# A Message to Britons Overseas

Here is an opportunity for our friends overseas to support British Industry and at the same time effect a definite monetary saving.

The shoes illustrated are specially selected because of their prices, which, after adding postage and duty, come out lower than they could be purchased for locally. The ABBOTT SERVICE is out to help Britons abroad, who, in their turn, will help BRITISH INDUSTRIES.

No. 466. SCOTCH GRAIN OXFORD.  
Here is an Oxford Shoe in Stout Grain waterproof upper. Solid leather for hard outdoor wear. The soles are red rubber, the "Royal and Ancient," and preferred by all Golfers and Walkers. Used on shoes three times the price of this

**21/-**

Postage 6d. Abroad 3/-.

No. 467. THE CAPLESS MOLIERE.  
Made in Stout Tan Willow Calf. Leather lined throughout. Seamless uppers. Semi-wide welts. The new 94% Crepe Sole, made by Harboro Rubber Company, England

**21/-**

Postage 6d. Abroad 3/-.

An Ideal Outdoor Shoe for Golf or Country Walks.

**C.O.D. WE SEND C.O.D. ALL OVER THE WORLD.** Through any Post Office, or if not in force, through any Bank. All Overseas Orders must be accompanied by a deposit of 5/- per pair always.

*"The Rock"*

## **Known all over the World**

Like the Rock of Gibraltar, ROK Roofing is known everywhere, because of its unvarying, solid British quality. Heat, cold, storm, all leave it unaffected for the asphalt-like surface of this flexible Bitumen Roofing is impervious to the action of the elements.

ROK is suitable for permanent buildings. With normal care, it will last a life-time. The cost of the material and labour is low compared with other kinds of roofing.

*is a "Red Hand" Roofing.*

Write for particulars of this and other "Red Hand" Roofings, Dampcourses and Felts to Mr. C. O. Stone

Ceylon	Jamaica	N. Rhodesia	Sierra Leone	Windward Is.
Cyprus	Kenya	North Borneo	Somaliland	Zanzibar

**THE BRITISH COLONIAL EMPIRE**, as distinct from the Dominions and India, has of late sprung into prominence. The potentialities of this vast but largely undeveloped asset, comprising nearly 40 separate countries spread across the globe, as an expanding market for British manufacturing industry are now recognised.

The *Crown Colonist* is the first journal to cover the Colonial Empire as a whole, making its special concern the trade and industry, public services and private enterprises, growth and economic development of all the Colonies, their relations with one another, with the rest of the Empire, and especially with Great Britain.

Collectively the Colonies form a great economic commonwealth spread across the world, united with strong bonds of loyalty to the mother country, and destined possibly to become of primary importance to the future of British manufacturing industry.

## **Regular Features**

*The destruction caused by White Ants was so great in this structure as to render it useless in an incredibly short time*

## ***The Penalty of not protecting Timber***

If the trifling cost of Solignum had been included in the cost of this structure, the destruction caused by White Ants could not have happened

The cost of Solignum is but a fraction of the value of the timber protected and to shirk this small expenditure is not economy but must lead to definite and heavy loss

# Fire!

**TYPE E. 902.**

1 quart size D.A. Pump, suitable for use on all Motor vehicles and Electrical Establishments. Kills a petrol fire and no risk of electrical shock.

**E. 320—Reversible Pattern.** In 1, 2 and 3 gallon capacities. Specially suited for export; formula for recharging being shown, thus avoiding sending to England for recharges.

**MAKERS of the WELL-KNOWN**

## Are your works & vehicles PROTECTED?

A SPARK may send your works up in flames *to-morrow* . . . an overheated exhaust pipe may reduce your most valuable lorry to blackened scrap *to-morrow*. Take time by the fore-lock *to-day*. Equip your works and vehicles with VALOR FIRE EXTINGUISHERS. There's no "perhaps" about VALOR EXTINGUISHERS—they act at once, *killing* the fire at the source, effectively and with little effort.

Easily handled and understood by anyone. Last for years and keep charges undamaged. ∴ Illustrated types are only representative of our large range.

Write for List 44/V5.

# CANADA LIFE PROGRESS! THROUGH THE YEARS

	In 1910	In 1920	In 1930
Surplus Earned ...	2253,390	2444,388	21,288,029
Payments to Policyholders and Beneficiaries ...	984,051	1,896,209	4,756,254
Total Premium Income ...	1,038,793	2,387,048	6,840,023
Total Income from all Sources ...	1,448,407	3,232,049	9,352,695
Assets for Protection of Policyholders ...	8,387,847	15,838,823	38,676,400
New Assurances Paid for ...	2,014,741	11,971,346	27,133,281
Total Business in Force ...	26,357,871	56,848,429	208,707,884

The Canada Life keeps well ahead of the times, and its policy of "fair and square dealing," which began with its founding 84 years ago, has been continuous. Never has this Company contested a claim on a technicality, and from its inception it has paid dividends to policyholders every year.

Even during the Great War and Influenza epidemic not one pound of reduction in dividends was necessary, and for the past thirty-one years its high dividends to policyholders have never been reduced but, on the other hand, have frequently been increased.

Notwithstanding the world-wide economic depression during 1930, the profit actually earned by the Company was the largest in its history of eighty-four years.

## CHAINS GRIP where tyres slip

**U**NDER all conditions of snow, ice, mud or sand, rubber alone cannot provide an efficient tractive grip—you must equip the wheels with genuine PARSONS Chains. Look for the word PARSONS on the coupling.

Parsons Chains grip on any surface—even on ice. No slipping; no skidding. Complete control always.

Easily carried, quickly put on and cannot damage spokes or rims.

Suitable for every type of tyre—solid or pneumatic, single or twin, for car or commercial vehicle.

# PARSONS CHAINS

**BRITISH MADE THROUGHOUT.**

*Insist on genuine PARSONS Chains and look for the word PARSONS on the coupling.*

## Miss Smallwood's Society for the Assistance of Ladies in Reduced Circumstances

*Under Royal Patronage.*

**T**HIS Society is solely engaged in tending for the needs of ladies who, through the ill-timed blows of "outrageous misfortune," are dependent on voluntary contributions and gifts.

Those who are helped in this way do not come within the orbit of other great charity organisations, and therefore the Society in carrying on a *specialised* charity appeals directly and strongly to your generosity.

The Society needs money for essential reasons—for rents—to buy coal—to relieve weak and frail ladies—to procure necessities for those capable of home employment—and to ensure an element of comfort for those who otherwise could not obtain it.

**Will you help in this very human cause? Every donation, large or small, is very gratefully accepted.**

If you cannot give a substantial amount now, will you kindly think of the Society when you make your will? **LEGACIES** help to lay a firm foundation, and an amount of £50, £100 or £500 would give very definite help in the future and do much for the benefit of the Society.

*Please make cheques payable to—*

**Miss SMALLWOOD'S SOCIETY, Lancaster House, Malvern.**

## PREFACE.

---

In view of the creation of a Dominions Office (see page xii), the title of the publication was in 1926 altered to "The Dominions Office and Colonial Office List."

In 1927 Part II. was rearranged so as to collect together the accounts of the territories with which each Office is concerned.

The present Edition has been carefully revised throughout, and the Editors desire to express their thanks for the ready co-operation and assistance which the Dominion and Colonial Governments and their colleagues in the two Offices have accorded to them. They will be glad to receive information of any errors or omissions which may be discovered, and to have notified to them any alterations or additions to be made in the biographical portion of the work. All communications should be addressed to "The Editors, Dominions Office and Colonial Office List, Colonial Office, Downing Street, London, S.W.1."

The Editors are greatly obliged to the different Dominion and Colonial Governments and to the British North Borneo Company for the assistance afforded to them in regard to maps. It must, however, be distinctly understood that the maps in this publication are supplied for the purpose of illustrating the Handbook, and are (like the book itself) *not official*.

Special efforts have continued to be made to increase in number and bring up to date the biographies in the Appendix, and the Editors wish to express their acknowledgments to the Governments and Officers who have supplied them with information on the point. They are specially indebted to Mr. Thomas Mulvey, K.C., Under-Secretary of State of Canada, to the Government of the Union of South Africa, and to Mr. Fred. Johns, of Adelaide, author of "Johns's Notable Australians," and of "Who's Who in Australia."

# CRUSHERS for bigger output

Solid Steel Jaw Crusher. Output 200 tons per hour.

BUILT ENTIRELY OF STEEL AND  
FITTED WITH JAWS AND OTHER  
WEARING PARTS OF HADFIELD'S  
PATENT

## MANGANESE STEEL

Trade Mark (Of which Hadfields are the  
inventors and sole makers)

The Supreme Material  
for resisting the abrasive action  
of stone and ore.

## MINING DRILL STEEL

HOLLOW AND SOLID  
WILL DRILL THE HARDEST ROCK  
REDUCE DRILLING COSTS  
HAS A HIGH CUTTING SPEED

### HOLLOW DRILL STEEL

In the hollow variety the hole is  
formed with a metal core, which  
ensures a perfectly smooth hole,  
accurately central and uniform in  
diameter throughout the length of  
the bar. This reduces the danger  
of the formation of fatigue cracks  
and corrosion pits to a minimum.

Many thousands of tons of the  
Hadfield Drill Steel have been sup-  
plied to Mines all over the world.

SHEFFIELD, England.

## THE COLONIAL OFFICE.

THE first separate organisation in this country for the central administration of Colonial affairs was a Committee of the Privy Council appointed by Order in Council of 4th July, 1660, "for the Plantations." On the 1st December, 1660, a separate "Council of Foreign Plantations" was created by Letters Patent.

It may be interesting to state that on the 28th of February, 1671, Evelyn's Diary records the author's appointment as a member of this Council, with "a salary of £500 per annum to encourage me."

In September, 1672, the Council was united, by Letters Patent, to the Council for Trade, and was henceforward known as the "Council of Trade and Plantations." It was suppressed on 21st December, 1677, and its functions, which had been much neglected, were transferred to the Privy Council. It was re-constituted in 1695, and continued to exist until 1782, at which date it consisted of eight Members of Parliament, who received a salary of £1,000 per annum each.

The affairs of India were placed under its charge in 1748, and remained so until the establishment of the Board of Control in 1784. From 1768 Colonial affairs have been dealt with by a Secretary of State.

The office of Secretary to the Sovereign dates at least from the reign of Henry III. There was one principal Secretary only (who was already called Secretary of State) down to 1539, when a second was appointed. From 1708 to 1746 a third Secretaryship existed dealing exclusively with Scotland.

In 1768, a Secretary of State for the American, or Colonial Department, was appointed, in addition to the two principal Secretaries of State then existing; but the commissions to the Council of Trade and Plantations continued to run as before. Both the Council and the New Secretary of State's Department were abolished in 1782 by Burke's Act, 22 Geo. III., cap. 82, on the loss of the United States.

By this Act power was given to delegate to a Committee of the Privy Council all the functions hitherto exercised by the Council of Trade and Plantations, and by Order in Council of 11th September, 1782, circular instructions were sent to the Governors of the Plantations to transmit their returns and accounts to the Privy Council. Pending the appointment of a Committee, Colonial affairs were dealt with by a subordinate branch of the Home Department, styled the Plantations Branch.

At this time the duties of the two principal Secretaries of State were divided into "Home" and "Foreign," the affairs of Ireland devolving on the Home Department, which now undertook also those of the Colonies.

In 1784, by Order in Council of 5th March, a "Committee for Trade and Foreign Plantations" was appointed in pursuance of Burke's Act, and the new body was reorganised and placed upon a definite footing by the subsequent Orders of 22nd August and 25th August, 1786. The business hitherto dealt with by the Plantations Branch of the Home Office was transferred to this Committee.

At its commencement in 1793, the affairs of the French War were managed by the Home Department, but in 1794 Mr. Dundas (afterwards Lord Melville), who was then the Secretary of State dealing with the Home affairs of the Department, was appointed "Secretary for War," and also nominally Secretary of State for the Colonies; but the Departments of War and the Colonies were not actually united until 1801, when Lord Hobart was created Secretary of State for the War and Colonial Department. From 1794 the "Committee for Trade and Foreign Plantations" (now known as the Board of Trade) gradually ceased to have any connection with Colonial affairs.

From the conclusion of the French War the attention of the Secretary of State was chiefly occupied with the Colonies, and he was usually designated as Secretary of

State for the Colonies. In 1854 a fourth principal Secretaryship of State was created the Secretaryship for War ; the affairs of the Colonies then became the entire charge of a principal Secretary of State. When the third Secretaryship of State was created in 1794 he had only one Under Secretary of State assigned to his Department. In 1806 an additional Under Secretary of State was appointed, thus bringing his establishment to the level of the Home and Foreign Departments. This appointment was discontinued after the end of the French War, but was re-established in 1825. This second Under Secretaryship is held by an officer changing with the Government. An Assistant Under Secretary of State was appointed in 1847, and a Legal Adviser was added in 1867, and made an Assistant Under Secretary of State in 1870. A third Assistant Under Secretary of State was appointed in 1874, and a fourth in 1898. A new post, that of Assistant to the Legal Assistant Under Secretary of State, was created in 1897. In 1907 the office was divided into the Dominions, Crown Colonies, and General Divisions, and a new post, that of Secretary to the Imperial Conference, was created. In 1911 a Legal Adviser was appointed in place of the Legal Assistant Under Secretary of State and the number of Assistant Under Secretaries of State was reduced to two. The number was again raised to three in 1916. On 1st March, 1921, when the affairs of the Middle East (including Iraq and Palestine) were placed under the Colonial Office, a fourth Assistant Under Secretary of State was appointed provisionally. The post was placed on the permanent establishment on 1st April, 1924. On the establishment of the Dominions Office in July, 1925, the number of Assistant Under Secretaries of State in the Colonial Office was reduced to three, but on the 1st October, 1930, a Personnel Division was created and a fourth Assistant Under Secretary of State was appointed to take charge of it.

During 1922, the arrangements for carrying out the Articles of Agreement for a Treaty between Great Britain and Ireland, signed on 6th December, 1921, were placed by H.M. Government under the supervision of the Secretary of State for the Colonies. Upon the passing of the Irish Free State Constitution Act 1922 (Session 2) (13 Geo. V ch. 1), and upon the exercise by the Government of Northern Ireland of the option provided in Article 12 of the Treaty, the Secretary of State for the Colonies became responsible for business relating to the Irish Free State and the Secretary of State for Home Affairs for business relating to Northern Ireland.

## THE DOMINIONS OFFICE.

In July, 1925, a new Secretaryship of State for Dominion Affairs was created, and as a result the Dominions Office was set up, to take over, from the Colonial Office, business connected with the self-governing Dominions (including the Irish Free State), the self-governing Colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate and Swaziland), and business relating to the Imperial Conference. One Minister combined the duties of the new post with those of Secretary of State for the Colonies until the 13th June, 1930, when Dominion Affairs became the entire charge of a principal Secretary of State.

The Staff of the Colonial Office and the Dominions Office is shown on pages xi to xix. The Permanent Under Secretaries of State, Assistant Under Secretaries of State, Legal Adviser, Chief Medical Adviser, Financial Adviser and Assistant Legal Adviser are Staff Officers selected by the Secretary of State. The rest of the Administrative and the Clerical Staff are recruited after competitive examinations held by the Civil Service Commissioners, from whom particulars can be obtained.

The present offices in Downing Street were occupied in 1875.

### SECRETARIES OF STATE WHO ADMINISTERED THE AFFAIRS OF THE COLONIES BETWEEN 1768 AND 1794.

1768, Feb. 27.	Wills Earl of Hillsborough (afterwards Marquis of Downshire).	1783, April 18.	Frederick Lord North (afterwards Earl of Guilford).

#### OVERSEA SETTLEMENT DEPARTMENT (CAIXTON HOUSE, TOTHILL STREET, S.W.1.)

His Majesty's Government have found it necessary to undertake closer responsibility than they have exercised in the past in connection with the movements of British subjects wishing to settle overseas within the Empire, or to emigrate to foreign countries. The Oversea Settlement Committee was appointed in order to assist them in carrying out the policy which is embodied in the Empire Settlement Act, 1922.

The Committee is composed as follows:—

*President*—The Secretary of State for Dominion Affairs.

*Chairman*—M. MacDonald, M.P.

R. S. Hudson, M.P. (Parly. Secy. to M. of Labour); Sir Donald MacLean, M.P.; J. Buchan, M.P.

*Vice-Chairman*—G. G. Whiskard, C.B., C.M.G. (Dominions Office).

G. E. Baker, C.B.E. (Board of Trade).

Mrs. Harrison Bell.

Viscount Burnham, C.H., G.C.M.G., T.D.

C. W. G. Eady, C.M.G. (Ministry of Labour).

E. R. Eddison C.M.G. (Department of Overseas Trade).

Col. E. J. L. Price, M.C. (War Office).

H. Evans.

Sir A. B. Lowry, C.B. (Ministry of Health).

F. Skevington (Treasury).

Dame Meriel Talbot, D.B.E.

Sir Charles J. Howell Thomas, K.C.B., C.M.G.,

(Ministry of Agriculture).

O. Thompson.

C. Turnor.

*Secretary*—G. F. Plant, C.B.E.

*Principals*—aE. T. Crutchley, C.B.E., W. Banks Amery, C.B.E.

*Assistant Principals*—yW. Garnett, J. R. S. MacLeod.

*Accountants*—W. G. Ives.

*Staff Officers*—W. E. Noall, M.B.E., E. A. Brett.

*Interviewer*—A. Bromwich.

*Intelligence Officer*—M. Jones, O.B.E.

*Clerical Officers*—(Higher Grade) R. H. Burt, R. L. Dixon, W. J. Daines, F. S. Wagland, E. A. Smith.

*Clerical Officers*—

G. F. W. C. Joyce.

R. H. Holding.

W. E. Embury.

J. Link.

H. A. Bennett.

W. G. Loltgen.

R. H. Ridley.

L. F. Steed.

W. H. Loeh.

G. C. Redfern.

*Permanent Non-Pensionable Clerk*—J. H. St. Leger.

*Supervisor of Copying*—Miss H. Stamp.

*5 Shorthand and Copying Typists.*

*3 Messengers.*

The Committee is constituted in accordance with the recommendations made by the Dominions Royal Commission (see Cd. 8462) and the Empire Settlement Committee (see Cd. 8672). The Staff of their office form a department of the Dominions Office, and their salaries are borne upon the Dominions Office vote.

a Seconded as Representative in the Commonwealth of Australia of H.M.G. in the United Kingdom.  
y Seconded for service with the Representative in the Commonwealth of Australia of H.M.G. in the United Kingdom.

# DOMINIONS OFFICE AND COLONIAL OFFICE LIST.

xv

## ESTABLISHMENT COMMON TO BOTH THE COLONIAL OFFICE AND THE DOMINIONS OFFICE.

The staff of the Colonial Office and Dominions Office below the rank of Assistant Under Secretary of State is interchangeable. The services of the Legal Staff, the Establishments Branch, the Library, the Accounts, Printing, Revision of Records, and Telegraph Sections are at the disposal of both the Colonial Office and the Dominions Office.

ZANZIBAR.—	<i>Auditor</i> —H. N. Lee, O.B.E.

## THE CROWN AGENTS FOR THE COLONIES.

The Crown Agents act as commercial and financial agents in the United Kingdom for the Governments of all the Colonies for the administration of which the Secretary of State for the Colonies is ultimately responsible. They receive instructions direct from the Colonial Governments, but are supervised by the Secretary of State. They do not act for the self-governing Dominions or for India, but in addition to the business of the Colonial Governments concerned they transact, with the sanction of the Secretary of State, that of the Governments of territories under the protection of His Majesty and territories in respect of which a mandate has been accepted by His Majesty, and of various public bodies such as Municipal and Harbour Authorities situated in the Colonies.

Down to 1833 each Colony appointed its own agent in London, but in that year all the agencies were consolidated into one office, with the exception of six agents, who continued for a time to represent some of the West Indian Governments.

The Crown Agents are appointed by the Secretary of State for the Colonies, who fixes their salaries and pensions, regulates the appointment and the salaries and pensions of their staff, and exercises a general control over the funds by which their office is maintained. They and their staff are thus in a similar position to Civil Servants.

The chief heads under which business is transacted by the Crown Agents are:—

- (1) The purchase, shipment, insurance, and, where necessary, inspection of stores of all kinds.
- (2) The detailed design of bridges, buildings and engineering structures of all kinds; the preparation of specifications for, and the examination and approval of, detailed designs of locomotives, rolling stock, cranes, etc.
- (3) The negotiation of contracts for the execution of large public works, and the preparation of designs and general advice relating to such works whether carried out by contract or departmentally, consulting engineers being employed in special cases.
- (4) The negotiation, issue, management (including management of sinking fund and payment of interest), and repayment of loans.
- (5) The investment of surplus balances, reserve and depreciation funds, and the like.
- (6) The payment of salaries to officers on leave of absence in this country, allotments and remittances to their families, and pensions to retired officers, widows, and orphans.
- (7) The selection and engagement of candidates for appointments of certain classes, mainly technical, and the provision of passages for these officers and for others returning from leave of absence.
- (8) Any commercial, financial, or other business which the Governments may require to be transacted in the United Kingdom.

The conditions under which the Crown Agents comply with requisitions from the Colonies for stores are laid down in Regulations for His Majesty's Colonial Services 349-352. Branch offices in the city deal with shipping arrangements and the transfer of Colonial stock.

The Crown Agents' office is financially self-supporting, commissions and fees for work done being charged to the Colonial Governments etc., which it serves at rates approved by the Secretary of State. No vote for the office therefore comes before the Imperial Parliament. The accounts kept by the Crown Agents on behalf of Colonial Governments are audited in accordance with the Regulations in force in the Colonies concerned. The accounts of the separate office funds are audited by the Comptroller and Auditor-General and are rendered to the Secretary of State.

**OFFICES:**—4 and 5, Millbank, Westminster, S.W.1; Stock Transfer Office, Lloyds Bank Buildings, Moorgate, E.C.2.

*Crown Agents for the Colonies.*

Sir Henry C. M. Lambert, K.C.M.G., C.B.

The following are the Colonies, Protectorates, etc., for which the Crown Agents transact business in this country :—

Bahamas.	Leeward Islands—
Barbados.	Antigua.
Basutoland.	Dominica.
Bechuanaland	Montserrat.
Protectorate.	St. Kitts-Nevis.
	Virgin Islands.
Bermuda.	Malta.
British Guiana.	Mauritius.
British Honduras.	Nigeria.
Brunei.	Northern Rhodesia.
Ceylon.	Nyasaland.
Cyprus.	Palestine.
Falkland Islands.	St. Helena.
Federated Malay	Seychelles.
States—	Sierra Leone.
Perak.	Somaliland
Selangor.	Protectorate
Negri Sembilan.	Straits Settlements.
Pahang.	Swaziland.
Kedah	Tanganyika Territory.
Kelantan	Transjordan.
Perlis	Trinidad and Tobago.
Johore	Turks Island.
Trengganu	Uganda Protectorate.
	Western Pacific (High Commission).
	British Solomon Is.
Fiji.	Gilbert and Ellice Is.
Gambia.	New Hebrides.
Gibraltar.	Tonga.
Gold Coast.	Windward Islands—
Hong Kong.	Grenada.
Iraq.	St. Lucia.
Jamaica.	St. Vincent.
Kenya.	Zanzibar.

The Crown Agents also act as Agents for the following Authorities :—The Royal West African Frontier Force, and the King's African Rifles, the Kenya and Uganda Railway and Harbours Administration, the Gibraltar City Council, the Kingston and St. Andrew Corporation, Jamaica, the Lagos, Accra, Sekondi and Cape Coast Town Councils, the Lagos Executive Development Board, the Kumasi Public Health Board, the Singapore Harbour Board and the Penang Harbour Board. They act also as Managers of the East and West African Widows' and Orphans' Pension Schemes, and as agents for the sale of Colonial Government Publications.

## UNITED KINGDOM REPRESENTATIVES IN THE DOMINIONS.

## JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

Office:—Downing Street, Whitehall, S.W.1.

The Judicial Committee of the Privy Council consists of the Lord Chancellor, Lord President, ex-Lords President, the Lords of Appeal in Ordinary,\* and such other members of the Privy Council as shall from time to time hold or have held "High Judicial Office" within the meaning of the Appellate Jurisdiction Acts, 1876 and 1887. Among the last are included Viscount Hailsham, Lord Buckmaster, G.C.V.O., Lord Darling, Lord Warrington of Clyffe and Lord Salvesen. Sir John Wallis is a member by virtue of section 30 of the Judicial Committee Act, 1833. Sir George Rivers Lowndes, K.C.S.I., and Sir Dinshah Fardunji Mulla, C.I.E., are members by virtue of section 1 of the Appellate Jurisdiction Act, 1929. By virtue of the Judicial Committee Amendment Act, 1895, as amended by the Appellate Jurisdiction Acts, 1908 and 1913, and the Administration of Justice Act, 1928, the following Judges from the Dominions beyond the Seas are members:—Sir Charles Fitzpatrick, G.C.M.G. (Canada), Sir James Rose Innes, K.C.M.G. (South Africa), Mr. Justice Lyman Poore Duff (Canada-Supreme Court), Sir Adrian Knox, K.C.M.G. (Australia), Sir Isaac Alfred Isaacs, K.C.M.G. (Australia), Chief Justice Francis Alexander Anglin (Canada-Supreme Court), Chief Justice Sir William Mulock, K.C.M.G. (Ontario), Sir Lancelot Sanderson (Bengal), and Chief Justice Jacob de Villiers (South Africa-Supreme Court), Sir Michael Myers, K.C.M.G. (New Zealand).

*Registrar of the Privy Council and Registrar of Ecclesiastical Causes* } Sir Charles Neish, K.B.E., C.B., Barrister-at-Law.  
*Chief Clerk,* W. Reeve Wallace, C.B.E.  
*Second Clerk,* D. G. Lys.

\* Viscount Dunedin, G.C.V.O., Lord Blanesburgh, G.B.E., Lord Atkin, Lord Tomlin, Lord Thankerton, Lord Russell of Killowen, Lord Macmillan.

## COLONIAL ADVISORY MEDICAL COMMITTEE.

In October, 1909, the Secretary of State for the Colonies, on the recommendation of a Departmental Committee of Enquiry, appointed a Committee (the Advisory Medical and Sanitary Committee for Tropical Africa) to advise him on medical and sanitary questions connected with Tropical Africa.

In July, 1922, the functions of the Committee were extended to cover similar questions connected with all Dependencies, and the title "Colonial Advisory Medical and Sanitary Committee" was adopted. In August, 1926, Dr. A. T. Stanton was appointed Chief Medical Adviser to the Secretary of State and ex-officio Chairman of the Advisory Committee.

On 1st January, 1931, the Committee took over the functions of the Colonial Medical Research Committee (described in previous issues of this Volume) which was dissolved on 31st December 1930; and its title was changed to the Colonial Advisory Medical Committee.

One of the duties of the Committee is to advise the Secretary of State upon the administration of the Tropical Diseases Fund. The income of this Fund, amounting to about £1,500 a year, mainly contributed by Colonial Governments, is directed to assisting investigation and research into the various diseases prevalent in the tropical colonies of the Empire.

The present Membership of the Committee is as follows:—

(*Chairman*)—A. T. Stanton, C.M.G., M.D., F.R.C.P., D.P.H.

Sir William T. Prout, K.C.M.G., O.B.E., M.B., C.M.

Major-General Sir Wilfred W. O. Beveridge, K.B.E., C.B., D.S.O., M.B., D.P.H., K.H.P.

Lieut.-Colonel S. P. James, M.D., F.R.S., I.M.S. (retd.).

A. E. Horn, C.M.G., B.Sc., M.D., M.R.C.P.

W. Fletcher, M.D., M.R.C.P.

Prof. W. W. Jameson, M.D., F.R.C.P., D.P.H.

Mrs. M. Blacklock, B.Sc., M.B.

A. G. Bagshawe, C.M.G., M.B.

A. H. Poynton, *Secretary*.

A. J. R. O'Brien, C.M.G., M.C., M.B., D.P.H., *Medical Secretary*.

## COLONIAL SURVEY COMMITTEE.

The Colonial Survey Committee is an advisory Committee appointed by the Secretary of State for the Colonies to advise him in matters affecting the survey of British Dependencies with a view to securing the rapid, economical, and methodical prosecution of accurate surveys where these are required, and rendering the results available as speedily as possible for use by the Home Government, the Colonial Governments, and the public. It was constituted in August, 1905, and its scope was extended in 1912 to include geological surveys in British Dependencies.

The present members are:—

Sir Cecil Bottomley, K.C.M.G., C.B., O.B.E., Colonial Office (*Chairman*); Vice-Admiral H. P. Douglas, C.B., C.M.G. (Hydrographer of the Navy); Brigadier E. M. Jack, C.B., C.M.G., D.S.O., (formerly Director-General of the Ordnance Survey); Brigadier H. St. J. L. Winterbotham, C.M.G., D.S.O., A.D.C., (Director-General of the Ordnance Survey); Col. M. N. McLeod, D.S.O. M.C. (General Staff, War Office); J. F. N. Green (Colonial Office), (*Chairman of the Geological Section*); Sir J. S. Flett, K.B.E., D.Sc., LL.D., F.R.S. (Director of the Geological Survey of Great Britain); Sir A. E. Kitson, Kt., C.M.G., C.B.E., C. W. Hobley, C.M.G., A.M.I.C.E., with Capt. G. T. McCaw, O.B.E. (War Office), and S. E. V. Luke (Colonial Office) as *Joint Secretaries*.

## THE ADVISORY COMMITTEE ON EDUCATION IN THE COLONIES.

This committee was appointed on the 1st of January, 1928, to advise the Secretary of State on any matters of education in the British Dependencies which he may from time to time refer to it, and to assist him in advancing the progress of education in those territories. It is constituted as follows:—

The Parliamentary Under Secretary of State (*Chairman*).

Sir John E. Shuckburgh, K.C.M.G., C.B. (*Deputy-Chairman*).

Miss S. A. Burstall, J.P.

Major A. G. Church, D.S.O., M.C., M.P.

Sir James Currie, K.B.E., C.M.G.

The Most Rev. Archbishop Goodier.

J. F. Horrabin.

The Rt. Hon. Lord Lugard, G.C.M.G., C.B., D.S.O.

F. O. Mann, O.B.E.

Sir George Maxwell, K.B.E., C.M.G.

A. I. Mayhew, C.I.E.

W. H. McLean, M.P., Ph.D.

Sir Percy Nunn, D.Sc.

J. H. Oldham.

K. W. M. Pickthorn.

Sir Michael Sadler, K.C.S.I., C.B.

A. A. Somerville, M.P., J.P.

H. Vischer, C.B.E.

Miss A. W. Whitelaw.

Mr. Vischer and Mr. Mayhew are Joint Secretaries of the Committee and receive salaries from the funds contributed by Colonial Governments. The official Secretary is Mr. A. H. Poynton.

## THE AFRICAN LIQUOR TRAFFIC CONTROL COMMITTEE.

This Committee was appointed in 1924 to consider and advise upon

- (1) All applications for the placing of brands of patent-still gin on the Schedule of approved brands which will be admitted into the British West African Colonies and Protectorates.
- (2) Any question which may arise as to the retention on the Schedule of any brand which has been placed on it.

It is constituted as follows:—

*Chairman*—G. Hazlerigg, O.B.E.  
Lt.-Col. C. A. Gordon Clark, C.M.G., D.S.O.  
R. B. Miller.

M. F. Nicholson.  
A. J. H. Gauge, F.I.C.  
J. M. Connell.

*Secretary*—R. A. Thorne (Colonial Office).

## COLONIAL RESEARCH COMMITTEE.

The Colonial Research Committee was appointed in 1919 to administer a Parliamentary grant for the assistance of the poorer Colonies in undertaking research work upon matters of economic importance.

The research work so far undertaken includes the investigation of forest problems in British Honduras, sponge cultivation in the Bahamas, British Honduras and Cyprus, geological and mineralogical work in the Leeward Islands, Windward Islands, British Honduras, Nyassaland and Rennell Island (Western Pacific), entomological work in Sierra Leone, an enquiry into cultural methods in Seychelles, and banana culture experiments at the Imperial College of Tropical Agriculture, Trinidad.

The Committee is composed as follows:—

Sir Halford Mackinder, (*Chairman*).  
Sir John E. Shuckburgh, K.C.M.G., C.B.  
Sir Frank Heath, K.C.B.

J. F. N. Green.  
E. R. Darnley.

*Secretary*—J. B. Williams (Colonial Office).

## DISCOVERY COMMITTEE.

In March, 1923, the Secretary of State for the Colonies appointed an Executive Committee to control, subject to his instructions, the investigations, mainly connected with whaling, recommended by the Interdepartmental Committee on Research and Development in the Dependencies of the Falkland Islands (see Parliamentary Paper, Cmd. 657). For the purposes of the investigations, the late Captain R. Scott's Ship "Discovery," was acquired on behalf of the Colonial Government, and, after being refitted to meet the requirements of the work, was placed in commission in 1925. In the same year a Marine Biological Station was established at Grytviken, South Georgia. Another ship, of the Whale Catcher type, which was named "William Scoresby," was built for the Committee and placed in commission in 1926. In July, 1929, the "Discovery," was chartered for the purposes of the British, Australian, New Zealand Antarctic Research Expedition of 1929—31, and in her place a third ship, named "Discovery II," which was specially constructed for research work was built for the Committee and commissioned on the 14th December, 1929.

The Committee is composed as follows:—

E. R. Darnley, Colonial Office (*Chairman*).  
Sir Sidney F. Harmer, K.B.E., D.Sc., F.R.S., British Museum (Natural History).  
(*Vice-Chairman*).

A. L. Ayton Colonial Office (*Finance Member*).

J. O. Borley, O.B.E. (*Fisheries Adviser*).

Vice-Admiral H. P. Douglas, C.B., C.M.G., R.N., Admiralty.

Sir J. Fortescue Flannery, Bart., M.I.C.E. (*Consulting Naval Architect*).

H. G. Maurice, C.B., Ministry of Agriculture and Fisheries.

J. M. Wordie, F.R.S.E., Royal Geographical Society.

F. H. Harper, M.B.E. (*Secretary*).

H. Horsburgh, A.M.I.C.E. (*Technical Officer*).

E. A. Nattrias (*Shipping Officer*).

E. W. A. Scarlett (*Accountant*).

## IMPERIAL ECONOMIC COMMITTEE.

This Committee was established in 1925, following on proposals of the Imperial Economic Conference 1923, for the purpose of considering the possibility of improving the methods of preparing for market and marketing within the United Kingdom the products of the Overseas parts of the Empire with a view to increasing the consumption of such products in the United Kingdom in preference to imports from foreign countries, and to promote the interests both of producers and consumers.

The Imperial Conference of 1926 widened the reference to the Committee by instructing it to put forward for the consideration of the various Governments concerned (a) a list of raw materials for possible further marketing enquiries, and (b) suggestions for the preparation and circulation of brief preliminary surveys of any branch of Empire trade and marketing, such preliminary surveys, if the Governments concerned so desire, to be followed up by further enquiries.

The Imperial Conference of 1930 further widened the reference to the Committee in the following terms of reference:—

- (1) to investigate the marketing of Empire foodstuffs in the United Kingdom.
- (2) to undertake inquiries into the production for export and the marketing in various parts of the world of raw materials of the Empire.
- (3) to prepare, at the instance of the Governments of the Commonwealth, surveys of any branch of Empire trade and marketing.
- (4) to carry out certain investigations adopted by the Imperial Conference 1930.
- (5) to facilitate conferences among those engaged in particular industries in various parts of the Empire.
- (6) to examine and report on any economic question which the Governments of the Empire may agree to refer to the Committee.

The Committee has published sixteen reports:—

The first a general report, and reports on meat, fruit, dairy produce, fish, poultry and eggs, honey, functions and work of the Committee, tobacco, timber, agricultural machinery, pigs and pig products, the trade of the British Empire, rubber manufactured goods, hides and skins, a progress report (1930), tea and coffee.

Sir Sydney Chapman, K.C.B., C.B.G. (*Chairman*), Sir Thomas Allen, Representatives of United Kingdom.

H. Watson, Mr. W. A. Wilson, Canada.

F. L. McDougall, C.M.G., Mr. C. L. Baillieu, C.M.G., O.B.E., Australia.

Sir Thomas M. Wilford, K.C.M.G., K.C., *High Commissioner*, R. S. Forsyth, New Zealand.

J. Dimond (one seat vacant), Union of South Africa.

J. W. Dulanty, C.B., C.B.E., *High Commissioner* (one seat vacant), Irish Free State.

W. C. Job (one seat vacant), Newfoundland.

Sir Bhupendra Nath Mitra, K.C.S.I., K.C.I.E., C.B.E., *High Commissioner*, Sir Campbell

Rhodes, G.B.E., H. A. F. Lindsay, C.I.E., C.B.E. (alternate to Sir B. N. Mitra), India.

The Hon. J. W. Downie, C.M.G., *High Commissioner*, Southern Rhodesia.

Sir John Shuckburgh, K.C.M.G., C.B., Mr. J. H. Batty, Colonies and Protectorates.

The following are advisers to the British Representatives:—

A. W. Street, C.I.E., M.C., Ministry of Agriculture and Fisheries.

Sir Robert Greig, M.C., LL.D., Department of Agriculture, Scotland.

G. Scott Robertson, D.Sc., Department of Agriculture, Northern Ireland.

*Secretary*—Sir David Chadwick, C.S.I., C.I.E.

*Assistants*—T. L. Catling, M.C., L. Bradgate, L. Croome, W. L. Loveday.

*Address*—2, Queen Anne's Gate Buildings, Dartmouth Street, S.W.1.

*Telephone*—Victoria 3452.

#### EMPIRE MARKETING BOARD.

The Board was set up in 1926, with the Secretary of State for Dominion Affairs as Chairman to assist him in the administration of the sums of money to be annually granted in 1926 and successive years, to assist in furthering the marketing of Empire Produce in this Country, and to foster the interests of Inter-Imperial Trade generally.

The Board carries out its functions with the aid of various committees dealing especially with such aspects of the subject as research, publicity, and marketing. In addition to representatives of the Home Government, there are also on the Board representatives of the Dominions, India, the Colonies and Protectorates.

The Staff of the Board is as follows:—

*Secretary*—Sir Stephen G. Tallents, K.C.M.G., C.B., C.B.E.

*Assistant Secretary*—E. M. H. Lloyd.

*Principals*—W. P. Hildred, J. Wilkie.

*Senior Staff Officer*—L. F. C. Maclean, O.B.E.

*Staff Officers*—A. H. Clarke, P. Grant, B. King, W. E. Knox.

*Clerks (Higher Grade)*—L. C. Nash, H. J. Oram, R. F. Jenkins, E. C. Atkins, P. J. Eaton, S. J. Fletcher, T. F. Skilton.

*Executive Officer*—I. Graul.

*Clerks*—F. V. F. Bennett, W. C. Hood, G. W. Rumble, J. Sill, P. M. Williams, L. L. Jones, L. T. Crofts, T. S. Horgan, A. J. C. Price, E. J. Rae, R. St. John, G. C. Gilchrist, F. W. Sidwell, G. H. Wake, F. Hancock, W. E. Lester, E. T. J. Salter, C. Thomas, R. A. Dunn, H. H. R. Dolling, H. J. Palmer, R. F. Rudge, J. W. Wallis, L. N. Hutchings, C. F. Richardson, B. H. Woollacott, A. W. E. Moore, F. Kitteringham, A. G. Olley, G. A. Johnson, Miss A. C. Bates, Miss I. Ross.

*Superintendent of Typists*—Miss D. E. White.

*Secretary Publicity Committee*—G. Huxley.\*

*Cinematograph Officer*—J. Grierson.\*

*Economic Assistant*—A. Cairns.\*

*Temporary Assistants*—C. H. B. Kenyon, M. E. Bentley, J. R. H. Shaul, A. C. Mason, G. S. Dunnett, C. R. Furlong, B. Marriott, Miss E. Grant, M. J. M. Dewar, D. Maitland, W. J. Clarke, W. Bassett-Cooper, E. Hodges, H. E. Farwell, C. Kaul, F. G. Mout, G. N. Waldegrave, Miss B. Lawrence, Miss N. M. Rodger, Miss A. F. Parry.

*Temporary Clerks*—M. T. Corrigan, E. P. Murrell, J. Herbert, J. M. Johnson, G. E. Rudland, G. H. Irwin, P. V. T. Jones.

\* Unestablished.

The address of the Board is 2, Queen Anne's Gate Buildings, S.W.1.

Telephone—Victoria 3452.

## COLONIAL ADVISORY COUNCIL OF AGRICULTURE AND ANIMAL HEALTH.

The Colonial Advisory Council of Agriculture and Animal Health was constituted in March, 1929, in accordance with the recommendations of the Committee on the organisation of a Colonial Agricultural Service (Cmd. 3049) and of the Colonial Veterinary Services Committee (Cmd. 3261). No specific terms of reference were given to the Council, but it was decided that its functions should be generally those which were recommended by the two Committees referred to above, i.e., to advise on the following matters :—

- (a) The supply and training of specialist and field officers for the Colonial Agricultural and Veterinary Services, in conjunction with the recruiting authorities of the Colonial Office;
- (b) The establishment of Central Research Stations and the general guidance of their work;
- (c) The efficiency and general well-being of the proposed unified Colonial Agricultural and Veterinary Services, including such advice upon the Agricultural and Veterinary Services as the Secretary of State or Colonial Governments may desire;
- (d) The collection, collation and distribution of scientific, agricultural and veterinary information in fields not covered by other agencies;
- (e) Main agricultural and veterinary research policy in the Colonial Empire;
- (f) The representation and collaboration of the Colonial Empire as a unit in Imperial schemes of research and in Imperial Bureaux;
- (g) The general progress of agriculture, food production and animal husbandry in the Colonial Empire.

The Council is composed as follows :

Sir Robert Hamilton, M.P., Parliamentary Under-Secretary of State for the Colonies (*Chairman*).  
 F. A. Stockdale, C.B.E., Agricultural Adviser to the Secretary of State for the Colonies (*Vice-Chairman*).  
 R. E. Montgomery, M.R.C.V.S., Adviser on Animal Health to the Secretary of State for the Colonies.  
 W. H. Andrews, D.Sc., M.R.C.V.S.  
 E. J. Butler, C.I.E., D.Sc., F.R.S.  
 Professor F. L. Engledow.  
 R. Forgan, M.C.,  
 Lieut.-General Sir William Furse, K.C.B., D.S.O.  
 Sir Arthur W. Hill, K.C.M.G., Sc.D., F.R.S.  
 Sir Guy A. K. Marshall, C.M.G., D.Sc. F.R.S.  
 J. B. Orr, D.S.O., M.C., D.Sc.  
 Sir John Russell, D.Sc., F.R.S.  
 A. T. Stanton, C.M.G., M.D.  
 R. V. Vernon, C.B.  
 J. G. Hibbert, M.C., Colonial Office (*Secretary*).

## COLONIAL DEVELOPMENT ADVISORY COMMITTEE.

In August, 1929, the Secretary of State for the Colonies, with the approval of the Treasury, appointed the Colonial Development Advisory Committee, with the following terms of reference :

"In accordance with Section 1 of the Colonial Development Act, 1929, to consider and report on, in the manner to be prescribed in the regulations to be made by the Secretary of State under Section 1 (9) of the Act, applications for assistance from the Colonial Development Fund, in furtherance of schemes likely to aid and develop agriculture and industry in the Colonies, Protectorates and Mandated Territories, and thereby promote commerce with, or industry in, the United Kingdom by any of the means specified in Section 1 (1) of the Act.

The composition of the Committee is as follows :—

Sir Basil Blackett, K.C.B., K.C.S.I. (*Chairman*).  
 Sir Edward Davson, Bt.  
 Sir John Eaglesome, K.C.M.G.  
 R. H. Jackson.  
 Sir Felix Pole.  
 A. Rae Smith, O.B.E., with L. B. Freeston, O.B.E., of the Colonial Office, as *Secretary*.

## WEST AFRICAN CURRENCY BOARD.

The West African Currency Board was appointed by the Secretary of State for the Colonies in November, 1912, on the recommendation of the West African Currency Committee of 1911-1912, to provide for and to control the supply of currency to the British West African Colonies and Protectorates.

The Board is represented in West Africa by Currency Officers at Lagos, Accra, Freetown, and Bathurst, who supervise and control the work performed for the Board by the branches of the Bank of British West Africa Ltd., which acts as the Board's Agent. The present Currency Officers are the Treasurers of Nigeria, the Gold Coast, and Sierra Leone, and the Receiver-General of the Gambia.

The Board is at present constituted as follows :—Sir W. H. Mercer, K.C.M.G. (*Chairman*), J. E. W. Flood; Sir R. Roy Wilson; *Secretary*, W. A. F. Wickhart; *Assistant Secretary*, W. A. Templeman; *Accountant*, J. Goldberg.

The address of the Board is 4, Millbank, Westminster, S.W.1.

## EAST AFRICAN CURRENCY BOARD.

The East African Currency Board was appointed by the Secretary of State for the Colonies in 1920 to provide for and to control the supply of currency to Kenya and Uganda. Its functions were subsequently extended to the Tanganyika Territory.

The Board is represented in East Africa by Currency Officers at Nairobi (for Kenya), Entebbe (for Uganda) and Dar-es-Salaam (for the Tanganyika Territory). The present currency officers are the Treasurers of Kenya, Uganda and the Tanganyika Territory.

The members of the Board are :—

Sir William H. Mercer, K.C.M.G. (*Chairman*).

Sir W. Cecil Bottomley, K.C.M.G., C.B., O.B.E.

P. H. Ezechiel, C.M.G.

*Secretary*, A. W. Abbott.

The address of the Board is 4, Millbank, London, S.W. 1.

## PALESTINE CURRENCY BOARD.

The Palestine Currency Board was appointed by the Secretary of State for the Colonies in 1926 to provide for and to control the supply of currency to Palestine.

The Board is represented in Palestine by a Currency Officer at Jerusalem. The present Currency Officer is the Treasurer of Palestine.

The members of the Board are :—

P. H. Ezechiel, C.M.G. (*Chairman*).

R. V. Vernon, C.B.

Sir John Caulett.

*Secretary*—J. H. Brown.

The address of the Board is 4, Millbank, Westminster, S.W. 1.

## BUREAU OF HYGIENE AND TROPICAL DISEASES.

His Majesty's Government have established in London a Bureau for the collection and general distribution of information with regard to hygiene and tropical diseases. Accommodation has been provided by the London School of Hygiene and Tropical Medicine, at Keppel Street, Gower Street, London, W.C.1. The Bureau is partly maintained from Imperial funds, and from funds provided by various Dominion, Colonial and Protectorate Governments.

The Bureau is under the general control and direction of an Honorary Managing Committee, appointed by and responsible to the Secretary of State for the Colonies. The Committee is composed of the following members :—

A. T. Stanton, C.M.G., M.D., F.R.C.P. (Chief Medical Adviser to the Secretary of State), *Chairman*.

Sir Walter M. Fletcher, K.B.E., C.B., M.D., Sc.D., F.R.S. (representing the Medical Research Council).

Sir John McFadyean, M.R.C.V.S.

G. A. Wallinger, (representing the Foreign Office and the Sudan Government).

A. E. Horn, C.M.G., M.D., B.Sc., M.R.C.P.

T. Carnwath, D.S.O., M.B. (representing the Ministry of Health).

W. H. Andrews, D.Sc., M.R.C.V.S. (representing the Ministry of Agriculture and Fisheries).

Professor J. C. G. Ledingham, C.M.G., F.R.S.

Professor W. W. Jameson, M.D., F.R.C.P.

J. J. Paskin, M.C., of the Colonial Office.

J. B. Sidebotham, of the Colonial Office, as *Secretary*.

The Bureau is administered by a salaried Director and Assistant Director, who are assisted by a staff of sectional Editors. Its main function is to collect from all sources information regarding hygiene and tropical diseases; to collate, condense, and, where necessary translate, this information, and to distribute it as widely and quickly as possible among those who are engaged in combating these diseases. This information is made available by means of the publications of the Bureau, viz., the Tropical Diseases Bulletin and the Bulletin of Hygiene both of which are issued monthly. The Bureau possesses a valuable Library which is now combined with that of the London School of Hygiene and Tropical Medicine.

The Director of the Bureau is A. G. Bagshawe, C.M.G., M.B., late of the Uganda Medical Staff.

## IMPERIAL INSTITUTE OF ENTOMOLOGY.

The Institute was founded at the beginning of 1913 for the purpose of encouraging and co-ordinating entomological work throughout the Empire in relation both to human and animal diseases and to agriculture. It was known as the Imperial Bureau of Entomology until 1930, when the name was changed to Imperial Institute of Entomology. The Head Office is at the British Museum (Natural History), Cromwell Road, S.W., and the Publication Office at 41, Queen's Gate, South Kensington, S.W. 7. Sir Guy A. K. Marshall, O.M.G., D.Sc., F.R.S., is the Director of the Institute, and Dr. S. A. Neave and Dr. W. R. Thompson, the Assistant Directors. There is an Honorary Committee of Management composed as follows :—

The Rt. Hon. Earl Buxton, G.C.M.G. (*Chairman*); W. Horner Andrews, D.Sc., M.R.C.V.S.; Major E. E. Austen, D.S.O.; Dr. A. G. Bagshawe, C.M.G.; C. E. Baines;

The Hon. Sir Henry Ranwell, K.C.M.G.; Dr. P. A. Buxton, M.R.C.S.; J. C. F. Fryer; Sir Sidney Harmer, K.B.E., F.R.S.; Dr. R. S. MacDougall; Sir John McFadyean, M.R.C.V.S.; Sir Daniel Morris, K.C.M.G.; Professor R. Newstead, F.R.S.; Professor G. H. F. Nuttall, F.R.S.; M. D. Peterson; Professor E. B. Poulton, F.R.S.; Lieut.-Col. Sir David Prain, C.M.G., C.I.E., F.R.S.; Sir Herbert Read, K.C.M.G., C.B., G.F. Seel; A. T. Stanton, C.M.G., M.D., F.R.C.P.; F. A. Stockdale, C.B.E.; C. Warburton; with S. Caine (of the Colonial Office), as *Secretary*.

The Chief Entomologists of the Governments of the Dominions are *ex officio* members of the Committee.

The Institute absorbed the Entomological Research Committee appointed in June, 1909, by the Marquess of Crewe, when Secretary of State for the Colonies, with the object of furthering the study of economic entomology particularly in the British Tropical African Colonies and Protectorates.

Contributions for the upkeep of the Institute, which amount to approximately £12,000 per annum, are made by H.M.'s Governments in the United Kingdom and in the Dominions, the Government of India, the Governments of the Colonies, Protectorates, etc., and of the Sudan, and the British North Borneo Company.

The Institute publishes a quarterly journal entitled "The Bulletin of Entomological Research," which includes original papers on entomological subjects; and a monthly journal entitled "The Review of Applied Entomology" (in two parts "Medical and Veterinary" and "Agricultural") summarizing all current entomological literature bearing on injurious insects. The identification of insects is also undertaken on a large scale for official entomologists in all parts of the Empire, and information and advice are given on any matters concerning injurious insects.

In 1927 a Laboratory for breeding beneficial parasites for export to Oversea Governments was opened at Farnham House, Farnham Royal, Buckinghamshire. Dr. W. R. Thompson, an Assistant Director of the Institute, is Superintendent of the Parasite Laboratory.

#### IMPERIAL MYCOLOGICAL INSTITUTE.

The Institute (which was formerly known as the Imperial Bureau of Mycology), was founded in 1920. It was the outcome of a proposal unanimously adopted by the Imperial War Conference in 1918, that a central organisation should be established for the encouragement and co-ordination of work throughout the Empire on the diseases of plants caused by fungi.

The Institute is situated at Ferry Lane; Kew (Telephone, Richmond 0603), and is in charge of the Director, Dr. E. J. Butler, C.M.G., C.I.E., F.R.S., late Imperial Mycologist, Director of the Research Institute, Pusa, and Agricultural Adviser to the Government of India.

There is a Committee of Management composed as follows:—Earl Buxton, G.C.M.G. (*Chairman*); Professor V. H. Blackman, F.R.S., Professor F. O. Bower, F.R.S., F. T. Brooks, A. D. Cotton, F.L.S., H. R. Cowell, Professor H. H. Dixon, F.R.S., Professor Sir J. B. Farmer, F.R.S., Dr. Sir Arthur W. Hill, K.C.M.G., F.R.S., Professor W. H. Lang, F.R.S., Sir Daniel Morris, K.C.M.G., Dr. P. A. Murphy, M. D. Peterson, Dr. G. H. Pethybridge, B.Sc., Lieut.-Col. Sir David Prain, C.M.G., C.I.E., F.R.S., J. Ramsbottom, O.B.E., M.A., Dr. A. B. Rendle, F.R.S., H. N. Ridley, C.M.G., F.R.S., F. A. Stockdale, C.B.E., Professor R. A. Robertson, F.R.S.E., Sir E. J. Russell, F.R.S., and Professor A. G. Tansley, M.A., D.Sc., with T. L. Rowan (of the Colonial Office), as acting *Secretary*.

The funds of the Institute are provided from the various self-governing Dominions, India and the Sudan, and the non-self-governing Colonies, Protectorates and mandated territories. The Ministry of Agriculture and Fisheries, the Scottish Board of Agriculture and the Ministry of Agriculture, N. Ireland, also make annual contributions. Its work on the diseases of plants caused by fungi is broadly on the same lines as that of the Imperial Institute of Entomology in regard to insects. Its primary function is to assist economic mycologists in the overseas parts of the Empire by the accumulation and distribution of information on all matters connected with plant diseases and by the identification of specimens. The former purpose is fulfilled by the publication of a monthly *Review*, the establishment of a lending library, and the preparation of translations and summaries of existing knowledge. In addition to the identification of specimens, critical studies of parasitic fungi are carried out. Accommodation is provided for overseas workers who may wish to prosecute their researches while in England. With the co-operation of the Empire Marketing Board, a new and commodious building has been built on a site in the Royal Botanic Gardens, Kew; and the Institute entered into occupation of this in July, 1930. A first Imperial Mycological Conference, organised by the Institute and attended by a large number of home and overseas mycologists was held in 1924, and a similar Conference, which was widely attended, was held in September, 1929.

#### STANDING CONFERENCE FOR THE CO-ORDINATION OF SCIENTIFIC RESEARCH.

This Conference was appointed 1922 and consists of representatives of the Development Commission, Medical Research Council and Department of Scientific and Industrial Research with the Biological Secretary of the Royal Society. It meets three or four times a year, and has for its primary purpose the discussion and co-ordination of "borderline" research questions in the fields of

agricultural, fishery, medical and industrial research which are the respective fields of the three principal bodies constituting the Conference. Since the Imperial Conference, 1926, the High Commissioners of the Dominions, and the Colonial and India Offices have been invited to send representatives.

*Joint Secretaries.* { E. H. E. Havelock, Development Commission, 6a, Dean's Yard, S.W.1.  
Dr. F. H. K. Green, Medical Research Council, 38, Old Queen Street, S.W.1.  
G. R. D. Hogg, Department of Scientific and Industrial Research, 16, Old Queen Street, S.W.1.

### IMPERIAL SHIPPING COMMITTEE.

Great George Street. S.W. 1.

This Committee was appointed in June, 1920, in pursuance of a resolution of the Imperial War Conference of 1918. The Committee derives its authority from, and is responsible to, the Governments represented at the Imperial Conference. It consists of 15 members, of whom 9 are nominated by the Governments of the various parts of the Empire, 5 are "persons experienced in shipping and commerce," and 1 is representative of civil aviation, under an independent chairman.

The terms of reference, as amended by the Imperial Conference of 1930, are :—

- (i) To enquire into complaints from persons and bodies interested with regard to ocean freights, facilities and conditions in the inter-Imperial trade, or questions of a similar nature referred to them by any of the nominating authorities, and to report their conclusions to the Governments concerned.
- (ii) To survey the facilities for maritime transport on such routes as appear to them to be necessary for trade within the Empire, and to make recommendations to the proper authority for the co-ordination and improvement of such facilities with regard to the type, size and speed of ships, depth of water in docks and channels, construction of harbour works, and similar matters; and in doing so to take into account facilities for air transport on the routes in question.

*Chairman*, Rt. Hon. Sir Halford Mackinder,

*Secretary*, R. M. Nowell.

### IMPERIAL COMMUNICATIONS ADVISORY COMMITTEE.

The Imperial Communications Advisory Committee was constituted in July, 1929, in accordance with the recommendations of the Imperial Wireless and Cable Conference 1928, to act in an advisory capacity in regard to telegraphic communications.

The Committee is charged with certain responsibilities relating to the activities of Imperial and International Communications Limited—the public utility company formed, in accordance with the recommendations of the Imperial Wireless and Cable Conference, for the purpose of co-ordinating the telegraphic services (both cables and wireless) connecting the various parts of the British Empire. The Committee is concerned with questions of policy regarding, in particular, the institution of new services, the discontinuance of existing services, alterations in rates, and the distribution of traffic between alternative routes.

The Committee consists of 8 members, appointed by the Governments of the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, the Irish Free State, India, and of the Colonies, Dependencies and Protectorates, respectively. The Government of any part of His Majesty's dominions now or hereafter possessing responsible government may also nominate one representative, who is entitled to be summoned to any meeting at which questions affecting the interests of that part of His Majesty's dominions are to be considered.

The Committee is at present composed as follows :—

*United Kingdom*, Sir Courtauld Thomson, K.B.E., C.B.

*Canada*, Sir Campbell Stuart, K.B.E.

*Commonwealth of Australia*, Mr. C. L. Baillieu, C.M.G., O.B.E.

*New Zealand*, Mr. M. B. Eason.

*Union of South Africa*, Lieut. Colonel E. A. Sturman, C.B.E.

*Irish Free State*, Dr. Thomas O'Higgins, T.D.

*India*, Sir Bhupendra Nath Mitra, K.C.S.I., K.C.I.E., C.B.E.

*Colonies and Protectorates*, Sir Edward Davson, Bt.

*Secretary*, Wing Commander Sir Norman Leslie, Bt., C.M.G., C.B.E.

*Address*, Queen Anne's Chambers, Tothill Street, Westminster, S.W. 1.

*Telephone*, Victoria, 6525.

*Telegrams*, Impicatory, Parl, London.

## xxx DOMINIONS OFFICE AND COLONIAL OFFICE LIST.

### EXECUTIVE COUNCIL OF THE IMPERIAL AGRICULTURAL BUREAUX.

2, Queen Anne's Gate Building, S.W. 1.

This body, consisting of nominees of the Governments of the United Kingdom, the Dominions and India, and of the Colonial Office, was set up in 1929 to administer a number (8) of Bureaux organised to act as clearing houses of information on research in eight specialised fields of agricultural science, and financed from a common fund provided by the Governments of the Empire. The Annual Reports of the Council are submitted to each of the Governments through their several members on the Council.

*Chairman.*—F. L. McDougall, C.M.G.

*Secretary.*—Sir David Chadwick, C.S.I., C.I.E.

---

### EMPIRE FORESTRY CONFERENCE AND THE STANDING COMMITTEE ON EMPIRE FORESTRY.

The Conference meets quinquennially (the last occasion being in 1928 in Australia and New Zealand) to discuss questions of forestry policy in the Empire and the wider technical aspects of forestry. The preparatory work for this Conference and the steps necessary to give effect to the resolutions are carried out by a Standing Committee on Empire Forestry, composed as follows:—

The Chairman of the Empire Forestry Conference; Technical Commissioner, British Forestry Commission; Director of Imperial Forestry Institute; Member of Council of Empire Forestry Association; and one representative of each of the following: Colonial Office; India Office; unit of Empire in which last Conference was held; unit of Empire in which next Conference will be held.

*Secretary.*—Fraser Story, 9, Savile Row, W. 1.

---

### IMPERIAL FORESTRY INSTITUTE, UNIVERSITY OF OXFORD.

Was founded in 1924 as a result of a resolution of the British Empire Forestry Conference held in Canada in 1923. It is at present financed by Colonial Governments and the Forestry Commission: it provides post-graduate training and refresher courses for forest officers of the Empire and undertakes the structural examination and identification of wood, the identification of trees, and carries out research on problems of silviculture, forest management and economics, pests and diseases, and in other branches of forestry.

*Director.*—Professor R. S. Troup, C.I.E., D.Sc., F.R.S.

*Secretary.*—P. S. Spokes, B.Sc., M.A.

---

### OVERSEA MECHANICAL TRANSPORT COUNCIL AND OVERSEA MECHANICAL TRANSPORT DIRECTING COMMITTEE.

The Directing Committee consists of technical experts under a non-technical chairman and was appointed in November, 1928, by the Secretary of State for Dominion Affairs and for the Colonies to investigate questions relating to the use of mechanical transport in undeveloped countries. One half of the necessary funds is provided by a number of the overseas Governments and the balance by the Empire Marketing Board.

The Council, which supervises the work of the Directing Committee, is composed of representatives of the Empire Marketing Board and of the contributing Governments, among which are those of the Commonwealth of Australia, New Zealand, India, Southern Rhodesia and a number of the territories administered through the Colonial Office.

*Secretary.*—J. C. May, O.B.E., 2, Wood Street, Millbank, S.W. 1.

---

### THE IMPERIAL INSTITUTE.

*Trustees:—*

The Lord President of the Council.

The First Commissioner of H.M. Treasury.

The Secretary of State for India.

The President of the Board of Trade.

The Secretary of the Department of Overseas Trade (Development and Intelligence).

The Rt. Hon. The Earl of Selborne, K.G., G.C.M.G.

The Rt. Hon. Lord Kirkley.

Sir Edward Davson, Bart.

The Imperial Institute building was erected at South Kensington as the National Memorial of the Jubilee of Queen Victoria, by whom it was opened in May, 1893. Since 1900 portions of the building have been in the occupation of the University of London.

The principal object of the Imperial Institute is to promote the utilisation of the commercial and industrial resources of the Empire, by the chemical and technical investigation of raw materials, by the supply of information relating to such materials and their production, and by the maintenance of comprehensive exhibits illustrating the economic resources of all the countries of the Empire overseas.

The Institute ceased to act as an independent institution in 1902, when it was placed under the management of the Board of Trade by Act of Parliament. The Colonial Office assumed the management by arrangement with the Board of Trade in 1907, and was placed in statutory control by the Imperial Institute (Management) Act of 1916.

As an outcome of the Report of the Committee of Enquiry appointed by the Secretary of State for the Colonies in 1923 and the subsequent resolution of the Imperial Economic Conference, an Act of Parliament (the Imperial Institute Act, 1925) was passed which repeals the Acts of 1902 and 1916, and provides (1) for the transfer of the Institute to the control of the Parliamentary Secretary of the Department of Overseas Trade; (2) for its management, under that Minister, by a Board of Governors representing all the interests concerned, and (3) for the amalgamation of the Imperial Mineral Resources Bureau with the Institute. The provisions of this Act were carried into effect as from July 1, 1925.

#### BOARD OF GOVERNORS.

*President*—Major D. J. Colville, M.P. (Parliamentary Secretary, Department of Overseas Trade).

*Vice-President*—\*Sir Edward Crowe, K.C.M.G. (Comptroller-General, Department of Overseas Trade).

*Representatives of the Dominions and India:*

*Canada*—The Hon. J. Howard Ferguson (High Commissioner).

*Australia*—Maj.-Gen. The Hon. Sir Granville de L. Ryrie, K.C.M.G., C.B., V.D. (High Commissioner).

*New Zealand*—The Hon. Sir Thomas Wilford, K.C.M.G. (High Commissioner).

*South Africa*—Hon. C. Te Water (High Commissioner).

*Newfoundland*—Hon. Sir Richard Squires, K.C.M.G., K.C.

*India*—Sir Bhupendra Nath Mitra, K.C.S.I., K.C.I.E., C.B.E. (High Commissioner).

*Representatives of Government Departments:*

*Treasury*—\*C. L. Stocks.

*Board of Trade*—P. W. L. Ashley, C.B., Sir A. E. Faulkner, C.B., C.B.E. (Mines Department).

*Colonial Office*—\*J. F. N. Green, F. A. Stockdale, C.B.E., \*P. H. Ezechiel, C.M.G. (Crown Agents).

*Ministry of Agriculture and Fisheries*—H. E. Dale, C.B.

*Department of Scientific and Industrial Research*—Sir Frank Smith, K.C.B., C.B.E., D.Sc., F.R.S.

*Representatives of Scientific and Commercial Interests:*

*Royal Society*—

*Former Governors of the Imperial Mineral Resources Bureau*—W. Forster Brown, M.Inst.C.E., H. F. Marriott, A.R.S.M., M.Inst.C.E.

*Association of British Chambers of Commerce*—\*Sir Stanley Machin, J.P.

*Federation of British Industries*—A. Johnston.

*Royal Botanic Gardens, Kew (Director)*—Sir Arthur Hill, K.C.M.G., F.R.S., M.A., F.L.S.

*Chairmen of Advisory Councils*—\*Lieut.-Colonel Sir David Prain, C.M.G., C.I.E., F.R.S. (Plant and Animal Products), \*Sir Richard Redmayne, K.C.B., M.Sc. (Mineral Resources).

*Secretary*—Capt. F. B. H. Drummond, M.C.

The following is a brief account of the operations of the Institute.

The Institute works in co-operation with the Agricultural, Mines and other technical departments in the Dominions, Colonies and India, whose operations it supplements by undertaking investigations and enquiries relating to the composition, uses and commercial value of products (animal, vegetable or mineral) which can be more efficiently conducted at home in consultation with merchants and manufacturers with a view to the local utilisation of the products or their export.

In addition to general laboratories for the investigation of products, special laboratories have been established for the examination of rubber, cement, and ceramic materials, and complete technical trials of these and other materials can be carried out. By its close association with manufacturers and users of raw materials in this country, the Institute is able to arrange large-scale trials of promising materials when necessary. Samples of the principal raw materials which have been investigated and commercially valued during recent years, and as to which full information is available, can be inspected by interested enquirers.

\* Members of Managing Committee.

Special analyses and investigations are undertaken for firms or private persons in any part of the Empire on payment of appropriate charges. Application for such investigations should be made in writing to the Director. Enquiries not involving laboratory work are dealt with without charge.

For the prompt execution of the investigation and enquiry work of the Institute, two Departments have been established, viz., Plant and Animal Products, and Mineral Resources. Each Department is under a Principal Officer and has its own laboratory and intelligence sections, and is responsible for all publications dealing with its particular subjects. In each department a special feature is made of the collecting and indexing of such published and other information as is likely to be of service in dealing with enquiries and other work of the Institute.

*Plant and Animal Products Department.*—This department deals with all investigations and enquiries relating to foodstuffs, oilseeds, essential oils, rubber, fibres, drugs, tobacco, timbers, gums and resins, and such like products. An Advisory Council on Plant and Animal Products has been appointed and Advisory Technical Committees, including representatives of the trades or industries concerned co-operate in the work on timbers, silk, vegetable fibres, animal fibres, oils and oilseeds, essential oils and resins, tanning materials, and hides and skins; other Committees will be formed as and when required. Investigations of plantation rubber are also carried out at the Institute on behalf of the Ceylon Rubber Research Scheme under the direction of the London Committee of the Scheme.

A very large number of reports on these subjects have been made to the Governments of the Dominions, Colonies and India. Some of the earlier reports have been collected together and published separately, whilst the results of current investigations are recorded in the "Bulletin of the Imperial Institute."

Special publications recently issued include a "Descriptive List of some Empire Timbers recommended by the Imperial Institute Advisory Committee on Timbers" and "Tanning Materials of the British Empire." Memoranda, prepared at the Institute on "Empire Sisal and its importance to the Cordage manufacturer," "India (Sunn or Sann) Hemp, its Production and Utilisation," and "The Production of Tung Oil in the Empire" have been issued by the Empire Marketing Board.

*Mineral Resources Department.*—This department is responsible for dealing with all investigations and enquiries relating to minerals. An Advisory Council on Minerals has been appointed combining the Board of Governors of the late Imperial Mineral Resources Bureau with representatives of the late Advisory Technical Committee on Minerals of the Imperial Institute. The fifteen Advisory Technical Committees of the late Bureau, each of which deals with a special group of minerals and metals, have been reconstituted as Committees of the Institute, and form a most valuable link with the mineral industries of the Empire.

The publications of the Imperial Mineral Resources Bureau, including the Statistics of the Mineral Industry of the British Empire and Foreign Countries and a series of volumes on the Mining Laws of the British Empire and of Foreign Countries, have been taken over by this Department, which has recently issued a Statistical Summary for 1928-30. The publication of the Mineral Monographs on specific minerals and metals, formerly issued by the Imperial Mineral Resources Bureau, is being continued, recent issues including those on Zinc, Tantalum and Niobium, Beryllium and Beryl, China, Clay and a Survey of the Mineral Position of the British Empire.

A series of twenty monographs on Mineral Resources with special reference to the British Empire have been issued under the direction of the late Mineral Resources Committee of the Institute.

Reports by the Director on the results of mineral explorations in Ceylon, Northern Nigeria, Southern Nigeria and Nyasaland, containing the results of investigations conducted in the laboratories of the Institute, have been printed in the Miscellaneous Series of Colonial Reports.

*Library.*—The library of the Institute contains a large collection of Colonial and Indian works of reference, and is regularly supplied with the more important reports and other publications of government departments in Great Britain, the Dominions, Colonies and India, and also most foreign countries. More than 500 serial publications, mainly of a scientific or technical character, are regularly received.

The library is available for the use of enquirers between the hours of 10 a.m. and 5.0 p.m. on week-days (10 a.m. to 1 p.m. on Saturdays).

*Statistical Section.*—This section is concerned with the collection of statistics for the use of other Departments of the Institute, for which purpose the chief statistical publications of nearly all the British and foreign countries are regularly received.

*Public Exhibition Galleries.*—The collections in these galleries are supplied chiefly through the Governments of the countries concerned and every part of the Empire is represented. The exhibits constitute a permanent exhibition illustrative of the commercial and industrial resources of the Dominions, Colonies and India, and of the life of the people and local scenery. The specimens of raw products on exhibition are of vegetable, mineral and animal origin, and have descriptive labels stating their nature, uses and commercial importance; and these are supplemented by dioramas, pictures, photographs, maps, diagrams and models, sporting trophies, native handicraft, etc.

There is a Central Stand in the Galleries for the supply of free literature and general information to enquirers and for the sale of publications and picture postcards. Visitors requiring scientific or technical information are referred from the Central Stand to the appropriate department. Pamphlets, circulars, hand-books, etc., containing information relating to the commerce, agriculture, mining and other industries of the principal British Possessions, and also to emigration, are available for gratuitous distribution.

Guide Lecturers conduct parties through the Galleries at stated times and explain the exhibits; special arrangements are made for school parties. Surplus specimens of economic products are supplied at a nominal charge to school museums on written application being made to the Director. When store material is available samples of raw products are supplied to manufacturers and others interested.

The Public Galleries are open free daily from 10 a.m. to 5 p.m. (except Christmas Day and Good Friday), and on Sundays from 2.30 to 6 p.m.

A Cinema has been installed by the Empire Marketing Board where films depicting the life, sports and industries of the various countries of the British Empire overseas are shown daily. Lectures on Empire industries and countries are frequently given.

*General Publications.*—The "Bulletin of the Imperial Institute" is published quarterly, price 3s. 6d. (annual subscription 15s., including postage), and may be ordered through any bookseller. The Bulletin contains records of the principal investigations conducted for the Dominions, the Colonies and India at the Imperial Institute, and special articles, chiefly relating to progress in tropical agriculture and the industrial utilisation of raw materials (animal, vegetable and mineral). New features introduced into the Bulletin are (1) a record of work conducted by Government Technical Departments Overseas and (2) a bibliography of the more important reports, articles, etc., on plant and animal products received in the Library during the preceding quarter.

Under the authority of the Secretary of State for the Colonies the Institute issued a Series of four Imperial Institute Handbooks, dealing with the Commercial Resources of the Tropics, with special reference to West Africa. The volumes still available are entitled: "The Agricultural and Forest Products of British West Africa," by G. C. Dudgeon, C.B.E., formerly Director-General of Agriculture in Egypt, and Inspector of Agriculture for British West Africa, 2nd edition; and "Cotton and other Vegetable Fibres," by E. Goulding, D.Sc., Scientific and Technical Department, Imperial Institute, 2nd edition.

The Reports of the Indian Trade Enquiry which discuss the possibilities of increasing and developing the trade in Indian raw materials have also been published. The volumes deal with: "Hides and Skins," "Oil Seeds," "Rice," "Timber and Paper Materials," "Jute and Silk," "Lac, Turpentine and Rosin," and "Cinchona Bark and Myrobalsans."

*Conference Rooms.*—These large rooms, specially decorated and furnished, are reserved on the principal floor for use by representatives of the Dominions and Colonies and for meetings and receptions.

*The Cowasjee Jehanghir Hall.*—The Bhownagree corridor and rooms in connection with this Hall are in the occupation of the Imperial Institute. The Hall is available for lectures, meetings, etc.

The following Societies have their headquarters at the Imperial Institute:—

*Overseas Nursing Association.*—An office on the mezzanine floor has been provided for this Association, whose principal object is the selection of trained hospital and private nurses for service in the Crown Colonies and other British Dependencies. Office hours, 10 a.m. to 5 p.m.

*African Society.*—This Society has been temporarily provided with an office at the Imperial Institute, and meetings of the Society are held there.

*School Empire-Tour Committee.*—At the desire of the Dominions Office an Office on the Mezzanine Floor has been provided for this Committee, whose object is the organization of tours to the Dominions for boys from this country. The Hon. Secretary is the Hon. Margaret Best.

The following is a list of the principal members of the Staff of the Imperial Institute:—

*Director*—Lt.-Gen. Sir William Furse, K.C.B., D.S.O.

*Secretary*—Captain F. B. H. Drummond, M.C.

*Secretarial Assistant*—G. S. Godfrey.

*Accountant*—E. J. Palmer.

*Registrar*—P. J. Redmond.

*Librarian*—F. Henn.

#### PLANT AND ANIMAL PRODUCTS DEPARTMENT.

*Chairman of Advisory Council*—Lt.-Col. Sir David Prain, C.M.G., C.I.E., F.R.S.

*Principal*—H. Brown, O.B.E.

*Vice-Principal*—E. Goulding, D.Sc., F.I.C.

*Chief Assistant (Intelligence)*—S. E. Chandler, D.Sc., A.R.C.S., F.L.S.

*Superintendent (Laboratory)*—J. R. Furlong, Ph.D., A.I.C.

*Senior Assistants (Intelligence)*—H. J. Jeffery, A.R.C.S., F.L.S.; F. Ferraboschi, M.A.; B. E. Long, B.A., W. G. Freeman, B.Sc., A.R.C.S., F.L.S.

*Assistants (Intelligence)*—G. W. Aston, Miss R. M. Johnson, H. J. Holman, B.Sc., D.I.C., A.R.C.S.

*Senior Assistants (Laboratory)*—O. D. Roberts, F.I.C.; G. T. Bray, A.I.C.

*Assistants (Laboratory)*—F. Major, B.Sc., A.I.C.; H. T. Islip, B.Sc., A.I.C.; L. Balmforth, B.Sc., A.I.C.; H. E. Coomber, B.Sc.; E. L. Hill, B.Sc., A.R.C.S.

#### MINERAL RESOURCES DEPARTMENT.

*Chairman of Advisory Council*—Sir Richard Redmayne, K.C.B., M.Sc.

*Principal*—T. Crook, A.B.C.S., F.G.S., M.Inst.M.M.

*Vice-Principal*—S. J. Johnstone, B.Sc., F.I.C.

*Superintendent (Laboratory)*—W. O. R. Wynn, F.I.C.

*Senior Assistants (Intelligence)*—B. Allen, M.A., B.Sc., M.Inst.M.M.; G. E. Howling, B.Sc.; E. H. Halse, A.R.S.M., M.I.M.M.

*Assistant (Intelligence)*—E. H. Beard, B.Sc.

*Senior Assistants (Laboratory)*—A. T. Faircloth; R. C. Groves, M.Sc., A.I.C.

*Assistants (Laboratory)*—H. Bennett, M.A., B.Sc., A.I.C.; W. G. Atkins; H. J. Broughton, W. H. Bennett, B.Sc., A.I.C., L. C. Chadwick, B.A.

*Legal Consultant*—A. D. Mc Nair, C.B.E., LL.D.

*Chief Statistician*—J. A. Nelson, B.Sc.

*Assistant Statistician*—J. J. Endcox.

#### EXHIBITION GALLERIES.

*Curator*—H. Spooner.

*Exhibition Officers*—A. B. Jackson, A.L.S.; F. W. Rolfe; F. Boulton; E. C. Moore; S. Herbert.

*Guide Lecturers*—Colonel M. C. Nangle; Capt. H. Luxmoore, R.N.

#### CEYLON RUBBER RESEARCH STAFF.

*Superintendent*—G. Martin, B.Sc., A.I.C.

*Senior Assistant*—W. S. Davey, B.Sc., A.I.C.

*Assistant*—H. C. Baker, B.Sc.

*Secretary, London Committee*—J. A. Nelson, B.Sc.

#### ROYAL BOTANIC GARDENS, KEW.

Kew as a scientific establishment dates from 1759, when a Botanic, or as it was then called a Physic Garden was established by the Princess Augusta of Saxe-Gotha, Dowager Princess of Wales.

It was energetically maintained by her son, George III., with the scientific assistance of Sir Joseph Banks, who was virtually, for the greater part of his life, director. Under his advice collectors were sent to all parts of the world. The first New Holland plants were introduced during Cook's voyages, 1768-1780. At Sir Joseph Banks's instance the system of inter-colonial exchange through Kew was commenced, which has been maintained ever since. The most memorable undertaking of this kind was the voyage of the *Bounty* (1787), for the purpose of introducing the bread-fruit tree from the South Seas into the W. Indies. Nelson, the Kew collector, was amongst those sent adrift by the mutineers, and eventually died of the exposure. Another Kew gardener, James Hooper, who had been attached to Lord Amherst's Embassy to China, remained in Java, and was from 1817-30 Hortulanus of the celebrated Dutch Colonial Botanic Garden at Buitenzorg, which he helped to create.

Both George III. and Sir Joseph Banks died in 1820, and the colonial and other work of Kew languished, though it was not absolutely abandoned during the reign of George IV. and William IV. In 1838 the abolition of the whole establishment was contemplated by the Government. Public opposition led to the appointment of a Treasury Committee, the report of which was presented to Parliament in 1840. The following paragraphs briefly defined the functions of the reorganised establishment:—"A national garden ought to be the centre round which all minor establishments of the same nature should be arranged. . . . From a garden of this kind Government would be able to obtain authentic and official information on points connected with the founding of new colonies; it would afford the plants there required, without its being necessary, as now, to apply to the officers of private establishments for advice and assistance."

These recommendations having been adopted by the Government, Sir W. J. Hooker, F.R.S., was appointed Director in 1841 to carry them out. A close connection between Kew and the Colonial and India Offices immediately sprang up. A scheme for a complete series of Colonial Floras was sanctioned in 1856, and has been steadily prosecuted. Kew serves to a large extent as an advanced horticultural school. Special attention is given to the preparation of gardeners for Colonial and Indian service, in which some 100 men, trained at Kew, are now in official employment.

Relations with the botanical institutions of the self-governing Dominions are maintained by semi-official correspondence. With those of colonies under the control of the Colonial Office the connection is closer. In 1902, the Director was given the title of "Botanical Adviser to the Secretary of State for the Colonies."

With a view to furthering the co-operation between Kew and the botanical and agricultural departments of the Dominions and Colonies, the Empire Marketing Board in 1927 made a grant to be devoted partly to the employment of an Economic Botanist at Kew, who will be available either to visit the Dominions and Colonies from time to time or to set free a superior officer of the Kew staff to undertake overseas missions, and partly for sending botanical collectors to various parts of the world to study and bring home plants of economic importance for cultivation at Kew and distribution to the Dominions and Colonies.

Colonial botanical institutions fall roughly into three classes. Those of the first class are usually, like Kew, administered by a scientific director; those of the second class by a skilled superintendent; the third class consists of "Botanic stations." These last are small and inexpensive gardens, devised in 1885, in order to afford practical instruction in the cultivation of tropical crops, and were intended to develop the agricultural resources at first of the smaller West Indian islands, and subsequently (1887) British possessions in Tropical Africa. These are now an integral part of the Agricultural Departments of the Colonies concerned and usually are in charge of a Curator, who, in many cases, is a gardener trained at Kew.

The principal members of the Kew staff are:—

*Director*, Sir Arthur W. Hill, K.C.M.G., M.A., Sc.D., D.Sc. (Adelaide), F.R.S.

*Assistant Director*, J. S. L. Gilmour, B.A.

*Economic Botanist*, H. C. Sampson, C.I.E., B.Sc.

*Keeper of the Herbarium and Library*, A. D. Cotton, F.L.S.

*Keeper of Museums*, W. Dallimore.

*Curator*, T. W. Taylor.

## MALAYAN INFORMATION AGENCY.

The offices of the Agency are at Malaya House, 57, Charing Cross, S.W.1.

The Agency has been established by the Governments of the Straits Settlements and the Federated Malay States, with the approval of the Secretary of State for the Colonies. The primary object of the Agency is to advertise the productions and attractions of Malaya, to furnish to enquirers interested in those parts or desirous of becoming acquainted with them, information as to the opportunities which they give and the facilities for travel and exploration which they have for the tourist or traveller, and to supply (on payment in some cases) publications and maps.

The great natural resources of Malaya are but little known to the general public, and still less is known of their beautiful scenery. One of the objects for which the Agency has been created is to disseminate information on these points. The Agency is also in a position to afford information as to the channels through which enquiry may be made by those desirous of obtaining employment in Malaya and to supply general information regarding employment and prospects.

The Agency undertakes for the Straits Settlements and Federated Malay States Governments work that does not fall within the scope of the transactions of the Crown Agents for the Colonies, who are the recognized financial and commercial agents of these Governments.

The Advisory Board of the Agency consists of the Agent, the Deputy Agent, a representative of mining interests, a representative of planting interests, a representative of commercial interests, and a senior member of the Malayan Government Service retired or on leave in this country.

The present Board consists of :—

H. W. Thomson, C.M.G., Agent.  
J. F. Owen, Deputy Agent.  
F. E. Mair.

Eric MacFadyen.  
J. Mitchell.  
E. C. H. Wolff, C.M.G.

### H.M.'s EASTERN AFRICAN DEPENDENCIES TRADE AND INFORMATION OFFICE.

This Office is situated in the Royal Mail Building, Cockspur Street, London, S.W.1.

It was established in 1925, with the approval of the Secretary of State for the Colonies, by the Governments of Kenya, Uganda, the Tanganyika Territory, Nyasaland, Zanzibar and Northern Rhodesia, and the Kenya-Uganda Transport Administration.

The creation of such an Office was recommended by the Parliamentary Commission which visited East Africa in 1924. The functions of the office are to give all possible information to persons proposing to interest themselves in East Africa for the purpose of settlement commerce, residence, or temporary visit, and also to stimulate the trade of East Africa by helping to introduce its products into home markets.

The office is under the control of Colonel W. H. Franklin, C.B.E., D.S.O., who is also H.M.'s Trade Commissioner in East Africa.

In connection with the office an advisory Committee has been formed, the membership of which is given below :—

Major-General Sir John Davidson, K.C.M.G., C.B., D.S.O. (*Chairman*).

Sir Randolph Baker, Bart., D.S.O.

D. F. Baaden.

Lieutenant-Colonel R. P. Collings Wells, C.B.E., D.S.O.

The Right Hon. Lord Cranworth, M.C.

Major W. M. Crowdy.

C. B. Hausburg.

Sir Sydney Henn, K.B.E.

F. S. Joelson.

Major Sir Humphrey Leggett, D.S.O., R.E.

D. O. Malcolm.

Col. C. Ponsonby.

W. A. M. Sim.

Major H. Blake Taylor, C.B.E.

Major C. Walsh.

A. Wigglesworth.

Sir Trevredyn Wynne, K.C.S.I., K.C.I.E.

In addition to which three sub-committees, are in being dealing respectively with matters relating to Kenya, Uganda and the other Dependencies concerned, but the work is mainly dealt with by the Full Advisory Committee.

*Deputy Commissioner*, Maj. C. H. Dale, O.B.E.

*Officers*, W. McHardy, O.B.E., and Maj. J. Corbet Ward, O.B.E. (*Secretary*), F. H. Melland, S. S. Murray (Seconded from Nyasaland), G. W. Knapman (*Librarian*).

### THE IMPERIAL COLLEGE OF TROPICAL AGRICULTURE.

*Incorporated by Royal Charter.*

The Imperial College of Tropical Agriculture, St. Augustine, Trinidad :—*Chairman of the Governing Body* : Sir James Currie, K.B.E., C.M.G. ; *Vice-Chairman of the Governing Body* : Lieut.-Colonel Sir David Prain, C.M.G., C.I.E., F.R.S. ; *Principal* : Geoffrey Evans, C.I.E. M.A. ; *Secretary*, Sir Algernon Aspinall, Kt., C.M.G., C.B.E., B.A. ; *Registrar* : W. A. Tansley.

*PROFESSORS* :—*Zoology and Entomology and Commissioner of Agriculture* : H. A. Ballou, M.Sc. ; *Mycology and Bacteriology* : H. R. Briton-Jones, D.Sc., Ph.D., D.I.C., A.R.C.S. ; *Botany* : E. E. Cheesman, M.Sc., A.R.C.S. ; *Chemistry* : F. Hardy, M.A., Dip. Agr. ; *Agromony* : C. Wood, M.A., Dip. Agric. ; *Economics* : C. Y. Shephard, B.Sc. ; *Sugar Technology* : *Assistant Professor of Entomology* : F. W. Urish, F.E.S., O.M.Z.S., V.D. ; *Assistant Commissioner of Agriculture* : G. A. Jones, Dip. Agric.

*LECTURERS* :—*Mycology and Bacteriology* : Andrew Kerr Briant, B.A., Dip. Agric. ; *Botany* : R. E. Hunter, M.Sc. ; *Chemistry* : P. E. Turner, B.Sc., F.I.C. (seconded for special research), and D. W. Duthie, M.A., B.Sc. ; *Agromony* : D. H. Brown, ; *Technologist (for Sugar)* : J. G. Davies, Dip. Agric. ; *Veterinary Science*, H. V. M. Metivier, O.B.E., B.Sc., M.R.C.V.S. (Trinidad Department of Agriculture) ; *Editor and Librarian* : G. G. Gianetti, M.A., Dip. Agric. (Econ.) ; *Officers for Banana Research* : O. W. Wardlaw, D.Sc., Ph.D., F.R.S.E., L. P. McGuire, M.Sc., Ph.D., D.I.C. ; *Officers for Cacao Research* : E. E. Pyke, B.Sc., A.R.C.S., F. J. Pound, B.Sc., and J. A. McDonald ; *Medical and Health Officer* :—J. R. Dickson, M.B., B.Sc., D.P.H.

*General Information* :—The Imperial College of Tropical Agriculture was incorporated in September, 1921, as the outcome of recommendations made in their Report (Command Paper 562) by the Tropical Agricultural College Committee appointed by Viscount Milner in 1919. The object of the College is to promote the study of Tropical Agriculture in suitable surroundings and to create a body of British Expert Agriculturists well versed in the knowledge of the cultivation of land in the tropics, of chemists and of scientific advisers possessing an intimate knowledge of the means of combating pests and diseases and to conduct Research. The College Buildings are at St. Augustine, near St. Joseph, Trinidad, on land granted to the College by the Government of Trinidad and Tobago. The funds of the College are derived from contributions from Colonies and Industries participating in the movement and an Imperial Grant. The Imperial Department of Agriculture, founded in 1898, was amalgamated with the College on April 1st, 1922.

The academic year extends from October 1st to June 30th. The following courses and facilities for study are available :—

1. **Post-Graduate Courses.** Open to holders of a degree or diploma of any British University, University College, or other Academic Institution specifically approved by the Governing Body of the Imperial College of Tropical Agriculture. Special facilities are available for such graduates to extend their knowledge of, or undertake investigations into, subjects pertaining to tropical Agriculture.
2. **Refresher Courses.** Open to officers of Agricultural Departments in the Tropics or similar institutions. Details are arranged on application.
3. **A Three Year Diploma Course,** primarily intended to give instruction in West Indian Agriculture. Admission to it, therefore is, save in exceptional circumstances, limited to students from the Caribbean area. As qualification for admission to this course the matriculation of any University within the British Empire or its recognised equivalent will be accepted.

Tropical Veterinary Science is also an important branch of the College curriculum.

The tuition fees are as follows :—

- (a) Post Graduate Course £75 per annum, or in the case of a Student from a foreign country £100 per annum.
- (b) Refresher Course £75 per annum, or in the case of Students from Contributing Colonies £50 per annum.
- (c) Sugar Course, £50 per annum, or in the case of Students from foreign countries £100 per annum.
- (d) Diploma Course £50 per annum, or in the case of Students coming from foreign countries £100 per annum.

Further particulars regarding the College can be obtained from the Secretary, The Imperial College of Tropical Agriculture, 14, Trinity Square, London, E.C.3, or from the Chief Clerk and Registrar, St. Augustine, Trinidad, B.W.I.

## LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE.

(University of London),

GOWER STREET, LONDON, W.C. 1.

*Dean* :—Professor W. W. Jameson, M.A., M.D., F.R.C.P., D.P.H.

*Secretary* :—R. W. Harris.

The London School of Hygiene and Tropical Medicine was constituted by Royal Charter in 1924 and took over the London School of Tropical Medicine on 1st August, 1924.

The School entered into occupation in October, 1929, of the handsome premises in Bloomsbury, the gift of the Trustees of the Rockefeller Foundation. The premises are fully equipped with the latest scientific equipment and accommodation is provided for a large number of students. There are a spacious Lecture Theatre, Classrooms, and Laboratories, a fine Library and a Teaching Museum.

The Bureau of Hygiene and Tropical Diseases is accommodated in the new building.

In addition to the Departments concerned with the following subjects, Departments of Biochemistry and of Chemistry as applied to Hygiene have been established, and also teaching sections of Medical Industrial Psychology and Industrial Physiology.

### PUBLIC HEALTH.

A course of study covering a period of nine calendar months is given for the Diploma in Public Health of the University of London beginning in October. Composition fee 54 guineas. Professor and Director of the Division: W. W. Jameson, M.A., M.D., F.R.C.P., D.P.H.

### BACTERIOLOGY AND IMMUNOLOGY.

A course of study is given for the Diploma in Bacteriology of the University of London lasting for one academic year, beginning in October. Composition fee for the course £47 15 0. Professor and Director of the Division: W. W. C. Topley, M.A., M.D., F.R.C.P., F.R.S.

## EPIDEMIOLOGY AND VITAL STATISTICS.

Special three-monthly courses are given in Epidemiology and Vital Statistics. Fee £7 7s. for three months. Professor and Director of the Division: M. Greenwood, D.Sc., F.R.C.P., M.R.C.S., F.R.S., F.S.S.

## TROPICAL MEDICINE AND HYGIENE.

The course of study is divided into two parts—Section A (Clinical and Laboratory Instruction) and Section B (Tropical Hygiene) each of which can be taken independently of the other, Section A being a three months' course and Section B a two months' course. Fees: Section A £25; Section B £15.

In addition to medical officers in the Colonial Service the school is open to other qualified medical practitioners of any nationality and of either sex. Qualified Veterinary Surgeons are also eligible as students, other applicants may be admitted in special circumstances.

Facilities for clinical and pathological studies are afforded by the Seamen's Hospital Society, whose Hospital for Tropical Diseases is established at Endsleigh Gardens.

The school course is designed to equip students for the Diploma of the Conjoint Board of the Royal College of Physicians of London, and the Royal College of Surgeons of England (D.T.M. & H. Lond.). Tropical medicine has been admitted as a sixth alternative subject for the M.D. of London University, and the school curriculum is so adapted as to afford facilities to candidates desirous of taking the M.D. in this subject.

The late Lord Milner raised a fund for research; and expeditions are from time to time sent to the Tropics. A field station has been established in Southern Rhodesia. Research Studentships are provided and each carries with it an income of £250 per annum. The holders are required to devote their whole time to work under the Heads of the Departments.

The Wandsworth Scholarship of £370 per annum (with extra allowances for overseas work), the Honourable Edward John Stanley Memorial Fund of £50 p.a., and the Langley Memorial Prize of £30, are in the gift of the School.

*Professor and Director of the Division of Medical Zoology and of the Department of Helminthology,*  
R. T. Leiper, D.Sc., M.D., F.R.S., F.Z.S.

*Director of the Department of Entomology,* P. A. Buxton, M.A., M.R.C.S., L.R.C.P., D.T.M. & H.

*Professor and Director of the Department of Protozoology,* J. G. Thomson, M.A., M.R.C.P., M.B., Ch.B.

*Director of the Division of Clinical Tropical Medicine:*—G. Carmichael Low, M.A., M.D., C.M., F.R.C.P.

*Warden of Studies and Curator of the Museum,* H. B. Newham, C.M.G., M.D., M.R.C.P., D.P.H., D.T.M. & H.

## THE LIVERPOOL SCHOOL OF TROPICAL MEDICINE.

The Liverpool School of Tropical Medicine was founded in 1899 by the late Sir Alfred Jones, K.C.M.G., President of the Liverpool Chamber of Commerce.

*Objects of the School.*—(1) To train medical men proceeding to the tropics in the special subject of tropical diseases.

(2) To conduct original researches into tropical diseases.

(3) To organise prophylactic measures against tropical diseases.

Its foundation was the direct result of an appeal issued by Mr. J. Chamberlain, who was then Secretary of State for the Colonies, advocating the formation of a school, or schools, of tropical medicine.

The school has, from its foundation, been dependent on voluntary contributions for support, but it at once received valuable assistance from the Government, first in the form of official recognition of the curriculum, and later by grants from Colonial Governments and from the Tropical Diseases Research Fund. The latter ceased at the end of 1929.

The school has sent out to the tropics since 1899 thirty-eight Research Expeditions.

From 1902 to 1906 the school published Memoirs. A new series of Memoirs was begun in 1924: three memoirs have now been published. In 1907 the Annals of Tropical Medicine and Parasitology were founded, and have now reached their twenty-sixth volume.

Attached to the school is a Tropical Ward of ten beds at the Royal Infirmary, Liverpool, and four private wards for paying patients were opened in August, 1925.

The present buildings of the school comprising a Lecture Theatre, Library, Museum, Laboratories, etc., were opened in 1920.

In 1923, the Sir Alfred Lewis Jones Tropical Laboratory was opened at Freetown, Sierra Leone, a site having been placed at the disposal of the School by the Colonial Government and the War Office. The laboratory is a well-equipped two-storeyed building, and it is to be hoped that research workers will avail themselves of its facilities to study various problems of tropical medicine, as ample material will be at their disposal.

## COMMITTEE.

*Hon. President*, H.R.H. The Duke of York, K.G., G.C.V.O.

*Chairman*, Sir F. C. Bowring, J.P.

*Hon. Vice-Presidents*, Earl of Derby, K.G., G.C.V.O., C.B., LL.D., Sir Edward Merewether, K.C.V.O., Sir H. J. Read, K.C.M.G., C.B., O. Harrison Williams, and Representatives of the University of Liverpool, the Royal Southern Hospital, and leading business men interested in the tropics.

The following is the staff :—

*Alfred Jones Professor of Tropical Medicine*, Warrington Yorke, M.D., M.R.C.P.

*Dutton Memorial Professor of Entomology*, W. S. Patton, M.B.

*Walter Myers Professor of Parasitology*, D. B. Blacklock, M.D.

*Professor of Tropical Diseases of Africa*, R. M. Gordon, M.D.

*Lecturer on Entomology*, A. M. Evans, D.Sc.

*Assistant Lecturer on Entomology*, vacant.

*Assistant Lecturer on Protozoology*, vacant.

*Lecturer on Helminthology*, T. Southwell, D.Sc., Ph.D., F.R.S.Ed.

*Clinical Pathologist*, F. Murgatroyd, M.D.

*Hon. Lecturer on Clinical Veterinary Parasitology*, A. W. N. Pillers, F.R.C.V.S.

*Lecturer on Tropical Surgery*, R. E. Kelly, C.B., F.R.C.S.

*Lecturer on Tropical Hygiene*, Maj.-Gen. David Harvey, R.A.M.C. (retired), C.M.G., C.B.E., M.D.

*Lecturer on Practical Sanitation*, E. W. Hope, O.B.E., M.D.

*Lecturer on Bacteriology*, J. M. Beattie, M.D.

*Lecturer on Vital Statistics*, C. O. Stallybrass, M.D.

*Lecturer on Public Health Chemistry*, W. H. Roberts, M.Sc.

*Lecturer on Sanitary Engineering*, S. W. Perrott, M.Inst.C.E.

*Caton Memorial Fellow*, F. Hawking, L.R.C.P., M.R.C.S.

## ROYAL INFIRMARY, LIVERPOOL (TROPICAL WARDS).

*Physician*, Warrington Yorke, M.D., M.R.C.P.

*Assistant Physician*, vacant.

*Consulting Surgeon*, Robert Ernest Kelly, O.B., F.R.C.S.

## SIERRA LEONE RESEARCH LABORATORY.

*Director*, R. M. Gordon, M.D.

*Assistant Director*,

*Research Assistant*, T. H. Davey, M.B.

*Secretary's Office*:—C18, Exchange Buildings, Liverpool.

## THE EMPIRE COTTON GROWING CORPORATION.

Millbank House, 2, Wood Street, S.W. 1.

This body was incorporated by Royal Charter in November, 1921, and was endowed with a fund of nearly £1,000,000, being half the Government's share of the surplus from the wartime control of Egyptian cotton. It derives further funds from a statutory levy on all cotton purchased by spinners in the United Kingdom. The levy from 1923-8 was at the rate of 6d. per bale of 500 lbs. It was then reduced, to 3d. per bale and in 1930 to 1d. per bale, with the approval of the Board of Trade. The Corporation, staff and maintain Experiment Stations in several cotton-growing parts of the Empire, where such problems are investigated as the breeding of the varieties of cotton most suitable for each district, and the control of pests and diseases. It has provided agricultural machinery when required, and paid the salaries and pensions of supplementary agricultural officers on the staff of Colonial Governments. By means of post-graduate Studentships it has provided for the further training of men to act as specialists and agricultural officers in the new cotton-growing countries, either in Government service or on the Corporation's staff. It has also devoted considerable attention to the development of transport of all kinds in cotton-growing countries. The Corporation also maintain a long-range Research Station in Trinidad, where fundamental problems relating to the genetics and physiology of the cotton plant are explored.

*Secretary*, L. G. Killby, Millbank House, 2, Wood Street, S.W. 1.

## THE OVERSEAS NURSING ASSOCIATION.

The Colonial Nursing Association was founded in 1896 for providing fully trained nurses for private and hospital work in the Colonies, and amongst other British communities abroad, and to facilitate in any other way the work of nursing.

At the request of the Colonial Office the Association recommends nurses for government service.

Since its foundation, in 1896, it has supplied 2,874 nurses, of whom 1,991 have been recommended for Government work, 799 to private posts and Hospitals not under Government, and 84 to the Dominions.

*Patroness*, H. R. H. The Princess Beatrice.

*President*, The Rt. Hon. the Earl of Athlone, K.G.

*Vice-President*, Sir Reginald Antrobus, K.C.M.G., C.B.

*Hon. Vice-President*, Lady Piggott.

*Executive Committee*, Mrs. Amery, Lady Antrobus, D.B.E., Mrs. Ronald Barrett, Mrs. Carnegie, Mrs. du Maurier, Miss Finch, R.R.C. (representing the Society for the Oversea Settlement of British Women), Alice Countess Grey, Lady Cunliffe-Lister, Lady Guillemard, Mrs. Hannington, O.B.E., Lady Harding, Mrs. Villiers Hawkins, Charlotte, Lady Inverclyde, Lady MacDonald, R.R.C., Miss M. Milne, The Viscountess Novar, G.B.E., Lady Piggott, Mrs. Piggott, Miss Price, Lady Read, Mrs. Stockdale, Mrs. H. A. Walker, Lady Wilson, Sir Reginald Antrobus, K.C.M.G., C.B., A. B. Acheson, Dr. A. J. O'Brien, C.M.G., Austin Wright.

*Secretary*, Miss E. C. Milne, Imperial Institute, S.W.7.

*Scottish Branch—President*, The Viscountess Novar, G.B.E.

*Hon. Secretary*, Miss Manson, 14, Ainslie Place, Edinburgh.

*The Objects of the Society are defined by its Charter of Incorporation, which bears date the 26th September, 1882.*

"It aims to promote the preservation of a permanent union between the Mother Country and the various parts of the Empire. It provides a place of meeting for British subjects connected with the Dominions, the Colonies, and India; for residents in this country who are in sympathy with the objects of the Society, and wish to promote the interests of the Empire beyond the seas; for British subjects and persons of direct British parentage resident in foreign countries. It provides a Library containing the best unofficial collection in existence of publications relating to the Empire; a comprehensive Law Library; and Reading, Smoking, and Reception Rooms. It publishes a Monthly Journal, and offers opportunities for the reading of Papers and for holding discussions upon subjects of Imperial interest, and it undertakes literary, commercial, and statistical inquiries in connection with the Empire. Nothing in the Papers or discussions is permitted tending to give the Society a party character." (Rule 1.)

The Society consists of resident and non-resident fellows (who must be British subjects), elected by the Council on the nomination of two fellows, one of whom at least must sign on personal

knowledge, and associates, who must also be British subjects, elected by the Council on the nomination of one fellow or one associate. Ladies may become fellows. A resident fellow (who has a permanent home in the United Kingdom) pays an entrance fee of 3*l.* 3*s.* and an annual subscription of 3*l.* 3*s.*; or if residing over 50 miles from London pays an entrance fee of 1*l.* 1*s.* and an annual subscription of 2*l.* 2*s.*; a non-resident fellow (who has his permanent home outside the United Kingdom) pays an entrance fee of 1*l.* 1*s.* and an annual subscription of 1*l.* 11*s.* 6*d.* Associates pay an annual subscription of 1*l.* 11*s.* 6*d.* Resident fellows can compound for the annual subscription by the payment of 31*l.* 10*s.*; resident (country) fellows by the payment of 21*l.*; and non-resident fellows can compound for the non-resident annual subscription on payment of 15*l.* 15*s.*, these amounts being reduced after the payment of five, ten, fifteen or twenty annual subscriptions. An additional class of members who, not being British subjects, cannot be fellows, but known as affiliated members, includes such subjects of Foreign Powers only as are either British born or children of British parents on both sides. They are nominated and elected in the same manner as non-resident fellows, and pay the same fees, i.e., entrance fee 1*l.* 1*s.* and subscription 1*l.* 11*s.* 6*d.*, or may compound for life at 15*l.* 15*s.*

The privileges of fellows, whose subscriptions are not in arrear, include the use of rooms, papers, and library. All fellows, whether residing in England or Overseas, have a copy of the monthly journal, *United Empire*, forwarded to them. They are also entitled to be present at the evening meetings, and to introduce one visitor; also to receive an invitation to the Annual Reception.

Affiliated members have the same privileges as associates, and in addition, the use of the Society's building.

Associates are entitled to receive a copy of the monthly journal of the Society, to attend any meeting held for the reading of papers or any annual provincial conference of the Society, and to attend the annual reception.

The Society occupies its own house, which is open on week-days from 9.30 a.m. to 10 p.m. (Christmas Day and Good Friday excepted), Sundays 2 p.m. to 10 p.m., and comprises luncheon, reading, writing, reception, billiard and smoking rooms, also a ladies' drawing room; a library containing over 220,000 volumes (including pamphlets), all of which relate to the Over-seas Dominions, Colonies and India. The newspaper room contains over 1,080 newspapers, magazines and reviews from all quarters of the Empire. The Library and Newspaper Room are open from 10 a.m. to 8 p.m. on Weekdays (Christmas Day, Good Friday and Bank Holidays excepted). Books may be borrowed, the correspondence of fellows may be addressed to the care of the Society, and visitors, introduced by a fellow, are admitted.

The annual meeting is held not later than the month of May; ordinary meetings are held at 8.30 p.m. on the second Tuesday (as a general rule) of the months from November to May, for the reading and discussion of papers. Monthly Luncheons are held in the City, with a speech on Imperial Trade questions. The House and Social Committee holds fortnightly meetings and monthly House Dinners. The number of members in December, 1931, was 17,424.

*Editor of the Society's Journal.*

F. P. Walton, LL.D.

*Honorary Secretaries.*

O. E. A. Bedwell; H. C. Gutteridge, K.C., LL.D.

*Assistant Editor and Secretary to the Society.*

Miss K. I. Toogood.

*Address of the Society*—1, Elm Court, Temple, E.C. 4.

The Society of Comparative Legislation was founded to promote a knowledge of the course of legislation in different countries, more particularly in the several parts of His Majesty's Dominions, and in the United States. For over thirty years the Society has been engaged in presenting year by year in its Journal in a concise and orderly form a summary of the legislation of the British Empire, the United States and the chief foreign countries of the world, together with a critical introduction and complete index. Ten years of the legislation of the British Empire—1898 to 1907—with a valuable introduction by Lord Rosebery have been collected in four large volumes under the title of "The Legislation of the Empire." Besides the review of legislation the Society publishes in its Journal articles upon a variety of topics, including international law. The subscription (payable to the Society's Bankers, Messrs. Child & Co., 1, Fleet Street, London), is one guinea, which entitles the subscriber to all Journals published during the year.

## CORONA CLUB.

The Corona Club was founded by Mr. Chamberlain in 1900 with the object of providing an annual opportunity for Officers on leave from the Colonies to meet socially with each other, the members of the Colonial Office, and retired officers of the Colonial Service.

In pursuance of this idea, an Annual Dinner is held, usually about the second or third week in June, under the presidency of the Secretary of State for the Colonies for the time being. The dinner concludes with a short speech by the Secretary of State, after which those present are enabled to move freely about and converse with the Secretary of State and with each other.

Membership of the Club is open to all past and present members of the Government service in the Colonies, Protectorates and Mandated Territories administered by the Colonial Office, and of the Colonial Office itself and the Office of the Crown Agents for the Colonies, irrespective of rank.

The annual subscription to the Club is 5s., which goes towards printing, clerical assistance and other necessary expenses, any balance being devoted to reduction of the cost of the dinner. A compounded payment of £2 2s. secures life membership of the Club.

Full particulars may be obtained from the Honorary Secretary, C. J. Jeffries, O.B.E., Colonial Office.

## THE CEYLON ASSOCIATION IN LONDON.

*President*—W. Shakespeare.

*Vice-President*—D. E. Sinclair.

*Secretary*—J. Still.

The Association had its origin in the proposal of the Planters' Association of Ceylon to establish a branch in London, and was formed in 1888 for the purpose of acting, in correspondence with the public bodies in Ceylon, for the protection and furtherance of the general interests of that Colony.

All residents in the United Kingdom interested in Ceylon are invited to become members of the Association, the annual individual subscription being 1l. 1s., and in the case of Firms and Companies in proportion to interests represented.

The Offices at 6, Laurence Pountney Hill, Cannon Street, where the Ceylon newspapers and other publications connected with the Colony are taken in, are daily open to members.

The affairs of the Association are managed by the Council.

The office-bearers and the Council are elected annually in general meeting.

Membership:—Companies and Agencies, 195; Private Members, 392.

6, Laurence Pountney Hill, Cannon Street, E.C. 4.

Telephone—Mansion House 4872.

### THE ASSOCIATION OF BRITISH MALAYA.

The Association of British Malaya was formed in May, 1920, and is composed of persons living and who have lived in the Malay Peninsula and who are connected with British Malaya by professional or commercial ties. Members must be British subjects. The Association absorbed the London membership of the Straits Settlements Association which had existed for many years.

#### *The Objects of the Association are:—*

To form a powerful body of opinion on all subjects of public interest in British Malaya and to represent that opinion wherever it is likely to carry most weight.

To support the best ideals and traditions of British Administration, both in the Straits Settlements and in the Malay States.

To support all sound proposals for the clear benefit of the Colony or the Malay States, whether they emanate from those charged with the Administration or otherwise.

To represent and, if possible, secure remedies for real grievances affecting considerable interests.

To keep in close touch with all interests in British Malaya, such as Tin Mining and the Smelting of Tin Ore, Rubber Planting and all other forms of Agriculture, Mercantile, Shipping and Banking interests, Legal opinion, Chinese affairs, the managements of all classes of labour, the welfare of the Malay population and questions of Health and Education.

To establish locally a corresponding Committee with an equal representation from the Colony and from the Malay States who shall advise on all questions that may arise in respect of any of the above interests and who shall keep the Association fully informed of all facts and arguments connected therewith.

*President*—H. B. Ward.

*Secretary*—Oliver Marks, C.M.G., Yeoman House, 31, Haymarket, S.W. 1.

### THE WEST INDIA COMMITTEE.

*Established circa 1750. Incorporated by Royal Charter, August 4th, 1904.*

Telegrams: "Carib, London." Telephone: Royal, 2200 (2 lines).

*President*—The Rt. Hon. The Viscount Elibank.

*Vice-Presidents*—The Rt. Hon. The Viscount Burnham, G.C.M.G., C.H., P.C.; The Rt. Hon. The Lord Olivier, P.C., K.C.M.G., C.B.

*Chairman*—Sir Eliot A. de Pass.

*Deputy-Chairman*—Lieut. Colonel I. B. Dawson, O.B.E., T.D.

*Hon. Treasurers*—Sir Alfred Sherlock, T. Greenwood, H. J. J. Freeman, J. G. Miller and C. W. Gurney.

*Bankers*—Barclays Bank (Dominion, Colonial & Overseas).

*Secretary*—Sir Algernon Aspinall, C.M.G., C.B.E.

The West India Committee is an incorporated association of Planters, Merchants, and others interested in the British West Indies, British Guiana and British Honduras. The object of The West India Committee is to promote the general welfare of those Colonies, and by united action to further their interests. Only British subjects are eligible for membership.

The West India Committee also acts as the representative in Great Britain of various West Indian organizations, having for their object the welfare of their colonies, notably the Jamaica Tourist Trade Development Board and the Bahamas Development Board.

The annual subscription for membership is £1 5s. 0d. or \$6 for individuals and £3 3s. 0d. for firms, companies and associations, which entitles the subscriber to receive the *West India Committee Circular*. Subscription for Life Membership, for individuals, £10 10s. 0d. There is no entrance fee; but new Members are invited to contribute to The West India Committee Endowment Fund.

The West India Committee Rooms are conveniently situated upon the first floor at 14, Trinity Square, London, E.C.3, near Mark Lane Station upon the Metropolitan and District Railways, and form a useful rendezvous for ladies and gentlemen from the West Indies when they visit their merchants in the City. Writing materials are provided, and in addition to all Official Gazettes, Parliamentary Papers, etc., all the West Indian newspapers are, through the courtesy of their editors, filed.

*Honorary Correspondents.*

Antigua, Mrs. W. M. McDonald.  
 Barbados, J. H. Wilkinson; H. B. G. Austin,  
 O.B.E.; H. H. Baird.  
 British Guiana, B. H. Bayley.

R. W. Lisle Carr, *Travelling Secretary*.

E. K. Waldoock, *Advertisement Manager, "Overseas" Magazine*.

A. W. Attoe, *Manager, Travel Bureau*.

*Objects.*

The Over-Seas League is a non-party society of British subjects residing in all parts of the world. Its underlying motive is to promote the unity of British subjects.

Its four chief objects are :—

- (1) To draw together in the bond of comradeship British people all the world over.
- (2) To render individual service to our Empire.
- (3) To maintain the power of the Empire and to hold to its best traditions.
- (4) To help one another.

*Members' Creed.*

Believing the British Empire to stand for justice, freedom, order and good government, we pledge ourselves, as citizens of the British Commonwealth of Nations, to maintain the heritage handed down to us by our fathers.

The Over-Seas Club was founded on August 27th, 1910, and, in March, 1918, amalgamated with the Patriotic League of Britons Over-seas, a Society organised in 1914 for the purpose of enabling British residents in foreign countries to contribute their share towards the defence of the Empire. The Over-Seas Club was granted a Royal Charter of Incorporation in 1922 under the name of the Over-Seas League. The Headquarters of the Over-Seas League is situated in Vernon House, and 3-5, Park Place, St. James's Street, S.W.1.

In addition to the headquarters offices, the premises consist of reading, writing and smoking rooms, dining room, billiard room, card room, drawing room, ladies' rest room, information bureau, travel bureau and the usual amenities of a first-class club, including bedrooms available for members.

*Membership Fees.*

All fees include the monthly magazine "Overseas."

## IMPERIAL CONFERENCE.

The Imperial Conference was constituted under the terms of the first resolution of the Colonial Conference of 1907, which ran as follows:—

"That it will be to the advantage of the Empire if a Conference, to be called the Imperial Conference, is held every four years, at which questions of common interest may be discussed and considered as between His Majesty's Government and His Governments of the self-governing Dominions beyond the seas. The Prime Minister of the United Kingdom will be *ex-officio* President, and the Prime Ministers of the self-governing Dominions *ex-officio* members, of the Conference. The Secretary of State for the Colonies will be an *ex-officio* member of the Conference and will take the chair in the absence of the President. He will arrange for such Imperial Conferences after communication with the Prime Ministers of the respective Dominions.

Such other Ministers as the respective Governments may appoint will also be members of the Conference—it being understood that, except by special permission of the Conference, each discussion will be conducted by not more than two representatives from each Government, and that each Government will have only one vote.

That it is desirable to establish a system by which the several Governments represented shall be kept informed during the periods between the Conferences in regard to matters which have been or may be subjects for discussion, by means of a permanent secretarial staff, charged, under the direction of the Secretary of State for the Colonies, with the duty of obtaining information for the use of the Conference, of attending to its resolutions, and of conducting correspondence on matters relating to its affairs.

That upon matters of importance requiring consultation between two or more Governments which cannot conveniently be postponed until the next Conference, or involving subjects of a minor character or such as call for detailed consideration, subsidiary Conferences should be held between representatives of the Governments concerned specially chosen for the purpose."

The following further resolution was passed at the Imperial War Conference, 1917:—

"That the Imperial War Conference desires to place on record its view that the resolution of the Imperial Conference of 20th April, 1907, should be modified to permit of India being fully represented at all future Imperial Conferences and that the necessary steps should be taken to secure the assent of the various Governments in order that the next Imperial Conference may be summoned and constituted accordingly."

This resolution was duly communicated to the Governments of the self-governing Dominions, all of which agreed to the proposal.

The Irish Free State, which was constituted as a self-governing Dominion in 1922, was first represented at the Imperial Conference of 1923.

Prior to the Conference of 1907 there were four Colonial Conferences (three in London and one in Ottawa). A brief account of these five Conferences follows :—

The invitations to the Conference of 1887, despatched by Mr. Stanhope in November, 1886, met with a prompt response in all quarters ; they were addressed to the Governors of all the Colonies in view of the celebration of the Jubilee of the reign of Her Majesty Queen Victoria. All the then self-governing Colonies sent delegates, as well as Natal and Western Australia, and representative gentlemen from some of the larger Crown Colonies attended meetings at which matters of interest to these dependencies were discussed. The proceedings were opened on the 4th of April with an address from the President, Sir Henry Holland, afterwards Viscount Knutsford, in which he reviewed the progress of the Empire during Her Majesty's reign and indicated the object for which the Conference had been summoned. The most prominent question discussed was the organisation of Colonial Defence, and an important agreement was arrived at for the increase of the Australasian Squadron. Five fast cruisers and two torpedo gunboats were to be added to the squadron, the Colonies paying, for maintenance and depreciation of these vessels, 126,000*l.* per annum for ten years. All the Colonial Legislatures passed the necessary legislation for giving effect to this arrangement, and vessels for service on the Australasian Station reached Australia in September, 1891. The defence of the important stations of King George's Sound and Thursday Island were also fully discussed, but no final decision was arrived at. It was also agreed that an Imperial Officer should be selected to inspect the Colonial forces and military defences. Among the other questions which came before the Conference were the provision for the Government of British New Guinea, and it was agreed that Queensland, acting with New South Wales and Victoria, should contribute 15,000*l.* a year for ten years for this purpose, the Imperial Government undertaking to provide a suitable steamer and maintain it for three years at an estimated cost of 29,000*l.* Queensland passed the necessary legislation in 1887, and the proclamation of sovereignty over the territory took place on the 4th September, 1887. Dr. (afterwards Sir William) MacGregor was selected as the first administrator of the new colony.

A full interchange of views on the relations of the Australasian Colonies with the Islands in the Pacific took place between Her Majesty's Government and the Colonial delegates, and the Conference unanimously approved the position taken up with regard to Samoa, and also the proposal for a joint Anglo-French Naval Commission for the preservation of the neutrality of the New Hebrides.

Among other questions discussed were the Australian and Pacific Mail services, telegraphic communication with Australia, the proposal for an Imperial Penny Post, the adoption of similar legislation with regard to merchandise marks and patents, and the enforcement of Colonial judgments and Orders in Bankruptcy.

In pursuance of the arrangement as to the inspection of the local forces of Australasia referred to above, Major-Gen. Sir Bevan Edwards, K.C.M.G., C.B., visited all the principal Colonies during 1890, and inspected their forces and defences. One important result of his report was that it showed the importance of a closer union of the Australasian Colonies, and at the instance of Sir H. Parkes, the Premier of New South Wales, an Inter-colonial Conference was held in Melbourne during 1890, to consider the question of Federation. The result of its proceedings and also of the proceedings of the Federation Convention which followed will be found in the account of Australia. A Conference of Australasian Prime Ministers was held at Hobart in 1895 to discuss the question, and measures were passed by all the Colonies except Queensland for the election of delegates (ten from each Colony) to draft a Constitution Act. The delegates were elected in February, 1897, and prepared the basis of a constitution. The later developments are described under the heading "Australia."

During 1894 a Colonial Conference was held at Ottawa, on the invitation of the Dominion Government, to consider the question of trade and communications between the Colonies, and between the Colonies and the Mother Country. Delegates attended from New South Wales, Victoria, Queensland, South Australia, Tasmania and New Zealand and from the Cape Colony, and important resolutions were passed urging the removal of legislative or treaty obstacles to preferential tariff treatment within the Empire, the establishment of a mail service between Great Britain and Australasia, via Canada, and the connection of Canada and Australasia by a cable under British control. A Committee of representatives of the Imperial and Colonial Governments was appointed in 1896 to consider the question of this cable, and eventually the execution of the project was decided on and a Board constituted to manage the undertaking. The work of laying was commenced in 1902.

The distinguishing event of the year 1897 was the celebration of the completion of the sixtieth year of the reign of Queen Victoria. Early in the year invitations were addressed to the Prime Ministers of all the self-governing Colonies to attend the celebration in London as guests of the Queen. The Prime Ministers, eleven in number, accepted and attended. Advantage was taken of their presence to hold a conference between them and the Secretary of State for the discussion of various questions of common interest. The proceedings were private, but a summary was presented to Parliament (C. 8596, July, 1897), in which were published the opening address by Mr. Chamberlain, setting forth the subjects of discussion, a short statement by Mr. Goschen on the question of naval defence, with special reference to the Australian naval agreement, and the resolutions arrived at by the Conference. It was generally agreed that the meeting had been most conducive to the interests of the Empire, and that it would be well to hold similar meetings in the future when occasion offered. As a result of a resolution passed at the Conference the existing commercial treaties with Germany and Belgium were denounced on the 30th of July, in order that the fiscal relations between the Mother Country and the Colonies might be completely independent of fiscal relations with foreign countries. This question had been brought prominently to the front by a Tariff Act passed in Canada, giving preferential treatment to the Mother Country, and the resolution was passed unanimously by the Conference largely in consequence of the urgent request of the Dominion Government. The matter of Imperial defence received much attention, and an offer was made by Sir J. Gordon Sprigg, on behalf of Cape Colony, to present a first-class battleship as a contribution to the British navy—for which a contribution in money was afterwards substituted.

Advantage was taken of the presence in London of the Prime Ministers of the self-governing Colonies in connection with the Coronation of King Edward VII, in 1902, to discuss with them various important questions of general interest, especially the political and commercial relations of the Empire and its naval and military defence. In the result a very considerable improvement was arranged, subject to the approval of the Parliaments concerned, in the terms of the Australasian Naval Agreement, by which the effectiveness of the squadron to which it related, as part of the naval force of the Empire, was to be greatly increased, and the amount of the Colonial contribution towards the maintenance of the squadron raised from 126,000*l.* a year to 240,000*l.* The Premiers of Cape Colony and Natal intimated their desire to increase their unconditional contributions to the Navy from 30,000*l.* and 12,000*l.* to 50,000*l.* and 35,000*l.* respectively. Newfoundland agreed to contribute 3,000*l.* a year towards the expense of a branch of the Royal Navy Reserve established in the Colony, on the condition that the number should be raised to 600 men. Various important resolutions were passed respecting commercial relations.

The last Colonial Conference (hereafter to be designated the Imperial Conference) was held in 1907, in which the Prime Ministers of all the self-governing Colonies took part, including the Transvaal, where the first elections under responsible government had just taken place. At the opening meeting, on April 15th, Sir Henry Campbell-Bannerman welcomed the Colonial representatives on behalf of His Majesty's Government in the United Kingdom.

**Conference of 1907.**  
(See Cd. 3523.)

The primary subject for consideration was that of the future Constitution of the Conference, raised by Mr. Lyttelton's despatch of 20th April, 1905, proposing the establishment of an Imperial Council. The resolution adopted (which is quoted above) provided for the meeting of an Imperial Conference every four years between His Majesty's Government and the Governments of the self-governing Dominions beyond the Seas, with the Prime Minister of the United Kingdom as *ex-officio* President, the Secretary of State for the Colonies taking the chair in his absence; and also provided that a permanent secretarial staff should attend to the business of the Conference during the period between its meetings. In the course of discussion Lord Elgin undertook so to alter the organisation of the Colonial Office that there should be a separate division dealing with the self-governing Dominions. The manner in which this undertaking was carried out by him is explained in his despatch of 21st Sept., 1907 (Cd. 3795).

The Conference affirmed the need of developing a General Staff, selected from the forces of the Empire as a whole, to study military science in all its branches. With regard to naval defence, Australia indicated a desire to make provision for a local force, diverting to its service the subsidy paid to the Admiralty under the Naval Agreement.

The members of the Conference, with exception of His Majesty's Government in the United Kingdom, re-affirmed the resolutions of the Conference of 1902 on the subject of Preferential Trade within the Empire, His Majesty's Government being unable to admit that it was necessary or expedient to alter the fiscal system of the United Kingdom.

Among other subjects brought before the Conference were the improvement of mail communication with Australia, *via* Canada, the promotion of emigration to British Colonies, the adoption of uniform conditions of naturalisation throughout the Empire, uniformity in Company law, in trade statistics and in trade marks and patents, and the codification of the rules governing appeals to the Judicial Committee of the Privy Council.

In consequence of the Parliamentary discussions concerning the naval position which took place in March, 1909, the offers of "Dreadnoughts" from New Zealand and Australia, and the Resolution passed by the Canadian House of Commons on the 29th March, His Majesty's Government decided to convene a special conference to discuss Naval and Military Defence, under the terms of Resolution I. of the Conference of 1907. The Conference, at which all the then self-governing Dominions were represented, met for the first time on the 28th July, 1909, and for the last on the 19th August. The main results of the Conference were as follows:—

**Defence Conference, 1909.**  
(See Cd. 4948.)

- (1.) The offers of New Zealand and of Australia to contribute a battleship each were accepted, with the substitution of cruisers of the new "Indomitable" type for battleships. The two ships were to be kept one on the China and the other on the Australian Station.
- (2.) Australia was to provide and maintain, with some temporary assistance from Imperial funds, an Australian unit of a general Pacific Fleet. The unit was to consist of a cruiser of the "Indomitable" type, three second-class cruisers of the "Bristol" type, six destroyers of the "River" class, and three submarines of "C" class.

- (3.) Canada was to make a start with cruisers of the "Bristol" class and destroyers of an improved "River" class.
- (4.) New Zealand was to continue her policy of a money contribution to be spent on the China unit of the Pacific Fleet. The cruiser of the "Indomitable" type given by New Zealand was to be the flagship of this unit.
- (5.) In regard to military defence, a plan was drawn up in outline for so organizing the forces of the Crown, wherever they might be, that they might be capable of being rapidly combined into one homogeneous Imperial army.

The South African delegates were not, of course, in a position to submit or approve any definite proposals as the Union of South Africa was then in process of establishment.

In accordance with the agreement arrived at at the Defence Conference, the Commonwealth of Australia placed orders through the Admiralty for the Second Class Cruisers required; Canada purchased the "Rainbow" and "Niobe"; orders were placed for the cruiser to be given by New Zealand, and in Canada and Australia Naval Defence Acts were passed, under which the Naval Defence Forces are governed by principles similar to those in force in the Imperial Navy.

In 1910 a Subsidiary Imperial Conference was convened to consider the subject of Imperial copyright. The Conference was held in May and June, and discussed fully the questions of the maintenance of the unity of copyright legislation throughout the Empire, and the desirability of the Empire accepting the Revised Copyright Convention of Berlin (1908). The Governments of all the Dominions were represented, and important resolutions were passed in favour of the adoption of a uniform copyright law for the Empire, and in favour of the acceptance of the Revised Copyright Convention, subject to certain reservations and, in particular, to the right of any self-governing Dominion to limit the obligations imposed by the Convention to works, the authors of which are subjects or citizens of a country of the union or *bona fide* residents in such a country. In accordance with the resolutions of the Conference an Imperial Copyright Act was passed in 1911. Legislation adopting its provisions was passed by the Commonwealth of Australia and Newfoundland in 1912, and by the Union of South Africa in 1916, and an Act, based on the Imperial Act, was passed in New Zealand in 1913. Legislation on the subject of copyright was also passed in Canada in 1921 and 1923, and came into effect on 1st January 1924.

Steps were taken in accordance with the fifth resolution of the Conference of 1907 to pass new Orders in Council respecting appeals from the Supreme Courts of New Zealand, the six Australian States, the provinces of Nova Scotia, New Brunswick, Prince Edward Island, Manitoba, British Columbia, Alberta and Saskatchewan, while Orders in Council respecting procedure were passed in respect of the Commonwealth of Australia, and the Union of South Africa. In accordance with the wishes of the Conference, steps were taken for the appointment of Trade Commissioners in the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa, and a paid correspondent of the Board of Trade was appointed in Newfoundland. These officers per form with regard to matters of trade much the same functions as are performed by His Majesty's consuls in foreign countries.

Steps were taken to secure greater uniformity in the laws of the Dominions with regard to trade marks and patents. Moreover, the trade statistics of the Dominions were modified with a view to showing more clearly the trade with the United Kingdom, British possessions, and foreign countries.

Uniformity in company law was, in part, effected by legislation in the Transvaal in 1909, in Victoria in 1910, and in British Columbia. Moreover, the legislation of the Parliament at Westminster was consolidated in 1908. Arrangements were made to hold in April, 1911, a subsidiary conference with regard to reciprocity in the examination and authorization of surveyors throughout the Empire, at which the Dominion of Canada, the Commonwealth of Australia, all the Australian States (except South Australia) and New Zealand were represented.

The question of naturalization was considered by an Inter-departmental Committee in 1908. Its report was forwarded for the consideration of the Dominions, and the question received further discussion at the Imperial Conference of 1911.

Steps were taken for the introduction of a silver currency in the Commonwealth of Australia, and, by an Order in Council of the 23rd January, 1911, the operation of the Imperial Act of 1870 was revoked so far as the Commonwealth is concerned.

The Radiotelegraphic Convention of 1906 was adhered to by the Dominion of Canada, the Union of South Africa, the Commonwealth of Australia, and the Dominion of New Zealand. A Bill was prepared for introduction into the Imperial Parliament, with a view to facilitating marriages in this country of persons coming from British Dominions and Colonies.

Steps were taken to secure a reduction in the Suez Canal dues.

Correspondence relating to Conference Work from May, 1907 to July, 1910, was published in Cd. 5273.

In accordance with the Resolution of the Conference of 1907, the first Conference which was officially styled "Imperial" was held in May and June, 1911. The

**Imperial Conference,** Prime Minister of the United Kingdom presided, the chair being taken in his absence by the Secretary of State for the Colonies, 1911, and, on one occasion, by the Prime Minister of Canada. The Prime (See Cd. 5745.) Ministers of all the Dominions were present, besides two other Ministers from Canada, Australia and the Union of South Africa, one other Minister from New Zealand and one from Newfoundland. The question of the constitution of the Conference and the reconstruction of the Colonial Office was considered at length, but a majority of the representatives were of opinion that no fundamental change was necessary.

The Conference also considered the question how far the Dominion Governments could be consulted with regard to Treaties, with special reference to the fact that the Declaration of London of 1908 was not submitted to the Dominions for approval before it was concluded. The representatives of His Majesty's Government in the United Kingdom proposed, and the representatives of the Dominions agreed, that in future the Dominions should be afforded an opportunity of consultation when the instructions to be given to British delegates at meetings at the Hague Conference were being framed, that Conventions affecting the Dominions provisionally assented to at that Conference should be circulated to the Dominion Governments before they were officially signed, and that a similar procedure, where time and opportunity and subject matter permitted, should, as far as possible, be used when preparing instructions for the negotiation of other international agreements affecting the Dominions. It was also agreed that, with a view to relieving the Dominions of obligations under "most favoured nation" clauses in Treaties concluded years ago and binding on the Dominions, His Majesty's Government should open negotiations with several foreign Governments having such Treaties with a view to securing liberty of any Dominion to withdraw from the operation of the Treaty without impairing the Treaty as respecting the rest of the Empire.

The question of an Imperial Court of Appeal was discussed at length, and it was proposed, and accepted that two Lords of Appeal should be added to the number of four already existing so that their services might be available both for service in the House of Lords and for service on the Judicial Committee.

The question of emigration to the Dominions also came up. The President of the Local Government Board showed that the numbers then emigrating were fully as large as could safely be spared by the United Kingdom. It was agreed that the present policy of encouraging British emigrants to proceed to British Dominions rather than to foreign countries should be continued and that full co-operation should be accorded to any Dominion desiring immigrants.

The discussion of the question of Naturalisation resulted in an Agreement on the main principles on which Naturalisation in one of the Dominions should be recognised in other parts of the Empire.

The question of improved Cable communications was considered and the Postmaster General of the United Kingdom was able to announce the prospect of important reductions from January 1st, 1912, in rates for deferred messages and in Press Cables. It was also agreed that a chain of Wireless Telegraph Stations should be constructed from the United Kingdom, *via* Cyprus, Aden, Bombay and Singapore, to some point in Australia from which there would be communication over the land lines to other parts of Australia, and from Australia both by cable and by wireless telegraphy to New Zealand. It was also agreed that the Pacific Cable Board should be authorised to lay a cable between Australia and New Zealand. The Governments of Canada and Australia undertook to consider favourably the extension of the Imperial Postal Order system and a resolution in favour of the lowering of the postal rates generally was agreed to.

In order to render possible further co-operation in commercial relations it was agreed that a Royal Commission should be appointed representing the Home and Dominion Governments with a view to investigating and reporting upon the natural resources of each part of the Empire represented at the Conference, the development attained and attainable, the facilities for production, manufacture and distribution, the trade of each part with the others and with the outside world, the food and raw material requirements of each and the sources thereof available, the extent, if any, to which the trade between each of the different parts had been affected by existing legislation in each, either beneficially or otherwise, and the methods by which, consistently with the existing fiscal policy of each part, the trade of each part with the others might be improved and extended.

It was agreed that all practical steps should be taken to secure uniformity of treatment of British shipping, to prevent unfair competition with British ships by foreign subsidized ships, to secure to British ships equal trading advantages with foreign ships, to promote the employment of British seamen on British ships, and to raise the status and improve the conditions of seamen employed on such ships. Proposals were made by the Dominion of New Zealand with the support of the Dominion of Canada for the grant of wider legislative powers in respect of shipping to the Oversea Dominions, but the Resolution was not accepted by the Governments of the United Kingdom, the Commonwealth of Australia, the Union of South Africa and Newfoundland.

In connection with the question of Merchant Shipping a discussion took place as to the treatment of British Indians in the Self-Governing Dominions. The Secretary of State for India (Lord Crewe) made a statement in which he pointed out that, while it was the undoubted right of the Self-Governing Dominions to determine in what manner their communities should be composed, and therefore to restrict in such way as they thought fit Indian immigration, it was important that this should

be done in a way compatible with the comity due to the Indian people, and that in all cases in which Indians were permitted to enter the Dominions or were domiciled therein due respect should be paid to their rights.

The principles laid down by Lord Crewe were accepted by the representatives of the Dominion Governments.

It was agreed to consider how far it was possible to make arrangements with a view to the enforcement in one part of the Empire of Judgments and Orders of the Courts of Justice in another part. Resolutions were also passed in favour of uniformity in the law of copyright, patents, trade-marks, companies and workmen's compensation. The questions of provision for deserted wives and children, the celebration of His Majesty's Birthday, and the Suez Canal Dues were discussed, and it was agreed that concerted action should be taken by all the Governments of the Empire to promote better trade and postal communications between the United Kingdom and the Oversea Dominions, and in particular to discourage shipping conferences or combines in so far as the operations of such conferences were prejudicial to trade.

Before separating the Conference agreed that it was desirable that between Conferences there should be interchange of visits between Ministers of the United Kingdom and Ministers of the Dominions and that His Majesty's Government in the United Kingdom should take into consideration the possibility of holding a meeting of the Conference, or a subsidiary Conference, in one of the Oversea Dominions.

After the termination of the Conference of 1911, steps were taken to carry out the several recommendations made. Agreements were made with the Governments of

#### Action on Resolutions of 1911 Con- ference.

Sweden, Norway, Denmark, France, Costa Rica, and Colombia, authorising His Majesty's Government to terminate on twelve months notice the application of the Commercial Treaties with those Powers with regard to all or any of the self-governing Dominions. Similar power was obtained in the case of the Commercial Treaty with Switzerland. An Act was passed by the Parliament at Westminster to add two Lords of Appeal, available for service in the House of Lords and on the Judicial Committee, and to increase to seven the number of Judges of the Courts of the Oversea Dominions who may be members of the Judicial Committee. In accordance with this provision, the Hon. Sir Joshua Williams, senior Puisne Judge of the Supreme Court of New Zealand, became a member of the Judicial Committee. The Bill on Naturalization, which it was proposed to introduce into the Imperial Parliament, was re-drafted in accordance with the views of the Imperial Conference, and passed into law under the title of the "British Nationality and Status of Aliens Act, 1914." Legislation has been also passed in Canada and Newfoundland with effect from 1915, in Australia with effect from 1921, in South Africa with effect from 1923, and in New Zealand in 1928. Legislation was passed providing for the laying of the cable by the Pacific Cable Board between Australia and New Zealand, and the work was successfully carried out. Reductions were made in cable rates between the United Kingdom and the Oversea Dominions (including the establishment of week-end telegrams in addition to deferred rates).

A Royal Commission was appointed to investigate and report upon the natural resources and trade of the Empire. The Commission was composed as follows :—

Lord D'Abernon, G.C.M.G., *Chairman*  
 Sir Alfred Bateman, K.C.M.G.  
 Sir H. Rider Haggard, K.B.E.  
 Mr. T. Garnett  
 Sir W. Lorimer  
 Mr. J. Tatlow

} Representing the United Kingdom :

The Right Hon. Sir George E. Foster, G.C.M.G., LL.D., Minister of Trade and Commerce, representing the Dominion of Canada ;  
 Mr. Donald Campbell, LL.B., representing the Commonwealth of Australia ;  
 Sir J. R. Sinclair, representing the Dominion of New Zealand ;  
 Sir J. W. S. Langerman, representing the Union of South Africa ;  
 The Hon. Sir E. R. Bowring, representing Newfoundland.

The Commissioners took evidence in London on several occasions, and also visited New Zealand, Australia, the Union of South Africa, Newfoundland, the Maritime Provinces of Canada, and Central and Western Canada. They submitted, in all, 15 volumes of minutes of evidence, three statistical volumes (dealing respectively with the Food and Raw Material Requirements of the United Kingdom, the Trade Statistics and Trade of the Dominions, and the Chief Harbours of the British Empire and Foreign Countries), five Interim Reports, and a Final Report [Cd. 8462]. The enquiry was delayed by the outbreak of war and was only completed in the early part of 1917. The Reports deal mainly with the following subjects :—Conservation and development of Natural Resources, Scientific Research, Migration, Oversea Communications (including Harbour Development and Telegraph and Wireless Services), Unification of Legislation, and the creation of an Imperial Development Board.

Representatives of Canada, the Commonwealth, New Zealand, and the Union of South Africa took part, in 1912, in the International Radiotelegraph Conference held in London and signed the Convention arrived at, which was subsequently ratified.

The Right Hon. Sir Herbert Samuel, G.B.E., then Postmaster General of the United Kingdom, visited Canada in the autumn of 1913, in accordance with the suggestion of the Conference for interchange of visits by Ministers, and several visits were paid to the United Kingdom by Ministers from the Dominions.

Contemporaneously with the meetings of the Imperial Conference in 1911, conferences took place between the Admiralty and representatives of the Dominion of Canada and the Commonwealth of Australia. The

**Defence.** result of these conferences was laid before, and approved by, the Imperial Conference. An agreement was made as to the control of the naval services and forces of the Dominions of Canada and Australia, the limits of the naval stations to be allotted to them, and the mode of procedure to be adopted when vessels of the Dominion navies proceeded beyond the limits of their respective stations, whether to ports of the British Empire or to foreign ports. Military defence was discussed at a Committee of the Imperial Conference on the 14th and 17th of June, and the proceedings of that Committee were laid before, and approved by, the Imperial Conference (Cd. 5746-2). The two battle cruisers of the "Indomitable" type, H.M.A.S. "Australia" and H.M.S. "New Zealand," and also two cruisers of the "Bristol" type, H.M.A.S. "Melbourne" and H.M.A.S. "Sydney," constructed as a result of the Conference of 1909, were completed and in commission during the Great War. The "Brisbane" was constructed in the Government Dock, Sydney, and launched on 30th September, 1915.

On the 10th December, 1912, the Secretary of State for the Colonies addressed a despatch to the Governors-General of Australia and the Union of South Africa and to the Governors of New Zealand and Newfoundland, on the subject of the representation of the Dominions on the Committee of Imperial Defence. This despatch communicated the text of resolutions which had been adopted on May 30th, 1911, at a meeting of the Committee of Imperial Defence and which were to the effect that one or more representatives appointed by the respective governments of the Dominions should be invited to attend meetings of the Committee of Imperial Defence when questions of naval and military defence affecting the overseas Dominions were under consideration, and that the proposal that a Defence

Committee should be established in each Dominion was accepted in principle. It was stated that, the Canadian Government having changed in the Autumn of 1911, it was necessary to put the proposals before Mr. (afterwards Sir R.) Borden and his colleagues when they visited London in 1912, and that Mr. Borden had provisionally accepted the resolutions and had stated that he saw no difficulty in a Minister of the Dominion Government spending some months of every year in London in order to carry out the intention. Mr. Borden had also expressed the desire that the Canadian and other Dominion Ministers who might be in London as members of the Committee of Imperial Defence should receive in confidence knowledge of the policy and proceedings of the Imperial Government in foreign and other affairs. It had been pointed out to Mr. Borden that the Committee of Imperial Defence was a purely advisory body and could not become a body deciding on policy which must remain the sole prerogative of the Cabinet, subject to the support of the House of Commons. But any Dominion Minister resident in the United Kingdom would at all times have free and full access to the Prime Minister and the Secretaries of State for Foreign and Colonial Affairs for information on all questions of Imperial policy. From Mr. Borden's speech in introducing the Canadian Naval Bill, it appeared that he accepted the proposals, and the same offer was open to all the other self-governing Dominions if they wished to adopt it, but it could be varied in the case of each or any Dominion to suit their wishes or the special circumstances of their case. (This despatch and subsequent correspondence were published in Parliamentary Paper Cd. 7347.)

In June, 1914, the Hon. G. H. Perley (afterwards Sir George Perley), a Minister without portfolio of the Canadian Government, came to reside in London as the representative of that Government, and was from time to time summoned to meetings of the Committee of Imperial Defence.

After the Great War had broken out, it was assumed by His Majesty's Government in the United Kingdom that it would not be convenient that the normal Imperial

Conference should meet on its due date in May, 1915, and after communications had taken place with the Prime Ministers of the Dominions in the course of December, 1914, it was definitely decided by general agreement to postpone the Conference. In intimating its postponement to the Dominions, the Secretary of State for the Colonies at the same time informed the Prime Ministers that it was the intention of His Majesty's Government to consult them most fully, and if possible personally, when the time arrived to discuss possible terms of peace.

Up to the end of 1916 every opportunity was taken of confidential consultation and discussion with the Prime Ministers and other Ministers of the self-governing Dominions on matters connected with the progress of the war. Thus the Prime Minister of Canada (Sir R. Borden) in 1915, and the Prime Ministers of the Commonwealth of Australia and New Zealand (Mr. Hughes and Mr. Massey) as well as Sir J. Ward (New Zealand) in 1916, attended meetings of the Cabinet in London during their stay in the United Kingdom, and Mr. Hughes and Sir G. E. Foster (Canadian Minister of Trade and Commerce) were two of the delegates of His Majesty's Government at the Paris Economic Conference in June, 1916.

When Mr. Lloyd George assumed office as Prime Minister in December, 1916, he announced, in the course of his speech in the House of Commons on December 19th, that it was proposed to summon an Imperial Conference at an early date in order to place the whole position before the Dominions and to take counsel with them as to the best means of securing an early and complete triumph. To this Conference representatives of India as well as of all the then self-governing Dominions were invited. All were able to attend with the exception of representatives of Australia, who were prevented from being present by the approach of a general election.

It was arranged that the meetings should take two forms. In the first place the overseas representatives were made temporarily members of the War Cabinet, which thus became, for the time being, an Imperial War Cabinet, an event subsequently described by Mr. Lloyd George as a "memorable landmark in the constitutional history of the British Empire." Whilst the Imperial War Cabinet was in session the overseas members had access to all the information which was at the disposal of His Majesty's Government in the United Kingdom and occupied a status of absolute equality with that of the members of the War Cabinet. It had prolonged discussions on all the most vital aspects of Imperial Policy. Its conclusions were necessarily secret, but it was announced that important decisions were reached which would be of the greatest value not only in the prosecution of the war but also when the time came for negotiations for peace.

At the conclusion of its sittings the Prime Minister of the United Kingdom announced that the Imperial War Cabinet was unanimous that the new procedure had been of such service, not only to its members but to the Empire, that it ought not to be allowed to fall into desuetude. Accordingly he proposed, on behalf of His Majesty's Government, that meetings of an Imperial Cabinet should be held annually, or at any intermediate time when matters of urgent Imperial concern required to be settled, and that the Imperial Cabinet should consist of the Prime Minister of the United Kingdom, and such of his colleagues as deal specially with Imperial Affairs, of the Prime Ministers of each of the Dominions or some specially accredited alternate possessed of equal authority, and of a representative of the Indian people to be appointed by the Government of India. He hoped that the holding of an annual Imperial Cabinet would become an accepted convention of the British Constitution.

From the time of the meetings of the Imperial War Cabinet 1917, full confidential information with regard to the progress of the War was communicated by the Prime Minister of the United Kingdom to the Prime Ministers of the Dominions. In the following year information with regard to foreign affairs began to be regularly communicated in a similar manner.

Concurrently with the sittings of the Imperial War Cabinet, there was held an Imperial War Conference presided over by the Secretary of State for the Colonies, the special work of which was, to use the terms of an address which it presented to His Majesty the King, "to consider the steps that may be required to ensure that the fruits of victory may not be lost by unpreparedness in times of peace, and so to develop the resources of the Empire that it may not be possible hereafter for an unscrupulous enemy to repeat his outrages upon liberty and civilization." Much of the business of the Conference was necessarily of a highly confidential character, but it was found possible to publish, soon after it terminated, the majority of the Resolutions passed, and a part of the discussions.

Reference can only be made here to one or two of the most important of the Resolutions.

One (No. XXI) asserted the principle "that each part of the Empire, having due regard to the interests of our Allies, shall give specially favourable treatment and facilities to the produce and manufactures of other parts of the Empire."

Another Resolution (No. IX) dealt with the future constitution of the Empire, and placed on record the view of the Conference that "any readjustment of constitutional relations, while thoroughly preserving all existing powers of self-government and complete control of domestic affairs, should be based upon a full recognition of the Dominions as autonomous nations of an Imperial Commonwealth, and of India as an important portion of the same, should recognise the right of the Dominions and India to an adequate voice in foreign policy and in foreign

relations, and should provide effective arrangements for continuous consultation in all important matters of common Imperial concern, and for such necessary concerted action, founded on consultation, as the several Governments may determine."

It was felt, however, that the subject was too intricate and important a one to be dealt with during the war, and the Resolution accordingly laid down that it should be the subject of a special Imperial Conference to be summoned as soon as possible after the cessation of hostilities.

Other of the published Resolutions dealt with the development of the material Resources of the Empire and their utilization for Imperial purposes. Of these one in particular (No. XIII) deserves notice. This advocated the establishment in London of an Imperial Mineral Resources Bureau to be specially concerned with the Mineral Resources and metal requirements of the Empire.

Of the Resolutions affecting India one (No. VII) dealt with its status as a partner State in the Empire, and recommended the full representation of India at all future Imperial Conferences, and another (No. XXII) accepted the principle of reciprocity of treatment between India and the self-governing Dominions.

Mention may be made also of two Resolutions (Nos. VIII and XII) which have resulted in the establishment of a permanent Imperial War Graves Commission, under the presidency of His Royal Highness the Prince of Wales, on which all parts of the Empire are represented. The object of this Commission is to care in perpetuity for the graves of those who have fallen in the common cause of the Empire.

Lastly, a Resolution was passed (No. XV) urging that the system of Double Income Taxation within the Empire should be reviewed as soon as possible after the conclusion of the War.

In order to give the fullest effect possible to Resolution XXI of the 1917 Conference, His Majesty's Government in the United Kingdom appointed a Committee of Ministers to consider the best methods and machinery of giving specially favourable treatment and facilities to the produce and manufactures of other parts of the Empire. In accordance with Resolution XIII, a special Committee, on which the Dominions and the India Office were represented, was appointed to frame a scheme for an Imperial Mineral Resources Bureau.

The proposal for full representation of India at future Imperial Conferences (Resolution VII) was put to the Dominion Governments and gladly concurred in by them.

In accordance with Resolutions VIII and XII, the Imperial War Graves Commission was established, and commenced active work at once.

Several of the other Resolutions were followed by Reports of specially constituted Committees, which formed the basis of the discussions at the Imperial War Conference, 1918.

In the summer of 1918, meetings of the Imperial War Cabinet and Imperial War Conference were again held. The meetings were on this occasion completely representative for the first time of all parts of the Empire since members from Australia were present as well as Ministers from all the other self-governing Dominions, whilst India was also fully represented.

The Imperial War Cabinet was in session from the beginning of June to the middle of August, 1918. In a communique issued at the termination of the meetings it was announced that every aspect of policy affecting the conduct of the war and the question of peace had been examined.

**Imperial War Cabinet 1918 Session.** It was further stated that the meetings had proved of such value that the Imperial War Cabinet had thought it essential that certain modifications should be made in the existing channels of communication

so as to make consultations between the different Governments of the Empire as continuous and intimate as possible. It had therefore been decided that, for the future, the Prime Ministers of the Dominions, as members of the Imperial War Cabinet, should have the right to communicate on matters of Cabinet importance direct with the Prime Minister of the United Kingdom whenever they saw fit to do so. It had also been decided that each Dominion should have the right to nominate a visiting or a resident Minister in London to be a member of the Imperial War Cabinet at meetings other than those attended by the Prime Ministers, and that these meetings would be held at regular intervals, arrangements being made also for the representation of India.

The Imperial War Conference in 1918, as in 1917, was held under the chairmanship of the Secretary of State for the Colonies.

**Imperial War Conference, 1918.** As in the previous year, the greater part of its deliberations was of a confidential nature, but it was found possible to publish a certain part of the discussions, and the great majority of the Resolutions passed.

(See Cd. 9177). Of these Resolutions, the most important (Nos. III, IV and XXIII) dealt with the future economic policy of the Empire with regard to raw materials. It was agreed that it was necessary to secure for the British Empire and the belligerent Allies the command of certain essential raw materials in order to enable them to repair the effects of the war as soon as possible and to safeguard their industrial requirements. The opinion was expressed that the Governments of the British Empire should make such arrangements amongst themselves as would ensure that essential raw materials produced within the Empire should be available for the purposes described, and should arrange with the Allied countries to utilize for the same purposes essential raw materials produced in those countries.

Before the Conference separated, the first steps were taken for practical action in this direction. A Committee of the Conference was appointed to investigate further the particular raw materials determined by the Conference as suitable for post-war control. This Committee's Report was approved by the Conference, and it was laid down that the Governments represented should forthwith consult with the representatives of the producers and trades concerned as to the method of obtaining command best suited to each individual commodity.

Other economic matters dealt with by Resolutions of the Conference were the non-ferrous metal industry (No. II), petroleum (No. XVIII), dyes (No. X), the creation of an Imperial Mineral Resources Bureau (No. XVI), a matter already considered at the 1917 Conference, and post-war supervision of shipping (Nos. XI and XXIV).

As to the latter, the Resolutions passed were to the effect that the Conference accepted in principle the establishment of an Imperial Investigation Board to review shipping on the principal routes, to enquire into and report on all matters connected with ocean freights and facilities, and to consider the development and improvement of the sea communications between the different parts of the Empire with particular reference to the size and type of ships and the capacities of harbours.

The question of communications within the Empire other than shipping also engaged the attention of the Conference, and Resolutions were passed dealing with an Imperial News Service (No. IX), Cable Communications (No. XIV), and Inter-Imperial Parcels Delivery (No. XII). Of these the first stated that the Conference was impressed with the importance of securing an adequate News Service, supplied from British sources to be available in all parts of the Empire, and requested His Majesty's Government in the

United Kingdom to formulate a scheme with these objects in view. The second laid it down that it was in the highest interests of the Empire to reduce materially the rates for telegraphic communications between the United Kingdom and the various Oversea Dominions, and laid stress on the desirability of the co-operation of the various Governments in the provision of a State-owned cable across the Atlantic. The third recommended that the existing facilities for Inter-Imperial Parcels Delivery should be enlarged, improved, and co-ordinated, and recommended the preparation of a detailed scheme for this purpose.

The Conference of 1917 had accepted the principle of reciprocity of treatment between India and the Dominions in the matter of immigration. In 1918 a further Resolution (No. XXI) was passed elaborating the principle already laid down. Specified conditions were agreed to which should regulate in future the admission of British citizen domiciled in any British country, including India, into any other British country for visits for the purpose of pleasure or commerce, including temporary residence for the sake of education. It was further agreed that Indians already permanently domiciled in the other British countries should be allowed on certain specified conditions to bring in their wives and minor children.

Other matters forming the subject of Resolutions of the Conference were the creation of an Imperial Court of Appeal (No. XXII), Naturalization (Nos. XIX and XX), Demobilization (No. XVII), Inter-Imperial Migration (No. XIII), and Imperial Statistics (No VIII).

On the close of hostilities in November, 1918, representatives of all the self-governing Dominions were immediately summoned. They took part, first in the preliminary discussions in London over the Peace negotiations, and secondly in the work of the Peace Conference at Paris.

**Peace Conference at Paris, 1919, and Treaties, &c., arising out of the Peace Settlement.** The Regulations governing the work of the Paris Conference laid down that the British Empire should be represented by five Delegates, and that the British Dominions and India should be represented as follows:—Two delegates each for Australia, Canada, South Africa and India (including the Native States); one delegate for New Zealand. It was added that each delegation had the right to avail itself of the Panel system, and that the representatives of the Dominions (including Newfoundland and India) might besides be included in the representation of the British Empire by the Panel system.

Co-ordination between the various British representatives was secured by frequent meetings and discussions in Paris. A special body was formed for the purpose of these discussions and was known as the "British Empire Delegation"; its secretariat was provided from the officials assisting the representatives of the various parts of the Empire.

Several Dominion Ministers were nominated to, and acted for the British Empire on, the allied Commissions which were appointed to consider various aspects of the condition of peace. Thus Sir R. Borden (Canada) was a member of the Commission on Greek Questions, Mr. Hughes (Australia) of the Commission on Reparation, Mr. Massey (New Zealand) of the Commission on the Responsibility for the War, and General Smuts (South Africa) of the League of Nations Commission.

Sir R. Borden and Sir G. E. Foster had to return to Canada before the completion on the treaty with Germany, and it was signed on behalf of Canada by Mr. Sifton and Mr. Doherty. The other Dominion representatives (Mr. Hughes and Sir J. Cook for Australia, General Botha and General Smuts for South Africa, and Mr. Massey for New Zealand) were able to remain until the Treaty was signed.

Under it, Canada, Australia, New Zealand, the Union of South Africa and India, as well as the "British Empire," became original members of the League of Nations, and were represented at the first and subsequent meetings of the Assembly of the League held at Geneva. The Irish Free State became a member of the League in 1923. At the Assembly of 1925, Senator Dandurand, the senior Canadian Delegate, was elected President of the Assembly. At the Assembly of 1927, Canada was elected to one of the non-permanent seats on the Council of the League, and in 1930 was succeeded by the Irish Free State.

The other important Treaties, Conventions, etc., arising out of the Peace Settlement, which were completed in 1919 and 1920, were also signed by representatives of Canada, Australia, New Zealand, the Union and India.

The work of carrying out the Resolutions of the Imperial Conference, 1911, and the Imperial War Conferences, 1917 and 1918, proceeded during 1919, 1920 and 1921.

At the end of 1918, the "Oversea Settlement Committee" was brought into existence in order to advise His Majesty's Government in the United Kingdom on the new problems in connection with Imperial Migration arising out of the termination of the War. Special delegates were sent by the Committee to Canada, Australia and New Zealand to investigate the openings for women in those Dominions: the policy of free passages from the United Kingdom to other parts of the Empire for ex-service men was inaugurated and maintained during the period 1919-1921. The adoption of a joint policy of State-aided settlement within the Empire was discussed between representatives of His Majesty's Government and the Governments of Canada, the Commonwealth of Australia and New Zealand in January-February, 1921, and their Report was approved at the Conference of Prime Ministers held in the Summer with a reservation on the part of the South African representatives.

In introducing the Budget for 1919-1920, the Chancellor of the Exchequer brought forward proposals for Preference on certain articles (such as tea, cocoa, sugar and tobacco) already subject to duty when imported into the United Kingdom, which were (1) consigned from and (2) grown, produced or manufactured in the British Empire. These proposals were accepted by Parliament and incorporated in the Finance Act, 1919, the general rate of preference given being  $\frac{1}{4}$ th of the full rate.

The Imperial Mineral Resources Bureau was incorporated by Royal Charter and began its labours.

Arrangements were made in 1919 for a special service of news of general Imperial interest to be sent to Australia and New Zealand, to South, East and West Africa and to the Eastern Colonies, contributions being made by the United Kingdom and by most of the Dominions and Colonies concerned. These arrangements came to an end, however, in 1921.

An Imperial Statistical Conference was held in February, 1920 (Cmd. 648). It was followed by an Imperial Entomological Conference (Cmd. 835), an Imperial Forestry Conference (Cmd. 865) later in the year, and in 1921 by an Imperial Customs Conference (Cmd. 1231).

After consultations as to the composition and functions of the body to review the problems of Inter-Imperial Ocean Communications, an Imperial Shipping Committee was appointed in 1920 under the Chairmanship of Sir H. Mackinder. By the end of 1921 it had issued Reports on Bills of Lading (Cmd. 1205), Deferred Rebates a obtaining in the United Kingdom-Australia Trade (Cmd. 1486), and the functions and constitution of a Permanent Imperial Body for shipping questions (Cmd. 1483).

A Royal Commission set up in 1919 to enquire into the United Kingdom income tax included in its Report (Cmd. 615) recommendations for dealing with double income tax within the Empire (Resolution XV of Imperial War Conference 1917). These recommendations were adopted by His Majesty's Government in the United Kingdom and incorporated in section 27 of the Finance Act, 1920 (*see also* Finance Act, 1921 section 28). Corresponding legislation was passed by the Commonwealth Parliament in 1921 (Act 31 of 1921, section 5). Legislation had been in force in New Zealand since 1916 (Act 5 of 1916, section 92).

Settlement of the questions of (a) provision for deserted wives and children (b) reciprocal enforcement of Judgments, in different parts of the Empire (both of which subjects had been much discussed between the Home and Dominion Governments since the Imperial Conference of 1911) was facilitated by the passing of the Maintenance Orders (Facilities for Enforcement) Act, 1920, and by Part II of the Administration of Justice Act, 1920, in the United Kingdom.

A Committee appointed at the end of 1919 to enquire into the high power wireless stations needed by the British Empire on commercial and strategical grounds presented its Report in 1920 (Cmd. 777), and preparations were begun in 1921 to carry the recommendations into effect.

From June-August, 1921, a Conference of Prime Ministers and representatives of the United Kingdom, the Dominions and India was held in London. The Prime Minister of the United Kingdom (Mr. Lloyd George) presided, and the Prime Ministers of Canada (Mr. Meighen), the Commonwealth of Australia (Mr. Hughes), New Zealand (Mr. Massey) and the Union of South Africa (General Smuts) were present as well as representatives of India. The Prime Minister of Newfoundland (Sir R. Squires) was unable to attend.

The greater part of the proceedings was highly confidential and comparable rather to the work of the Imperial War Cabinets of 1917 and 1918 than to that of the Imperial War Conferences of those years. The Conference considered in detail the Foreign Policy of the British Empire. Discussion took place in regard to the League of Nations, and general appreciation was expressed of its work, and of its claim to the support of the British Empire. Close consideration was given to the question of British Policy in Egypt. Several meetings were devoted to considering the Naval, Military and Air Defence of the Empire. Specific Resolutions were passed as to Empire Settlement and Migration, the nationality of children born abroad of British parents, Air Communications, the Imperial Wireless Scheme, Shipping, Wireless Telephony and Cable and Wireless Rates for Press Messages.

Agreement was reached as to the apportionment between the various parts of the Empire of the Reparation receipts falling to the British Empire under the Treaty of Peace with Germany.

The question of the position of British Indians in the Empire was further discussed, and a Resolution passed which, while reaffirming the Resolution of the 1918 Conference (*see* p. lxxvi above), recognised that there was an incongruity between the position of India as a member of the British Empire and the existence of disabilities upon British Indians lawfully domiciled in some other part of the Empire, and expressed the opinion that, in the interests of the solidarity of the British Commonwealth, it was desirable that the rights of such Indians to citizenship should be recognised.<sup>1</sup>

<sup>1</sup> NOTE.—The representatives of the Union of South Africa were unable to accept this Resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India expressed the hope that, by negotiation between the Governments of India and of South Africa, some way could be found to reach a more satisfactory position.

It was decided that, having regard to the constitutional developments in the Empire during the last few years, no advantage would be gained by holding the Constitutional Conference contemplated by Resolution IX of the Imperial War Conference, 1917 (*see p. lxxv above*); but stress was laid on the importance of continuous consultation between the Prime Ministers, and on the advantage of their meeting annually, or at such longer intervals as may prove feasible. The principle established in 1918 of direct communication between Prime Ministers, and of the right of the Dominion Prime Ministers to nominate Cabinet Ministers to represent them in consultation with the Prime Minister of the United Kingdom (*see p. lxxvii above*), was reaffirmed.

In the course of the discussions on Foreign Policy at the Prime Ministers' Conference of 1921, much time was devoted to the problems of the Western Pacific and Far East; whilst the discussions were proceeding, the President of the United States of America issued his invitation to a Conference to be held at Washington in the Autumn of 1921, at which these matters would be discussed, as well as the question of limitation of armaments. The British Empire Delegation at this Conference included representatives of Canada (Sir B. Borden), Australia (Senator Pearce), New Zealand (Sir J. Salmond) and India. Several important conventions were concluded at the Conference, including that for the limitation of Naval Armament, the Quadruple Pacific Treaty and the Nine-Power Treaty regarding China (*see Cmd. 1627*). The Dominions were also represented at the International Conference held in Genoa in the spring of 1922, and some sent representatives to the subsequent technical Conference held at the Hague.

In 1922, in pursuance of the Resolution passed at the 1921 Conference, an Act, entitled the Empire Settlement Act, was passed by the Parliament at Westminster empowering His Majesty's Government in the United Kingdom in association with Dominion Governments or public or private organisations either in the United Kingdom or overseas, to formulate and co-operate in carrying out agreed schemes for affording joint assistance to suitable persons in the United Kingdom to settle in the Oversea Dominions. The expenditure was not to exceed £1,500,000 in 1922-3 or £3,000,000 in subsequent years.

Legislation was enacted amending the British Nationality and Status of Aliens Act, 1914 (*see p. lxxi*), in the direction of giving greater facilities for the retention of British citizenship by children born abroad of British parents.

**Action in 1922 on Resolutions of 1921 Conference and of previous Conferences.** By the end of 1922 the Maintenance Orders (Facilities for Enforcement) Act, 1920, had been extended to New Zealand, Queensland, Western Australia, Tasmania and British India, and the Administration of Justice Act, 1920, to South Australia and Western Australia, the necessary reciprocal legislation having been passed.

Agreements were made between the Commonwealth Government and the Amalgamated Wireless Company in March, and between the Union Government and the Marconi Wireless Telegraph Company in August, for the provision of long distance wireless communication. The arrangements to be made in the United Kingdom were still under examination at the end of the year.

A Conference on the subject of an Empire Patent was held in June.

Further reports of the Imperial Shipping Committee on Rates of Freight in the New Zealand Trade (Cmd. 1564) and on the Deferred Rebate System (Cmd. 1802) were completed.

Legislation was passed at the end of the year to facilitate the importation of cattle from Canada into the United Kingdom.

Shortly after Mr. Bonar Law assumed office as Prime Minister in the autumn of 1922, enquiries were made of the Dominions and India as to the possibility of holding an Imperial Economic Conference in 1923 to study the question of co-operation in the development of the resources of the British Empire and the strengthening of economic relations between its constituent parts. It was ultimately decided to hold an Economic Conference and a meeting of the Imperial Conference concurrently. Both Conferences took place in London in October and November, 1923, the Irish Free State being represented for the first time.

The Prime Minister of the United Kingdom (Mr. Stanley Baldwin) presided at the Imperial Conference, and the Prime Ministers of Canada (Mr. Mackenzie King), the Commonwealth of Australia (Mr. Bruce), New Zealand (Mr. Massey), and the Union of South Africa (General Smuts), the President of the Executive Council of the Irish Free State (Mr. Cosgrave) and the Prime Minister of Newfoundland (Mr. Warren), attended the meetings, as well as other Ministers and representatives of India.

The United Kingdom, the Dominions, India and the Colonies and Protectorates were all represented at the meetings of the Imperial Economic Conference, over which the President of the Board of Trade (Sir Philip Lloyd-Graeme) presided.

The Imperial Conference gave detailed consideration to the Foreign Policy of the British Empire and reached a common understanding on the main heads of the policy to be pursued, subject to the approval of the Governments and Parliaments. The main conclusions, and extracts from the general statement made by the Secretary of State for Foreign Affairs, were subsequently published. The question of the Naval, Air and Military Defence of the Empire was also considered and resolutions were passed placing on record the chief conclusions which had been reached. Certain points in connection with the negotiation, signature and ratification of Treaties were discussed and a Resolution was adopted. Other matters considered included the Condominium in the New Hebrides, the status of High Commissioners, the publication of correspondence between the several Governments, the contribution of India to the expenses of the League of Nations, certain Nationality questions, the question of the validity of marriages between British subjects and foreigners, and the proposed extension of the powers of the Imperial War Graves Commission.

Several meetings were devoted to a further discussion of the position of British Indians in the Empire and to the consideration of a proposal put forward by the representatives of India to the effect that the Dominion Governments concerned, and the British Government for the Colonies and Protectorates, should agree to the appointment of Committees to confer with a Committee appointed by the Indian Government as to the best and quickest means of giving effect to the Resolution of the 1921 Conference (*see* p. lxx above). This proposal was generally accepted, except by the Prime Minister of the Union of South Africa.

The Imperial Economic Conference considered in detail the economic relations between the several parts of the Empire and discussed fully all aspects of inter-Imperial trade. The most important Resolutions passed were on the subject of Imperial Preference, Oversea Settlement, Co-operation in financial assistance to Imperial Development, Communications, Economic Defence, the future of the Imperial Institute, Immunity of State Enterprises, and the establishment of an Imperial Economic Committee.

**Imperial  
Economic  
Conference,  
1923.**  
(Cmd. 1990 and  
Cmd. 2009.)

During 1923 and 1924 the Maintenance Orders (Facilities for Enforcement) Act, 1920, was extended to the Union of South Africa, South Australia and New South Wales, and the Administration of Justice Act, 1920, to New Zealand Newfoundland and Victoria, the required reciprocal legislation having been passed.

**Action in 1923 and 1924 on Resolutions of 1921 Conference and of previous Conferences.**

Further Reports were issued by the Imperial Shipping Committee on the work of the Committee, 1920 to 1922 (Cmd. 1872), on the Economic size and speed of vessels trading between the United Kingdom and Australia (Cmd. 1917), on the Methods of Assessment of Shipping to Income Tax within the Empire (Cmd. 1979), on the Prospective size of Vessels in the Eastern and Australian Trades via Suez in relation to Proposals for the Deepening of Colombo Harbour (Cmd. 2250), on Canadian Marine Insurance Rates (Interim Report Cmd. 2249), on Rates of Freight on Canadian Flour in the North Atlantic (Interim Report Cmd. 2248), and on East African Shipping Services (Interim Report issued by the Stationery Office).

A British Empire Forestry Conference was held in Canada in the autumn of 1923, its recommendations which were discussed at the Imperial Economic Conference 1923, are set out in the Record of Proceedings of the latter Conference (Cmd. 2009). An Imperial Mycological Conference was held in July 1924 (*see* Stationery Office Publication Colonial No. 8 of 1924).

Before steps had been taken to give effect to the resolutions of the Imperial Economic Conference, a new administration was formed in the United Kingdom, as a result of the general election in December, 1923, with Mr. Ramsay MacDonald as Prime Minister. Shortly after taking office, the new Government announced that they adhered generally to the resolutions of the Conference, with the exception of those relating to Tariff Preference and to the establishment of an Imperial Economic Committee; later their views on the resolutions of the Conference were set out in a Parliamentary Paper (Cmd. 2115). The principal action taken was as follows. Effect was given to the proposals for co-operation in financial assistance to Imperial development by Section 2 of the Trade Facilities Act, 1924,

**Action in 1924 on resolutions of Imperial Economic Conference, 1923.**

The Carriage of Goods by Sea Act, 1924, was passed, and similar legislation was carried in the Commonwealth of Australia. Provision was made in Section 31 of the Finance Act, 1924, for the exemption from United Kingdom taxation of shipping registered in such other parts of the Empire as grant reciprocal exemption to shipping registered in the United Kingdom. A Bill for the re-organisation of the Imperial Institute and the incorporation of the Imperial Mineral Resources Bureau with it was introduced into Parliament and passed through the House of Lords, but lapsed on the dissolution of Parliament in October, 1924. It was announced by the Chancellor of the Exchequer in his budget statement that further consideration of the proposals relating to the Immunity of State Enterprises from taxation would be postponed for a year, during which time the views of the Dominion Governments on the question would be sought. Arrangements were made for the establishment at Oxford of an Imperial Forestry Institute. A Committee on Imperial Wireless Services under the chairmanship of Sir Robert Donald reported (*inter alia*) in favour of the ownership by His Majesty's Government in the United Kingdom of wireless stations in this country for communication with the Dominions (Cmd. 2060); and steps were taken for the completion of the Government high power wireless telegraphy station at Rugby. A contract was also entered into with the Marconi Wireless Telegraph Company for the erection of "beam" stations, to be taken over on satisfactory completion and operated by the Government for communication

with Canada. The contract provided for the possible extension of the arrangement to cover communication with Australia, South Africa and India. In Canada steps were taken by the Canadian Marconi Company for the erection of the "beam" stations required. In Australia, the agreement with the Amalgamated Wireless Company was modified to provide for the erection of a "beam" station, and in the Union of South Africa arrangements were made with the Marconi Company for the erection of an experimental "beam" station. It was announced during the summer that, on further consideration, His Majesty's Government proposed that a Committee should be set up on the lines of the Imperial Economic Committee recommended by the Conference with one specific reference, namely, to consider the possibility of improving the methods of preparing for market and of marketing within the United Kingdom the food products of the oversea parts of the Empire. By the end of the year general agreement was reached for the establishment of a Committee on these lines. The definite proposals regarding Tariff Preference which were laid before the Conference were brought before parliament in June in the form of resolutions, and, so far as they were put to the vote, rejected by varying majorities. In the latter part of the year, a general election took place, and as a result a new Government was formed with Mr. Baldwin as Prime Minister. The new Government announced that such of the proposals relating to Tariff Preference as involved no increase in existing duties would be placed before Parliament as part of the budget of 1925, and that, as regards the other proposals, the full money equivalent of the advantage which would have been conferred by them on Empire imports, would be made available for expenditure on alternative schemes for improving the marketing of Empire imports of food stuffs: the proposed Imperial Economic Committee would be asked to advise as to the best methods of employing this amount.

Among the most important matters discussed at the Imperial Conference, 1923, under the head of Foreign Policy, was the offer of the United States Government to take part in an international conference or enquiry to investigate the European Reparations problem. This led up to the appointment of the Expert Committees under the Reparation Commission and eventually to the London Reparation Conference of July-August 1924, which considered the steps necessary to give effect to the Reports of those Committees.

**Action in 1924 and the early part of 1925 on Resolutions of Imperial Conference, 1923.** In connection with the London Conference, arrangements were made for the establishment of a British Empire Delegation, of which the representatives of any Dominions so desiring were members on the panel system; also for the representatives of the Dominions so appointed to be able to be present at meetings of the Conference on days when it was not their turn to sit as members of the British Empire Delegation. Canada, the Commonwealth of Australia, New Zealand and the Union of South Africa availed themselves of this arrangement, which was announced to be a special one for this Conference, and not to be regarded or quoted as a precedent.

Action was also taken during 1924 on other matters of Foreign Policy which came up at the Imperial Conference of 1923, namely, that leading up to the eventual ratification of the Peace Settlement with Turkey and the signature and ratification of the Treaty with the United States of America for the regulation of the Liquor Traffic. The resolution regarding the Negotiation, Signature and Ratification of Treaties (*see* p. lxxii) was accepted by His Majesty's Government in the United Kingdom and the Governments of the Dominions and India, and advantage was taken on several occasions of the procedure contemplated in it.

A Squadron under Vice-Admiral Sir F. Field, consisting of the battle-cruisers Hood and Repulse and a squadron of light cruisers, left Plymouth in November, 1923, and

returned in September, 1924. In the course of its cruise the Special Service Squadron visited Sierra Leone, the Union of South Africa, Zanzibar, Ceylon, the Straits Settlement, the Federated Malay States, Australia, New Zealand, Western Samoa, Fiji, Western Canada, Jamaica, Eastern Canada and Newfoundland, as well as Honolulu and San Francisco. It was received everywhere with great enthusiasm.

In the early part of 1924, considerable correspondence with the Dominion Governments took place (Cmd. 2083) regarding the proposed development of the Singapore Naval Base. Mr. Ramsay MacDonald announced in the House of Commons on 18th March that His Majesty's Government in the United Kingdom had decided for the time being not to proceed with the proposal. This decision was reversed by the new Government after the General Election in the autumn.

The Commonwealth Government decided in the autumn of 1924 to initiate a programme of defence development to be spread over a period of five years, and as a first step to undertake the construction of two cruisers and two ocean going submarines, besides making provision for oil fuel, munitions etc. The New Zealand Government also undertook to maintain a second light cruiser as from October, 1925.

As regards the questions discussed in connection with the status of High Commissioners (namely, the possibility of obtaining some special precedence for High Commissioners on ceremonial occasions and the possibility of extending the privileges granted to them as regards exemption from taxation and similar matters) the action taken was as follows :—

(1) As regards precedence, the following notification was made in the London Gazette of the 29th July, 1924 :

"Amongst the matters discussed at the Imperial Conference, 1923, was the question of precedence of the High Commissioners in London. In accordance with the undertaking then given (see page 17 of (Cmd. 1987) ), the matter was examined and suggestions were put forward, with His Majesty's approval, by the late Government for the consideration of the Dominion Prime Ministers and the Government of India. These proposals have proved generally acceptable, and His Majesty has now been pleased to direct that the High Commissioners for Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, the Irish Free State, Newfoundland and India should be given precedence, on ceremonial occasions, according to the following principles :—

"(a) When British or Dominion Ministers, being at the time members of their respective Cabinets, are present, the High Commissioners should take precedence immediately after them ; this precedence is subject to the qualification that the High Commissioner should not on any occasion be given a precedence higher than that accorded by the Table of Precedence to Secretaries of State.

"(b) When no members of the British or Dominion Cabinets are present, the High Commissioners should take precedence immediately after that accorded by the Table of Precedence to Secretaries of State."

(2) As regards exemption from taxation, rates, etc., it was announced in January, 1925, that His Majesty's Government in the United Kingdom would take the necessary action, including the introduction of legislation where necessary, to put High Commissioners personally in as favourable a position in these matters as Foreign Ambassadors and Ministers.

A Committee appointed by the Government of India came to England in the early part of 1924. Its discussions with the representatives of His Majesty's Government in the United Kingdom dealt more particularly with the position of British Indians in Kenya and Fiji.

A suggestion was made by Mr. Ramsay MacDonald in the summer of 1924 that a preliminary enquiry should be held to consider the system of consultation with the Dominions on matters of Foreign Policy and general Imperial interest. After considerable discussion this was agreed to, in principle, by the Dominion Governments, but difficulties were experienced in arranging a suitable date, and no date had been fixed when the General Election took place in the autumn. The new Government, after considering the matter, intimated to the Dominion Governments its doubts whether there would be any advantage in pursuing the matter further at this stage.

In the autumn of 1924 the Commonwealth Government appointed a Liaison Officer in London for the purpose of studying the foreign situation and supplying the Prime Minister of the Commonwealth with any information necessary to supplement that received through existing channels.

In view of the terms of the Protocol for the Pacific Settlement of International Disputes drawn up at the Fifth Assembly of the League of Nations in September, 1924, His Majesty's Government in the United Kingdom took steps in December to ascertain whether the Dominion Prime Ministers could arrange to attend or be represented at a special meeting of the Imperial Conference to consider the issues arising out of the Protocol. It was found, however, that the exigencies of Parliamentary and other business made a representative meeting impossible, and it was accordingly decided to deal with the matter by correspondence. As a result it was announced by the Secretary of State for Foreign Affairs at the meeting of the Council of the League in March 1925 that His Majesty's Government and the Governments of Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa and India, were unable to accept the Protocol (see Cmd. 2368). A similar announcement was made later by the Government of the Irish Free State. Correspondence with the Dominions on the subject is printed in Cmd. 2468.

Provision was made in the Finance Act, 1925 (sections 8 and 9), to give effect to those of the proposals relating to Tariff Preference placed before the Imperial Economic Conference which did not involve any increase of existing duties ; and Action in 1925 a preferential rebate was also granted in respect of the new duties on Resolutions imposed by that Act (sections 4, 6 and 7) and by the Safeguarding of of Imperial Industries (Customs Duties) Act, 1925. The Finance Act (section 25), Economic Conference, 1923. by providing for the liability of Oversea Governments to taxation in respect of trading operations in this country, gave effect to the resolution of the Conference regarding the Immunity of State Enterprises from taxation. The Imperial Economic Committee was set up and in July issued two reports, viz. : a general report (Cmd. 2493) which *inter alia* contained the advice given by the Committee as to the method of employment of the sum to be made available for expenditure on improving the marketing of Empire imports of foodstuffs (see p. lxxiv), and a report on Meat (Cmd. 2499). The Imperial Institute Act, 1925, was passed to carry out the reorganisation of the Institute, and the incorporation with it of the Imperial Mineral Resources Bureau, and came into operation on the 1st July. The Government high-power wireless telegraphy station at Rugby was completed and opened on the 1st January, 1926. The sites for the "beam" stations to be erected for

communication with Canada, Australia, South Africa and India were acquired, and progress was made towards the completion of the stations. A committee, on which the Dominions concerned were represented, was set up to advise the Postmaster-General on matters connected with the operations of services by the "beam" stations, and held regular meetings during the year.

The Imperial Shipping Committee issued a Second Report on Canadian Marine Insurance Rates (Cmd. 2447).

An Imperial Entomological Conference was held in June, 1925 (see Cmd. 2490).

In April, 1925, the Commonwealth Government placed an order in this country for the construction of two cruisers (see p. lxxv). In October, 1925, a second light cruiser was commissioned for service in the New Zealand Division of the Royal Navy.

**Further Action in 1925 on the Resolutions of the Imperial Conference, 1923.** The Finance Act, 1925 (section 26), gave further relief to High Commissioners, Agents-General and their staffs in respect of exemption from income tax in this country; and administrative action was taken to place the High Commissioners personally in the same position as regards exemption from taxation in this country as foreign Ambassadors and Ministers.

The Dominion Governments were kept fully informed of the negotiations on the subject of European Security which led up to the Locarno Conference of October, 1925, and the signature in London, on the 1st of December, 1925, of a Treaty of Mutual Guarantee and other connected instruments. Article 9 of the Treaty provided that it should not impose any obligations on any of the Dominions or India unless the Government of such Dominion or of India had signified its acceptance thereof. It was announced by the Secretary of State for Foreign Affairs in the House of Commons on the 18th November, 1925, that His Majesty's Government hoped to discuss the whole situation resulting from the Locarno Conference with representatives of the Dominions and India at a meeting of the Imperial Conference. It was announced in February, 1926, that a meeting of the Conference had been arranged for October.

In accordance with the announcement made by the Prime Minister in December, 1924 (see p. lxxvi), and following upon the recommendations of the Imperial Economic Committee (see p. lxxvi) a sum of £500,000 was voted by Parliament in the financial year 1926-7 for expenditure on improving the marketing of imports of Empire products, together with home agricultural produce. The fund was to be administered by the Secretary of State for Dominion Affairs who would be assisted by a Board, called the Empire Marketing Board. A small secretarial staff was appointed to assist the Board and various schemes under the two main heads of publicity and research were recommended by the Board and approved by the Secretary of State. The Imperial Economic Committee issued two further reports on Fruit (Cmd. 2658) and Dairy Produce (Cmd. 2725). The Imperial Shipping Committee issued reports on "certain aspects of the Canadian cattle trade" (Cmd. 2609). "Prai River Railway Wharves (Penang Harbour)" (Cmd. 2703), "Mombasa (Kilindini) Harbour" (Cmd. 2713) and also a report on the work of the Committee from January, 1923, to May, 1926 (Cmd. 2706). In August the Irish Free State Government appointed a representative as member of the Committee. The wireless "beam" stations for communication with Canada were completed and the service was opened.

A considerable part of the work of the Imperial Conference, which met in October, 1926, consisted of the discussion of questions affecting Inter-Imperial Relations, which were referred to a Committee of Prime Ministers and Heads of Delegations presided over by Lord Balfour. The Report of the Committee, which was unanimously adopted by the Conference stated certain general principles which appeared to it to govern the relations between the various parts of the Empire and dealt with the application of those principles to a number of practical questions.

**Imperial Conference, 1926**  
(Cmd. 2768 and 2769).

**Questions affecting Inter-Imperial Relations.** As regards general principles, the Report stated that equality of status was the root principle governing Inter-Imperial Relations so far as concerned Great Britain and the Dominions, which it described as "*autonomous Communities within the British Empire, equal in Status, in no way subordinate one to another, in any aspect of their domestic or external affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations.*" It pointed out, however, that the principle of equality and similarity, appropriate to status, did not universally extend to function.

The application of these principles to particular questions was dealt with by the Committee under the three heads of (a) relations between the various parts of the Empire, (b) relations with Foreign Countries and (c) the system of communication and consultation.

(a) The Committee recommended that, in view of the altered state of affairs arising from the establishment of the Irish Free State as a Dominion, legislative action should be taken, subject to the approval of His Majesty the King, to secure that His Majesty's title should in future read "George V. by the Grace of God, of Great Britain, Ireland and the British Dominions beyond the Seas King, Defender of the Faith, Emperor of India." It defined the position of the Governor General in a Dominion as the representative of the Crown and not the representative or agent of His Majesty's Government in Great Britain and expressed the view that the practice whereby the Governor General of the Dominion was the formal official channel of communication between His Majesty's Government in Great Britain and His Governments in the Dominions was no longer wholly in accordance with the constitutional position of the Governor General and that the recognised official channel of communication should be, in future, between Government and Government direct. It considered various points connected with the operation of Dominion legislation, with particular reference to the reservation of such legislation for the assent of His Majesty, the power of disallowance of such legislation, the competence of Dominion Parliaments to give their legislation extra-territorial effect and the principles embodied in or underlying the Colonial Laws Validity Act, 1865, and recommended the appointment of a special committee to enquire into these points. It also considered the question of principle involved in certain provisions of the Merchant Shipping Act, 1894, and recommended that a special Sub-Conference should be held to consider the subject.

(b) The Committee examined the working of the Resolution adopted by the Imperial Conference of 1923, on the subject of the negotiation, Signature and Ratification of Treaties (*see* page lxxii) and made a number of recommendations as to Treaty procedure with a view to supplementing that Resolution. It considered, in the light of the same Resolution, the question of the representation of the different parts of the Empire at International Conferences and arrived at conclusions

as to the most suitable procedure in the various classes of case arising. It examined the possibility of applying the principles underlying the Resolution of 1923 to matters arising in the conduct of foreign affairs generally and agreed that the Governments concerned might usefully adopt as a guide in all negotiations falling within their respective spheres the following general principle: "So long as the initiating Government receives no adverse comment and so long as its policy involves no active obligations on the part of the other Governments, it may proceed on the assumption that its policy is generally acceptable. It must, however, before taking any steps which might involve the other Governments in any active obligations, obtain their definite assent." It also considered certain questions which had arisen as to the practice regarding the issue of exequaturs to Consuls in the Dominions.

(c) The Committee reviewed the system of communication and consultation during the intervals between Imperial Conferences, with special reference to the desirability of arranging that closer personal contact should be established between Great Britain, and the Dominions, and the Dominions *inter se*, and summed up its conclusions in a Resolution which it submitted for the consideration of the Conference.

A comprehensive statement on Foreign Affairs was made to the Conference by the Secretary of State for Foreign Affairs, and a general discussion on foreign affairs took place.

**Foreign Relations and Defence.** Certain particular aspects of Foreign Relations were referred to the Committee on Inter-Imperial Relations mentioned above. This course was adopted as regards the policy of Locarno (*see* page lxxvii). The results which that policy had already achieved and those which it was hoped to secure were explained and discussed, and the Committee recommended to the Conference the adoption of the following resolution. "The Conference has heard with satisfaction the statement of the Secretary of State for Foreign Affairs with regards to the efforts made to ensure peace in Europe, culminating in the agreements of Locarno; and congratulates His Majesty's Government in Great Britain on its share in this successful contribution towards the promotion of the peace of the world." The Committee also considered questions connected with compulsory arbitration in International disputes and the adherence of the United States of America to the Protocol establishing the Permanent Court of International Justice.

Certain other aspects of foreign relations were referred to special Committees of the Conference whose Reports were approved by the Conference. Questions connected with the work of the Permanent Mandates Commission of the League of Nations, with the Condominium in the New Hebrides and with British Policy in the Antarctic were dealt with in this manner.

As regards the question of defence and the methods by which the defence arrangements of each part of the Empire could be most effectively co-ordinated, a number of resolutions were adopted by the Conference.

Certain questions connected with the law of nationality were referred to a Committee under the Chairmanship of the Secretary of State for Home Affairs and various resolutions on the subject, recommended by the Committee, were adopted by the Conference.

**Other matters.** Special Sub-Committees of the Conference were set up *inter alia* to deal with questions of Imperial Air Communications, Overseas Settlement, Research, Forestry, and General Economic questions especially the encouragement and production of Empire films, Industrial Standardisation, and the future of the Imperial Shipping Committee and Imperial Economic Committee). Resolutions were adopted on all these questions.

The opportunity afforded by the Conference was taken for a discussion between representatives of the partner Governments (the United Kingdom, Canada, Australia and New Zealand) of certain outstanding questions connected with the Pacific Cable. It was settled that legislation should be introduced to provide for the future composition of the Board, the amount of its reserve fund and the disposal of annual surpluses. The new cable laid by the Board in duplication of its existing cable across the Pacific was opened for traffic in November.

In order to give effect to the recommendation of the Inter-Imperial Relations Committee of the Imperial Conference of 1926 as to the Title of His Majesty the King, the Royal and Parliamentary Titles Act, 1927, was passed and a Proclamation thereunder was issued by His Majesty on the 13th May, 1927, making the change recommended by the Committee (page 16 of Cmd. 2768).

**Action in 1927, 1928, 1929 and 1930 on the Resolutions of the Imperial Conference, 1926.** In accordance with the wishes of His Majesty's Governments in Canada, the Commonwealth of Australia, the Union of South Africa and the Irish Free State, the procedure of direct communication between Governments, referred to in Section IV (b) of the Committee's Report (page 16 of Cmd. 2768), was adopted in the case of communications between His Majesty's Government in the United Kingdom and His Majesty's Governments in those Dominions.

A statement was made by Sir Austen Chamberlain at the meeting of the Council of the League of Nations on the 9th March, 1927, at the request of all His Majesty's Governments, that it was the desire of those Governments that the form of Treaties between Heads of States should be adopted in the case of all Conventions concluded under the auspices of the League, in accordance with the recommendation of the Imperial Conference (pages 22 and 23 of Cmd. 2768). This form was in fact adopted in the case of the various League Treaties negotiated during these years. Effect was given, in individual cases as they arose, to the other recommendations of the Imperial Conference on the subject of Treaty procedure.

In pursuance of the Resolution adopted by the Imperial Conference of 1926 as to the further development of the existing system of communication between His Majesty's Governments (page 27 of Cmd. 2768), His Majesty's Government in the United Kingdom appointed a representative in Canada, with the title of High Commissioner, who took up his duties in September, 1928. Arrangements were made, at the request of the Prime Minister of New Zealand, for an officer from the Foreign Office in London to be seconded for attachment to the Department of the Prime Minister of New Zealand in an informative and consultative character, particularly in relation to foreign affairs. Arrangements were also initiated whereby the Imperial Secretary in South Africa would act as a supplementary channel of communication between His Majesty's Governments in the United Kingdom and in the Union of South Africa.

In November, 1930, a post of High Commissioner in the Union of South Africa for His Majesty's Government in the United Kingdom was established; it was combined with the existing post of High Commissioner for South Africa which had until then been held by the Governor-General of the Union of South Africa.

Legislation to give effect to the scheme for the re-organisation of the Pacific Cable Board was passed, and the opportunity was taken to consolidate existing legislation (Pacific Cable Act, 1927).

The Workmen's Compensation (Transfer of Funds) Act, 1927, was passed to enable effect to be given to a recommendation of the Imperial Conference upon the subject (see page 47 of Cmd. 2768).

The Imperial Economic Committee (see pp. lxxii and lxxiii) issued their Fifth Report on Fish (Cmd. 2934), their Sixth and Seventh Reports on Poultry and Eggs and Honey, respectively (Cmd. 3015), their Eighth Report on the Functions and Work of the Imperial Economic Committee (Cmd. 3018), their Ninth Report on Tobacco (Cmd. 3168), their Tenth Report on Timber (Cmd. 3175), their Eleventh Report on Agricultural Machinery, and their Twelfth Report on Pigs and Pig Products. The Eleventh and Twelfth Reports appeared as Stationery Office Publications. Notes were published dealing with the work and finance of the Empire Marketing Board (see p. lxxiii) from July, 1926, to the 31st March, 1928 (Cmd. 3158), and from July, 1926, to 31st March, 1929 (Cmd. 3372). The principal activities of the Board fell under the two heads of publicity and research. As regards publicity the general idea was to create a background against which specific efforts to press the sale of Empire produce can be thrown into relief. Expenditure on this head was devoted to press advertising, posters, participation in Exhibitions, subsidised lectures, and experimental work in connexion with the cinema; the total amounted to rather less than half the total expenditure from the fund. The remainder was devoted to research partly by way of provision of capital grants for the development of existing institutions, and partly by provision of funds for the conduct of specific investigations. Provision of £1,000,000 for the Empire Marketing Fund was made on the Estimates for 1927-8, and provision of £500,000 was made on the Estimates for 1928-1929, with a note that provision for the balance of the full amount of the £1,000,000 would be made either by supplementary estimate or by addition to further estimates when required for the purposes of the fund. The amount provided on the Estimates for 1929-1930 was £550,000 with a note similar to that for 1928-1929,

The Imperial Shipping Committee issued Reports on the Harbour of Dar-es-Salaam, Tanganyika Territory (Cmd. 2917), on the Harbours of Nigeria (Cmd. 3205), on the Harbour of Singapore (Cmd. 3328), and on certain questions relating to the shipment of Grain through the Canadian ports of Halifax, N.S., and Saint John, N.B. (Cmd. 3345).

An Imperial Education Conference was held in June, 1927, and an Imperial Agricultural Research Conference was held in October, 1927. One of the recommendations of the latter Conference proposed the establishment of certain new Imperial Agricultural Bureaux, to be attached to existing Research Institutions in the United Kingdom, to deal with the interchange of information on special branches of agricultural science. A meeting of representatives of the Governments willing to contribute was held in London, in November, 1928, and drew up for the consideration of the Governments a scheme for the future control, organisation and finance of the proposed new Bureaux. The scheme was accepted and eight new Bureaux were set up in the course of 1929 dealing respectively with Soil Science, Animal Nutrition, Animal Health, Animal Genetics, Agricultural Parasitology, Plant Genetics (other than Herbage), Plant Genetics (Herbage), and Fruit Production. These Bureaux are controlled by an Executive Council nominated by the various Governments of the Empire.

The wireless "beam" Stations (see p. lxxiv) for communication with Australia, South Africa and India were completed and the services were opened.

Lord Lovat, the Under-Secretary of State for Dominion Affairs, and Chairman of the Oversea Settlement Committee, left England on the 4th August, 1928, on a visit to Canada, Australia and New Zealand, to discuss matters relating to oversea settlement with representatives of the Dominion Governments and of private organisations. Lord

Lovat left Canada on September 19th and arrived in New Zealand on October 8th. Owing to indisposition he was compelled to cancel his projected visit to Australia, and he sailed for England from New Zealand on October 28th. Following upon Lord Lovat's visit and upon further discussions between His Majesty's Governments in the United Kingdom and in Canada, arrangements were made for the reduction as from January 1st, 1929, of the third-class ocean fare to the Eastern ports of Canada from £18 15s. Od. to £10 for British subjects normally resident in the United Kingdom who intend to settle permanently in the Dominion.

In September, 1927, the New Zealand Parliament, on the motion of the Prime Minister of New Zealand, passed a resolution approving proposals for a contribution of £1,000,000 in instalments towards the expenses of the Singapore Defence. Naval Base.

H.M.A.S. "Australia," one of the two cruisers constructed in Great Britain for the Commonwealth of Australia (page lxxvii) was launched in March, 1927, and the two submarines, H.M.A.S. "Otway" and H.M.A.S. "Oxley" (see page lxxv) were completed during the year. H.M.A.S. "Australia" and H.M.A.S. "Canberra" were commissioned during 1928, and left England for Australia, in August and December of that year respectively.

Arrangements were made in 1927 for the loan to the Canadian Government of two destroyers, H.M.S. "Torbay" and H.M.S. "Toreador," to replace H.M.C.S. "Patrician" and H.M.C.S. "Patriot," which had become no longer serviceable. In December, 1928, the Canadian Government placed an order for two destroyers to be constructed in England.

The first course at the Imperial Defence College, the establishment of which was referred to in Conclusion eight of the Imperial Conference of 1926 on the subject of Defence (page 36 of Cmd. 2768), opened in January, 1927, and was attended by officers from the United Kingdom, Canada, the Commonwealth of Australia, New Zealand and India. In the case of the second course opening in January, 1928, arrangements were made for an officer from the Union of South Africa to attend in addition to officers from the parts of the Empire mentioned above.

The Prime Minister of the United Kingdom (the Right Honourable Stanley Baldwin, M.P.) visited Canada in July - August, 1927. In July, 1927, the Secretary of State for Dominion Affairs (the Right Honourable L. S. Amery, M.P.) left England on a visit to the Dominions, extending until February, 1928, which embraced South Africa, Australia, New Zealand and Canada. In October, 1929, the Prime Minister of the United Kingdom (the Right Honourable J. Ramsay MacDonald, M.P.), after a visit to the United States, spent some time in Canada, and visited Toronto, Ottawa, Montreal and Quebec. (See also the reference above to Lord Lovat's Tour.)

Arrangements were made for a Conference to take place in January, 1928, in London, comprising representatives of His Majesty's Governments in the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, of the Union of South Africa and the Irish Free State, the Government of India, and of the Colonies and Protectorates, to discuss certain questions relating to cable and wireless communications.

The Conference held its first meeting on the 16th January, and submitted its Report on the 6th July (Cmd. 3163). In this Report it is stated that one of the main features of the situation referred to the Conference for examination was the fact that the cable undertakings operating between the various parts of the British Empire would be unable to continue on a paying basis in face of unrestricted competition on the part of the Beam Wireless services. After considering the possible courses of action by the Governments concerned, the Conference came to the conclusion that the amalgamation in one undertaking of all the cable and wireless interests conducting communications between the various parts of the Empire provided the best prospects of conserving and improving the communication services of the Empire, without entailing contributions from public funds. Following upon this conclusion the Conference made detailed recommendations of considerable importance, the main features of which may be summarised as follows (1) the formation of a Merger Company, to combine the respective interests of the Eastern and Associated Telegraph Companies and Marconi's Wireless Telegraph Company; (2) the formation of a Communications Company to hold all the Communication Assets of the Cable and Marconi Companies; (3) the transfer to this Company of the cables of the Pacific Cable Board, the West Indian Cable and Wireless system worked by the Board, and the Imperial Atlantic Cables; (4) the lease to the Company of the Post Office Beam Services. Among the various measures of control recommended as a corollary to the handing over to private enterprise of the conduct of public services was the establishment of an Imperial Advisory Committee, to include representatives of the Governments participating in the Conference, to whom representatives of other parts of the Empire might be added as required, from time to time, with the approval of the Governments concerned. It was proposed that the Committee should be consulted by the proposed Communications Company in regard to questions of policy, including any alteration of rates. An agreement to carry these recommendations into effect was executed on 29th May, 1929, on behalf of H.M.'s Governments in the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa and the Irish Free State, and of the Government of India, and these Governments have each nominated representatives to sit on the Imperial Communications Advisory Committee which has been established in accordance with the recommendations of the Conference.

At the request of H.M. Government, in the Commonwealth of Australia a mission comprising Sir Arthur Duckham, K.C.B., Sir Hugo Hirst, Bart, Sir Ernest Clark, K.C.B., and Mr. Dougal Malcolm sailed in August for Australia, with the following terms of reference—"To confer with the Commonwealth and State Governments, with the Development and Migration Commission, and with leaders of industry and commerce in Australia, in the development of Australian resources and on any other matters of mutual economic interest to Great Britain and the Commonwealth which may tend to the promotion of trade between the two countries, and the increase of settlement in Australia." The mission concluded their investigations in January, 1929, and before leaving that country issued a report giving a comprehensive review of the position there as it appeared to them.

Following on the appointment in 1924 of a Minister to represent the interests of the Irish Free State at Washington, and the appointment late in 1926 of a Minister to represent the interests of Canada at the same capital (pages 26 and 27 of Cmd. 2768), the U.S. Government took steps for the appointment of Ministers at Ottawa and Dublin, who presented their credentials during the summer of 1927. Appointments of a Canadian Minister at Paris and of a French Minister at Ottawa were made in 1928.

#### **Economic Mission to Australia.**

#### **Diplomatic Representation of the Dominions in Foreign Countries and Foreign Countries in the Dominions.**

The number of Canadian Ministers in foreign capitals was increased in 1929 by the appointment of a Minister to represent the interests of that Dominion at Tokyo ; later in the year a Japanese Minister was appointed at Ottawa. Ministers representing the Union of South Africa were appointed during 1929 at the Hague, Washington and Rome, and Ministers for the Netherlands, the United States and Italy were appointed in the Union in 1929 and 1930. Irish Free State Ministers were appointed in the latter part of 1929 at Paris, Berlin and the Vatican City. Early in 1930 a Papal Nuncio was appointed at Dublin and this appointment was followed later in the year by the appointment of Ministers for France and Germany.

**Consular Representation of the Dominions in Foreign Countries.**

During 1930 appointments were made of a Consul-General for the Union of South Africa in Portuguese East Africa and a Consul-General for the Irish Free State in the United States.

**Geneva Naval Conference, 1927.**  
(Cmd. 2964).

At the Conference on the Limitation of Naval Armament held at Geneva during the summer of 1927, the several parts of the Empire were represented by plenipotentiaries, each holding a full power appointing him representative of His Majesty the King for the particular part of the Empire named in the full power. A statement to this effect, which also mentioned the desire of His Majesty's Governments that any resulting Treaty should be in the form recommended by the Imperial Conference of 1926, was made by the First Lord of the Admiralty at the opening session of the Geneva Conference (pages 5 and 6 of Cmd. 2964).

**Treaty for the Renunciation of War, 1928.**

During the negotiations which resulted in the signature, in August, 1928, of the Treaty for the Renunciation of War, there was constant communication between His Majesty's Governments, and the Governments of the United Kingdom, the Dominions and India were included amongst those invited by the United States Government to become original signatories to the Treaty. The Treaty was signed on behalf of the several parts of the Empire in the manner contemplated in such cases by the Imperial Conference of 1926.

The instruments of ratification of the Treaty by His Majesty in respect of the several parts of the British Empire were formally deposited at Washington on the 2nd of March, 1929, the instruments in respect of Canada and the Irish Free State by the Ministers representing in the United States the interests of those Dominions, those in respect of the United Kingdom and the Dominions not then separately represented at Washington by His Majesty's Ambassador.

**Conference on the Operation of Dominion Legislation and Merchant Shipping Legislation, 1929.**

A Conference opened in London in October, 1929, to consider the matters which the Imperial Conference of 1926 (pages 18 and 19 of Cmd. 2768) had recommended should be considered by an Expert Committee and a special Sub-Conference on Merchant Shipping Legislation. Representatives of the United Kingdom and all the Dominions except Newfoundland were present ; it was also arranged between the Governments that India should be represented for the discussion of Merchant Shipping and of such other particular subjects arising at the Conference as might be of direct interest to India. The unanimous report of the Conference was communicated to the Governments concerned, and was subsequently published as Cmd. 3479.

At the time of the Imperial Conference of 1926, a general understanding was reached that none of the Governments represented at the Conference would take any action in the direction of acceptance of the compulsory jurisdiction of the Permanent Court of International Justice without bringing the matter up for further discussion. During 1929, consultations took place between His Majesty's Governments regarding the acceptance of the Optional Clause of Article 36 of the Statute of the Court, and these consultations were continued in September between the delegates of the United Kingdom, the Dominions and India at the Assembly of the League of Nations at Geneva. As a result, the Clause was accepted during September on behalf of all parts of the British Empire, signatures being subject to ratification and declarations being made at the time of signature, indicating the conditions attached to acceptance of the compulsory jurisdiction of the Court (see pages 4 and 5 of Cmd. 3452 for texts). The necessary instruments of ratification had all been deposited by August, 1930.

As the result of conversations between the Prime Minister of the United Kingdom and the United States Ambassador in London, and of later conversations between the Prime Minister and the President of the United States in Washington, invitations were issued for a Naval Conference to be held in London in January, 1930, between the Powers which had participated in the Washington Naval Conference, 1921-22, arrangements for the representation of the several parts of the Empire being on similar lines to those made in connection with the Geneva Naval Conference, 1927. The Treaty which resulted from the Conference, entitled the International Treaty for the Limitation and Reduction of Naval Armament, was signed on the 22nd April, 1930 (see Cmd. 3556). Signature on behalf of the several parts of the Empire was effected in the manner recommended by the Imperial Conference of 1926, and the necessary instruments of ratification were deposited by the end of the year, and the Treaty came into force as between the United States of America, the Members of the British Commonwealth of Nations and Japan, on the 31st December, 1930.

The Imperial Conference met in October, 1930.

A considerable part of its discussions on questions affecting Inter-Imperial Relations was devoted to consideration of the Report of the Conference of 1929 on the Operation of Dominion Legislation (Cmd. 3479 see p. lxxxiv). Agreement was reached on the provisions of the legislation which would require to be passed by the United Kingdom Parliament to give legal effect to the recommendations of that Report, and also on the procedure to be adopted preparatory to such legislation. The Conference also considered and adopted recommendations on other matters dealt with in the Report of the Conference of 1929, viz.: Nationality and, under the heading of Defence Questions, Discipline of Armed Forces, and Prize Law and Procedure. On the subject of Merchant Shipping a draft agreement was drawn up to provide for the future regulation of matters of common concern relating to Merchant Shipping, following the recommendations of the Report of the Conference of 1929. Agreement was also reached on provisions for the setting-up of an *ad hoc* arbitral tribunal by agreement between the parties, for the settlement of disputes which might arise between the Members of the British Commonwealth.

The Conference also placed on record a statement as to the appropriate procedure in regard to the appointment of Governors-General in view of the position of Governors-

General as declared by the Imperial Conference of 1926 (see p. lxxviii). A further review took place of the system of communication and consultation in relation to foreign affairs, and certain recommendations were made in regard to the Channel of Communication between Dominion Governments and Foreign Governments. The precedence granted in 1924 to the High Commissioners for the Dominions in London (see p. lxxv) was discussed, and it was intimated by His Majesty's Government in the United Kingdom that they were prepared to recommend to the King that the Dominion High Commissioners should on all ceremonial occasions (other than those when Ministers of the Crown from the respective Dominions were present) rank immediately after Secretaries of State, that is, before all Cabinet Ministers in the United Kingdom, except Secretaries of State and those Ministers who already have higher precedence than Secretaries of State. A notification of His Majesty's directions in this matter appeared in the "*London Gazette*" of the 27th January, 1931.

In the sphere of foreign affairs, apart from the review of certain special questions of foreign policy, the main work of the Conference was the discussion of the means by which the Members of the British Commonwealth could best co-operative in promoting the policy of disarmament and world peace. These matters were referred to a Committee which, in the course of its work, considered three specific aspects of the problem, namely, the question of accession to the General Act for the Pacific Settlement of International Disputes, the proposals before the League of Nations to bring the Covenant of the League into harmony with the Pact of Paris, and the text of the draft Disarmament Convention, drawn up, in a provisional form, by the Preparatory Commission for a general Disarmament Conference. The Conference recorded agreed conclusions of a general nature on all these matters.

Discussions took place on matters of common interest connected with defence between representatives of the respective services in the United Kingdom and the Dominions.

It was recommended, as a result of discussion between representatives of the United Kingdom, the Commonwealth of Australia and New Zealand, that the existing policy of the ultimate establishment of a definite naval base at Singapore should be maintained, but that, apart from existing contracts and the completion of the air base, the remaining expenditure required for completion should be deferred for five years.

The work of the Conference on the economic side was primarily concerned with the examination of large questions of policy connected with the promotion and development of Inter-Imperial Trade. At an early stage in the Conference the detailed examination of these questions was remitted to a Committee on Economic Co-operation. This Committee made considerable progress in the examination of the proposal for the establishment of a fixed quota for Dominion wheat milled in the United Kingdom, and the Government of the United Kingdom undertook to examine carefully the Report of the Committee on this subject in consultation with the Governments of the wheat-growing Dominions and of India.

The Committee on Economic Co-operation also examined questions concerning the adoption of quotas for commodities other than wheat, import boards, bulk purchase schemes and the organisation of channels of trade; its report on these subjects was referred to the Governments concerned for consideration.

At the conclusion of the Conference, after passing a resolution recording their belief in the importance of the further development of Inter-Imperial markets, the Conference resolved that, as they had not been able, within the time limit of their deliberations, to examine fully the various means by which Inter-Imperial trade might here be maintained and extended, the Economic Section of the Conference should be adjourned to meet at Ottawa within the next twelve months when that examination would be resumed with a view to adopting the means and methods most likely to achieve the common aim.

The Committee on Economic Co-operation also considered the future work of the Imperial Shipping Committee, the Imperial Economic Committee and the Empire Marketing Board, and resolutions on these subjects were adopted by the Conference.

Other Committees which were set up on the economic side of the Conference dealt *inter alia* with questions of Communications (other than transport), Civil Aviation, Oversea Settlement, Forestry, Research, Mineral Resources, the International Institute of Agriculture, Cotton Growing, Petroleum Production and Refining, Oversea Mechanical Transport, arrangements for a Conference of Statisticians, the use of Cinematograph Films for the Education of Producers, and the Standardisation of the Form of Customs, Invoices and Certificates thereon. Resolutions were adopted by the Conference on all these questions.

A Conference on Standardisation took place at the same time as the Imperial Conference and the Report of this Conference (Cmd. 3716) was considered by the Imperial Conference, which adopted the Resolutions put forward therein.

In accordance with the recommendations of the Imperial Conference, 1930, resolutions were passed before the end of July 1931 by all the Dominion Parliaments approving the legislation proposed to give effect to the report of the Conference of 1929 on the Operation of Dominion Legislation (Cmd. 3479 *see* p. lxxxiv). The legislation required was accordingly passed by the United Kingdom Parliament in November and December and received the Royal Assent on the 11th December 1931 as the Statute of Westminster, 1931 (22 Geo. V. cap. 4).

On the 10th December, 1931, an agreement relating to Merchant Shipping legislation was signed on behalf of the United Kingdom and all the Dominions, in the form approved at the Imperial Conference of 1930 (pages 32 to 37 of Cmd. 3717).

In May 1931, a post was created of High Commissioner in the Commonwealth of Australia for His Majesty's Government in the United Kingdom (*see* page lxxx as to the establishment of similar posts in Canada and the Union of South Africa). Pending the appointment of a High Commissioner, arrangements were made for the duties of the post to be performed by the existing migration representative under the designation of United Kingdom Representative.

The two Australian submarines H.M.A.S. "Otway" and H.M.A.S. "Oxley" (*see* page lxxxii) were transferred, in accordance with an agreement reached at the time of the Imperial Conference, 1930, to the United Kingdom Government for maintenance.

A post of Irish Free State Minister at Brussels was established during 1931: it was arranged that this post should be held, jointly with his existing post, by the Irish Free State Minister at Paris (*see* page lxxxiv). In addition to the post of Consul-General for the Irish Free State in the United States (*see* page lxxxiv), two posts of Irish Free State Consuls were established during 1931 at New York and at Boston respectively.

Diplomatic & Consular Representation of the Dominions in foreign countries.

**General Act  
for the Pacific  
Settlement of  
International  
Disputes.** During 1931 accession to the General Act for the Pacific Settlement of International Disputes (Cmd. 3930) was effected on behalf of all the Members of the British Commonwealth of Nations except the Union of South Africa. In the case of the United Kingdom and certain other Members, of the Commonwealth, this accession was subject to certain conditions, which are indicated on pages 14 and 15 of Cmd. 3930.

**Economic  
Section of  
Imperial  
Conference.** As the result of further communications between the Governments concerned the proposed meeting at Ottawa (*see* page lxxxvii) was postponed and arrangements were made, after the change of Government in the United Kingdom in the autumn of 1931, for the Conference to meet at Ottawa in July 1932.

## PART II.—INTRODUCTION.

The greater portion of the Colonial Empire has accrued within comparatively recent times, though the first attempt at Colonial settlement, that of Sir Humphrey Gilbert in Newfoundland, was made as early as 1583. The Treaty of Utrecht (1713) left us in possession, in addition to the New England States, only of Newfoundland, New Brunswick, Nova Scotia, St. Helena, two slave-trading stations at the Gambia and the Gold Coast, the Bermudas, Jamaica, Barbados, the Bahamas, St. Kitts, Nevis, Antigua, Montserrat, the Virgin Islands and Gibraltar. Until the great wars which marked the second half of the eighteenth century, we made but little progress in territorial acquisition. The States of New England, and the steadily increasing business of the East India Company, afforded sufficient outlet for our colonising energy; but when the progress of the Seven Years' War brought us into collision with France in North America and India, we were fairly launched on our definite career of colonial extension. The Treaty of Paris (1763) gave us the rest of Canada and Dominica, St. Vincent, Grenada, the Grenadines and Tobago in the West Indies. The nucleus of the Colony of Sierra Leone was acquired in 1788. By the Treaty of Amiens (1802) the Dutch ceded to us Ceylon, and Spain, Trinidad. The two Treaties of Paris (1814 and 1815) gave us the Cape, British Guiana, Malta, Mauritius, Seychelles, St. Lucia, and Tobago (which had been given back to France in 1783), and left us with a free hand in India and the Pacific. During the reign of Victoria we occupied Natal, Rhodesia, Bechuanaland, Basutoland and the Transkei, Zululand, British Columbia and the wide North-West Territories of the Canadian Dominion, as well as Australia, New Zealand and Tasmania, British New Guinea and North Borneo. We also secured by cession Hong Kong, Labuan, Lagos, the greater portion of the Gold Coast, and Fiji, and we acquired by arrangement Cyprus and the basin of the lower Niger. During 1890 large additions were made to the Empire in Africa, as a result of the arrangements between the United Kingdom, Germany, France, and Portugal for the delimitations of their respective possessions and spheres of influence in that continent; and, by the end of the 19th century the United Kingdom had established its claims to the exclusion of other Powers, over the wide territories now known as Kenya, Zanzibar, Uganda, Nyasaland, British Somaliland, the Protectorate of Nigeria, the Northern Territories of the Gold Coast, and the Protectorate of Sierra Leone. A Protectorate was proclaimed over Amatongaland, now part of Natal, in 1895. In 1898 Weihaiwei was obtained on lease from China, as well as an extension of British Kowloon. The former was given back to China on 1st Oct. 1930. In 1899, by an arrangement with Germany, certain of the Solomon Islands were transferred to the British sphere of interest. The Orange Free State and the Transvaal were annexed in 1900. In the same year Tonga, in the Western Pacific, came under British protection, and the Cook Islands, Savage Island, and other small islands were annexed.

British protection has been extended to all that part of the Malay Peninsula which is not in the possession of Siam, and the government of the various States is carried on in accordance with the advice of British Residents or Advisers.

The Great War of 1914-18 resulted in extensive territories, formerly belonging to Germany and Turkey, being placed under British administration under mandates from the League of Nations.

Of these, the following were entrusted to the control of the Government of the United Kingdom:—

Tanganyika Territory, i.e. the former German East Africa, less the north-west corner which was assigned to Belgium.

British Cameroons, a strip bordering on Nigeria of the former German Protectorate of the Cameroons.

British Togoland, a strip of former German Togoland bordering on the Gold Coast.

Palestine and Transjordan.

To Australia were entrusted German New Guinea and the neighbouring German islands in the Pacific Ocean; to New Zealand, the German Samoan Islands; and to the Union of South Africa, German South West Africa.

A mandate for Nauru was given to the British Empire.

Iraq was entrusted to the supervision of the Government of the U.K., which had recognised it as an independent state subject to certain special relations with the U.K., which were embodied in a treaty and a number of subsidiary agreements which were ratified and came into force in 1924.

Including India but excluding the countries held on mandatory conditions, the Empire now extends over 11 millions of square miles, or 91 times the area of the Mother Country. The area of the overseas Empire excluding India is nearly 80 times that of the United Kingdom, and the estimated population is 64½ millions.

Of the total area of over 9½ million sq. miles, the self-governing Dominions (exclusive of the Irish Free State) cover about 7½ million sq. miles, inhabited by a population of 23 millions, so that the area more or less under the direct authority of the Home Government amounts to 2 million sq. miles, with a population of about 48 millions. All but about 300,000 sq. miles of this is in Africa.

Since 1870 British troops have been gradually withdrawn from all the self-governing Dominions, and now the land defence of these Dominions rests entirely on their local forces. Of the Colonies, Gibraltar, Malta, Cyprus, Mauritius, Ceylon, Straits Settlements, Hong Kong, Jamaica, and Bermuda possess British garrisons. British forces are stationed in Palestine, Transjordan and Iraq. The naval defence of the Empire still rests mainly on the Imperial Navy, though, as will be seen from the pages relating to the Imperial Conference, most of the self-governing Dominions now give substantial assistance. There are Imperial naval stations at Simon's Town, Bermuda, Malta, Gibraltar, Singapore and Hong Kong.

An account of the Colonial Conferences of 1887, 1894, 1897, 1902 and 1907, of the Imperial Conference of 1911, of the Defence Conference of 1909, of the Imperial War Conferences of 1917 and 1918 and of the Conferences of 1921, 1923, 1926 and 1930, is given under the heading "Imperial Conference."

A conference of Governors and other official representatives of the Dependencies not possessing responsible government was summoned by Mr. Amery, Secretary of State for the Colonies, in May, 1927, under the style of "The Colonial Office Conference". In all twenty-six Governments were represented. The Conference under the chairmanship of the Secretary of State, sat for three weeks, and the list of agenda comprised a great variety of subjects of concern to the Colonies generally, e.g. recruitment and training of Colonial Civil Servants and the conditions of their service, medical, agricultural, forestry and transport questions, organisation of scientific research, education, cinematograph films, Colonial Trade Agencies in London and Colonial participation in trade exhibitions, civil air development, wireless communications and broadcasting, co-operation in the exchange information, etc.

A full summary of the proceedings and conclusions of the Conference was published by the Stationery Office as Cmd. 2883 and Cmd. 2884 (1/3 and 4/6 respectively).

The second Colonial Office Conference was held in June and July, 1930. Twenty-seven Oversea Governments were represented and Observers on behalf of the Administrations of the following countries also attended the meetings:—India, Union of South Africa, Southern Rhodesia, South African High Commission Territories, Sarawak, and North Borneo.

The Secretary of State for the Colonies presided over the Conference which, as in 1927, was composed solely of official representatives. Amongst the subjects under discussion were the Colonial Development Fund; broadcasting, Civil aviation, and mechanical transport developments: the organization of the Colonial Service as a whole, especially in the light of the Report of the Committee on the system of appointment in the Colonial Office and the Colonial Services (see Cmd. 3554): the organization of the scientific services including proposals for a unified agricultural service (see Cmd. 3049): labour questions: prison administration and the treatment of juvenile offenders. On a great number of these questions a general agreement on policy was secured, and the Conference unanimously recorded its emphatic opinion that such periodical opportunities of reviewing subjects of general concern were of considerable value to Colonial Administrations.

A summary of the proceedings of the Conference was published by the Stationery Office as Cmd. 3628 (price 2/-).

### AUSTRALIA.

#### THE COMMONWEALTH.

The Commonwealth of Australia is constituted under an Act passed by the Parliament of the United Kingdom in 1900—63 & 64 Vict., cap. 12. By this Act it was made lawful for the Queen, with the advice of the Privy Council, to proclaim that, on and after a day appointed in the proclamation, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also if Her Majesty were satisfied that the people of Western Australia had agreed thereto, of Western Australia, should be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

A proclamation was accordingly issued by Her Majesty on the 17th of September, 1900, appointing the 1st of January, 1901, as the day on which the Commonwealth should be established—Western Australia being included as an original State in accordance with the result of a referendum taken before that date in the Colony and with Addresses passed by both Houses of the Legislature.

A short history of the events leading up to the establishment of the Commonwealth, and of the provisions of the Constitution, as fixed by the Act of Parliament above quoted, is given below. The account of the different States of the Commonwealth is arranged alphabetically, and a description of territories dependent on the Commonwealth follows.

The Earl of Hopetoun (afterwards Marquis of Linlithgow) was selected as the first Governor-General of the Commonwealth. A Commission was issued to him on the 29th of October, 1900, and he was sworn on the 1st January, 1901.

It was announced in September that the Queen would issue a special Commission to H.R.H. the Duke of York, for opening in Her Majesty's name the first session of the Commonwealth Parliament in the spring of 1901, and that H.R.H., accompanied by the Duchess of York, would pay visits to the different States of the Commonwealth. At the invitation of the Government of New South Wales, a representative body of troops, about 1,000 strong, sailed from England in November, to attend the inauguration of the Commonwealth at Sydney on the 1st of January, 1901. A small detachment of officers and non-commissioned officers of the Indian Army also proceeded to Sydney on the same occasion. The

Commission issued by the Queen to the Duke of York was renewed on the accession of King Edward VII. The Duke and Duchess landed at Melbourne on the 6th of May, and on the 9th the Duke opened the first session of the first Commonwealth Parliament in the Exhibition Building at Melbourne. The Duke and Duchess subsequently visited Brisbane, Sydney, New Zealand, Hobart, Adelaide and Perth, leaving Australia on the 26th of July to continue their tour to Mauritius, South Africa and North America.

#### *Australian Federation.*

Until the passing of the Commonwealth of Australia Constitution Act the only means of joint legislative action in Australia was provided by the "Federal Council of Australasia Act, 1885" (48 & 49 Vict., cap. 60). This Act created a Council of two members from each Colony which adopted the Act, except in the case of Crown Colonies, which had only one member each, with power to Her Majesty at the request of the Legislatures of the Colonies to increase the number of representatives for each Colony by Order in Council. Such an increase was upon the request of the Legislatures made by Her Majesty on 3rd March, 1894, when an Order in Council was passed, providing that each Colony which was or should be represented on the Federal Council, except any Crown Colony, be represented by five members. This Council had power to legislate with regard to the relations of the Colonies with the Islands in the Pacific, prevention of the influx of criminals, fisheries in Australasian waters beyond territorial limits, service and enforcement respectively of civil and criminal process out of the jurisdiction of the issuing Court, the enforcement of judgments beyond the limits of the Colony where they had been passed, the extradition of offenders, and the custody of offenders on ships belonging to Colonial Governments beyond territorial limits, and generally on any matters referred to it by Order of Her Majesty in Council on the request of the Colonial Legislatures. The Legislatures of any two or more Colonies might also refer to it for legislation questions of defence, quarantine, patents, copyright, bills of exchange, recognition of marriage and divorce, naturalisation, status of corporations, and joint stock companies, and other matters of general Australasian interest; but legislation of the Council on such matters was to extend only to the Colonies by whose Legislatures the matters should have been so referred, and such Colonies as might afterwards adopt the same. It had also power to decide on any questions affecting the mutual relations of any two Colonies referred to it by consent. The Council was to meet at least once in every two years.

The first meeting took place on 25th January, 1886, when representatives were present from Victoria, Queensland, Tasmania, Fiji, and Western Australia. Measures were passed authorising the service of the civil powers and the enforcement of the judgments of the Courts of the different

Colonies throughout the territories of all those represented, and various important questions were discussed, including the defence of King George's Sound and Torres Straits. The second session opened on 16th January, 1888. An address was adopted to Her Majesty respecting the deportation of French criminals to the Pacific. An Act was also passed to regulate the Pearl Shell and Bêche-de-mer Fisheries in Australasian waters adjacent to Queensland. The Council met for its third session on 29th January, 1889, when representatives from South Australia were present for the first time. An Act was passed to regulate the Pearl Shell and Bêche-de-mer Fisheries in Australian waters adjacent to Western Australia. The amendment of the basis of representation in the Council was discussed at the session, and communications on the subject subsequently passed with the Imperial Government. The fourth session opened on 20th January, and closed on 24th January, 1891. South Australia was not represented, the Act (a temporary measure for two years only) under which that province joined the Council having expired. The only Bill passed was one to facilitate the recognition in other Colonies of Orders and Declarations of the Supreme Court of any Colony in matters of lunacy. An address to Her Majesty was also adopted referring to the desirability of British subjects being placed on an equal footing with subjects of other countries in regard to the acquisition of land in, and trading with, natives of the New Hebrides.

The fifth session was commenced on 26th January, 1893, when the Colonies of Victoria, Queensland, Tasmania, and Western Australia were represented. An Act was passed providing for the discipline and government of the garrisons established at King George's Sound and Thursday Island; and a resolution was adopted in favour of an increase in the number of representatives for each Colony, except any Crown Colony, to five. The Standing Committee was instructed to take steps for giving effect to this resolution, and also for securing the adhesion of the Colonies not represented in the Council. As the result of action taken by the Standing Committee, the Legislatures of all the Colonies in the Council addressed Her Majesty, requesting that the proposed increase in the number of representatives might be made; and, on 3rd March, 1894, Her Majesty was pleased to make an Order in Council providing "that each Colony which is or shall be represented in the said Council, except any Crown Colony, shall be represented by five members."

The sixth session opened on the 30th January, 1896, when the same four Colonies were represented as at the preceding session. There were present, for the first time, five delegates from each Colony. At this session no Bills were brought forward, but resolutions were adopted affirming the desirability of defining the status, and of granting facilities for the winding up of companies carrying on business in different Colonies; of rendering uniform the laws relating to banking; of establishing an effectual system of quarantine; of adopting a more economic method of raising public loans; and of taking steps with a view to the holding of a second Federation Convention. An address to the Queen was also adopted praying for the appointment of an Australian representative on the Privy Council Bench, in view of the special features often presented by Australian appeals.

The seventh session was commenced on 26th January, 1897, when the Colonies of Queensland,

Tasmania, Victoria, and Western Australia, were represented. An Act was passed, upon a reference of the matter to the Council by the Legislatures of Victoria and Queensland, to provide for the naturalisation within the Australian Colonies, or some of them, of persons of European descent naturalised in any of such Colonies, also upon a reference of the subject by the Legislatures of Tasmania, Western Australia, Victoria, Queensland, an Act was passed to make provision for the enforcement in certain cases within the Australian Colonies, or some of them, of Orders of the Supreme Court of such Colonies for the production of testamentary instruments. The Council adopted an Address to Her Majesty, referring to the Address adopted in 1891 with regard to restrictions in the way of trade with the natives of the New Hebrides, urging that negotiations should be entered into with the other Powers concerned with a view to imposing on their subjects equal restrictions in that trade. This and all the previous sessions were held at Hobart. The Council resolved that the place of its next meeting should be Melbourne.

#### *The Commonwealth Act.*

Notwithstanding the existence of the Federal Council, however, a movement was made for the establishment of a more effective Federation, to embrace a Federal Executive, as well as Legislature, somewhat upon the model of Canada. Towards the end of 1889 negotiations were opened between the various Australasian Colonies, the result being that a Conference of the seven principal Australasian Colonies met in Melbourne, on the 6th February, 1890. At this Conference it was unanimously agreed that the best interests of the Australian Colonies would be promoted by their "early union under the Crown," and that the Legislatures of the various Colonies should be invited to appoint to a National Australasian Convention during the year 1890 delegates empowered to report upon the scheme for a Federal Constitution.

In accordance with these resolutions, delegates were appointed, and the Convention commenced its deliberations in Sydney on the 2nd March, 1891. After an animated discussion, which lasted more than five weeks, a "Bill to constitute a Commonwealth of Australia" was drawn up and adopted. The Convention recommended that this Bill should be submitted by the Parliaments for the approval of the people of the several Colonies. It provided for the union of the Australasian Colonies in a Federal Commonwealth under the Crown; for a Governor-General to be appointed by the Crown, who should be aided and advised by an Executive Council: the constitution of a Senate and House of Representatives, with certain definite powers, the latter to have the initiation of money bills, which the former might pass or reject, but not amend; for the establishment of a Federal Judiciary: the revenue of the Commonwealth to be derived from the Customs and Excise duties, and other taxation, which should be collected by Federal officers, and expended as required for Federal purposes, any surplus to be returned to the respective Colonies. It also provided for absolute free trade internally throughout the Commonwealth, so soon as the Parliament should have imposed uniform Customs duties. The draft Bill of 1891, though it crystallised the idea of Federation, failed to command the serious attention of the Legislatures, and Federalists began a popular agitation to place the movement on a new footing.

A meeting of the Premiers of all the Australasian Colonies took place in Hobart in January, 1896, and

agreed to a scheme for framing a Federal Constitution to be submitted for the approval of their respective Parliaments. The Enabling Bill, agreed to at this Conference providing for the election by each Colony of 10 delegates to prepare a scheme of Federation, was adopted by the Parliaments of N. S. Wales, Victoria, S. Australia, and Tasmania, and in a modified form by Western Australia.

Delegates were accordingly duly elected and assembled in Convention at Adelaide on 22nd March, 1897, for the purpose of drafting a constitution. Having prepared a "Bill to constitute a Commonwealth of Australia," the Convention was on the 23rd April adjourned to reassemble at Sydney on 2nd September. The draft Bill was in the meantime submitted to the local Legislatures, and various amendments were suggested by those bodies. The Bill, together with those amendments, was further considered by the Delegates at the Sydney Session of the Convention, and a long discussion took place on various proposals submitted for settling questions of difference between the two Houses of the new Federal Legislature. Considerable progress was made with the rest of the measure, but the work of revision was not completed, and the Convention adjourned until 20th January, 1898, partly in the hope of seeing delegates from Queensland join in the final discussion. This hope was not realised, as the Queensland Legislature, for the second time, shelved the Enabling Bill.

The Convention met again at Melbourne on the 20th of January, 1898, and remained in session till the 17th of March, and a Bill was adopted which in accordance with the Federation Enabling Acts of the different Colonies was submitted to the popular vote for acceptance or rejection. In Victoria the polling was—For acceptance, 100,520; against, 22,099. The Bill was also accepted by the vote of the people in South Australia and Tasmania. But in New South Wales the statutory minimum number of 80,000 affirmative votes required by the Enabling Act of that Colony was not obtained, and the matter fell through for the time.

A further Conference of Premiers was held at Melbourne in January, 1899, to consider the objections of New South Wales; and this time Queensland was represented. The Premiers met in a spirit of compromise, and on the 2nd of February an agreement was come to which all the Premiers agreed to submit to their Parliaments for reference to the electors, it being understood that New South Wales should lead the way. South Australia, however, for purposes of local convenience, took a referendum vote upon the Bill on the occasion of the General Election, without waiting for New South Wales. This vote was taken on the 29th of April, when 65,990 votes were given for Federation and 17,063 against.

In New South Wales, the Bill providing for the reference to the people of the amended draft constitution was passed by the Lower House on the 2nd of March, but in the Upper House amendments were made. One of these required that one-third of the electors on the register should vote for the Bill in order to secure its acceptance. The Bill as amended passed the Legislative Council on the 21st of March. On the 22nd March the Lower House rejected the amendments of the Upper House. The latter body refused to give way. A conference between the two Houses was held without result on the 28th of March. Mr. Reid, Premier of New South Wales, prorogued Parliament for a few days, and on his advice the Governor added twelve new members to the Council. The Bill was re-introduced in the

Lower House, and passed on the 13th of April. It was accepted by the Legislative Council with an unimportant amendment (providing that a period of eight weeks should elapse before the referendum was taken) on the 20th of April, and on the 25th of April it was announced that the question would be submitted to the electors on the 20th of June. It was accepted by a majority of about 25,000.

On the 27th July, the amended Commonwealth Bill was accepted by overwhelming majorities in Victoria and Tasmania, and on the 2nd September by a majority of about 7,500 in Queensland. The delay in taking action in Western Australia led to some correspondence between Sir John Forrest, Premier of Western Australia, and Mr. Reid. Mr. Reid declared on behalf of the Federating Colonies that no amendments to meet the views entertained in Western Australia could now be considered; and the same assurance was repeated by Sir G. Turner, Premier of Victoria. Sir J. Forrest, in fulfilment of his undertaking at the Premiers' conference, brought the draft Constitution before the Legislature, which referred it to a Select Committee, who reported that it should not be accepted without considerable amendment. The Legislative Council finally refused to allow a referendum to be taken.

Addresses to the Queen from the five Colonies which had accepted the Constitution praying for the enactment of the Commonwealth Bill were received in the autumn of 1899.

As it appeared that some alterations in the Bill might be required by the Imperial Government, Mr. Chamberlain telegraphed to the Governor of New South Wales, expressing the hope that delegates were coming home to advise and assist during the passage of the Bill through Parliament.

Delegates were appointed, and reached England in March. Western Australia also sent a delegate to represent the views of that Colony, and the Agent-General for New Zealand was appointed to watch the interests of New Zealand.

The discussion between Her Majesty's Government and the Delegates turned chiefly on the clauses of the Bill relating to the Appeals to the Privy Council. Under the Bill, in Section 74, appeals were allowed both from the Supreme Courts of the States and from the Federal High Court, but there was a limitation in cases affecting the interpretation of the Constitution of the Commonwealth or of a State "unless the public interests of some part of Her Majesty's dominions other than the Commonwealth or a State are involved." Various memoranda passed on this subject of Clause 74, the delegates demurring to any alteration in the Bill, whilst Her Majesty's Government pointed out the difficulty of interpreting the Clause, and the danger that it might unduly restrict the right of appeal in cases where the interests of foreigners or British subjects outside Australia were affected.

The Bill was introduced into Parliament with amendments to secure Her Majesty's prerogative to grant special leave of appeal from the High Court of the Commonwealth or the Supreme Court of any State to the Privy Council. But the discussion with the delegates continued, and two successive compromises were arrived at. First, the appeal on Constitutional questions was made dependent on the consent of the Executive Government or Governments concerned, and finally was made dependent on a certificate to be granted at the discretion of the High Court.

No other amendments of any consequence were made by Parliament in the Bill as received from

Australia, except that provision was made for the inclusion of Western Australia as an original State, provided that Her Majesty was satisfied that the people of that Colony had agreed thereto prior to the issue of the Proclamation.

The Queen caused to be sent to Australia, for presentation to the Commonwealth Parliament, a duplicate of the Commission issued for the formal declaration of Her assent to the Act, together with the pen, inkstand, and table used on the occasion of its signature. She subsequently presented a duplicate of the Proclamation bringing the Act into force, duly signed and passed under the Great Seal.

#### *Constitution of the Commonwealth.*

The Constitution of the Commonwealth of Australia is contained in the Act of Parliament 63 & 64 Vict., cap. 12. The opening part of the Act recites that the union is to be indissoluble and provides for the admission of other Australasian Colonies and possessions of the Queen. It makes provision for the proclamation and date of establishment of the Commonwealth, declares the binding force of Commonwealth laws, and makes definitions. The Federal Council of Australasia Act, 1885, is repealed, and the Commonwealth is declared to be a single self-governing Colony for the purposes of the Colonial Boundaries Act. The proclamation was made on 17th September, 1900, constituting the Commonwealth as from 1st January, 1901.

The leading features of the Constitution proper are as follows:—

The Parliament consists of the King, a Senate and a House of Representatives. The Governor-General acts for the King.

The Senate consists of six members from each State. The number may be increased or diminished, but so that the equal representation of the original States is maintained, and no original State has less than six Senators. Qualifications for Senators are the same as those for Members of the House of Representatives, as given below. Senators are chosen for six years. The qualifications of electors for the first Parliament were those for the more numerous House of the Parliament of the State in which the elector was competent to vote. In the first Parliament of the Commonwealth the *Franchise Act*, 1902, unified the franchise for both Houses, on the basis of universal adult suffrage.

The House of Representatives has approximately twice as many members as the Senate, and the number of members for each State is in proportion to the population, but not less than five for any State. The qualifications of electors are as stated in the preceding paragraph. Each elector is to vote only once. Qualification of a Member to be (a) 21 years of age; (b) to be an elector or entitled to be; (c) resident 3 years; (d) natural born or naturalised 5 years.

House may continue to exist for 3 years from first meeting, but may be dissolved sooner; number of members may be increased or diminished by Parliament, subject to the Constitution.

The general powers of the Parliament are grouped under 39 headings, the principal of which are to make laws for trade, taxation, bounties, borrowing, postal services, naval and military, census and statistics, currency, banking, insurance, insolvency, corporations, divorce, marriage, invalid and old age pensions, immigration and emigration, quarantine, industrial disputes, railways, &c. Exclusive powers are held in regard to the seat of Government, State departments

transferred, and other matters declared by the Constitution to be within the exclusive power of the Parliament.

Money Bills may not originate in, nor be amended by, the Senate, which House may, however, return the Bill requesting any omission or amendment. Equal power with the House of Representatives is possessed in respect of all other proposed laws. Tacking Bills are prohibited.

Provision for Dead-locks.—Joint dissolution, and if again passed in Lower House and rejected in Senate a joint sitting to be held, and if passed by an absolute majority of total number of both Houses, disputed Bill to become law.

A Bill having passed both Houses the Governor-General shall either assent, withhold assent, reserve the Bill or return it and recommend amendments.

Executive power vested in King and exercisable by Governor-General in Council, who may appoint Ministers of State.

State departments of Customs and Excise transferred to Commonwealth on its establishment. Departments of posts, naval and military defence, light-houses, &c., and quarantine, on a date or dates to be proclaimed (Posts, telegraphs, &c., and naval and military defence became transferred to the Commonwealth on 1st March, 1901; quarantine on 1st July, 1909; and lighthouses, &c., on 1st July, 1915).

High Court of Australia established; appellate and original jurisdiction.

Collection of Customs to pass to Commonwealth. Customs and Excise duties to be uniform, and intercolonial free-trade established within two years after the establishment of the Commonwealth, after which period the Federal Government shall have exclusive power to levy such duties and to grant bounties on the production or export of goods. Western Australia may continue duties in force on intercolonial goods at the establishment of uniform tariff for five years, subject to reduction of one-fifth each year.

Of the net revenue from Customs and Excise not more than one-fourth to be applied by Commonwealth towards its expenditure. This holds good for the first 10 years and thereafter until the Parliament provides otherwise (Braddon clause).

Right of States to reasonable use of river waters for conservation or irrigation reserved.

Inter-State Commission provided for to regulate trade and commerce, and prevent discriminations being made by any State which may be deemed unreasonable or unjust to any other State. This Commission was established in 1913 and functioned till 1920, since which date no further appointments have been made.

Constitutions, powers, and laws of States protected. State Debts may be taken over.

Admission of new States provided for. Commonwealth to protect States against invasion or domestic violence.

Seat of Government to be in New South Wales, not less than 100 miles from Sydney, and to be within Federal territory. Parliament to meet at Melbourne until it meets at the new capital. The first session of Parliament at the Federal Capital City (Canberra) was opened by H. R. H. The Duke of York in May, 1927.

An alteration diminishing the proportionate representation of any State, or the minimum number of representatives of a State, or altering its limits, or in any way affecting the provisions of the Constitution in relation to it, shall not become law without the approval of a majority of the electors of such State.

The financial portion of the Act is too intricate to be briefly summarised. See Sections 81-105 of the Act.

Constitution may be altered by an absolute majority of each House; then to be submitted to electors, and if in a majority of States a majority of electors voting approve, also majority of all electors approve, then the change may be made. In case of a dead-lock between the two Houses, renewed after three months' interval, the Governor-General may submit the question to the electors in each State qualified to vote for the Lower House.

Two questions, both dealing with finance, were submitted to a referendum concurrently with the Federal elections of April 13th, 1910. The first provided that the Commonwealth should take the whole of the revenue from Customs and Excise, and pay to the States a sum equal to one pound five shillings per annum per head of their population, to be determined according to the latest available Commonwealth statistics. A special payment was to be made to Western Australia, in view of the large contribution per capita made by that State to the Customs revenue. It was intended that this arrangement should take the place of the Braddon clause but it was rejected by the electorate. The Surplus Revenue Act, 1910, retained to the Commonwealth for ten years the whole of the Customs and Excise Revenue, subject to each State receiving an annual payment equal to 25s. per head of the population of the State. This arrangement continued in force, until 1st July, 1927, when it was abolished by the States Grants Act. By the Financial Agreement Acts, 1928 and 1929, provision was made for the payment to the States of fixed annual amounts towards the interest on State debts. Special allowances are still made to South Australia, Western Australia and Tasmania. The second proposal related to the conversion of the State debts. The Constitution provided for the conversion of all the debts existing at the time of Federation, and it was the object of the second proposal to amend the Constitution so as to give the Commonwealth unlimited power to assume all State debts existing at any time. This proposal was passed.

Two more "proposed laws" for the alteration of the Constitution were submitted to a referendum on 26th April, 1911. They were:—

*A.* Constitution Alteration (Legislative Powers) 1910, and

*B.* Constitution Alteration (Monopolies) 1910.

The object of *A* was to extend the legislative powers of the Commonwealth Parliament in four directions (*a*) Trade and Commerce (*b*) Corporations (*c*) Industrial Matters and (*d*) Trusts and Monopolies. The result would have been a great change in section 51 of the Constitution. The object of *B* was to give the Commonwealth the power of making laws for, or assuming control of, any business or industry which was declared by resolution of both Houses to be the subject of any monopoly. Both resolutions were rejected by a large majority. At the general election of 1913 (May 31st), six questions were submitted to referendum; each question representing a proposed alteration of the Constitution, on which the electors were asked to decide. Of these, five were the old questions of 1911 re-submitted, and the sixth dealt with railway disputes. All the proposals were again rejected, but by much smaller majorities than in 1911.

Referenda were taken on 19th December, 1919, regarding a constitutional extension of Commonwealth powers in legislation and the nationalisation of monopolies. In each case the majority of votes was not in favour of the proposed extension.

On 4th September, 1926, a referendum was taken regarding an alteration of the Constitution in relation to the extension of legislative powers in regard to (*a*) Industry and Commerce, and (*b*) Essential Services. In each case the majority of votes was not in favour of the proposed extension.

In pursuance of a referendum held on the 17th November, 1928, the Constitution was altered by inserting a new section authorising the making of agreements between the Commonwealth and the States in relation to the taking over of State debts by the Commonwealth and the borrowing of money by the Commonwealth and the States. By an agreement entered into in 1927 and validated in 1929 the Commonwealth has taken over the State debts and provision has been made for the establishment of a Loan Council to exercise control over borrowing by the Commonwealth and the States and for the establishment of a sinking fund for the redemption of loans.

It will be observed from the summary given above that the Constitution follows that of the United States rather than that of Canada so far as the distribution of Federal and State powers is concerned. The matters belonging to the Commonwealth are limited to those expressly specified, and in other respects State powers are maintained. But its general political scheme rests on the doctrine of the constant responsibility to Parliament of an Administration formed with the approval of the Representative of the Crown.

The Governorships of the States are still filled by the Crown, and the Governors correspond on State business directly with the Secretary of State. The Governor-General is, however, kept informed of the correspondence passing between the Governors of the different States and the Dominions Office.

#### *Legislation, &c.*

Until 1927 the Parliament of the Commonwealth sat in Melbourne, but since May, 1927, the sittings of the Commonwealth Parliament have been held at Canberra, Federal Capital Territory.

The subjects engaging the attention of the Federal Parliament have been numerous and important. A record of legislation enacted from the inauguration of the Commonwealth to 1915 is given in the 1920 edition and from 1916 to 1920 in the 1923 edition of this work.

The following is a summary of the more important legislative enactments of the Commonwealth Parliament during the year 1930:—

(i) *Bankruptcy.* Provides for establishment of Federal Court of Bankruptcy.

(ii) *Gold Bounty.* Provides for payment of bounty to stimulate production of Gold.

(iii) *Income Tax (No. 2).* Provides for increase of tax from 10 per cent. to 15 per cent. on taxable income over £500 derived from personal exertion and for super tax of 7½ per cent. on taxable income derived from property.

(iv) *London Naval Treaty.* Enables effect to be given to the London Naval Treaty, 1930.

(v) *National Debt Sinking Fund.* Adjusts sinking fund contributions to original basis of thirty and fifty years.

(vi) *Sales Tax Assessment.* One of nine cog-nate measures imposing a sales tax of 2½ per cent. on goods, etc., sold by importers, manufacturers, and others.

(vii) *Seat of Government (Administration).* Abolishes commission system of government in Federal Capital Territory and provides for ministerial control through departments.

#### *Commonwealth Departments.*

The Trade and Customs Departments of the States were transferred to the Commonwealth Government on the 1st of January, 1901, and the Defence and Post and Telegraph Departments on the 1st of March, 1901. Other departments which have been created are Home Affairs, the Attorney-General's Department, the Treasury, the Prime Minister's Department, the Department of External Affairs, the Works Department, the Department of Health, the Department of Markets, and the Department of Transport. (The Navy, Army and Air Force are now in one Department, i.e., Defence.)

#### *Customs Duties.*

The Australian Customs Tariff, which is a very elaborate one, provides a British Preferential Tariff, an Intermediate Tariff and a General Tariff.

The British Preferential Tariff applies to goods the produce or manufacture of the United Kingdom, subject to the condition that the goods have been shipped in the United Kingdom to Australia and have not been transhipped, or, if transhipped, if it is satisfactorily proved that the intended destination of the goods when originally shipped from the United Kingdom was Australia. The provisions of the British Preferential Tariff may

be applied wholly or in part to any part of the British Dominions.

The Intermediate Tariff may be applied wholly or in part to any portion of the British Dominions or to any foreign country by negotiation, but at the present time this Tariff operates only in respect of certain goods covered by the Preferential Agreement between Australia and Canada.

The General Tariff applies to all importations except importations of produce or manufactures of the United Kingdom and those covered by Preferential Agreements.

*Primage Duty.* In addition to duties imposed by the Customs Tariff a primage duty of 10% ad valorem is imposed for revenue purposes on practically all goods imported into Australia. Certain goods have, mainly in the interests of the primary producer, been exempted from payment of primage duties, while other goods, principally machines, tools of trade and raw materials, not manufactured in Australia, pay only 4% primage.

*Reciprocal Agreements.* A Reciprocal Tariff Agreement between Australia and New Zealand has been in force since 1922, and a comprehensive Reciprocal Tariff between Australia and Canada operated from 3rd August, 1931. This Canadian Agreement superseded a previous Canadian Treaty operating from 1st October, 1925. The effect of both of these Agreements is to extend (with few exceptions) the benefits of the British Preferential Tariff to goods the produce or manufacture of the countries mentioned when they are imported into the Commonwealth direct from the country of origin. Certain goods the produce of Papua and the Territory of New Guinea are admitted into Australia free of duty.

#### *Statistics.*

Full statistics relating to the various States, etc., are given under subsequent headings. It will be convenient, however, to summarise some of the more important statistics for Australia as a whole.

#### *Population of Australia,*

(Exclusive of Full-blood Australian Aborigines.)

Date.	States.						Territories.		Total.
	New South Wales.	Victoria.	Queens-land.	South Australia.	Western Australia.	Tasmania.	Northern.	Federal Capital.	
31.3.1901 (Census)	1,354,846	1,201,070	498,129	363,157	184,124	172,475	*	†	3,773,801

\* Included in South Australia. † Included in New South Wales.

#### *Average Annual Increase of Population in Australia, 1861-1921—By decades.*

Period.	Increase per cent. per annum.	Period.	Increase per cent. per annum.
1861-71	3.75	1891-1901	1.72
1871-81	3.03	1901-11	1.81
1881-91	3.50	1911-21	2.20

The Periods referred to are from Census to Census.

#### *Public Debt of Australia.*

The referendum of 17th November, 1929, authorised the making of agreements between the Commonwealth and the States in relation to the taking over of State Debts, and by an agreement validated in 1929 the Commonwealth assumed control of the State Debts from 1st July, 1929. The following table shows the complete indebtedness of the States and Commonwealth at 30th June, 1931.

Commonwealth.	New South Wales.	Victoria.	Queens-land.	South Australia.	Western Australia.	Tasmania.	Total Debt. O'wealth and States.

*Inspector-General*, C. E. Lane-Poole, 939l.

*Meteorological Branch.*

*Director (Commonwealth Meteorologist)*, W. S. Watt, 710l.

*State Meteorologists* : New South Wales, D. J. Mares, 499l.; Queensland, G. G. Bond, 475l.; South Australia, E. Bromley, 475l.; Western Australia, E. B. Curlewis, 475l.; Tasmania, J. C. Foley, 418l.

## DEPARTMENT OF TRADE AND CUSTOMS.

*Comptroller-General*, E. T. Hall, 1,550l.

*Deputy Comptroller-General* (Supernumerary), E. Abbott, 1,056l.

*Deputy Comptroller-General*, H. McConaghy, 1,056l.

*Chief Surveyor*, M. B. Synan, 800l.

*Chief Clerk*, J. J. F. Kennedy, 576l.

*Collector*, New South Wales, W. H. Barkley, C.B.E., 1,017l.

*Collector*, Victoria, J. Musgrave, 862l.

Queensland, R. B. Curd, 770l.

South Australia, H. E. Neal, 800l.

Western Australia, G. F. A. Mitchell,

710l.

*Collector*, Tasmania, E. A. J. Benjafield, 595l.

*Tariff Board.*

*Chairman*, H. McConaghy.

*Members*, H. E. Guy, S. Berchdolt, W. S. Kelly.

*Film Censorship.*

*Chief Censor*, W. C. O'Reilly, 691l.

*Analyst's Branch.*

*Federal Analyst*, W. Percy Wilkinson, F.I.C., 730l.

*Department of Health.*

*Director-General of Health and Director of Quarantine*, J. H. L. Cumpston, C.M.G., M.D., D.P.H., 1,550l.

## DEPARTMENT OF WORKS.

*Secretary*, P. A. Gourgaud, 853l.

*Director-General of Works*, T. Hill, O.B.E., M.V.I.E., A.M.I.E. (Aust.), 1,094l.

*Director of Lands and Survey*, A. Percival, 730l.

*State Directors* :—

New South Wales, C. H. U. Todd, 770l.

Victoria, H. J. Mackennal, 770l.

Queensland, J. Orwin, 634l.

South Australia, H. M. Rolland, O.B.E., 634l.

West Australia, G. S. Cook, 595l.

*River Murray Commission.*

*President*, Senator the Hon. J. B. Dooley,

*Members*, T. Hill, O.B.E., H. H. Dare, R. H. Horsfield, J. H. Eaton.

*Secretary*, D. P. Israel.

*Commonwealth Railways.*

*Commonwealth Railways Commissioner*, G. A. Gahan, 1,550l.

*Secretary*, E. Simms, 720l.

## DEPARTMENT OF TRANSPORT.

*Secretary*, H. C. Brown, 853l and 155l as War Service Homes Commissioner.

*Marine Branch.*

*Secretary*, L. F. East, 862l.

*Director of Navigation*, Capt. J. K. Davis, 800l.

*Engineer and Ship Surveyor-in-Chief and Principal Examiner of Engineers*, A. E. Battle, 653l.

*Principal Nautical and Ship Surveyor*, L. R. Sunderoombe, 614l.

*Principal Examiner of Masters and Mates*, L. E. Lucas, 557l.

*Senior Nautical and Ship Surveyor (Relief, etc.)*, C. D. Matheson, 557l.

*Senior Clerk*, J. Salmon, 518l.

*Director of Lighthouses and Engineer in Chief*, B. Wallach, B.E., 800l.

## DEPARTMENT OF MARKETS.

*Secretary*, E. J. Mulvany, I.S.O., 930l.

*Council for Scientific and Industrial Research.*

*Council*, Sir G. A. Julius, K.B., B.Sc., B.E., M.I.M.E., M.I.E. (Aust.), Chairman; Prof.

A. E. V. Richardson, M.A., D.Sc., Prof. A. C. D. Rivett, M.A., D.Sc.

*Secretary*, G. Lightfoot, 910l.

# NEW SOUTH WALES.

## Boundaries and Area.

The State of New South Wales lies on the eastern coast of Australia, almost entirely between the 29th and 36th parallels of south latitude, and between the 141st and 154th meridians east of Greenwich. It is bounded on the east by the Pacific Ocean, to which it presents a coast line extending from Point Danger at its north-eastern extremity to Cape Howe at the south-east. From the point last mentioned, which is also the north-east limit of the State of Victoria, it is bounded by a surveyed and marked line running in a north-westerly direction to the source of the River Indi and thence by the southern bank of the Murray, into which the first-named stream merges, as far as the 141st meridian of east longitude. The intersection of the Murray with this meridian forms a common point of the three States of New South Wales, Victoria, and South Australia.

On the west, the State is separated from South Australia by the line of the 141st meridian, as far as its intersection with the 29th parallel of south latitude, at which point New South Wales, South Australia, and Queensland touch. Commencing at this point, the northern boundary of the State follows the 29th degree of latitude, east of the Barwon River, then along the Macintyre and Dumaresq Rivers to the junction of the latter with Tenterfield Creek, thence along the crest of a spur extending from the great Dividing Range. Then it follows the Dividing Range to Macpherson Range and proceeds along that Range until it reaches the coast at Point Danger.

The area of New South Wales is 310,372 square miles (inclusive of Federal Territory—940 square miles and Lord Howe Island, a dependency of New South Wales, 5 square miles), or 198,638,000 acres, being a little over two and a half times that of Great Britain and Ireland. Excluding the surface covered by rivers, lakes and principal harbours, the area is 195,669,000 acres, or about 305,733 square miles.

The length of the State, from Point Danger on the north to Cape Howe on the south, is 683 miles, the length of the seaboard is 907 miles. From east to west, along the 29th parallel, the breadth is 756 miles, while diagonally from the south-west corner, where the Murray passes into South Australia, to Point Danger, the length reaches 850 miles.

Sydney, the seat of Government, is in 33° 51' 41" S. lat., and 151° 12' 23" 10" E. long.

Of the total area of the State, 88,238,348 acres were practically beyond State control on the 30th June, 1930.

The number of alienated holdings over one acre in extent used for agricultural and pastoral purposes during the last year (1929-30) for which returns were compiled was:—

Area Series. (Freehold only).	Holdings	Area of Holdings (Freehold only).
		Acres.
1- 30	8,720	117,889
31- 320	27,214	3,949,300
321- 640	11,309	5,424,505
641- 1,280	10,728	9,966,089
1,281- 2,000	4,950	7,920,484
2,001- 3,000	3,076	7,551,238
3,001- 5,000	2,215	8,512,366
5,001-10,000	1,516	10,223,976
10,001-50,000	810	14,658,138
50,001 and over	57	4,907,390
Total	70,595	73,231,375

In addition to the alienated area shown above, there were 99,304,307 acres of Crown Leases.

There were 5,563 Holdings, consisting of Crown Lands only, 61,199 consisting of Alienated Lands only and 9,396 consisting of Alienated Lands, with Crown Lands attached.

At 30th June, 1930, the number of holdings of 1 acre and upwards was 76,158. The area of alienated holdings (freehold only) was 73,231,375 acres and the total area of Crown lands occupied was 99,304,307 acres.

## History.

The name "New South Wales" was given to the eastern part of Australia on its discovery by Captain Cook in 1770, but the first settlement was not formed until 1788, at Port Jackson, under Captain Phillip, R.N. The capital was named after Viscount Sydney, who was Secretary of State for the Colonies when the settlement was formed.

New South Wales was then held to include the whole eastern portion of the continent. The first newspaper was established in 1803. The Merino sheep was introduced in 1797, but progress for a time was slow because a passage over the Blue Mountains, giving access to the interior plains, was not discovered until 1813. The population in 1800 was 5,217. At the first census in 1828 the total population was only 36,598, but it increased rapidly thereafter, and the discovery of gold in 1851 brought much population to the State. Responsible government was established in 1856, and the next thirty years was a time of remarkable prosperity and progress. On the 1st January, 1901, the Colony of New South Wales united with the Colonies of Victoria, Queensland, South Australia, Western Australia, and Tasmania, into a close political federation known as the Commonwealth of Australia. This, the second outstanding political event, was followed by a further period of phenomenal prosperity and progress which lasted until the outbreak of the European war in 1914. Then the extraordinary overseas demand for the staple products, which increased as the war continued, enhanced the value of local production, so that the critical period which followed the post-war trade boom passed without any economic disorder and the State entered upon a period of steady industrial expansion. This expansion continued until towards the end of 1929 when a heavy fall in the prices of staple exports caused a depression similar to that prevailing in other countries of the world.

## Climate.

New South Wales is situated entirely in the temperate zone and its climate is generally mild and equable with plenty of sunshine. The mean temperature in the shade at Kiandra in the coldest portion of the State during 1930 was 45° 6' Fah. and at Menindie in the western division it was 65° 8". On the coast it varied from 55° 5' in the southern portion to 69° 9' in the northern districts, Sydney being 63° 3'. On the mountains snow lies in a few places in the winter. On the tablelands the mean annual temperature is somewhat lower than in the coastal districts, where the winter is milder.

The rainfall decreases as the distance from the coast increases. The average rainfall of Sydney is about 48 inches annually, the average annual number of days on which rain falls is 152.

The prevalent winds in summer are the north-east sea-breeze and light westerly; in winter, westerly.

In winter, on the lowlands, frosts are common in the southern and rare in the northern districts.

*Trade and Industry.*

The staple products of New South Wales are wool and wheat.

The quantity and value of wool exported from New South Wales to countries outside Australia during the last five years is shown below; the figures include wool produced in other States and exported through New South Wales, but exclude New South Wales wool transferred to other States for export overseas:—

1926-27	364,657,943 lbs.	value	28,895,680/.
1927-28	340,978,355 "	"	30,320,197/.
1928-29	359,753,007 "	"	27,377,890/.
1929-30	325,289,000 "	"	16,235,892/.
1930-31	362,829,443 "	"	14,104,883/.

The value of the wheat exported overseas during 1930-31, was 3,818,105/., and of wheaten flour, 1,242,475/.

The quantities were wheat, 18,633,141 centials, and flour 3,640,930 centials.

The other principal exports of Australian produce to countries outside Australia in 1930-31 were:—Butter, 31,388,919 lbs., 1,676,247/.; lead, 952,926/.; coal, 387,400/.; coke, 1,763/.; skins and hides, 1,451,760/.; tallow, 282,400/.; frozen and preserved meat, 1,044,035/.; sausage casings, 128,642/.; biscuits, 58,184/.; confectionery, 45,877/.; fruit, fresh and preserved, 273,727/.; wines, 31,073/.; tobacco, 115,635/.; pearl shell, 150,710/.; leather, 247,023/.; timber, 270,237/.; copper ingots, 376,073/.; tin, 78,364/.; zinc, 57,111/.; gold specie, 1,041,056/.; gold bars, 72,668/.; eggs, 139,782/.; metal manufacturers other than machinery, 223,140/.; live animals, 41,887/.; stationery and paper, 85,653/.. A re-export trade in manufactured goods is carried on with the islands of the Pacific.

The values of the chief articles of British and foreign produce imported in 1930-31 were:—Iron and steel—bars, rods, angles and tees, 79,302/.; plate and sheet, 505,443/.; pipes, tubes and fittings, 162,476/.; adding and computing machines, 54,673/.; dairy implements and machinery, 58,065/.; printing machinery, 58,788/.; other machinery and implements, 1,125,576/.; timber, 303,457/.; tools of trade, 145,887/.; telephones, 95,801/.; wireless sets and materials, 251,612/.; cable and wire covered, 286,722/.; other electrical appliances, 962,664/.; motor car bodies, 6,898/.; motor car chassis, 183,722/.; pneumatic tyre covers, 9,240/.; lamps and lampware, 69,280/.; cutlery and plated ware, 180,146/.; furniture, 19,626/.; yarns, 400,641/.; sewing and other cottons, thread, etc., 189,697/.; fancy goods, 247,284/.; cotton, dyed or printed, 975,580/.; silk, raw, 105,356/.; silk piece goods, 721,529/.; woollen piece goods, 55,379/.; apparel and attire, 101,943/.; cinematographs and films, 537,390/.; proprietary medicines, 153,893/.; pianos, 2,180/.; whisky, 262,955/.; tea, 1,239,305/.; tobacco, cigars, etc., 1,112,097/.; copra, 97,878/.; fish (preserved), 203,938/.; jewellery and precious stones (unset), 66,888/.; kapok, 51,130/.; paper—news print ing, 713,279/.; books (printed), 378,439/.; canvas and duck, 118,921/.; carpets and carpeting, 148,733/.; linoleums, oilcloths, etc., 77,489/.; petroleum crude, petroleum and shale spirit, benzine, etc., 1,848,870/.; mineral oil (kerosene and lubricating), 473,871/.; glass and glassware, 122,289/.; socks and stockings—cotton, 2,641/., silk, 27,964/., woollen, 10,951/.; linseed, 180,541/.; bags and sacks, 746,415/.; rubber tyres, 2,956/.. 36·3 per cent. of the overseas imports was the produce of the United Kingdom, and

33·6 per cent. of the exports was shipped thereto.

Sydney and Newcastle are ports of registry; 16 vessels, of a total tonnage of 8,719, were registered during the year ended 30th June, 1931, while the total number of vessels on the registers at 30th June, 1931, was 1,001, with a tonnage of 113,125.

*Factories and Works.*

In 1929-30 there were 8,208 factories and works, employing 167,690 persons, of whom 125,769 were males and 41,921 females. The total value of plant and machinery was 53,515,368/.; the total salaries and wages paid amounted to 34,875,995/.; and the value of the output was 167,250,618/.

*Agricultural Production.*

The total area under crop during the season 1929-30 was 5,499,408 acres, and the total value of agricultural production 15,438,000/.. The principal crops in 1929-30 were wheat, 34,407,000 bushels, maize, 3,035,850 bushels, hay, 686,962 tons, sugar cane, 174,110 tons, oats, 2,528,610 bushels, wine, 1,933,709 gallons and potatoes, 23,907 tons. In 1930-31 the estimated production of wheat was 65,811,000 bushels, and the yield of wheaten hay 670,750 tons.

*Pastoral and Dairying Production.*

The number of live stock on 30th June, 1930, was as follows:—Horses, 534,946; cattle, 2,686,132; sheep, 48,720,000; and awine, 323,499. The number of sheep at 31st December, 1930, was 49,870,000. The wool clip in 1930-31 was 427,220,000\* lbs. (as in the grease), valued in Sydney at 15,486,000/..

The production of the dairying industry during 1929-30, included 105,022,384 lbs. of butter, 6,345,785 lbs. of cheese, and 21,616,472 lbs. of bacon and ham. The total value of pastoral production was 28,511,000/., and of dairying and farmyard production was 14,796,000/.

*Mining.*

Coal mining has advanced steadily since 1863. The produce of 18 mines in that year is given as 435,889 tons, valued at 236,230/., while in 1881, 1,769,597 tons, valued at 603,248/., were raised from 40 mines; and, in 1915, 9,449,008 tons, valued at 3,424,630/., were raised from 112 mines. In 1923, 10,478,513 tons, valued at 8,607,892/., were raised from 165 mines. In 1924, 11,618,216 tons valued at 9,589,547/., were raised from 159 mines. In 1925, 11,396,199 tons, valued at 9,302,515/., were raised from 157 mines. The production of coal in 1926 was 10,885,766 tons valued at 9,436,520/.. from 141 collieries; in 1927 the mines numbered 153 the production of coal being 11,126,114 tons valued at 9,782,002/.; in 1928, 9,448,197 tons, valued at 8,263,729/., were raised, and there were 168 mines; and in 1929 7,617,736 tons, valued at 5,952,720/., were raised, the number of mines being 189; 1930, 7,093,055 tons, 5,193,032/., 216 mines. Silver and silver lead to the value of 2,088,790/., and zinc concentrates valued at 986,087/., were produced in 1930. The total value of the minerals won during 1930 was 9,781,606/., excluding the value of Portland cement, lime and coke.

*All Industries.*

The total value of production from all industries during the year 1929-30 was 137,233,000/., or 56/ 7s. 7d. per head of population.

\* Subject to revision.

### Currency and Banking.

The currency of New South Wales is under the supervision of the Commonwealth Government. British or Australian gold coins are legal tender and the paper currency in the form of Australian Notes is controlled by the Commonwealth Bank Act and the Bank Notes Tax Act.

The 16 trading banks operating in the State in 1931 were:—Commonwealth Bank of Australia; Bank of New South Wales; Commercial Banking Company of Sydney, Ltd.; Bank of Australasia; Union Bank of Australia, Ltd.; Australian Bank of Commerce, Ltd.; English, Scottish, and Australian Bank, Ltd.; Queensland National Bank, Ltd.; Bank of New Zealand; Commercial Bank of Australia, Ltd.; National Bank of Australasia, Ltd.; Rural Bank (a department of the Government Savings Bank of New South Wales); Bank of Adelaide; Primary Producers; Comptoir National d'Escompte de Paris; Yokohama Specie Bank, Ltd. Total average amount of deposits in trading banks for June quarter, 1931:—

Deposits not bearing interest ...	£41,243,590
Deposits bearing interest ...	80,109,505*
<b>Total</b> ...	<b>£121,353,095*</b>

The average note circulation for the same period was 63,366*l.*, the decrease in recent years being due to the issue of Commonwealth notes, which are now practically the only bank notes in circulation.

The number of accounts in Government Savings Banks in New South Wales on the 31st March, 1931, exclusive of inoperative and School Savings accounts and of accounts under 1*l.*, was 1,400,216, and the value of deposits, 70,773,167*l.*, equivalent to 50*l.* 6*s.* 11*d.* per account and 28*l.* 4*s.* 10*d.* per head of population. Interest on deposits was allowed at the rate of 4 per cent. per annum on all accounts up to 1,000*l.*

### Means of Communication.

On the 30th June, 1931, there were 6,044 miles of railways, owned and worked by the Government, the total cost of construction and equipment having been 132,565,362*l.* The receipts during the year ended 30th June, 1931, were 15,205,742*l.*†, and the working expenses 12,899,646*l.*, the balance therefore available towards meeting the annual charge for interest being 2,306,096*l.* There were 109 miles of private railway. There were also 200 miles of Government tramways, earning 3,058,471*l.*, against working expenses amounting to 3,121,395*l.* The total capital expenditure on tramways in operation was 8,435,810*l.* Several Victorian railway lines have been extended into New South Wales in districts not served by the State's railways, the total length being 204 miles.

### Posts and Telegraphs.

There are 3,093 telegraph stations, and the revenue received during the year ended 30th June, 1930, was 399,480*l.* from telegraph, 95,292*l.* from cablegrams and 2,361,924*l.* from telephone. There is a high-power radio station at Sydney capable of long distance communication. In

1930 9 licenses were in force for nine broadcasting stations, the total wireless licenses issued numbered 111,303.

In 1930 the cable messages sent from New South Wales numbered 399,653 and 382,323 were received. The amount of revenue for cable messages credited to New South Wales was 95,292*l.*

Of inland rivers the Murray, Darling, Murrumbidgee, and Lachlan are navigable most of the year for small river craft, and nearly all the coast rivers are navigable for varying distances by ocean-going steamers, especially the Richmond, the Clarence, the Macleay, the Manning, the Hunter and the Hawkesbury, while Port Jackson (Sydney Harbour), Port Stephens and Jervis Bay are large natural harbours. Steamers leave Sydney regularly for nearly all parts of the world, but communication with Europe is chiefly by the vessels of the P. and O. (*via* Colombo and Marseilles and *via* Capetown), the Orient Royal Mail lines (*via* Suez and Naples), the Messageries Maritimes (*via* Marseilles), Canadian Australasian line (*via* Vancouver), Oceanic line (*via* San Francisco), the Union S.S. Company of New Zealand (*via* San Francisco), White Star and Aberdeen lines (*via* Durban and Capetown), Scottish Shire line (*via* Suez), Blue Funnel line (*via* South Africa), the New Zealand Shipping Line (*via* Panama); Shaw, Savill and Albion Line; Canadian Government line (*via* Vancouver). The Clan line; Cunard line; Commonwealth and Dominion line; Federal Steam Navigation Co.; Ellerman and Bucknall line; Holland-Australia line; Swedish-Australia line; Norwegian-Australia line; German-Australia line; North German-Lloyd; Lloyd Sabaud line U.S. & A. line (inc.). Five or six mails are sent to and despatched from England monthly.

Letters from England reach Sydney in about 31 days.

Air mail services are in operation in Australia those over the State of New South Wales are from Adelaide (S.A.) to Cootamundra *via* Mildura, Hay and Narrandera, and branch services Broken Hill to Mildura and Hay to Melbourne, *via* Echuca.

### Education.

The education system of New South Wales is under the control of the Minister of Public Instruction, regulated by the Public Instruction Act of 1880. Teachers in State schools belong to the Public Service and are paid fixed salaries according to their qualifications and the classifications of their schools. Education is free, and compulsory between the ages of 7 and 14 years.

At the close of 1930 there were 3,217 State schools divided as follows:—High schools, 36 (8 boys, 7 girls and 21 mixed); public schools, 2,710 (including 606 provisional, 48 half-time, 1 travelling, 1 correspondence, 10 central, 8 special and hospital and 44 evening continuation schools); subsidised schools, 468; and industrial and reformatory schools, 3. School buildings are erected and maintained wholly at the expense of the Government.

State aid to denominational schools ceased many years ago, but general religious instruction is imparted by the State teachers, and for limited periods with the consent of parents by ministers of religion. Children are conveyed to central schools, and in very thinly-populated remote districts subsidies are paid either to families who combine and engage teachers, or

\* Commonwealth Bank Savings Bank deposits, previously included, are now excluded.

† Exclusive of the amount of 800,000*l.* paid by the Government as a contribution towards the losses on departmental lines.

to single families of 2 children and upwards ; in the latter case it may take the form of assisting to board the children near existing schools. A properly equipped travelling school conveys a means of instruction to several outlying groups in rotation. As a further means of providing facilities for the education of children of isolated families correspondence schools have also been organised. All children are carried free by rail to the nearest school, while conveyances are subsidised by the Department to carry pupils residing in an outlying district to a Central School.

The "Bursary Endowment Act," passed in 1912, provides for the establishment of a fund for Bursaries tenable in public or private secondary schools and in the Sydney University and for the constitution of a Bursary Endowment Board. About three hundred Bursaries, each tenable for four or five years at a High or District School, and carrying a monetary grant ranging from 12*l.* to 50*l.* per annum, are awarded annually. Provision is made for the supply of necessary text books to all pupils by the Department free of cost to the pupil. Agricultural Scholarships, Technical Scholarships and from 25 to 40 University Bursaries are also awarded annually. A Higher Education Scheme has been established which provides for (a) higher primary education in Superior Public Schools which are of three types (commercial and junior technical for boys and domestic for girls), and (b) High School education of several types (general, commercial, technical and agricultural), in High Schools. There are also District Rural Schools, which provide elementary agricultural instruction. Intermediate Certificates are issued on the satisfactory completion of a three years' High School course, and leaving Certificates (equivalent in prescribed subjects, to the University Matriculation Certificates) are awarded on the satisfactory completion of a five years' High School course. Thirty-four High Schools and two Agricultural High Schools are in operation. At the end of 1930, 1,312 students were undergoing courses of training, covering two years or more, at the Teachers' Colleges. In addition, 133 students were receiving a short (12 months') course of training preparatory to taking charge of small bush State Schools, or of receiving appointments as assistants in country schools.

Evening Continuation Schools have been brought into operation in city and country centres divided into the following classes: (1) Junior Technical Schools; (2) Commercial Schools—in both cases the object being to assist lads to push on more rapidly in the callings they have chosen; and (3) Domestic Schools, for girls only.

For the year 1930 the net cost to the State of public instruction was 4,471,939*l.*, exclusive of 213,744*l.* expended on technical education.

The University of Sydney was established and endowed by the State in 1850. Its State endowment was originally 5,000*l.*, and from 1890 to 1892 was 13,900*l.*, but it is now 32,000*l.* The endowment is largely added to by annual special grants and by private donations. The State endowment and special grants for 1930 amounted to 73,161*l.* Five denominational colleges are affiliated to the University. In addition, there is the women's college, also affiliated. During the year 1929-30, the total State endowment amounted to 6,233*l.* The University has the power of granting degrees in arts, law, medicine, science, engineering, agriculture, veterinary science and dentistry. Recently, several faculties

have been added to its curriculum. In the metropolis there is a public grammar school, with an enrolment of 860 pupils, and having a State endowment of 1,500*l.* There are also technical colleges, under the Department of Public Instruction, and classes are held in Sydney and in the principal country towns. The Central College—a large establishment—is extensively equipped and staffed for trades, professional, and scientific instruction. The fees are within the reach of all, and the colleges are open to males and females alike. There is an Australian Museum, a National Art Gallery, a Public Library, including the Mitchell Library, with endowments of 1,000*l.*, 2,000*l.*, and 2,000*l.* respectively, a State Conservatorium of Music and a Music Library. Public libraries and schools of arts are established throughout the State. There are also a Royal, a Medical, a Linnean, a Zoological, a Historical, a Geographical, and two Art Societies, a Government Observatory, Agricultural and Forestry Museum, and a Mining and Geological, and Technological Museums, Government Agricultural Colleges, Experimental Farms, with many other educational associations.

#### *Local Government.*

In New South Wales the greater portion of the State has been incorporated, leaving only the "Western Division," which is but sparsely settled, outside the scope of local government. Even in that division, however, several towns have been established as Municipalities.

The area incorporated comprises 183,964 square miles out of a total area of 309,439 square miles in the State (i.e., exclusive of Lord Howe Island and the Federal Capital Territory of Canberra and Jervis Bay).

The local government of this large area, with the exception of the City of Sydney, is provided for under the Local Government Act, 1919, as amended by subsequent Acts.

The City of Sydney was first incorporated in 1842, being the first town in the State to be granted municipal government, but it has, since its incorporation, been governed under special Acts applying to it alone.

Apart from the City of Sydney, there are two types of local government provided for, viz.:—Shires and Municipalities—the former comprising country districts (sometimes of great extent the largest being the Shire of Lachlan containing 5,736 square miles) and the latter the larger towns. There are now (September, 1931) 138 Shires and 180 Municipalities in the State. As regards town areas in Shires, a Shire Council may (subject to the Governor's approval and if a majority of the electors concerned do not veto the proposal at a poll which may be taken on a petition signed by not less than 100 of such electors) acquire the right to exercise many of the powers of a Council of a Municipality in any such area by having the area declared by Proclamation of the Governor to be an "Urban Area," without the expensive machinery of a separate municipal government having to be set up. Provision is also made for the proclamation of any municipality as a city, if it fulfils the requirements laid down by the Act and for the continuance as cities of all towns so proclaimed before the Act came into force. Cities, however, have no greater powers than Municipalities, and are treated as Municipalities under the Act in all respects except as to name.

The Act provides, practically, for adult suffrage; that is, that every natural-born or

naturalised British subject, male or female, of the full age of 21 years, who is an owner or rate-paying lessee of rateable land, or an occupier of land shall be entitled to enrolment as an elector. Occupier includes every person who is residing or has had his principal place of abode on land whether rateable or not in a ward or riding and has continuously during the period of six months prior to the day prescribed for enrolment resided or had his principal place of abode in the area. Councils consist of not less than 6 and not more than 9 Councillors in the case of Shires and not less than 6 nor more than 15 Aldermen in the case of Municipalities. Any person whose name is on a roll of electors is eligible for election as a Councillor or Alderman, except in certain cases where disqualification is provided for, the most important of which is on account of business or financial relations with the Council.

Each Shire is divided into Ridings, and a Municipality may be divided into Wards or may exist as an undivided area, but Ridings and Wards must be represented by an equal number of Councillors or Aldermen, as the case may be. Provision is made for the election of Urban Committees of three persons (or such other number as the Governor may determine from time to time) to manage the affairs of Urban Areas where such have been created. General elections of Councillors and Aldermen take place every three years, the last election having been held in December, 1928, and it is provided that in any Shire and Municipality elections may, if the electors so decide at a poll taken upon a petition of one-fifth of their number, be held according to the principles of proportional representation. Only one Council has to date adopted the system of proportional representation; and this Council proposes, as soon as possible, to revert to the ordinary method of election.

The functions of Shire and Municipal Councils include the control of roads, bridges, public watering places for stock, wharves and jetties, the lighting of streets, the regulation of traffic (except in the Sydney Metropolitan Traffic area) the removal and disposal of nightsoil and garbage, the provision of water supplies and of sewerage services, the regulation and licensing of public vehicles (except where the Transport Commissioners are the licensing authority) the control and management of parks and recreation grounds, etc.

To provide the revenue for exercising its powers a Council is empowered to levy a general rate of not less than 1*d.* in the £ on the unimproved capital value of all rateable land in its area. Where, however, a general rate of 1*d.* is more than sufficient in any year to meet the requirements of a Council, the Governor is empowered to authorise the levying of a rate less than that sum.

In addition to the general rate Councils are empowered to levy special rates for special works, local rates for works of benefit to a portion of the area only, and loan rates for the repayment of loans. In the case of these rates ratepayers may petition for a poll to be taken on the questions as to whether the rate shall be levied on the unimproved capital value or the improved capital value of the land subject to it.

The amount of the rates which a Council may levy is limited as follows, but provision is made that the Governor may grant permission to exceed these limits in special cases.

*Shires.*—General rates—2*d.* in the £ on the unimproved capital value of all rateable land in the Shire.

Rates in Urban Areas other than general, and water and sewerage local rates—2*s.* in the £ on the assessed annual value of all rateable land in the Urban Area.

*Municipalities.*—General rates—a sum equal to 2*d.* in the £ on the unimproved capital value and 1*s.* 6*d.* in the £ on the assessed annual value of all rateable land in the area; provided that a general rate of more than 3*d.* in the £ on the unimproved capital value shall not be levied on a mine worked for minerals other than coal and shale. All rates (other than water and sewerage local rates)—a sum of 2*d.* in the £ on the unimproved capital value and 2*s.* in the £ on the assessed annual value of all rateable land in the Municipality.

Water local rates are limited in both Shires and Municipalities to a sum equal to 2*s.* in the £ on the assessed annual value of all land rateable to the water rate. Sewerage local rates are limited to a similar sum.

There are four methods provided by which Councils may borrow for purposes authorized by the Act, viz.:—limited overdraft, renewal loan, ordinary loan and special loan. Ratepayers may petition for a poll of ratepayers to be taken on the questions as to whether a special loan shall be raised, or as to whether the loan rate shall be on the unimproved or improved capital value.

It is compulsory for loan rates to be levied for the repayment of renewal, ordinary, and special loans, except in certain circumstances, and except in the case of special loans raised by Shire councils. The total amount which may be owed by a Municipal Council on account of its borrowings is limited to twenty per cent. of the unimproved capital value of all rateable land in the Municipality, and special loans raised by a Shire Council must not in the aggregate exceed thrice the amount of the income of the Shire. Where loans are self-supporting, i.e. in the case of reproductive loan works and services which are not a charge upon the rates, the Governor may direct that they be not taken into account in calculating the Council's limit of borrowing.

A Council may also, subject to limitations enter into contracts for the purchase of goods and the performance of work on terms providing for payment by the Council by instalments extending over a period of years. The total of the amounts owing by a Council under these contracts is required to be taken into account as a charge against the Council's borrowing limit.

To assist Shire Councils it is provided that out of the Consolidated Revenue a sum of not less than £150,000 shall be distributed each year among Shire Councils by way of endowment, according to an apportionment made by the Governor every three years. For each of the years 1928 1929 and 1930 an amount of 250,000*l.* was made available for distribution as endowment. For the ensuing triennium 1931, 1932 and 1933 the amount to be distributed is based on the statutory minimum of 150,000*l.* per annum. Special grants and repayable advances for works are also made by the Government each year to both Shire and Municipal Councils. The amount paid for the financial year ended 30th June, 1931, being 916,224*l.* (special grants 900,101*l.*, loans 16,123*l.*).

In addition to what has been stated above as to a Council's powers, some novel features which were introduced by the Act of 1919 may be mentioned. These include the formation of groups of whole or parts of Shires and Municipalities—the groups being called "County Districts"—in order

to carry out more effectively such functions of the Councils of the areas included as the destruction of aquatic plants like water hyacinth (the growth of which in some districts has been found to render rivers unnavigable until the river is cleared and the plant destroyed), the prevention of river bank erosion or of floods, the supply of electricity, or any other function which would be a matter of concern to the district in which such Shires or Municipalities are situated. The Act provides for each "County District" to be administered by a "County Council" composed of delegates elected by the Council of each Shire or Municipality included in the district. The functions of a County Council are limited to the powers specially delegated to it by the Governor. The other powers of the Shire or Municipal Councils of the district are not interfered with in any way. Four "County Districts" have so far been proclaimed.

Difficulty was experienced in the past in getting the Councils of many Shires and Municipalities to carry out works such as the making of a new road or bridge desired by the residents of a particular Riding or Ward, and the 1919 Act accordingly provides that in circumstances like that, upon a petition signed by all the Councillors or Aldermen representing the Riding or Ward, or by at least one-fifth of the ratepayers of the Riding or Ward, the Council shall take a poll of ratepayers of that Riding or Ward, and, if such poll is favorable, shall carry out the work the people want and levy a local rate to provide for the repayment of the cost.

It is also provided in the Act that a Council may at any time take a poll of electors or ratepayers on any question arising out of the administration of the Act, and any question of importance may be thus referred to the people themselves for decision.

#### *Constitution.*

The first Legislative Council dates from 1823; it was greatly enlarged and made chiefly elective in 1843. "Responsible government" was established by the Constitution Act, 18 & 19 Vict., cap. 54 (1855). The Governor is appointed by the Crown; so also is the Legislative Council, of whom not less than four-fifths must be persons not holding office under the Crown, except officers on H.M.'s sea or land forces on full or half pay. The members of the first Legislative Council were appointed for five years, but all subsequent appointments have been made for life, subject to certain provisions contained in the Act. The Council consisted in August, 1931, of 86 members, who are not paid, with the exception of the President and Chairman of Committees, and any members who may accept portfolios in a Ministry. All members are privileged to travel free over all Government Railways and Tramways.

The Legislative Assembly has varied from time to time in its numbers and method of election. The property qualification and plural voting were abolished in 1893. The franchise was extended to women in 1902.

The electoral franchise is held by male and female adults, who are natural born or naturalised subjects of the King, and absolutely free, with a residential qualification, which requires residence for a continuous period of six months in the Commonwealth of Australia, three months in the State of New South Wales, and at least one month immediately preceding claim for enrolment in any subdivision. Persons are disqualified from voting who are of unsound mind or who have been convicted and are under sentence for

an offence punishable in any part of the British Empire by imprisonment for one year or longer.

The Parliamentary Elections Act, 1911, provided that an elector absent from the district for which he or she is enrolled may vote for that district at any polling place in any other electorate, and extended the franchise to members of the Naval and Military service.

The electoral Acts were consolidated in 1912.

On 18th December, 1918, an Act was assented to providing for the election of members of the Legislative Assembly at General Elections in accordance with the principles of Proportional Representation; for postal voting in cases where an elector throughout the hours of polling is not within 15 miles of a polling place (reduced to 10 miles in 1928), or is travelling under conditions which preclude him from attending a booth; or where an elector through serious illness or infirmity, or, in the case of a woman by approaching maternity, was precluded from attending a booth.

The State was subdivided into 24 districts, 9 of which were 5-seat districts and 15 were 3-seat districts.

On 10th December, 1920, an Act was assented to providing for the filling of casual vacancies by the election of the unsuccessful candidate at the last General Election who represented the same party interests as the late member, and who, upon the count of the primary preference votes, was highest on the list as disclosed by such count as between the unsuccessful candidates representing such party interests who was willing to be elected and available to fill the vacancy.

On the 28th December, 1921, an Act was assented to whereby full compulsory expression of preferences was abolished in favour of compulsion to the extent of the number of seats to be filled.

It provides for compulsory enrolment.

The interval between the issue of the writ and the taking of the poll was extended from the 28th day to a day not later than the fortieth day after the date of the issue of the writ.

The polling hours were fixed from 8 a.m. to 8 p.m., and nomination papers are now required to be signed by six electors instead of one hundred.

On 17th March, 1926, an Act was assented to, which provided for a redistribution of the State into ninety single seat electorates and for the repeal of the system of proportional representation upon completion of the redistribution and the preparation of the rolls.

The repeal of the Casual Vacancies Acts was also provided for, to take effect upon the issue of the writs for the first General Election on the basis of single seat electorates, and from that date casual vacancies are to be filled by the holding of by-elections. Preferential voting was also provided for.

In March, 1927, an Act was assented to which provided for a further redistribution for the purpose of giving the rural districts a greater measure of representation by increasing the number of electorates within the country area by at least three.

This redistribution, however, was not proclaimed and an Act was assented to on 4th January, 1929, which provided that within six months of proclamation of relevant sections a redistribution should be effected on the basis of 43 seats for a defined Sydney area, 5 seats for a defined Newcastle area and 42 seats for the country area. Future redistributions are

to be effected by a Commission of three persons, viz., the Electoral Commissioner, the Government Statistician, and Surveyor-General for the time being.

The Act provided also for the compilation of a joint roll for the purposes of Commonwealth elections and elections of the Legislative Assembly; for the compulsory expression of preferences in voting at elections of the Legislative Assembly; for compulsory voting at such elections; and for the establishment of a Court of Disputed Returns.

A person entitled to be enrolled, but whose name has been omitted from or struck off the roll, owing to an error of an officer, or a mistake of fact, is now permitted to vote under certain restrictions.

An objection on the ground of non-residence shall be deemed not to be good unless it alleges that the person objected to does not live in the sub-division, and has not so lived for at least one month last past. But once the rolls are certified by the various Returning Officers to be true copies of the head rolls, the roll is conclusive and its correctness cannot be inquired into by the Court of Disputed Returns.

The duration of the Assembly is three years, but it may be dissolved by the Governor at any time.

The amount paid to members was increased from £600 per annum to £875 per annum as from 1st July, 1925.

From April, 1930, the annual salary payable to members of the Legislative Assembly was reduced from £875 to £743 15s. 0d. per annum.

Members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the transmission of correspondence through the post.

*Nyngan Farm*, T. S. Rudkin, 408l. 9s. 7d. per annum and quarters and living allowance 47l. 7s. per annum.  
*Temora Farm*, L. Judd, 453l. 9s. 7d. per annum and residence.  
*Condobolin Farm*, R. W. McDiarmid, 438l. 9s. 7d. per annum and residence, and living allowance 47l. 7s. 0d. per annum.  
*Trangie Experiment Farm*, A. H. MacDougall, 453l. 9s. 7d. with residence.  
*Superintendent, Narrara Viticultural Nursery*, H. G. White, 378l. 9s. 7d. per annum and quarters.  
*Superintendent Griffith Viticultural Nursery*, N. D. Lackie, 328l. 9s. 7d. per annum and residence.  
*Glenfield Veterinary Research Station*, J. W. Chapman (foreman), 253l. 9s. 7d. per annum, and residence and allowance 26l.  
*Wauchope Bee Farm (Senior Inspector of Apiaries)*, W. A. Goodaore, 408l. 9s. 7d. per annum and quarters.  
*Government Poultry Farm, Seven Hills*, D. C. Duncan (poultry instructor), 266l. 9s. 7d. per annum and quarters.

**Forestry Commission.**

*Commissioner*, N. W. Jolly, 1,500l.  
*Secretary*, S. M. Tout, 743l. 9s. 7d.  
*Chief Working Plans Officer*, G. J. Rodger, B.Sc., 743l. 9s. 7d.

**Stock Branch.**

*Chief Veterinary Surgeon*, M. Henry, M.R.C.V.S., B.V.Sc., 943l. 9s. 7d.  
*Secretary, Registrar of Brands, &c.*, S. Smith, junior, 693l. 9s. 7d.  
*Director of Veterinary Research*, H. R. Seddon, D.V.Sc. (Melb.), 843l. 9s. 7d. and quarters.  
*Chairman, Local Board of Control, Tick Quarantine Area*, C. L. O'Gorman, M.R.C.V.S., 843l. 9s. 7d.

**Botanic Gardens, &c.**

*Director Botanic Gardens and Officer in Charge Centennial Park*, G. P. Darnell-Smith, D.Sc. (Syd.), B.Sc. (Lond.), B.Sc. (Bristol), F.I.C., F.C.S., 901l. 6s. 1d., less 120l. per annum quarters.

*Curator, Botanic Gardens and Centennial Park*, E. N. Ward, 593*l.* 9*s.* 7*d.* and quarters.  
*Superintendent, Botanic Gardens and Outer Domain*, G. F. Hawkey, 438*l.* 9*s.* 7*d.*, less 50*l.* per annum quarters.  
*Superintendent, Centennial Park*, J. M. Nichol, 393*l.* 9*s.* 7*d.*, less 65*l.* quarters.

#### WATER CONSERVATION AND IRRIGATION COMMISSION.

*Commissioners*, The Hon. W. F. Dunn, M.L.A., *Minister for Agriculture* (ex officio), Chairman; H. H. Dare, M.E., M.Inst. C.E., 1,250*l.*; Geo. J. Evatt, 1,250*l.*  
*Chief Executive Officer, Head Office*, F. H. Brewster, A.M.I.E. (Aust.), 1,093*l.*  
*Secretary*, H. G. Bevan, LL.B., 993*l.*  
*Executive Officer, Gauging and Water Rights*, J. E. Slade, 843*l.*  
*Manager Mirrool Irrigation Area*, Griffith, J. G. Youll, 793*l.*  
*Supervising Engineer and Architect*, W. Renshaw, A.M.I.E. (Aust.), 793*l.*  
*Cannery Manager, Lecton*, J. Brady, 771*l.*  
*Designing Engineer, Head Office*, H. M. Larkins, B.E., A.M.I.E. (Aust.), 743*l.*  
*Assistant Secretary and Chief Clerk, Head Office*, L. J. Hagarty, 743*l.*  
*Commercial Officer, Head Office*, A. E. Lewis, 743*l.*  
*Accountant, Head Office*, J. Seabrook, 743*l.*  
*Manager, Yanco Irrigation Area*, J. Ward, 733*l.*  
*Resident Engineer, Griffith*, W. J. Whettam, A.M.I.E. (Aust.), 693*l.*  
*Accountant, Murrumbidgee Irrigation Area*, Lecton, F. S. Digby, 693*l.*  
*Engineer, Surveys and Investigations, Head Office*, G. Huddleston, 693*l.*  
*Legal Officer*, B. J. Stanner, 668*l.*  
*Resident Electrical Engineer, Lecton*, A. E. Lemaire, 643*l.*  
*Mechanical Engineer, Head Office*, W. Edmonds, 643*l.*  
*Principal Research Officer, Griffith*, F. K. Watson, A.M.I.C.E. (England), 643*l.*  
*Chief Survey Draftsman, Head Office*, H. Valentine, 643*l.*  
*Resident Engineer, Wyanyala Dam*, C. J. Watt, 643*l.*  
*First Clerk*, G. A. Try, 623*l.*  
*Lands Administration Officer*, J. Messner, 618*l.*  
*Resident Engineer, Denilquin*, H. C. Fry, 603*l.*  
*Superintendent, Water Distribution and Engineer for Maintenance, Lecton*, T. M. Wilson, 618*l.*  
*Assistant Engineer for Boring*, P. E. Tandy, B.E., 593*l.*  
*Superintendent, Water Distribution and Engineer for Maintenance, Griffith*, S. H. Knight, 593*l.*  
*Supervising Officer, Shallow Boring*, J. L. Devitt, 588*l.*  
*Assistant Engineer and Official Trustee Bore Water Trusts, Moree*, J. C. Yeo, 583*l.*  
*Branch Accountant, Griffith*, R. M. Johnson, 568*l.*  
*District Inspector, Lecton*, P. C. Braithwaite, 472*l.* Free Residence, 61*l.*  
*District Engineer, Cuthwa and Coomealla Irrigation Areas*, H. Wagstaffe, 533*l.*, value of free residence and water 32*l.*  
*District Inspector, Griffith*, H. G. Lawson, 500*l.*, special allowance 33*l.*  
*District Inspector, Yenda*, S. M. Braithwaite, 493*l.*

#### DEPARTMENT OF LABOUR AND INDUSTRY.

##### Ministerial Office.

*Minister for Labour and Industry*, Hon. J. M. Baddeley.  
*Under-Secretary*, F. W. Kitching, 1,393*l.* 9*s.* 7*d.*  
*Chief Clerk*, L. W. M. Bennett, 773*l.* 9*s.* 7*d.*  
*Accountant*, C. S. B. Cochrane, A.C.I.A., 751*l.* 6*s.* 1*d.*

##### Industrial Registrar's Office.

*Industrial Registrar*, A. M. Webb, 843*l.* 9*s.* 7*d.* plus 85*l.* allowance.  
*Chief Clerk*, E. J. Kilpatrick, 551*l.* 6*s.* 1*d.* plus 40*l.* allowance.

##### Office of the Chief Inspector of Factories and Investigation Officer.

*Chief Inspector of Factories and Investigation Officer*, W. I. Taylor, 793*l.* 9*s.* 7*d.*  
*Superintending Inspector of Factories and Shops, and Senior Industrial Inspector*, R. C. Huntley, 568*l.* 9*s.* 7*d.*  
*Superintending Inspector of Factories and Shops and Industrial Inspector*, F. A. Dunleavy, 538*l.* 9*s.* 7*d.*, W. D. Clark, 528*l.* 9*s.* 7*d.*, T. G. Bennet, 538*l.* 9*s.* 7*d.*

##### Gas Examiner's Office.

*Senior Gas Examiner*, J. E. Tatham, 500*l.*

##### Labour Exchanges.

*Manager, Labour Exchanges*, C. J. Bellemore, 773*l.* 9*s.* 4*d.* plus 150*l.* allowance.  
*Officer-in-Charge, Migration Branch*, A. S. Davies, 693*l.* 9*s.* 7*d.*  
*Manager Government Agricultural Training Farm, Schoeyville*, J. F. Scully, 396*l.* 1*s.* 9*d.*, plus quarters and 50*l.* allowance.

##### Scaffolding and Lifts Branch.

*Departmental Engineer*, P. A. Fildes, 793*l.* 9*s.* 7*d.*

#### DEPARTMENT OF LOCAL GOVERNMENT.

*Under-Secretary*, H. E. Street, D.E.C., A.F.I.A.  
*Acting Chief Clerk*, C. H. N. Smart.  
*Acting First Clerk*, S. Haviland.  
*Inspectors of Local Government Accounts*, W. R. Wylie, H. C. Burns and T. Barber.  
*Senior Accounts Clerk*, B. B. C. Hughes.

##### Sub-Department—Valuer General's Department.

*Valuer General*, G. H. Legge.  
*Deputy Valuer General*, S. A. Giraud.  
*Chief Clerk*, H. A. N. Puddicombe (at present on loan to Transport Office as Acting Secretary).  
*Registrar*, E. Miller.

##### Statutory Bodies.

##### Electrical Contractors and Electricians Licensing Board.

*President*, J. D. Handley.  
*Members*, H. G. Holle, S. G. Turner, T. P. Johnson and J. Stewart.  
*Secretary*, R. Daly.

##### Local Government (Superannuation) Board.

*President*, E. H. J. O'Halloran.  
*Members*, The Hon. J. T. Tyrrell, M.L.C. and A. R. Bluett.

THE UNIVERSITY OF SYDNEY.

*Chancellor*, The Hon. Sir William Portus Cullen, K.C.M.G., M.A., LL.D.  
*Deputy-Chancellor*, Sir Mungo MacCallum, K.C.M.G., M.A., LL.D., D.Litt.  
*Vice-Chancellor*, Professor R. S. Wallace, M.A., LL.D., 2,000l.\*  
*Registrar*, Walter A. Selle, M.A., 1,100l.\*

Professors.

*Greek*, W. J. Woodhouse, M.A., 1,100l.\*  
*Latin*, F. A. Todd, B.A., Ph.D., 1,100l.\*  
*Mathematics*, H. S. Carslaw, M.A., D.Sc., 1,100l.\*

## LORD HOWE ISLAND.

Latitude, 31° 30' S. Longitude 159° 5' E.

This island lies 436 miles north-east from Sydney, and 300 miles from Port Macquarie, the nearest part of the Australian continent.

It was discovered on February 17th, 1788, by Lieutenant H. L. Ball, of H.M.S. "Supply," whilst on his way from Port Jackson to found a settlement at Norfolk Island. It is of volcanic origin and crescent shaped, about seven miles in length and from one-half to one-and-three-quarters in width, containing about 3,220 acres. It is of great beauty throughout and covered with a dense and most luxuriant vegetation, but from the peculiar bouldery character of the formation of the major part of its floor, it has scarcely more than 300 acres suitable for agriculture. The soil of these few acres is extremely rich, and will produce almost any sub-tropical vegetation.

No lands have been sold, and the people pay no rent, occupying the land upon sufferance only—the Government reserving the right of resuming whenever they may see fit.

The population numbers 120 souls. Very fair and comfortable accommodation may be obtained

amongst the settlers. The natural beauties of the island render it most attractive to visitors. Tourists are visiting this beautiful island in largely increasing numbers. Fish are very plentiful, and good sport can consequently be had. There is a monthly steam service to the island under the agency of Burns, Philp and Co. During the tourist season a fortnightly service alternates with a monthly service.

The Island is a dependency of New South Wales and the Government of New South Wales have appointed a Board of Control consisting of the Hon. J. C. L. Fitzpatrick, M.L.A., Chairman; E. B. Harkness, Esquire, C.M.G. (Under-Secretary, Chief Secretary's Office, &c.); and Dr. G. P. Darnell-Smith, &c. (Director, Botanic Gardens, &c.); Members: S. L. Anderson, Chief Secretary's Office, Sydney, Secretary. The Board take charge of the affairs of the Island, and the management and control of the Kentia palm seed industry. Lord Howe Island is the home of the Kentia palms, the hardest and most beautiful palms in the world, and the seeds are collected and sold under the Board's direction. Hundreds of bushels of these seeds are shipped annually to all parts of the world.

## QUEENSLAND.

*Situation and Area.*

Queensland occupies the whole of the north-eastern portion of Australia, commencing at a point on the east coast called Point Danger, in lat. 28° 8' south, about 400 miles north of Sydney, the capital of New South Wales.

The greater portion of the southern boundary line is formed by the 29th parallel of south latitude. The eastern seaboard extends about 1,500 miles, from Point Danger passing Cape York, the extreme northern point of the continent, and embracing the greater part of the Gulf of Carpentaria, terminates on the boundary of the Northern Territory, in lat. 10° 40'. Thursday Island, in Torres Straits, with Moreton, Stradbroke, Fraser, Hinchinbrook, Prince of Wales, Wellesley, and many other islands, are included in the State.

The breadth of the territory near the southern boundary is about 900 miles from the eastern coast line to the meridian of 138° east longitude, which forms the western boundary line of the State, separating it from the territory of South Australia. This includes the greater part of the Gulf of Carpentaria, which has a seaboard of about 750 miles. The whole of the State of Queensland comprises 870,500 square miles, or 429,120,000 acres (being equal to more than the combined areas of France, Germany, Italy and the British Isles).

*Early History.*

Captain Cook landed in Moreton Bay in 1770, but the Brisbane River, running into Moreton Bay, was not discovered until 1823, and the Moreton Bay Settlement was formed from New South Wales in 1824. The Darling Downs were explored in 1828, and squatters or ranchers, as they are termed in America, began to settle on the rich pasture grounds. The territory was, however, not thrown open to colonisation until 1842, and, after explorations by Leichhardt, 1845-7, and by Kennedy in York Peninsula in 1847, it was separated from New South Wales on 10th December, 1859, when it became a separate colony, under the name of Queensland, with about 25,000 inhabitants, having responsible government from the time of the proclamation declaring the Colony distinct.

*Climate and Physical Features.*

The climate is comparable to that of Madeira, the mean temperature being high but constant. The northern part is tropical. The mean temperature at Brisbane is about 63-7°, the extreme range during 1930 being from 40-7° to 96-7°. The rainfall in the interior is scanty and variable: the total for year at Brisbane was about 41.215 inches in 142 wet days; mean barometer 30.091.

The country extending along the eastern seaboard is indented with several fine bays and estuaries, which are the outlets of rivers, a number of which are navigable for good-sized vessels.

A mountain range, called the "Main," or "Great Dividing Range," extends throughout the greater portion of the colony: it is a continuation of the main range, or Cordillera of New South Wales and Victoria, and runs northerly throughout its course, and continues its course northerly to its termination at Cape York, the most northerly point of the continent of Australia. At or near the 21st parallel of south latitude another range leaves the Great Divide nearly at right angles,

and traversing the State westerly, separates the waters flowing east, south and west from those which, flowing northerly, debouch into the Gulf of Carpentaria. Between this range and the eastern shore are situated the highest mountains in the country, viz., the Bellenden Kerr Range, which reach an elevation of over 5,000 feet above the sea level.

*Products and Industries.*

Between the main range and the sea, especially on the banks of the rivers, there are large quantities of good alluvial land, which in its natural state is covered with a dense growth of timber. Much of this, in the more settled portions of the country, has been cleared and cultivated, and is found to yield a remunerative return to the farmers, who are usually small proprietors, cultivating the soil principally with their own labour, and growing chiefly sugar, maize, wheat, English and sweet potatoes, cotton, and semi-tropical fruits and vegetables.

Sugar growing is a very important industry. In 1930 there were 298,070 acres under cane, of which the crops on 222,044 acres were crushed, yielding a return of 3,528,660 tons of cane, which produced 516,783 tons of sugar at 94% net titre.

Maize was grown on 172,176 acres, and returned a yield of 4,565,850 bushels.

Tobacco Cultivation.—During the year ended 31st Dec., 1930, 71 acres yielded 58,594 lbs. of cured leaf.

The cultivation of cotton is now being undertaken on a large scale, and during 1930, 35,527 acres were under this crop of which 22,652 acres produced 17,022,897 lbs. of unginned cotton.

In 1930 the quantity of land under arrowroot (*Canna Edulis*) was 761 acres, which yielded 10,098 tons of tubers. Factories made 714,390 lbs. of arrowroot flour during 1929-30. A small proportion of this root is utilised for pig food.

Amongst other fruits, bananas occupied 18,030 acres, of which 12,565 acres produced 3,068,143 bunches of fruit. Pineapples, 5,543 acres, of which 3,983 acres produced 1,000,508 dozen. Oranges, 3,773 (2,805 bearing, 968 not bearing) acres, with 308,967 bushels. The total value of all crops for 1930 was estimated at £12,782,165.

Much of the country to the west of the dividing range of mountains is elevated tableland, consisting of wide plains, sparsely timbered but well grassed and watered, embracing many millions of acres of excellent agricultural soil. Within a certain distance of the mountains where the rainfall is tolerably regular, most of the land is well adapted for the production of wheat. This is cultivated in the neighbourhood of Toowoomba and Warwick on the Darling Downs; also at Roma and Mitchell further to the west. There is every prospect of the area of cultivation extending to the Burnett District and further west in the near future. In 1930, out of the total area planted with this cereal, 10,645 acres were mown for hay, and 272,316 acres yielded 4,791,561 bushels of grain.

Grazing is far in advance of tillage farming in the State, and there are 1,948 squatting "runs" or tracts of land, containing 200,716,980 acres, leased from the Government at a very low annual rental, more than half the number of which are surveyed, besides which an additional area of 75,961,276 acres are leased as grazing farms and homesteads, and 21,168,520 under occupation licence. Number of horses, 481,615, cattle, 5,463,724, sheep, 22,542,043 swine, 217,528.

Wool produced, 1929-30, expressed as greasy, 161,087,873 lbs., value 7,779,202l.

The chief exports overseas of home production were :

Goods sent to other States of Australia are not now counted as exports.

On account of this the details given above for some items are of practically no value. Many products, notably sugar, agricultural produce and fruit, gold, etc., are transhipped in other States and are not officially recorded as Queensland exports.

The imports are apparel and soft goods, vehicles, oils in bulk, implements and machinery, metals and manufactures thereof, iron and steel, paper, etc.

About 55·77 per cent. of Queensland's direct overseas trade is with the United Kingdom, whilst 61·02 per cent. is within the British Empire.

The percentages with foreign countries in 1929-30 were as follows: United States of America, 10·15; France, 4·74; Japan, 5·35; Germany, 5·56; Belgium, 4·14; and Italy, 2·04.

The mining industry is one of the most important in the State.

Queensland's mineral output during recent years has shown successive decreases which, however, do not necessarily imply that her mining is at an end.

During 1930 gold was obtained chiefly from the following fields: Gympie, Kilkwan and Glastonbury, Ravenswood, Mt. Coolon, Etheridge, Oaks and Woolgar, Batavia River, Cloncurry, and Charters Towers, Mt. Morgan.

The production for the year was 7,821 fine ozs., valued at 33,224*l*.

Many other minerals are worked in the State. The principal of which and their value for 1929 were:—

*Tin*.—49,708*l*.—Chief centres of production: Chillagoe, Cooktown, Herberton, Kangaroo Hills, and Stanthorpe.

*Lead*.—4,169*l*.—Chief centres: Brisbane and Etheridge.

*Copper*.—174,075*l*.—Chief centres of production: Cloncurry, Mt. Morgan.

*Silver*.—5,527*l*.—Chief centres: Chillagoe, Mt. Coolon, Cloncurry, Mt. Morgan.

*Limestone*.—31,180*l*.—Chief centres: Chillagoe, Gladstone, Gympie, Rockhampton, Stanthorpe and Townsville.

*Zinc*.—Nil.—Chief centre: Chillagoe.

*Arsenic*.—Nil, Stanthorpe.

Total value of minerals other than gold, 1,230,012*l*. Excellent coal continues to be raised in the environs of Ipswich, the Burrum and Peak Downs, the Dawson Valley and the Darling Downs, and at Bowen and Mount Mulligan, N.Q., whilst valuable deposits of this mineral are worked at Callide, as well as in other portions of the central districts; but besides these pits numerous workable seams of this mineral are known, and their being actively worked depends solely on the opening of an extended market. The total output for 1930 was 1,094,676 tons, valued at 952,866*l*.

Several companies have been formed with the object of prospecting for oil in the Roma and other districts, but up to the present, payable quantities have not been discovered.

Useful timbers of various descriptions grow in abundance in Queensland, and ought to become a valuable export. The timber indigenous to the State is popularly divided into two classes, termed respectively "hard" and "soft" woods. The undermentioned trees supply the hard wood which is most in demand: blue gum, messmate, iron bark, blackbutt, turpentine, stringy bark, spotted gum, bloodwood, tallow wood, yellow wood, dark yellow wood, swamp mahogany, crows ash, &c., &c. Some of these woods are especially valuable for railway making, bridge, pier, and wharf building, as well as for fencing purposes, on account of their strength and durability. The timbers which are used for house and boat building, cabinet and ornamental work, have a fine grain, are easily worked, and take a bright polish; a few of those most in use are as follows: hoop, kauri and bunya pine, maple silk-woods, silky and satin oaks, black and walnut bean, rose walnut, mahogany and grey tek.

Amongst the medicinal plants supplying extracts and preparations which are attracting notice in both Europe and America may be mentioned—*Duboisia myoporioides*, the extract of which is in demand as a substitute for belladonna; *Alstonia constricta*, whose bark is a valuable tonic; *Euphorbia Drummondii*, the extract of which is effective in dysentery and low fever; *Euphorbia pilulifera*, or the asthma herb; and the lemon-scented iron bark (*Eucalyptus staigeriana*) which, on distillation, yields an essential oil equal to that of the lemon. The extract from leaves of the eucalyptus is used largely as a remedy for colds, fevers, &c.

During 1929-30 the value of the production of Queensland's fishing industry was as under: £

Fish, Crabs, Turtles and Oysters ..	186,631
Pearls and Pearlshell .. .. .	220,062
Tortoise and Trochus Shell .. ..	39,291
Bêche de Mer .. .. .	21,199

Brisbane, Maryborough, Bundaberg, Rockhampton, and Townsville are ports of registry, and had, in 1930, 238 vessels on their registers, of a total tonnage of 14,057.

#### Water Supply.

A considerable sum has been advanced from time to time to municipalities and boards for the construction of works for the supply of water to the city of Brisbane and to towns in the State, of which a large proportion has been repaid, leaving at the end of 1930 an indebtedness to the Government of 2,797,289*l*. In addition 2,206,801*l* has been advanced for Metropolitan Sewerage Works.

Loans other than Government outstanding, at 31st December, 1930. For water £2,391,057; for Metropolitan Sewerage £2,447,542.

An important feature of the country west of the coast range is the proved existence of artesian water

in some 376,800 of the 670,500 square miles comprising the area of the colony at 30th June, 1931. At least 4,766 artesian bores have been sunk with an aggregate depth of 787·86 miles; the depth ranges from 3,000 feet to a maximum of 7,009 feet, the depth of the bore at Springleigh; 1,424 of these bores overflow. The estimated continuous yield of water from these flowing bores at 30th June, 1931, was 281,836,070 gallons per diem. In addition, supplies were pumped from 1,896 bores. Generally stated, the waters are soft, and otherwise of excellent quality. The static pressure at the surface ranges from fully 270 lbs. per square inch, as at the Government bore at Thargomindah, to a few lbs., and the temperatures of the waters range from 23° to 78° Fahr. The amount expended in boring for artesian water is estimated by the Government hydraulic engineer at about three-quarters of a million sterling, exclusive of the cost of casings, so that not far short of a million sterling represents the amounts expended, chiefly by pastoralists, in improving and increasing the value of the national estate. In addition to this expenditure, Government have expended large sums on the construction of water conservation works on main roads and stock routes, and these works have opened up country, facilitated settlement, and added to the value of public lands. The Dawson Valley irrigation project alone will supply water to some 200,000 acres and render this district immune from drought ravages.

The Nathan dam now under construction will impound 2,500,000 acre-feet of water and will be the largest artificial storage reservoir in the world.

During 1930 26,947 acres were artificially watered by various means. The crop chiefly benefited being sugar cane, but vegetables, fruit, lucerne, other fodder crops and grass lands have been similarly treated.

#### Population.

The population of Queensland, excluding the aboriginals, was found by the returns of the census of April, 1881, to be 213,525 persons; a census was taken on the 1st of May, 1886, when it was found that the total population was 322,853 persons, an increase of 51·20 per cent. in 5 years; and the census of 5th April, 1891, showed the population to be 393,719; of these 223,799 were males, and 169,939 females. The census of 3rd April, 1911, showed that there were 329,506 males and 276,307 females, making a total of 605,813, exclusive of 8,687 aboriginals. The population is mostly either Australasian born or of European parentage. The figures for 1911 do not include all aborigines, but only those living under civilised conditions. Population of State 30th June, 1931, 959,572. The census of aboriginals as on 30th June, 1930, revealed that there were at that date 14,042 full bloods and 3,889 half-castes in the State.

#### Census, 4th April, 1921.

	M.	F.	P.
Total .. ..	398,989	357,003	755,972
Chinese .. ..	3,764	320	4,084

(c)

#### Local Authorities and Towns.

Practically the whole of the State is divided into Local Authority Areas (cities, towns and shires), a few islands only, occupied by a population of some 1,500 persons, being excluded. The Local Authority areas are governed by aldermen and councillors who are elected by the people and have authority in all parochial matters.

The receipts of these bodies, including receipts for Water and Sewerage purposes in 1930 were 5,816,333*l.*; their expenditure 5,918,527*l.*; the assessed rateable value of the property in districts under their control 80,526,913*l.* (excluding cost of construction of water works 6,566,707*l.*, and sewerage 3,601,129*l.*) (capitalised Interest 787,073*l.* not included); their liabilities were 21,967,312*l.*, whilst their assets totalled 18,068,733*l.* Liabilities and assets for the water and sewerage works, which are due principally on behalf of these local bodies, are included in the figures given and amounted to 11,151,299*l.* and 12,080,712*l.* respectively.

In addition, the various Local Authorities control other public utilities—electric light, small railways and tramways (including Rockhampton and Brisbane Street Tramways); particulars follow for year 1930:

Public Utility.	Receipts.	Expenditure.	Liabilities.	Assets.
	£	£	£	£
Electric Light..	886,888	750,279	1,725,832	1,957,068
Private Railways & Tramways ..	1,008,670	967,297	3,170,628	3,297,713
<b>TOTALS</b>	<b>1,895,558</b>	<b>1,717,576</b>	<b>4,896,460</b>	<b>5,254,801</b>

Brisbane, the capital of the State, is beautifully situated about 20 miles from the mouth of the fine river of that name. The city, including its suburbs, had, at the Census on 4th April, 1921, a population of 210,032 (ten mile radius). The City of Brisbane now consists of an area of 385 sq. miles and the estimated population on 31st December, 1930, was 313,251. It is only about 10 miles in a direct line from the sea coast; the climate is healthy, and during the greater part of the year most enjoyable.

The other chief towns are Townsville (31,800), Ipswich (28,233), Maryborough (12,000), Rockhampton (30,000), Gympie (9,588), Toowoomba (26,145), Charters Towers (9,200), Bundaberg (11,250), Cairns (9,750), Mackay (9,230), Warwick (7,000) and Mt. Morgan (4,000).

#### Currency and Banking.

There were, on 30th June, 1930, 14 banks (exclusive of the Commonwealth Bank), with 526 branches. The value of the coin and bullion is given as 516,420*l.*; deposits, 37,044,028*l.*; assets, 43,092,732*l.*; liabilities, 37,754,740*l.*

At the same date the assets of the Commonwealth Bank were 7,718,196*l.*, and the liabilities 9,177,163*l.* (including 7,234,095*l.* deposits).

The Commonwealth Savings Bank, Queensland Branch, had on 30th June, 1930:—

No. of Depositors .. .. 501,074  
Value of Deposits .. .. 23,901,136*l.*  
Average Value of each Account .. 47*l.* 14*s.* 0*d.*  
The coinage of Queensland is the same as that of the United Kingdom and the same provisions as to

legal tender apply. No coins are made in Queensland however. The Australian Note Issue is controlled by the Commonwealth Bank.

#### *Education.*

A Government system of elementary education was established in Queensland in 1875. Primary education is absolutely free and compulsory for children between the ages of five and fourteen years.

Schools are established at all places thickly enough populated to warrant them. These are administered by a central department under the jurisdiction of the Minister for Public Instruction.

Secondary education is provided for by high schools, technical colleges and grammar schools. The former two types are directly maintained and controlled by the Government, whilst the latter are State endowed. Primary school pupils by test examination may gain free admittance to secondary schools.

Intermediate Schools have also been established—principally for vocational training.

A university is also established, admission to which may be obtained by examination.

In 1930 there were in operation 1,726 State Schools, with an average attendance of 115,326 pupils. Of these 13, with 118 teachers and 2,061 scholars, were High Schools. There are also (1929) 195 private schools, with average attendance of 25,772 children, and 10 grammar schools, with average attendance of 2,036 pupils. 12,422 pupils were enrolled at classes at 15 technical colleges during 1930. The University has 14 professors, 21 lecturers, 12 part time lecturers, 5 assistant lecturers, 12 miscellaneous assistants including 10 student demonstrators, and an enrolment of 666.

The public expenditure on education, science and art during 1930-31 was 1,608,981l.

#### *Immigration.*

The arrivals into the State during 1930 from places outside the boundaries numbered 58,008, and the recorded departures to all countries 53,995 showing an excess of arrivals of 4,013.

Subsequent allowances for unrecorded departures are made by the Commonwealth Statistician when compiling population estimates, and he shows an excess of arrivals of 5,840, Queensland's allowance being a minus quantity.

#### *Government.*

The constitution is regulated by the Letters Patent of 6th June, 1859, and Act 31 Vict., No. 38. The Legislature is formed of one House of Parliament, the Legislative Assembly. The members are elected. There is no property qualification required for membership in the Legislature. The voting for members is by ballot. The Elections Act Amendment Act of 1905 provides for male and female adult franchise on residential qualification only, a twelve months' continuous residence in the State being the only proviso, subject to disqualifications for insanity, criminality, wife desertion, etc.

By the Electoral Districts Act, of 1910, the State is divided into 72 districts, each returning one member.

By the Electoral Districts Act of 1931, these will be reduced to 62.

The Upper House, or Legislative Council, was abolished by an Act passed in 1922 (12 Geo. V. c. 32). Its members were nominated by the Governor and held office for life.

#### *Means of Communication.*

Queensland is divided for the purpose of Railway administration into three divisional railway systems, Southern, Central and Northern, each in charge of a General Manager, subject to the control of the Commissioner at Brisbane. On 30th June, 1931,

there were 6,430 miles of 3 ft. 6 ins. gauge, 30 miles of 2 ft. gauge, and 69 miles of 4 ft. 8½ ins. gauge, Government lines open for traffic, being the greatest mileage of railway in any Australian State. In addition there are 103 miles of railways and tramways of 3 ft. 6 ins. gauge owned by private Companies or Local Authorities, which are either worked by the Commissioner or are subject to his inspection.

On 30th June, 1931, there were 29 miles of railway under construction, exclusive of 180 miles on which work is temporarily suspended. The mileage of lines authorised by Parliament but not yet commenced is 1,130.

The rolling stock consists of 785 engines, 1,038 carriages, 137 rail motors, etc., 19,173 wagons and 180 brake vans.

From Brisbane main trunk lines run west and north. The former crosses the Main Range (2,000 feet high) and shortly after passing Toowoomba at the entrance to the Darling Downs, 101 miles from Brisbane, bifurcates, one arm proceeding due west through pastoral and wheat-growing country until it reaches Cunnamulla (604 miles from Brisbane); the other crosses the famous agricultural Darling Downs and then, passing through the granite district of Stanthorpe in which are many flourishing fruit orchards, terminates at Wallangarra on the New South Wales border (223 miles from Brisbane).

Off the Southern and Western lines beyond Toowoomba, there are fifteen branches with a total length of 521 miles. From Westgate (13 miles south of Charleville) the Great Western Railway links up with the main system, and is open for traffic to Quilpie (125 miles). The South-Western Railway joins the Southern system at Warwick and terminates at Dirrenbandi (257 miles).

A railway, built to uniform gauge standard of 4 ft. 8½ ins., now gives direct communication between Brisbane and Sydney without transhipping at the Border, and reduces the distance between the two Capitals by approximately 100 miles. The Queensland section of this line extends from South Brisbane to the Macpherson Range on the New South Wales border, a distance of 69 miles.

Within a radius of 100 miles from Brisbane there are fifteen branch lines, 393 miles in length, serving the suburban areas, seaside resorts and rich agricultural and heavily timbered districts. One of these lines running due south terminates at Tweed Heads, the New South Wales border, 69 miles from Brisbane. In addition between Brisbane and Rockhampton there are thirteen branches (totalling 612 miles) serving agricultural, mineral and sugar lands and heavily timbered districts.

The Central line extends from the city of Rockhampton due west to Longreach thence north-west to Winton, 537 miles, linking the Central and Northern Railways in Western districts. The connection between Longreach and Winton facilitates the quick transport of stock, etc., during drought periods for which purpose it mainly was constructed. The Central line passes through pastoral country with eight branches of 531 miles into agricultural, pastoral and mineral areas (including Blair Athol Coalfield, where the seam is 90 feet thick), and to Port Alma, 37 miles south-east from Rockhampton. The seaside resorts are Emu Park and Yeppoon, situated some 32 miles and 35 miles respectively from Rockhampton.

From the port of Mackay a short line runs through the sugar-growing country east of the Eungulla Range to Netherdale, 44 miles, with three small branches running north and south, a distance of 23 miles, into sugar country. In this district there are over 200 miles of light tramways into sugar plantations and mills.

From Merinda (4 miles from the port of Bowen) a branch, 49 miles in length, runs to the extensive

Bowen Coalfield, from which coal supplies for the Townsville Railway system are obtained. The newly-opened Mount Isa works, also shipping requirements are supplied from this field.

The Great Northern Railway commences at the port of Townsville, 832 miles north of Brisbane, and runs through the one time well-known mining town of Charters Towers, 83 miles from the Port, and from Hughenden (236 miles) continues due west over 200 miles through Northern Downs pastured with sheep and cattle, to the rich copper-mining district of Cloncurry, 481 miles, thence with a southerly sweep to Selwyn, 72 miles from Cloncurry, passing through Malbon where it bifurcates to the mining districts of Hampden, Mount Elliott and Duchess, eventually reaching Dajarra, a distance of 582 miles from Townsville. From this point the line to Moonah Creek, 41 miles in the direction of Camooweal, is partially constructed. A branch line 54 miles in length from Duchess to Mount Isa serves the newly-opened Mount Isa mineral district, and another line 85 miles in length runs north from Cloncurry to the Mount Cuthbert and Dobbryn mineral districts.

From Hughenden a line runs south-west to Winton, a distance of 132 miles, through fine pastoral country, joining up at Longreach with the Central line running from Rockhampton.

The Southern, Central and Northern systems are joined up by the North Coast Railway as far north as Cairns, completing the link between the Capital (Brisbane) and Cairns, 1,043 miles. The North Coast line passes through such important towns as Gympie, Maryborough, Bundaberg, Gladstone, Rockhampton, Mackay, Bowen, Townsville, Ingham, and Innisfail, and links up these towns with the other Australian Capital cities.

In the far north, from the port of Cairns, a line of railway runs west over the Barron Ranges, past the famous Barron Falls, through some of the most picturesque tropical scenery of the world, through the wonderful timber scrubs of Atherton, the mineral township of Herberton, to the rich tableland at the heads of the Herbert and Johnstone Rivers. A branch line joining the main line 64 miles from Cairns runs along the Johnstone River, through rich scrub lands to Millaa Millaa, 37 miles. At Mareeba, 46 miles from the Port, the line purchased from the Chillagoe Company connects with the Cairns Railway. This line runs to Mungana, a distance of 103 miles, and 75 miles from this junction, another line 142 miles in length serves the mineral fields of Etheridge, whilst from Dimbulah another line of 30 miles taps the coalfields of Mount Mulligan which supply the Cairns District with coal.

From Cooktown, the furthest northern port on the eastern coast, a railway runs to Laura, a distance of 67 miles.

From Normanton in the Gulf of Carpentaria, a railway runs to the once mineral town of Croydon, a distance of 94 miles.

Bond Rents, &c. .. .	8,251	

NOTE.—Since records of transfers of goods from other States have ceased to be kept by the Customs authorities, no credit is given to Queensland for overseas goods consumed there; this accounts for apparent drop in Customs receipts. Also, no credit is given to Queensland for exports that go interstate and for transhipment overseas, which constitute a large proportion of the Total Exports.

#### Governors of Queensland.¶

Sir Anthony Musgrave, G.C.M.G., 6th November, 1883, and 13th December, 1886.
Gen. Sir H. W. Norman, G.C.B., G.C.M.G., C.I.E., 1st May, 1889.
Gen. Sir H. W. Norman, G.C.B., G.C.M.G., C.I.E., 7th May, 1891.
Lord Lamington, K.C.M.G., 9th April, 1896.
Lord Lamington, G.C.M.G., 27th April, 1900.
Maj.-Gen. Sir H. C. Chermiside, G.C.M.G., C.B., 24th March, 1902.
Lord Chelmsford, K.C.M.G., 30th Nov., 1905.
Sir W. MacGregor, M.D., G.C.M.G., C.B., 2nd December, 1909.
Major Sir H. J. Gould-Adams, G.C.M.G., C.B., 15th March, 1915.
Lt.-Col. Sir Matthew Nathan, P.C., G.C.M.G., 3rd December, 1920.
Lt.-Gen. Sir T. H. J. C. Goodwin, K.C.B., C.M.G., D.S.O., F.R.C.S., 19th February, 1927.

## SOUTH AUSTRALIA.

*Situation and Area.*

That portion of the Continent of Australia bounded on the east by the 141st degree of east longitude, on the north by the 26th degree of south latitude, on the west by the 132nd degree of east longitude, and on the south by the Southern Ocean, was constituted a British Province by Act of Parliament, 4 and 5 William IV., c. 95, under the designation of SOUTH AUSTRALIA. In 1861, the territory known as "No Man's Land," about 80,000 square miles, lying between the boundaries of South and Western Australia, was added by Act 24 and 25 Vict., c. 44, making the western boundary the 129th degree of east longitude. The area contained within those limits is estimated to be 380,070 square miles.

The country known as the Northern Territory from the 26th parallel of south latitude to the Indian Ocean, between the 129th and 138th degree of east longitude, was also annexed to South Australia, but was on January 1st, 1911, taken over by the Commonwealth.

Kangaroo Island (90 m. by 25 m.; area 1,500 sq. m., 1,000 ft. highest point), Nuyts Archipelago, the Gambier, and other islands on the south coast, are included in the State.

Adelaide, the capital of the State, is situated about five miles from the eastern shore of St. Vincent's Gulf, in latitude 34° 57' S. and longitude 130° 38' E., and Port Adelaide, the principal port, is about seven miles north-west from the city, and connected therewith by rail.

SOUTH AUSTRALIA.  
LONDON, or  
OFFICE OF CROWN LANDS,  
ADELAIDE.

(1908 or 1909.)

The quorum of the Council consists of ten members, including the President.

The qualification for a member of the Legislative Council is that he shall have attained the age of 30 years, that he be a subject of the King, and that he has resided in the State for three years.

The inhabitants of the City of Adelaide, including the suburbs, on 31st December, 1930, were estimated to be 324,420.

About 87 per cent. of the whole population are members of Protestant Churches, and the remaining 13 per cent. are Roman Catholics. The Church of England is represented by 34 per cent.

...salaries are subject to reduction under  
Act of 1930."

Adelaide, the capital of the State, is situated about five miles from the eastern shore of St. Vincent's Gulf, in latitude 34° 57' S. and longitude 130° 38' E., and Port Adelaide, the principal port, is about seven miles north-west from the city, and connected therewith by rail.

*Early History.*

The south coast of the State was surveyed by Flinders in 1802, and Stuart in 1829 explored the Murray River to its mouth.

The province was founded on the Wakefield system of colonization under Act of Parliament 4 and 5 William IV. c. 95.

The first colonists landed at Kangaroo Island, but the settlement was almost immediately transferred to the mainland where the province was proclaimed at Glenelg on December 28, 1836.

Copper was discovered at Kapunda in 1842, at the Burra in 1845, and at Wallaroo in 1859.

Responsible government was established in 1856. Stuart reached the Indian Ocean near the mouth of the Adelaide River in July, 1862, and the Northern Territory was annexed to South Australia in July, 1863.

*Climate.*

The rainfall at Adelaide averages 21 inches annually, mostly from May to October. It varies from 16 to 42 inches on the plains and hills respectively. The mean temperature 63°, the extreme range being from 33° to 111°.

The South Australian climate is very mild and healthy. The birth rate is 17 per 1,000 of population, and the death rate only 8. The infantile mortality is about the lowest in the world, being only 48 per 1,000 births.

*General Government.*

The Parliament of South Australia consists of a Legislative Council and a House of Assembly, created by the Local Act No. 2 of 1855-56, which was proclaimed on October 25th, 1856. This Act, commonly called the Constitution Act, was passed by virtue of the Imperial Act 13 & 14 Vict., cap. 59.

The Legislative Council and House of Assembly, as originally constituted, consisted of 18 and 36 members respectively. By the Local Act No. 27 of 1875, the House of Assembly was increased to 46 members, representing 22 electoral districts. By Act No. 236 of 1881, six members were added to the Legislative Council, and the Colony was divided into four electoral districts for the purpose of Council elections. In 1882 the House of Assembly was further increased to 52 members, representing 26 electoral districts; and by Act No. 460 of 1888, the Northern Territory was created an electoral district, returning two members, thus raising the number to 54. By Act 779 of 1901, the number of members was reduced from 31st March, 1902, to 18 in the Legislative Council and 42 (representing 13 districts) in the House of Assembly. The Northern Territory having been transferred to the Commonwealth Government, the Electoral Districts then numbered 12, returning 40 members. By Act 1148 of 1913 the assembly Districts were altered, and now number 19, returning 46 members.

The five electoral districts of the Legislative Council are—Central No. 1, Central No. 2, Southern, Midland and Northern, each returning four members. (*Vide* Section 10, Act 959 of 1908, and Section 15 of 1148 of 1913). Elections are conducted by ballot. (*Vide* Section 21, Act 369 of 1908.)

The quorum of the Council consists of ten members, including the President.

The qualification for a member of the Legislative Council is that he shall have attained the age of 30 years, that he be a subject of the King, and that he has resided in the State for three years.

The qualification of a voter is that he shall be 21 years of age, a natural-born or naturalized subject of His Majesty, and have resided in South Australia six months. As to other qualifications, see Act 1148, 1913. Members of both houses are paid 400*l.* per annum. This was reduced by 5 per cent. for one year from December 1, 1930, and by 10 per cent. for one year from December 1, 1931.

The House of Assembly, which is liable to dissolution by the Governor, is elected for three years; 8 Districts returning 3 members each, and 11 Districts returning 2 members each. The Constitution Act prescribes no other qualification as necessary for a member of the House of Assembly than that he shall be qualified and entitled to be registered as an elector. An elector's qualification to vote is that he shall be of full age, a natural born or naturalized subject of His Majesty, and have lived in South Australia for six months. The total number of electors in 1930 for the Legislative Council was 132,294, and for the House of Assembly 323,907, of whom over half are females. The session is usually from June to December.

The franchise for both Houses was extended to adult women by Act 613 of 1894.

Responsible government is carried on by six Ministers, members of the Legislature, who form the Cabinet, and are *ex-officio* members of the Executive Council. The ministry has a total salary of 7,750*l.* per annum. This was reduced by 15 per cent. for one year from December 1, 1930, and by 20 per cent. for one year from December 1, 1931.

*Local Government.*

There are 39 municipalities in the State, whose powers are regulated by the "Municipal Corporations Act, 1890." The governing body consists of Mayor (Lord Mayor for the City of Adelaide), Aldermen (Aldermen are at present elected for City of Adelaide and some of the Suburban Corporations only), and Councillors, elected by the ratepayers, who also elect the Auditors. The Council has power to levy rates for municipal purposes only on all house and land property within the municipal area, but the question of raising a loan must be submitted to a general meeting of the ratepayers, and a poll must be taken if demanded by six ratepayers. There are also 157 district councils having somewhat similar powers. The aggregate annual assessment of the property within the municipal areas and District Councils amounts to 9,636,868*l.* and rates collected 988,012*l.*

*Population.*

The population of the State at the census of 1911, was 408,558 persons, and of 1921, 495,160. This does not include the aborigines, of whom there are 2,500, exclusive of those living in a wild state. In 1921 there were 251 Chinese in the State. The immigration of Chinese is controlled by the Commonwealth Government under the Immigration Restriction Act, No. 17 of 1901. The population of the State on 30th June, 1931, was estimated to be 583,000.

The inhabitants of the City of Adelaide, including the suburbs, on 31st December, 1930, were estimated to be 324,420.

About 87 per cent. of the whole population are members of Protestant Churches, and the remaining 13 per cent. are Roman Catholics. The Church of England is represented by 34 per cent.

*Production and Industry.*

It may be roughly estimated that not more than 150,000 square miles of the area of the State, are at present put to profitable use. Agricultural settlement has not extended 300 miles from the coast; and pastoral occupation may be said to have reached 1,200 miles. Forty-eight counties have been proclaimed to 31st December, 1930, embracing 84,680 square miles, or 54,194,880 acres. The area outside the declared counties covers 295,390 square miles, or 189,049,600 acres. Of the area of the State only 16,903,642 acres have been or are being alienated from the Crown—amounting, nevertheless, to about 100 acres for each male adult in the State, and 117,000,000 acres are held under lease from the Crown. 4,641,109 acres are in process of alienation under systems of deferred payments. About two in every five acres of the alienated land is under tillage; the remainder is used for pastoral purposes only. All land is surveyed by the Government prior to leasing, and is divided into farms of extent varying from 80 to 20,000 acres—the necessary reserves being made public for railways, highways, watering stock, etc.

Over half the total area of land cultivated is cropped with wheat (for grain, hay and fodder), of which 4,300,000 acres were cultivated in 1931-32. The total area under cultivation is over 7,700,000 acres. The following are the average yields of the main crops grown:—Wheat, 29,000,000 bushels; oats, 1,800,000 bushels; barley, 3,600,000 bushels; hay, 635,000 tons; and the estimated value of the crops averages 14,000,000*l.*, or 21*l.* per head of population. The value of breadstuffs exported to overseas countries averages annually 7,000,000*l.*

Vine culture is an important and progressive industry; 52,000 acres of land are devoted to this purpose. Wine made averages 14,000,000 gallons annually. There is a considerable export trade to overseas countries, chiefly Great Britain. The slopes of the hills produce wines of a full-bodied character similar to those of Spain and Portugal, whilst those made in the more elevated districts resemble the lighter wines of the Rhine. Whilst the local demand is fully supplied at very cheap rates, a considerable export trade in wines of a higher character is carried on. The wines of South Australia have always been awarded prizes at the several Great International Exhibitions.

Considerable attention has also been paid to the drying of raisins and currants; of the former 210,000 cwts., and of the latter, 160,000 cwts. are made annually. 20,656,845 lbs. raisins and 13,340,913 lbs. currants were sent to overseas countries in 1930-31.

Almond trees (163,000) are of rapid growth, and large quantities of a superior description of soft-shell almond are gathered yearly for home consumption and for shipment. Apple trees, 960,000; apricot trees, 309,000; orange trees, 458,000; lemon trees, 41,000; pears, 201,000; plums, 290,000; peaches and nectarines, 229,000; cherries, 64,000; and also figs, quinces, raspberries, strawberries, gooseberries, walnuts, peanuts, etc. The principal kinds of fruits produced each season is as follows:—Apples, 728,000 cases; apricots, 264,000 cases; peaches, 183,000 cases; oranges, 67,000 cases; pears, 169,000 cases; and plums, 142,000 cases. The dried fruit production is as follows:—Apricots, 12,000 cwts.; apples, 660 cwts.; peaches, 5,000 cwts.; pears, 2,000 cwts.; and plums, 6,000 cwts.

Returned soldiers and others have been settled on irrigation blocks for fruit and vine culture and

for dairying along the River Murray, and the area under irrigated culture has increased from 7,000 acres in 1914, to 40,000 acres in 1930.

The State possesses all the conditions requisite for the successful and profitable culture of the olive, 15,000 gallons of oil being expressed annually. Olive oil of the most delicate character has been expressed, and gained awards at the various Exhibitions. Its purity and superiority general over the imported article of commerce has acquired for it a high position in the local market. 6,000 gallons of eucalyptus oil are distilled, and an export trade is being worked up.

Potatoes, onions, turnips, carrots, mangolds, pumpkins and melons, tomatoes, and practically all kinds of vegetables grow well in the State, their production being valued at 380,000*l.*

In 1851 the total area of land leased from the Crown for pastoral purposes was 15,000 square miles. In 1930 there were 150,000 square miles in pastoral occupation. During the same period the number of horses has increased from 6,500 to 183,529; of horned cattle from 75,000 to 218,985; and of sheep from 1,000,000 to 5,980,959; whilst the exports of wool have increased from 4,000 to 200,000 bales. Each year there are made 12,000,000 lbs. of butter, and 3,600,000 lbs. of cheese; and 5,200,000 lbs. of bacon and hams are cured. In normal seasons, large quantities of butter, frozen meat, etc., are exported to Europe, in addition to tallow and skins and hides. The value of pastoral and dairying products exported overseas averages 4,500,000*l.*

The keeping of bees is generally carried on in conjunction with other pursuits, and annually 2,000,000 lbs. of honey are produced.

South Australian wattle bark holds a high place in the market for tanning purposes, about 10,000 tons being stripped every year.

The number of factories in 1929-30 were 1,814 employing 33,159 hands and 176,519 horse-power actually used. Wages paid 6,964,963*l.* Total value production 30,312,784*l.* Value of land, buildings, plant and machinery, 19,223,713*l.*

A few years ago, flour mills and tanneries were almost the only representatives of local manufactures; whilst these have largely increased in number and efficiency, many important additions have been made to the list, and there are now many steam flour mills, saw mills, foundries, agricultural implement works, electric light and gas works, breweries, and factories for clothing, boots and shoes, saddlery, jams, aerated waters, soap and candles, fertilizers, joinery, cycles and motors, brushware, glassware, etc., etc.

Out of 10,061,590*l.* worth of produce exported overseas during 1930-31, the value of breadstuffs amounted to 3,399,557*l.*; while wool represented 1,502,758*l.*; fruits and wine, 1,056,590*l.*; butter, 119,604*l.*; meats, 33,658*l.*; tallow, 28,142*l.*; concentrates 718,129*l.*; lead, pig, 1,462,335*l.*; hides, 244,354*l.*; bullion and specie, 1,159,379*l.*

The chief imports are textiles, alcohol, tea, hardware, and machinery, manures, paper, oils, bags and sacks, timber and vehicles. The total external trade for 1930-31 was 13,977,126*l.*, almost half of which is with the United Kingdom, the bulk of the remainder being with other British Countries, the United States, France, Italy and Japan. The total external trade reached 33,529,062*l.* in 1925-6.

The minerals produced during the year 1930 were valued at 1,288,238*l.*, the chief being copper

6,966l., salt 132,224l., ironstone flux 1,067,651l., and gypsum 35,724l.

Since the inception of the State, 49,014,552l. of minerals have been produced, of which copper accounts for 33,095,237l.

#### *Value of Production, 1929-30.*

The crops produced in South Australia were valued at 11,937,903l., and in addition the net factories output was 10,637,552l., pastoral 2,989,297l., minerals 1,320,805l., dairying 1,950,572l., poultry 950,542l., fisheries, game and forestry, etc., 1,279,248l., the grand total being 31,085,919l., equal to 54l. per head of population.

#### *Currency and Banking.*

The legal tender and usual currency is exclusively British sterling.

Ten banking institutions in addition to the Commonwealth Government Bank and the State Bank carry on business within the State, all of which have establishments in the principal seaports and inland townships—numbering altogether 445 branches and agencies. Their names are: The Bank of Australasia; Union Bank of Australia, Limited; National Bank of Australasia, Limited; English, Scottish, and Australian Bank, Limited; Bank of Adelaide; Bank of New South Wales; Commercial Bank of Australia, Limited; Commercial Banking Company of Sydney Limited; Australian Bank of Commerce, Limited; and Primary Producers Bank of Australia, Limited. The average assets of the twelve banks for June quarter, 1931, totalled to 30,106,513l., and the total deposits to 22,478,189l.

The State Savings Bank is managed by a Board of Trustees appointed by the Governor, and has 41 branches and 368 agencies. The number of accounts open on 30th June, 1931, was 502,897 and the total deposits amounted to 19,470,907l. Rate of interest paid to depositors, 4½ per cent. The Commonwealth Savings Bank had 65,162 accounts at the same date with deposits 1,951,162l. 90 in every 100 persons of the population are depositors in savings banks, the deposits averaging 37l. per head of population.

A State Bank was established in 1925, with power to make advances to primary producers, and for homes and to conduct general banking business.

#### *Penny Banks.*

Agencies at schools, 1,230; depositors, 74,157; deposits, 98,139l.

#### *Education.*

The University of Adelaide was founded by Royal Letters Patent in 1881, and an Act of the local Parliament in 1874. It was endowed by private munificence, aided by an annual grant of 5 per cent. on all sums contributed from private sources, and an endowment of land, the total receipts, including endowments, for 1930 being 161,220l. The University has the power of granting degrees in arts, law, medicine, dentistry, science, music, engineering and economics; the staff consists of 251 professors, lecturers, etc., 18 being lecturers and assistants and teachers in the Conservatorium of Music. All classes are open to women. It had in 1930, 994 undergraduates and 964 non-graduating students (exclusive of 430 students at the Conservatorium of Music),

besides those attending extension lectures. Total expenditure, 122,593l.

The School of Mines and Industries was established in 1889. It is supported by an annual parliamentary vote of about 25,000l. and by school fees. Diplomas are awarded in mining, metallurgy, mechanical, electrical and civil engineering and other industrial and commercial subjects are taught. The staff consists of 99 teachers. The students number 4,004, including children from public schools receiving instruction in domestic economy. There are in addition nine Technical Schools in the country with 1,768 scholars; one School of Arts and Crafts, with 1,518 students, and Apprentice Classes, with 555 students.

Primary, secondary and technical education is provided for by the Education Acts, by which the management of public education is committed to a Minister of Education—a member of the Cabinet. The education is secular, but not to the exclusion of the Bible; free from January 1, 1892, and it has been compulsory since 1876. In 1930 there were 1,073 schools, with 3,767 teachers and teachers in training, and 93,669 scholars. Included in these are 27 High (secondary) schools, with 236 teachers, and 6,038 scholars, and technical education is imparted at 35 Domestic Art Centres and 20 Woodwork Centres and also at a number of primary schools in addition to the technical schools mentioned above.

The expenses of the Education Department for payment of teachers, etc., grants to educational institutions and buildings, were during 1930-31, 974,951l. The net expenditure from loan money on school buildings on 30th June, 1930, was 1,741,616l.

Towards the maintenance of the South Australian Public Library, Museum, and Art Gallery, also country institutes (305 in number) the sum of about 29,000l. is annually granted by the Government in addition to special grants for buildings.

There are also 188 Private Schools with 949 teachers and 15,599 scholars.

#### *Administration of Justice.*

The legal tribunals of the State consist of a Supreme Court, presided over by the Chief Justice and four Puisne Judges; the Court of Vice-Admiralty, of which the Chief Justice is Judge; Circuit Courts at Mount Gambier, Port Augusta, and Gladstone, presided over by Judges of the Supreme Court. The Court of Insolvency previously controlled by the State was in August, 1928, taken over by the Commonwealth Government, and in South Australia there is a Court of Insolvency at Adelaide presided over by a Judge who is also a Stipendiary Magistrate, and there are Local Courts of Insolvency at Gladstone, Mount Gambier, Port Augusta and Wallaroo presided over by Stipendiary Magistrates. Local Courts of Civil Jurisdiction in all the principal towns throughout the State with full Jurisdiction, presided over by Stipendiary Magistrates, and Limited Jurisdiction, by Justices of the Peace; and Police Magistrates' Courts.

The number of persons convicted in the Supreme Court in 1930 was 304, approximately one in every 1,900 of the population.

#### *Land Transfer.*

The Statute known as the Real Property Act of South Australia affords a process by which

the transfer of landed property may be accomplished in as easy and cheap a manner as any ordinary commercial transaction. There can be no question that the operation of the measure has been highly advantageous to the community.

#### *Loans for Public Works.*

Legislative sanction has been accorded from time to time for the raising of money by way of loan, for the prosecution of reproductive public works—such as railways, tramways, waterworks, telegraphs, harbour improvements, and other public purposes.

#### *Means of Communication.*

There are 46,500 miles of roads defined in the settled districts, the greater portion of the cost of which has been defrayed from the General Revenue—no special toll or rate having been levied. The Commonwealth Government has contributed 228,000*l.* annually since July, 1926, towards the construction of main roads. The aggregate number of miles macadamised is 13,600, and leading out from the capital city there are 278 miles of bituminous concrete and wood block and bitumen preparation roadways. In addition to the main lines, perhaps as many more miles of district or by-roads have been constructed and kept in repair by local municipalities out of rates and grants in aid.

The railways are all constructed and worked by the Government. The mileage opened for traffic in the State is 2,536, exclusive of the Port Augusta Alice Springs railway, 578 miles, and the East West railway, 598 miles, which are controlled by the Commonwealth Government. Up to June 30th, 1931, the cost of construction and equipment of the State lines reached 27,877,282*l.* The receipts in 1930-31 were 2,600,559*l.* There is daily (except Sunday) railway communication between Adelaide, Melbourne, Sydney, and Brisbane, and tri-weekly between Perth.

A regular air passenger and mail service is in operation between Adelaide and Perth and passengers are also carried to and from other States. Air communication is maintained between Adelaide and various country centres.

The geographical position of South Australia necessitated early and earnest attention being devoted to the extension of the South Australian telegraphs, so as to afford communication with Melbourne, Sydney, Brisbane, Port Darwin, and Perth. To accomplish this South Australia, at her own risk, erected a line of telegraph, some 2,200 miles in length, at a cost of over 500,000*l.*, across a continent which had only been traversed by an exploring party. An additional wire has been erected at a cost of over 50,000*l.* At present the railway reaches Alice Springs, 1,024 miles north of Adelaide, and Birdum, 316 miles south of Darwin the intervening gap being 733 miles.

On the 30th June, 1930, there were 794 telegraph stations in the State, and the number of telegraph messages sent in 1929-30 was 1,986,516. There were 551 telephone exchanges, with 42,868 connections. Post Offices number 897.

Internal water communication is afforded by the Murray River, on which steamers run for 2,000 miles. There is regular and frequent communication by mail steamers with all parts of Australasia as well as with Europe and San Francisco.

*Sweden, Consul, J. W. Sandford; Vice-Consul, J. G. Sweeney, Port Pirie.*  
*Switzerland, Vice-Consul (vacant).*  
*United States, Vice-Consul, H. M. Wolcott.*

## TASMANIA.

*General Description.*

Tasmania, the smallest State of the Australian Commonwealth, is an island at the southern extremity of the continent of Australia, from which it is divided by Bass' Straits, 120 miles wide, Victoria being on the other side of the straits. It lies between 40° 33' and 43° 39' S. lat., and 144° 39' and 148° 23' E. long.

*History.*

Tasmania was discovered in 1642 by the Dutch navigator, Abel Jan Tasman, and by him named Van Diemen's Land, the name by which it was known down to 1853. It was not known to be an island until 1798. It was formally taken possession of by England in 1803, and made auxiliary to the penal settlement at Botany Bay, from which it was separated in 1825. The first free emigrants arrived in 1816, and the last convicts in 1853. Responsible government was introduced in 1856. Federation with the other Australian Colonies came into effect on the 1st of January, 1901.

*Climate.*

Captain Cook described the climate as "the finest in the world," and succeeding generations have endorsed the verdict. It is of the type of the south of England, rather warmer in summer, considerably milder in winter, and with much more sun at all times. The rainfall varies from 20 ins. on the East Coast to over 100 ins. on the Western Mountains. The mean temperature at Hobart in the three hottest months is 62°, about the same as London, and in the three coldest months 47° which is 8° warmer than London.

*Means of Communication.*

There is a mail and passenger service, two or three times a week, between Launceston and Melbourne, and twice a week between Burnie and Melbourne, and a weekly service between Hobart and Sydney.

Mail and passenger communication with Europe and America is chiefly via Melbourne and Sydney. In the apple season (February to May) direct steamers leave Hobart every few days for England; at other times of the year less frequently.

Post and telegraphs are controlled by the Commonwealth. There are 3,479 pole-miles of telegraph, and telegrams were sent in 1929-30 at the rate of 2.1 per head of the population. Telegrams within the Commonwealth cost 1s. 4d. for 16 words.

There are 11,969 telephone instruments connected, which is 56 per 1,000 of population.

There are 518 Post Offices in the State, and the number of letters and postcards received and despatched in 1929-30 was approximately 170 per head, and of packets and newspapers 66 per head.

Postage rates for all British Dominions are 2d. per oz. for letters, and for newspapers 1d. per 4 ozs.; for all other places, 3d. for first oz., 2d. for each additional oz. for letters, and 1d. per 2 ozs. for newspapers.

The receipts for Post and Telegraph and Telephone services in Tasmania in 1929-30 were 377,801l. and expenditure 443,227l.

*Area.*

The State contains 26,215 square miles (16,778,000 acres) of which 6,258,767 acres had been granted or sold up to January, 1930. Of the balance 2,621,940 acres are held under pastoral and timber leases and occupation licences, which return 30,000l. in rentals to the State; and 42,515 acres for Mining purposes which return an annual rental of 13,000l. About

50 per cent. of the total area is still in the hands of the Crown, but a large proportion of this is unsuitable for settlement.

The adjacent islands are 55 in number, most of them being in Bass' Straits. The chief are the Furneaux group (including Flinders Island), Robbins Island, King Island, Bruny Island on the south, and Maria Island on the east coast.

*Roads.*

All roads are constructed by the State Government, mostly out of Loans; but the Federal Government, beginning with 1924, gives a subsidy in aid of special new constructions. The maintenance of main roads is also borne by the State, partly out of a Motor Tax, while other roads are maintained by Municipalities. There are 7,867 miles of metalled or gravelled, and 4,709 miles of other roads.

*Railways.*

There are 789 miles of railways in the State, constructed mainly on the three foot six inch gauge. Of these 664 belong to Government, and cost 6,534,000l., and 125 to private companies costing 852,000l. The gross earnings of the government lines in 1929-30 were 507,374l. and working expenses 535,414l., making a loss on working of 0.43 per cent. of the capital cost, against an average rate of interest payable of 4.35 per cent.

*Land.*

There is little first-class Crown land now available for selection. Most of the accessible land of all kinds has been alienated, though only a small proportion has been cleared for cultivation. Bush land suitable for fruit-growing is readily obtainable at from 5l. to 10l. per acre. Cleared land can often be had for little more than the present expense of clearing.

Some 100,000 acres of land have been re-purchased by the Government for closer settlement, besides 200,000 acres for soldier settlement. These are now held under lease from the Crown with right of purchase.

*Trade.*

The chief Exports in 1930-31 were:—

	£
Fruit, fresh and preserved, &c.	1,363,472
Zinc	907,077
Other Metals and Ores	907,408
Wool	454,651
Potatoes	315,931
Timber	110,318
Hides and Skins	261,040
Hops	140,855
Butter and Cheese	331,012
Woollen Goods	563,969

Confectionery, Cement and Carbide of Calcium are other exports of growing importance.

Hobart does over one-half of the total trade, and Launceston over one-quarter. Burnie and Devonport are considerable exporters of farm produce to the mainland States.

*Farming.*

The land in crop in 1929-30 was 265,317 acres (6 per cent. below the decennial average), including 32,000 acres of orchard. The wheat production of Tasmania is insufficient for its own requirements. For the season 1929-30 a crop of 408,849 bushels of wheat was harvested from 16,805 acres, an average yield of 24 bushels per acre. Oats, grain and hay, and potatoes provide

considerable surpluses for export to the mainland States. The average yield of oats per acre for the season 1929-30 was 30 bushels, and of potatoes nearly 3 tons per acre. The season 1929-30 produced 3,950,000 bushels of marketable apples. This quantity represents a heavy crop, the average for the past decennium being 2,913,392 bushels. Prices, however, were unsatisfactory, and the cash return was considerably below that obtained from the much smaller yield of the previous season. About 66 per cent. of this crop went to overseas countries, mainly to the United Kingdom, 24 per cent. to the mainland States, the balance being used in jam and drying factories and for local consumption.

Wool production in 1929-30 was valued at 705,000*l*. The number of sheep was 2,091,113, and of cattle 214,643.

The number of sheep recorded as on 31st December, 1929, is the largest since 1852, and the number of cattle was equal to the decennial average.

Farming wages are about 8*s*. per day, or 2*l*. per week for permanent hands.

### *Mining.*

Tasmania has a particularly rich and varied store of minerals, particularly in the west, north-west and north-east parts of the island. The most important mines are copper, silver-lead, silver-lead-zinc and tin, followed by coal, osmiridium and gold. Wolfram, asbestos, iron pyrites, bismuth and ochre are also produced, but in small quantities. Large and valuable deposits of iron ore and shale are being developed, but have not yet reached the producing stage. From 1880 to 1930 the State produced minerals valued at 58,276,667*l*.

The chief copper producer is the Mt. Lyell mine, one of the great mines of the world, which in the last 30 years has produced over 201,000 tons of copper. For 1930, the production of copper in Tasmania was 9,941 tons.

Tin is found in many parts of the island. The chief producer has been Mt. Bischoff, another of the great mines, which has produced tin to the value of over 5,000,000*l*., and paid dividends of 2,500,000*l*. Substantial quantities are also got from the alluvial deposits of the north east which are now more important than Bischoff.

Zinc is produced chiefly at the Electrolytic Works at Risdon, a suburb of Hobart, from concentrates brought from Broken Hill. A plant with an output of over 150 tons of zinc per day, using 30,000 electrical h.p., is in full operation. Subsidiary works are in operation at Zeehan to treat the valuable complex ores near Dundas, which have hitherto resisted commercial treatment. The total output of zinc for the year 1930 was 54,901 tons, valued at 1,034,932*l*., of which only 943 tons, valued at 19,322*l*., was produced from Tasmanian ores.

Coal is widely distributed, but not generally of high quality as steam-coal. The production in 1930 was 138,716 tons. Valuable deposits of high grade steam-coal are now being developed at Reclerhe Bay in the extreme south.

Gold, once of high importance, has now taken a minor place in mineral production. In 1930 4,467 ozs. were produced, worth 18,976*l*.

Osmiridium of high quality is a special Tasmanian product. It has been won by simple washing methods from the serpentine detritus in several localities now worked out. The output in 1930 was 953 ozs., valued at 16,235*l*.

### *Hydro-Electric Power.*

The water power of the island is under process of steady development, under a State department. The first scheme of using the waters of the Great Lake (on the Central Plateau, at a height of 3,300 feet), is now an assured success. The present capacity is 66,000 horse power, all of which is being used for industrial or domestic purposes. A further development of 15,000 h.p. also on the Central Plateau was completed during the year. For the year to 30th June, 1930, the revenue was 284,534*l*.

The Great Lake station supplies the Zinc works at Risdon (electrolytic extraction of zinc, zinc-rolling and zinc oxide), the Carbide works at North West Bay, the Cadbury-Fry-Pascall Combine of chocolate manufacture at Claremont, and the requirements of Hobart and Launceston for tramways and general and domestic use.

Further large demands for power are certain in connection with wood-pulping, now that the old problem of turning the enormous waste of eucalypts into paper has been solved. It is expected that in a few years the Australian consumption of paper of all kinds will be fully met.

The total cost to date of these schemes is slightly over three and a half millions. The total amount of power available in the State is not known, but 1,750,000 h.p., have been located.

Power is supplied for general industrial purposes from 5/8th penny per unit upwards. Very special terms are quoted for large blocks of power.

The Mount Lyell Hydro-electric plant at Lake Margaret, generating 8,000 h.p., supplies the Lyell mine, and the concentration of the Electrolytic Zinc Company of Zeehan, referred to above.

### *Other Industries.*

The principal other industries, apart from those for the satisfaction of the State's own requirements, are saw-milling, fruit-preserving (jam making, canning, drying, etc.), confectionery, wool manufacture, cement and calcium carbide.

Tasmanian ales have long enjoyed a good name throughout Australia.

### *Population.*

The population, as determined on 31st, March, 1931, is males, 219,694; females, 108,899. Total 110,795.

There was normally an excess of males in the population, amounting in 1914 to 2 per cent. of the population. After considerable fluctuation, due to the war, there is now an excess of females of 0.9 per cent.

The birth rate has dropped from a pre-war average of 30 per 1,000 to about 22 per 1,000. The death rate of 9 per 1,000 is little less than the pre-war average, so that the rate of natural increase has declined considerably. The infant death rate in 1930 was 51 per 1,000 births.

Hobart on the river Derwent is the capital, and had, with the suburbs, a population (census 3-4-31) of 53,400. Launceston, on the Tamar, had 27,000.

### *Migration.*

The population is swelled annually during the summer by about 20,000 visitors from the mainland cities. The permanent growth of population, however, is somewhat slower than in Australia as a whole. Tasmania has, in fact, since 1850 been a source of population for other parts of Australasia, and except for brief intervals there has been a steady outflow to those parts of the mainland

which are in the state of most rapid development. On the other hand, Tasmania offers peculiar attractions to a certain type of settler, such as the retired officer or civil servant, possessing a pension or some private means. Though the cost of the necessities of food and clothing are no lower than in other States, the amenities of life are more accessible and come within the reach of very moderate incomes. In education at moderate expense and in bringing up of children generally, the island has great advantages. These circumstances coupled with an attractive and healthy climate, great beauty of scenery, and an easy-going and friendly temper in the people, have always, and increasingly in recent years, attracted a fair number of settlers of this type, which has balanced in part the loss of the younger native-born, who have set out to push their fortunes in other States and Dominions.

#### *Banking.*

The system of coinage is the same as in Great Britain. Commonwealth notes replace Bank of England and Treasury notes as legal tender.

There are seven cheque-paying banks operating in Tasmania, including the Commonwealth Bank. By an Act of 1925 weekly returns of assets and liabilities must be made by banks.

The Commonwealth Savings Bank operates throughout the State through the Post Offices, having taken over, by agreement, the State Savings Bank. There is also a Savings Bank managed by Trustees at Hobart, with branches in a few country towns, and one at Launceston, and a State Agricultural Bank. The total deposits in Savings Banks are equal to about 32% per head of population. The number of Savings Bank accounts is 80 per 100 of the population.

#### *Education.*

The University of Tasmania, established in 1890 at Hobart, grants degrees in Arts, Science, Law, Engineering and Commerce.

Its revenue comes largely from the State, which, however, exercises no direct control, but half of the members of the governing body are elected by the members of Parliament.

The teaching staff comprises 10 professors, 19 lecturers, and during 1929, there were 240 students taking courses for degrees. Fourteen scholarships from public grant and private benefaction are tenable at the University; these cover tuition fees, and for country students add a maintenance allowance in most cases. The University also largely controls secondary education by conducting intermediate and leaving school examinations, and on the results of the latter most of the University scholarships are awarded.

Under the joint control of the Workers Educational Association and the University, 19 Tutorial classes were held at different centres in 1929.

Secondary education is about equally divided between the Secondary schools (partly "Public," partly "Private") and the newer State High Schools, which are free. Of the former the principal are Hutchins School, Friends' High School, St. Virgil's College and Clemes College in Hobart, and the Church Grammar School and St. Patrick's College in Launceston; of the latter, full-course schools are working very successfully in Hobart, Launceston and Devonport.

The expenditure on State High Schools, apart from capital cost and repairs, is about 15% per pupil.

Primary education is mostly in the hands of the State. It is free, compulsory and non-sectarian

in State schools. A complete course of training at the Teachers' College has now been sufficiently long in operation to ensure an adequate supply of trained teachers for all requirements.

Tasmania was, in Australia, the pioneer State in the matter of medical inspection and treatment of school children.

#### *Central Government.*

The main lines of the present Constitution were laid down by a local Act in 1855. These have been amended from time to time and, of course, profoundly modified by Federation.

Parliament consists of two elected Houses. The Legislative Council of 18 members is elected by free-holders of 10%, and lease-holders of 30% annual value. Returned soldiers are also entitled to vote. Three members retire annually, and the Council cannot be dissolved as a whole.

The House of Assembly is elected on adult suffrage for a maximum of three years, and consists of 30 members returned for five six-member constituencies, which are the same as the Commonwealth electoral divisions. The system of voting is substantially the Hare system of the single transferable vote, with obligation to record at least three preferences. After an earlier partial trial it was applied to the whole State in 1909, and seven General Elections have been held under it. The system has given general satisfaction. The machinery has worked easily and the elector has been so little troubled by its supposed intricacy that the proportion of informal votes is smaller than that for a block vote in Federal Elections. For each of the seven elections, the system has given representation to parties in almost exact proportion to their strength. A number of amendments have been proposed to improve and safeguard proportional representation, but no serious proposal has been made for reverting to older methods. Casual vacancies, the bugbear of proportional representation, are filled from the results of the previous General Election, and this method has been found satisfactory in practice. Full information may be found in the departmental reports, and the detailed rules of the scrutiny in the Commonwealth Year Book, No. 6.

The power of the Upper House to amend money bills sent up from the Assembly has always been a matter of some doubt, and at the end of 1924 was successfully challenged by the House of Assembly in respect both of the Appropriation Bill and of an Income Tax Bill. The controversy on the subject was early in 1926 settled by a compromise, by which the Upper House gave up any claim to amend the Appropriation Bill or bills imposing a rate of Income Tax, but maintained full powers of amendment of other money bills.

#### *Taxation.*

The State imposes graduated taxes on incomes and on land and estates passing at death. Income Tax is much the most important and includes a considerable sum drawn from winners of Lottery prizes throughout Australia.

Under the Land Tax Act the rates payable on unimproved values (without exemption) range from 3d. in £ on the first 2,500£, to 3½d. on portions over 80,000£.

The Income Tax Act is based upon the Commonwealth Act in operation in 1922. The rates on taxable amounts not exceeding 2,000£. from property or 3,000£. from business are identical under both Acts; but the taxable amounts on corresponding gross incomes are different. Incomes of less than 125£. and in the

case of married persons of 200*l.* are exempt. Deductions from taxable amounts of 1*l.* for every 2*l.* by which the income is less than 500*l.*, and also a deduction of 39*l.* for each child, are allowed to married taxpayers, and 1*l.* for every 16*l.* by which the income is less than 1400*l.* to unmarried persons. The rates per 1*l.* on gross incomes from business range from 4*d.* to 1*s.* 7*d.*; and on incomes from property from 4*d.* to 1*s.* 11*d.* The tax on Companies is 1*s.* 6*d.* in the 1*l.* In addition to these State Taxes, the Commonwealth also imposes taxes on income and land, and collects death duties.

#### Local Government.

There are 47 municipalities, under the Act of 1907, besides Hobart and Launceston, the constitutions of which are earlier and somewhat different. Police and Education are both centralised, but in other respects municipal powers and functions are of the usual type; the most important in the rural districts being the maintenance of roads, other than main roads. The Councils elect a Warden as Chairman, and appoint a Council Clerk as permanent executive official. The Councils are elected by the ratepayers, with votes varying in number from one to six, according to the annual value of their property. All rating is on capital value, and not, as with State taxation, on the unimproved value.

About half the municipalities undertake some measure of water supply. The lighting for a number of municipalities is now supplied by the State Hydro-Electric scheme. The rates vary from about 1*s.* 3*d.* in some purely agricultural districts, to from 3*s.* to 5*s.* in the towns and mining districts.

#### Succession of Governors & Lieutenant-Governors of Tasmania since 1893.

	From	To
Viscount Gormanston, K.C.M.G.	Aug. 8, 1893	Aug. 14, 1900
J. S. Dodds, Esq., C.M.G., C.F. (Sir John), Administrator	May 1, 1899	Nov. 8, 1899
J. S. Dodds, Esq., C.M.G.	Aug. 14, 1900	Nov. 8, 1901

*Secretary*, E. O. Rowland, 672l.

*Charitable Grants Department.*

*Administrator of Charitable Grants and Director of Employment Bureaux*, C. F. Seager, 750l.

*Superintendent, Newtown Infirmary*, B. A. C. Elliott, 559l.

*Public Health.*

*Secretary for Public Health and Chief Inspector of Factories*, E. J. Tudor, 750l.

*Deputy Chief Inspector of Factories*, C. E. Wilson, 429l.

*Chief Inspector, also Food and Drugs*, J. Riley, M.R.S.I., 546l.

*Mental Diseases Hospital.*

*Medical Superintendent*, G. E. Aitken, L.R.C.P., L.R.C.S., L.F.P.S., 800l.

*Assistant Medical Officer*, G. C. Jago, M.B., B.Sc., 663l.

*Junior Medical Officer (vacant)*, 450l.

*Matron*, Miss J. Power, 351l.

*Secretary*, R. G. Terry, 507l.

*Analyst's Office.*

*Government Analyst*, E. Ward (acting), 750l.

*Fisheries.*

*Secretary to Fisheries Commission*, J. A. Edwards.

*General Hospital, Hobart.*

*Surgeon-Superintendent*, V. R. Ratten, C.B.E., M.D.

*House Surgeon*, Dr. B. M. Carruthers.

*Junior House Surgeon*, G. H. Solomon.

*Junior Medical Officers*, E. E. Davis and A. B. O'Brien.

*Acting Secretary*, T. B. A. Walker.

*Lady Superintendent (Nursing Staff)*, Miss G. H. Lade.

*General Hospital, Launceston.*

*Surgeon Superintendent*, Clifford Craig, M.D., M.S., F.R.A.C.S.

*Junior House Surgeons*, A. Hay, J. F. Drew and W. J. Duck.

*Secretary*, A. F. Kemp.

*Matron*, Miss M. A. Newman.

NOTE.—There are many other Hospitals throughout the State, most of which are State-aided.

*Agent-General in London.*

*Agent-General, Vacant.*

*Secretary*, H. W. Ely, I.S.O.

*Tasmanian Government Railways.*

*Commissioner*, F. P. St. Hill, 2,000l.

*Chief Accountant and Traffic Auditor*, W. H. Crawford, 675l.

*Secretary*, C. J. Rollins, 725l.

*Cashier and Paymaster*, C. E. Boyes, 586l.

*Chief Engineer for Existing Lines*, A. H. Wherrett, 750l.

*Resident Engineer*, T. L. Milles, 550l.

*Chief Mechanical Engineer*, H. B. Bennett, 800l.

*Traffic Manager*, O. H. Harrison, 725l.

*Tasmanian Tourist Bureau.*

*Director Tasmanian Government Tourist Bureaux*, E. T. Emmett, 675l.

*Branches at Launceston, Melbourne, Sydney, Brisbane and Perth.*

*Department of the Treasury.*

*Treasurer*, Hon. J. C. McPhee, 1,250l.

*Under-Treasurer*, P. J. Strutt, 900l.

*Accountant*, D. P. Young, 728l.

*Taxation Department.*

*Commissioner of Taxes, etc.*, H. E. Downie, 1,150l.

*Deputy-Commissioner of Taxes, Launceston*, W. J. Wilson, 750l.

*Chief Clerk and Assessor*, H. C. Tapping, F.A.I.S., 676l.

*Chief Clerk, Launceston*, W. Ryan, 520l.

*Printing Department.*

*Government Printer, W. E. Shimmings, 750l.*  
*Accountant, F. C. Hardinge, 507l.*

*Supply and Tender Department.*

*Manager, G. F. Dawson, 700l.*  
*Chief Clerk, C. H. Harrison, 559l.*

*Registration Department.*

*Registrar-General, D. P. Young.*  
*Deputy-Registrar, Hobart, F. Dickinson, 455l.*

*Education Department.*

*Director, G. V. Brooks, 900l.*  
*Chief Inspector and Secretary for Education, W. Wright, 750l.*  
*Superintendent of Technical Education, W. Gibson, B.E., 650l.*  
*Principal of Training College, J. A. Johnson, M.A., 725l.*  
*Technical Schools, Principals—Hobart, L. Dechaineux, 650l.; Launceston, D. V. Allen, 620l.; Queenstown, A. S. Winter, 500l.; Zeehan, E. H. O. White, 380l.*

*The University of Tasmania.*

*Chancellor, Hon. Sir Neil Elliott Lewis, K.C.M.G.*  
*Vice-Chancellor, W. J. T. Stops, LL.B.*  
*Registrar, Lt.-Col. L. R. Thomas, D.S.O.*  
*Professors: English, A. B. Taylor, W. H. Williams (Professor Emeritus); Mathematics, E. J. G. Pitman; Law, D. G. McDougall; Biology, T. T. Flynn; Classics, R. L. Dunbabin; Engineering, Alan Burn; Economics, T. Hytten; Physics, A. L. McAulay; Psychology and Philosophy, E. M. Miller.*  
*Lecturers: Chemistry, P. J. Macleod; Applied Chemistry, E. E. Kurth; Botany, I. D. Travers, Modern Languages, C. Malthus, C. W. Macfarlane; History, C. S. King; Law, G. L. Doyle, R. C. Wright; Education, J. A. Johnson (also Principal, Training College); Accountancy, A. R. Hower; Economics, R. Wilson; Electrical Engineering, H. P. Tuck; Mathematics, Miss E. K. Lowenstern, Mech. Engineering, W. H. Schneider; Eng. Drawing, J. Field.*  
*Tutorial Classes, N. of Tasmania, S. F. W. Limbrick.*

*Attorney-General's Department.*

*Attorney-General, Hon. H. S. Baker, 1,250l.*  
*Secretary to Attorney-General, B. J. Thompson, 481l.*  
*Parliamentary Draughtsman, J. R. Rule, 775l.*  
*Assistant Parliamentary Draughtsman, R. G. Osborne, 624l.*

*Solicitor-General's Department.*

*Solicitor-General, P. L. Griffiths, LL.B., 950l.*  
*Crown Solicitor, A. Banks Smith, 720l.*

*Judges.*

*Chief Justice, Hon. Sir H. Nicholls, K.C.M.G., LL.B., 1,800l.*  
*Puisne Judges, Hon. Harold Crisp, 1,500l.; Hon. A. I. Clark, 1,500l.*  
*Judges' Associate, H. Brettingham Moore, 424l.*

*Supreme Court.*

*Registrar of Supreme Court and Sheriff A. G. Brammall, 700l.*  
*Deputy Registrar, R. G. Bingham, 546l.*

*Lands Titles and Registry of Deeds.*

*Recorder of Titles, A. A. Richardson, 775l.*  
*Deputy Recorder of Titles, L. C. Pittfield, 572l.*

*Public Trust.*

*Public Trustee, E. D. Kemp, 750l.*

*Magistracy.*

*Police Magistrate, Hobart, Commissioner, Court of Requests, H. B. White, 775l.*  
*Police Magistrate, Hobart, F. N. Stops, 700l.*  
*Police Magistrate, etc., Launceston, E. L. Hall, 775l.*  
*Police Magistrate and Commissioner Court of Requests, North-Western Division, J. P. Clark, 650l.*

*Police Department.*

*Commissioner of Police, J. E. C. Lord, C.M.G., D.S.O., 900l.*  
*Secretary, E. P. Andrewartha, 585l.*

*Gaols.*

*Governor H.M. Gaol, Hobart, Lieut.-Col. L. M. Mullen, D.S.O., 572l.*  
*Deputy Governor, E. P. Pope, 442l.*

## DEPARTMENT OF PUBLIC WORKS.

*Minister for Public Works, Sir W. H. Lee, K.C.M.G., 1,250l.*  
*Director of Public Works, G. D. Balsille, A.M.I.E. (Aust.), 1,200l.*  
*Engineer of Works, W. Ross Reynolds, A.A., M.I.C.E., 750l.*  
*Assistant Engineer, A. E. Middleton, M.V.I.E., 559l.*  
*Chief Inspector of Roads, F. W. Trappes, 507l.*  
*Inspector of Public Buildings, A. H. Tucker, 533l.*

*Tasmanian Government Hydro-Electric Department.*

*Commissioner, H. A. Curtis, A.M.I.E., Aust., A.A.M.I.E.E.*  
*Associate Commissioners, R. L. Parker, C.M.G., C. B. Davies.*  
*Engineer for Hydraulic Designs (vacant).*  
*Engineer for Electrical Construction, A. P. Binns, B.Sc.*  
*Chief Operator, G. H. Evans, A.M.I.E., Aust.*  
*Secretary and Auditor, Walter E. Taylor, F.F.I.A., F.A.I.S.*  
*Accountant, W. R. Spinner, A.F.I.A.*  
*District Manager, G. H. Loftis, A.M.I.E., Aust.*  
*District Secretary, R. Scaife.*

*Department of Agriculture.*

*Director of Agriculture, F. E. Ward, H.D.A., 850l.*  
*Superintendent of Research (vacant), 750l.*  
*Superintendent of Extension Service, E. R. Hudson, B.Sc., B.Ag., Dip.C.A.C., 728l.*  
*Plant Pathologist, Vacant.*  
*Chief Veterinary Officer, R. C. T. Philp, L.V.Sc., 598l.*  
*Chief Agronomist, C. L. Gillies, B.Ag., Dip. C.A.C., 572l.*  
*Agricultural Chemist, F. H. Johnstone, B.Sc., A.I.C., 481l.*  
*Microbiologist, H. M. Nicholls, 442l.*  
*Chief Dairy Officer, J. T. Armstrong, 550l.*  
*Chief Horticulturist, P. H. Thomas, 550l.*  
*Veterinary Pathologist, D. T. Ozer, B.V.Sc., 442l.*

*Lands and Surveys Department.*

*Minister for Lands*, Hon. Sir W. H. Lee, K.C.M.G.  
*Secretary for Lands*, W. N. T. Hurst, 700l.  
*Staff-Surveyor and Chief Computer*, A. B. Howell, 624l.  
*Chief Draftsman*, E. P. Lovett, 507l.  
*Chief Draughtsman, Mining*, O. J. Roper, 546l.

*Returned Soldiers and Closer Settlement.*

*Secretary*, J. L. McGough, 624l.

*Forestry Department.*

*Conservator of Forests*, S. W. Steane, 800l.

*Mines Department.*

*Secretary for Mines*, W. A. Pretyman, 728l.  
*Chief Clerk*, A. B. Bryan, 533l.  
*Chief Inspector of Mines and Chief Inspector of Explosives*, J. O. Hudson, M.N.E.I.M.E., 700l.  
*Geologist*, P. B. Nye, B.M.E., 598l.  
*Chemist and Assayer*, L. H. Bath, 520l.

COMMONWEALTH DEPARTMENTS IN TASMANIA.

*Deputy Director of Post and Telegraphs*, J. E. Monfries, 792l.  
*Local Auditor*, W. Y. O'Driscoll, 606l.  
*Deputy Commissioner for Taxation*, P. C. Douglas, 675l.  
*Commonwealth Electoral Officer, Commonwealth Works Registrar, also Deputy-Commissioner, Pensions Department, and Deputy P.S. Inspector*, C. F. M. Travers, 606l.  
*Divisional Returning Officers*—Bass, A. J. Simmons; Darwin, N. J. Warmbrunn; Denison, L. Ainsworth; Franklin, C. A. Blakney; Wilmot, A. R. Cooke.  
*Meteorological Divisional Officer*, J. C. Foley, 522l.

*Statistical Department.*

*Deputy Statistician*, E. T. McPhee, 720l.

*Trade and Customs.*

*Collector of Customs*, E. A. J. Benjafield, 672l.

*Treasury.*

*Accountant, Sub-Treasury*, P. C. Douglas.

*Military Forces (6th Military District).*

*Commandant*, Lt.-Colonel H. J. Cox-Taylor, D.S.O.  
*Deputy-Director of Medical Services*, Col. W. W. Giblin, C.B., V.D.

*Foreign Consuls and Consular Agents.*

*France*, Consular Agent, W. H. Burgess, Hobart.  
*Netherlands*, Consul, D. C. McLaren, Hobart.  
*Belgium*, Consul, Hon. T. Murdoch, M.L.C., Hobart.  
*Sweden*, Consul, L. L. Dobson, Hobart; George E. Harrap, Vice-Consul, Launceston.  
*Norway*, Consul, A. C. Paton, Hobart; George E. Harrap, Vice-Consul, Launceston.  
*Argentina*, Vice-Consul, L. D. Burgess, Hobart.  
*Denmark*, Vice-Consul, E. Ross.  
*Italy*, Consular-Agent, P. C. Smith, Launceston.  
*Brazil*, Vice-Consul, Germain Murdoch, Hobart.  
*Japan*, under jurisdiction of Consul at Melbourne.  
*Switzerland*, under jurisdiction of Consul at Melbourne.

VICTORIA.

*Situation and Area.*

Victoria is situated at the south-east of the continent of Australia, and lies between the 34th and 39th parallels of south latitude and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 420 miles, and its greatest breadth is about 250 miles. Its extent of coast line is nearly 600 miles.

On the north and north-east Victoria is bounded by New South Wales, from which it is separated by the River Murray, and a direct line from the head waters of that stream, at Forest Hill, to Cape Howe. On the west it is bounded by South Australia, from which it is separated by a line approximating to the position of the 141st meridian, extending from the Murray to the sea. On the south and south-east its shores are washed by the Southern Ocean, Bass' Strait, and the Pacific Ocean.

The southernmost point in Victoria, and on the whole continent of Australia, is Wilson's Promontory, which lies in latitude 39° 8' S., longitude 146° 26' E.; the northernmost point is the place where the western boundary of the State meets the Murray, latitude 34° 2' S., longitude 140° 58' E.; the point furthest east is Cape Howe, situated in latitude 37° 31' S., longitude 149° 59' E.; the most westerly point is the line of the whole western frontier, which, according to the latest correction, lies upon the meridian 140° 58' E., and extends from latitude 34° 2' S. to latitude 38° 4' S., or 242 geographical miles.

The area of Victoria is, according to the most recent computation, 87,884 square miles, or 56,245,760 acres (nearly equal to Great Britain). The whole continent of Australia contains 2,974,581 square miles, and Victoria consequently occupies about a thirty-fourth part of its surface.

*Physical Features.*

Victoria is traversed, with more or less regularity, throughout its entire length from east to west by a chain of mountains and lesser hills, completely dividing it into two parts, and known as the Dividing Range. The summit of this range runs generally at a distance of 60 or 70 miles from the coast. The streams to the north of it flow towards the River Murray, and those to the south of it towards the sea. The eastern part of the range, which divides the Gippsland district from that of the Murray, is named the Australian Alps; and that part which separates the County of Ripon from that of Borung, and extends into the County of Kara Kara, is named the Pyrenees. The higher peaks of the Dividing Range are covered with snow for several months in the year. The mountainous country is, for the most part, densely wooded to the very summits with fine timber, but the peaks above the winter snow line are quite bare, or only partially covered with dwarfed trees or shrubs. From near Kilmore eastward, a distance of 200 miles, the mountains are generally steep but have been made accessible by good roads thus removing the barrier between the parts of the State north and south of them. From Kilmore westward the range rapidly dwindles, so that although presenting in places points of considerable height—such as Mount William and Mount Macedon—it is easily crossed. From Mount Macedon it becomes, as it stretches away to the Western district, a chain of hills, in parts only of considerable altitude, and offering no serious obstructions to crossing in very many places. That portion of the Murray basin commencing at

Wodonga on the east as a point, and extending in the form of a regular triangle to a width of 200 miles along the western boundary of Victoria, has almost a flat surface, with a very slight inclination towards the Murray. The remaining country north and south of the Dividing Range and its spurs is moderately undulating; it is in some parts destitute of timber, but closely wooded in others. Besides the main Dividing Range, there are also other ranges extending in different parts of the country, many of them being spurs of the main chain. The highest peaks, however, are found in the Dividing Range and its offshoots.

#### Population.

Although Victoria occupies no more than the thirty-fourth part of the Australian continent, it contains nearly 27.7 per cent. of the inhabitants of the whole continent. This satisfactory feature is due to the benefits to be derived from the climatic, agricultural and manufacturing advantages of Victoria. The estimated population of the State on the 30th June, 1931, was 1,797,459 viz., 888,548 males and 908,911 females. These numbers give a proportion of 102.3 females to 100 males.

#### Means of Communication.

Melbourne, the metropolis of Victoria, is distant from Sydney by sea about 650 English miles, and by land 577 miles; from Adelaide by sea 560 miles, and by land 483 miles. It is connected with Sydney, Brisbane, Adelaide and Perth by railway. Steam postal communication with England, *via* Ceylon and Suez, is maintained weekly by the steamers of the P. and O., alternating with those of the Orient Company. Mails are also carried by the lines of steamers belonging to the Pacific, British India and Messageries Maritimes (French) Companies.

The post offices (official, semi-official, and non-official) in Victoria number 2,732.

The postal, telegraph and telephone revenue was 3,385,428*l.*, in 1929-30, and the expenditure 2,736,092*l.* (excluding loan expenditure, 685,391*l.*)

The number of telegrams transmitted during 1929-30 was 3,992,661. There are 160,381 telephones in use in the State, with 118,074 subscribers. The amount received on account of telegrams and telephones during the year 1929-30 was 1,757,288*l.*

The railways in Victoria, with the exception of two small lines, are all owned by the Government. The number of miles open for traffic on 30th June, 1930, was 4,723, and 120½ miles were in course of construction. In 1929-30 the gross receipts were 12,088,013*l.*, and the working expenses 9,598,893*l.* The interest and expenses on the debt incurred for construction amounted to 3,526,117*l.*, and the revenue deficit for the twelve months was 1,037,997*l.*

#### Climate.

From its geographical position Victoria enjoys a climate far more genial to Europeans than any other State of Australia. In regard to heat the weather is never severely oppressive, except during the prevalence of hot northerly winds, and these occur only at intervals during the summer months. Over a period of 75 years the mean temperature at Melbourne was 58.5°; the mean atmospheric pressure noted first at an Observatory, 91 feet above the sea level, and later at the Weather Bureau 115 feet above sea level, was 30.012 inches; rain falls on the average upon 138 days in the year, the mean annual rainfall being 25.49 inches.

#### Early History.

It is believed that the first Europeans who ever sighted any portion of the land now embraced within the limits of the colony of Victoria were Captain Cook and the officers and crew of His Majesty's ship *Endeavour*. Cook, however, did not attempt to land, but passed on to other discoveries.

On his return to England he reported the eastern part of Australia to be suitable for colonisation, and this led to a party of convicts being despatched there in 1788, under Captain Arthur Phillip, R.N. On the shores of Port Jackson, a few miles to the north of Botany Bay, Phillip established a permanent settlement, but for nearly ten years afterwards nothing was done towards the exploration of the southern shores of Australia. At length George Bass, a surgeon in the Royal Navy, started in a whale-boat, manned by six seamen, and, passing Cape Howe, coasted along that part of Victoria now called Gippsland, and rounding Wilson's Promontory—the southernmost point on the Australian Continent—entered Western Port on the 4th June, 1798. He, however, returned to Sydney without discovering Port Phillip Bay, which was first entered in February, 1802, by Acting-Lieut. John Murray, in command of the armed brig *Lady Nelson*. In October of the following year an attempt was made to colonise the territory by Lieut.-Col. David Collins, of the Royal Marines, in command of a party of convicts. Collins, however, after the expiration of three months, abandoned Port Phillip as unfit for settlement, and for the next twenty years the district attracted but little attention. Then two explorers—Hume and Hovell—made their way overland from Sydney, and, on their return, gave a satisfactory report of the country, the result being that a convict establishment was soon afterwards founded on Western Port Bay, which, however, was in a short time abandoned, apparently on economic grounds. The first permanent settlement in Victoria was formed at Portland Bay, by Mr. Edward Henty, from Van Diemen's Land—as Tasmania was then called—who landed on 19th Nov., 1834, and soon commenced to till the soil, run and breed stock, and carry on whaling operations. Others followed, but the absence of good land in the immediate vicinity of the port, and the openness of the bay, which rendered it unsafe for shipping during the prevalence of certain winds, caused it to be considered an unsuitable site. The capital was eventually founded at the northern end of Port Phillip Bay by two parties, one led by John Batman, who landed on 29th Nov., 1835, and the other by John Pascoe Fawkner, whose party arrived at the site of Melbourne on the 28th August of the same year. Both of these were from Van Diemen's Land, and they were soon followed by others from the same island, and from Sydney, who brought stock with them, and commenced to push their way into the interior. These were met by Major (afterwards Lieutenant-Colonel Sir) Thomas Mitchell, who, entering from New South Wales on the north, and traversing a considerable portion of the (as yet) unknown territory, was so struck with its wondrous capabilities that he named it Australia Felix, a title the aptness of which a subsequent knowledge of the geniality of its climate, the excellence of its soil, and the then unsuspected richness of its mineral treasures, has proved to be fully justified. The reports of Sir Thomas Mitchell, and the success of the first settlers, caused great excitement, not only in Australian settlements, but in the mother country.

Herds of sheep and cattle driven overland from New South Wales speedily occupied the best parts of the new territory. Every available craft capable of floating was put into requisition to bring passengers and stock from Van Diemen's Land, and after a time shiploads of emigrants began to arrive from the United Kingdom. Regular government was first established under Captain William Lonsdale, who, having been sent from Sydney to take charge of the district, landed on the 29th Sept., 1836; and on the 2nd March of the following year Sir Richard Bourke, the Governor of New South Wales, visited it, and named the metropolis Melbourne. Mr. Charles Joseph La Trobe arrived on the 30th Sept., 1839, having been appointed to the principal official position in the settlement under the title of Superintendent. This title was changed to that of Lieutenant-Governor, when, on the 1st July, 1851, it was separated from New South Wales, and created a separate colony under the name of Victoria. Shortly afterwards rich deposits of gold were discovered, which led to a great influx of population. After a time discontent arose amongst the diggers in consequence of the oppressive character of the mining regulations, which culminated in riots on the Ballarat goldfield towards the end of 1854. The disturbance was soon quelled, with some bloodshed on both sides, and the grievances complained of were afterwards redressed. A new constitution, giving responsible government to the colony, was proclaimed on the 23rd November, 1855.

#### Industry.

The main industry is grazing and agriculture, 9,309,000 acres being under cultivation in 1930-31. The chief products were wheat, grown on an area of 4,600,200 acres, producing 53,814,369 bushels; oats, 371,024 acres, producing 6,893,827 bushels; barley, 87,518 acres, producing 1,983,130 bushels; potatoes, 67,590 acres, producing 173,341 tons; and hay, 1,277,398 acres, producing 1,605,900 tons. In 1929-30 40,594 acres were devoted to the culture of the vine, producing 1,363,575 gallons of wine, 783,654 cwts. of raisins, and 178,226 cwts. of currants. A considerable area is devoted to the cultivation of fruit trees and vegetables; tobacco, hops, and olives are also grown. The dairying industry has made rapid strides; in 1929-30 there were produced 90,639,652 lbs. of butter (of which 40,305,160 lbs. were exported overseas) and 6,953,949 lbs. of cheese. At March, 1931, there were in the State 379,872 horses, 1,429,920 cattle (including 669,132 milch cows), 16,477,995 sheep, and 231,245 pigs. The wool exported overseas in 1930-31 amounted to 175,419,800 lbs., valued at 6,960,714*l*. The amount of gold raised in 1930 was 24,119 ozs., making a total since 1851 of 71,348,924 ozs. fine, valued at 303,070,257*l*. Enormous deposits of brown coal exist, and seams of true coal of good quality which have been discovered are being worked with success. The quantity of black coal raised in 1930 was 699,302 tons, valued at 802,677*l*, and the quantity of brown coal raised was 1,831,507 tons, valued at 173,713*l*. The chief exports other than wool, butter and wheat are flour, fruits (all kinds), hides and skins, meats, live stock, leather, milk and cream and tallow. The chief imports are textiles and apparel, woollens, tea, timber, paper, oils, machines and machinery, and iron. During 1930-31 over 93 per cent. of the overseas trade was done at Melbourne. The other principal ports were Geelong, Portland, Warrnambool.

The vessels on the Victorian register at the end of 1930 numbered 344, with a total tonnage of 193,851.

Victoria, as a manufacturing country, occupies a pre-eminent position in the Australasian group. Returns of statistics are collected from all factories employing four or more persons, or using machinery driven by power. The following is a statement of the number and nature of factories and persons employed therein during 1929-30:—

#### Manufactories and Works, 1929-30.

Nature of Industry.	Number of	
	Factories.	Hands employed.
Tanning, fellmongering, &c. ...	234	3,232
Oil, soap, candle, &c. ...	26	823
Brick, stone, glass, &c. ...	249	5,026
Working in wood ...	633	6,509
Metal, machinery, &c. ...	1,022	25,439
Food, drink, tobacco, &c. ...	1,200	20,628
Woollen mills, clothing, boots, &c. ...	2,132	53,115
Printing, binding, paper, &c. ...	596	11,451
Organ, piano, &c. ...	20	466
Arms and explosives ...	8	506
Coachbuilding, bicycle, saddle, &c. ...	1,021	7,646
Shipbuilding, docks, &c. ...	14	385
Furniture, bedding, &c. ...	425	4,117
Drugs, chemicals, &c. ...	102	2,522
Surgical, &c., Instruments ...	46	246
Timepieces, jewellery, &c. ...	118	1,077
Heat, light and energy ...	138	3,231
Leatherware ...	60	882
Rubber goods ...	102	3,261
Minor Wares (N.E.I.) ...	49	447
<b>Total ...</b>	<b>8,195</b>	<b>151,009</b>

The total number of all establishments is 8,195, of which 762 use steam or gas engines, 6,142 use electric power, and 515 oil, water, &c. They employ 151,009 hands, and the approximate total value of lands, buildings, machinery, and plant is 72,011,020*l*. The value of materials used was 66,770,302*l*, and of articles produced or work done 122,811,099*l*. The wages paid amounted to 30,517,535*l*.

The estimated value of Victorian production in 1929-30 was as follows:—

	£
Agricultural Production ...	8,985,524
Pastoral and Dairying Production ...	23,135,434
Mining Production ...	1,833,246
Forest ...	1,704,614
Miscellaneous Products ...	5,531,182
<b>Total Primary Products ...</b>	<b>41,190,000</b>
Manufacturing—value added during process ...	49,403,185
<b>Total ...</b>	<b>90,593,185</b>

#### Irrigation and Water Conservation.

The climate of Australia is a comparatively dry one, and it is to this that its superior salubrity is, to a great extent, attributed. Droughts in Victoria are not of frequent occurrence. Still, in certain districts, serious inconvenience and loss have been experienced at times on account of deficient rainfall. To obviate this Parliament has passed several measures with the view of promoting national irrigation and water conservation for domestic and stock supplies upon a large scale. By the Water Act of 1905 all existing irrigation trusts, with the exception of the First Mildura Irrigation Trust, were

abolished, and their works and duties transferred to the State Rivers and Water Supply Commission. In 1909 an Act was passed extending the authority of this latter body by giving it the general construction of works formerly entrusted to the Department of Water Supply and by imposing on the Commission all the duties formerly performed by the Water Supply Department. The capital expenditure on irrigation and water works controlled by the Commissioners on the 30th June, 1930, amounted to 20,752,495*l*. The Commission is empowered to levy rates on all lands capable of irrigation under their jurisdiction, the total area irrigated being 566,577 acres in 1929-30. The Mildura Irrigation Colony, lands, works, and approaches are controlled by the First Mildura Irrigation Trust. From time to time the Government has assisted the Mildura Trust until on the 30th June, 1930, the total amount advanced was 119,782*l*, of which 110,887*l* was outstanding on 30th June, 1930. The extent of watering done by this Trust represented 51,780 water acres in 1929-30.

#### *Chief Cities and Towns.*

Melbourne, the capital, on the 31st December, 1930, had a population of 1,032,500. The first settlers established themselves on the site of the present city so recently as in 1835.

The other cities are Geelong (43,400), Ballarat (42,050), Bendigo (33,690), and Warrnambool (8,100). The chief towns are Castlemaine (7,170), Wonthaggi (7,000), Mildura (6,000), Shepparton (5,500), Ararat (5,300), Hamilton (5,300), Maryborough (4,960) and Stawell (4,700).

#### *Banking and Currency.*

The following banks had offices numbering 924 in all, throughout the State during the June quarter of 1931:—The Bank of Australasia; of New South Wales; of New Zealand; Commercial of Sydney; Commercial of Australia; English, Scottish and Australian; National of Australasia; the Union of Australia; Queensland National; Ballarat Banking Co.; Primary Producers' of Australia; Comptoir National D'Escompte de Paris; Australian Bank of Commerce; Bank of Adelaide; and The Commonwealth Bank of Australia.

The deposits at that period amounted to 96,743,751*l*., and the paid up capital to 52,740,685*l*.

There are also 211 banks and branches, with 396 agencies of the Savings Bank. The number of depositors on the 30th June, 1931, was 1,250,873, and the amount on deposit was 56,850,067*l*. (including 1,812,053*l*. to the credit of deposit stock accounts). The legal tender and usual currency is exclusively British sterling.

A branch of the Imperial Mint is established at Melbourne. The value of gold coin and bullion issued during 1930 was 538,872*l*. Coinages of silver and bronze are also undertaken by the Mint.

#### *Education.*

Education establishments in Victoria are of four classes, viz., the University, with its four affiliated Colleges, for superior education; State schools, for primary and secondary education; registered schools for primary and secondary education; and technical schools for instruction in the various arts. The Melbourne University was established under a special Act of the Victorian Legislature in 1853, and Royal Letters Patent were issued on the

14th March, 1859, declaring that all its degrees except those of divinity should be recognised in the United Kingdom and the British colonies and possessions. Affiliated to the University are four Colleges—Trinity, Ormond, Queen's, and Newman—connected with the Church of England, the Presbyterian, the Methodist, and Roman Catholic Churches respectively. The number of students attending lectures at the University during 1930 was 3,040. From the date of the opening of the University to the end of 1930, the total number of students who matriculated was 16,606, and 12,087 direct degrees were conferred during the same period. The technical schools, which are controlled by the Education Department, number 28, there are also 2 Agricultural Colleges and 1 School of Horticulture. The principal of these is the Melbourne Working Men's College, established for the purpose of improving the general and technical education of the working classes and open to women as well as men. The gross enrolment of pupils at senior technical schools, excluding those at agricultural and horticultural colleges, was 18,152.

The system of primary public instruction, which was commenced on 1st January, 1873, is strictly secular. Attendance at school is compulsory for children between the ages of 6 and 14, and State instruction is granted free of cost. In 1929 there were 2,601 State schools, with a total enrolment of 258,872 scholars, instructed by 8,070 teachers (including 622 temporary teachers). The average attendance was 180,274. In 1929-30 the cost of public instruction (exclusive of buildings, rent, &c.) was 2,369,637*l*. There is no local control over the schools.

The secondary schools are for the most part under the control of private persons or proprietary bodies, usually connected with some religious denomination. These now receive no State assistance, but formerly a few of the principal ones received money and grants of land from the Government. According to the returns for 1929, there were 501 registered schools in Victoria, with 2,249 teachers, and an attendance of 65,413 scholars. Of these schools the Roman Catholic denomination had about one-half and over half the scholars.

#### *Government.*

The Government of Victoria consists of a Governor appointed by the Crown, who is the official head of the Legislature, and assents in the name of the Crown to Acts passed by the Parliament. There is a Legislative Council, or Upper House of Parliament, consisting of 34 members elected for 17 Provinces, and an Assembly, or Lower House, consisting of 65 members returned by 65 Electoral Districts. The Constitution was established by an Act passed by the Legislature of Victoria, 1854, to which Her Majesty assented, in pursuance of the power granted by Act of the Imperial Parliament (18 & 19 Vict., cap. 55).

The constitution of the two Houses and the qualification of Members and Electors have been amended on several occasions; and a Reform Act received the Royal Assent on 26th November, 1903. By this Act the number of Members of both Houses was reduced, the franchise for the Upper House broadened, and the property qualification for membership reduced, and several other reforms made. In 1907 an Act was assented to abolishing the separate representation of railways and public officers in the Parliament of the State—one of the provisions of the Reform Act of

1903. Officers in the service of the Government are, however, prohibited from using any influence in respect to any matter affecting their remuneration or position in the public service.

The Adult Suffrage Act of 1908, assented to on 31st March, 1909, places women on an equality with men as electors for the State Legislature.

One of the two Members of Council returned for each of the Electoral Provinces retires in rotation at the expiration of every three years, so that the tenure of seats is six years. The Governor has no power to dissolve the Council, except in case of a deadlock between the two Houses. The property qualification of members is possession of freehold property of an annual value of 50*l*. The property qualification of Electors of Members of Council is possession of freehold property rated in some municipal district at not less than 10*l*. per annum, or occupation of freehold or leasehold property of not less than a 15*l*. annual rating. Graduates of Universities within the British dominions, matriculated students of the University of Melbourne, barristers and solicitors, legally qualified medical practitioners, officiating ministers of religion, certificated school-masters, and officers of the army and navy when not on active service, also have votes for the Legislative Council. The functions of this House differ very slightly from those of the House of Lords. Money Bills may be either accepted or rejected, but they may not be altered. By the Reform Act of 1903 the Council is now empowered to suggest alterations in these Bills.

The *Constitution Act Amendment Act 1922* provides of the reimbursement of expenses of members of the Legislative Council at the rate of 200*l*. per annum.

An Act was passed in 1857 to abolish the property qualification required of members of the Legislative Assembly, and universal suffrage exists so far as the election of that body is concerned. Plural voting was abolished by an Act passed in August, 1899, so far as the election of members of the Assembly is concerned. The duration of the Assembly is, under ordinary circumstances, three years, but it may be dissolved by the Governor at any time. Vote by ballot has been in operation since 1856, and by an Act passed in October, 1900, provision is made for voting by post in certain cases. Voting at Legislative Assembly elections was made compulsory by an Act assented to on 23rd December, 1926.

All members of the Legislative Assembly, who are not in receipt of official salary out of the Consolidated Revenue, are paid 500*l*. a year "for reimbursing their expenses in relation to their attendance in Parliament."

An Act was passed in December, 1903, limiting the amount which may be expended by candidates for election expenses to 400*l*. and 150*l*., for the Council and the Assembly respectively. The purposes for which such expenditure may be incurred are defined by the Act.

#### *Municipal Government.*

A complete system of local self-government exists in Victoria. The municipalities are of two kinds, urban and rural, the first being called cities, towns and boroughs, and the second shires. Each municipal district is a body corporate, with perpetual succession and a common seal. The governing body is a Council, the members of which are elected by the ratepayers. The Council

of every municipality is required to make and levy each year a general rate equally in respect of all rateable property within the municipal district. No such rate made in any one year shall exceed the amount of 3*s*. in the £1 of the net annual value of such property as estimated under the provisions of the Local Government Act, or be less than 6*d*. in the £1 of such value. The ratepayers if they so desire may have the rate imposed on the unimproved value of the land. In 1930-31 fourteen municipalities were rated on this method. In 1930-31 there were 56 cities, towns, and boroughs and 140 shires. The number of ratepayers was 607,478; the annual value of the rateable property was assessed at 36,032,913*l*., representing a value in fee simple of 679,539,071*l*.; the total income in 1930 was 7,069,633*l*., and the expenditure was 7,304,945*l*.; whilst their loan indebtedness amounted to 13,802,633*l*.

The harbour of Melbourne is under the control of the Melbourne Harbour Trust, created by Act in 1876. The revenue of the Trust in 1930 was 618,891*l*., and its expenditure 1,203,718*l*., including capital expenditure 596,543*l*. The outstanding debt of the Trust at the end of 1930 amounted to 4,220,807*l*.

The Melbourne Water Supply Works are now under the control of the Melbourne and Metropolitan Board of Works which body is also empowered to undertake the sewerage of the metropolis. In 1929-30 the Board's ordinary revenue was 1,706,372*l*., and its expenditure 1,774,150*l*. exclusive of 2,877,284*l*. from loans; whilst there were loans outstanding at 30th June, 1930, amounting to 23,365,020*l*. The expenditure on the sewerage works completed and in course of construction amounted to 12,272,133*l*. up to the 30th June, 1930.

There are also two Fire Brigade Boards, supported by equal contributions by the Government the Municipalities and the Insurance Companies. In 1930 their revenue amounted to 292,891*l*., their expenditure to 277,239*l*., including 27,300*l*. loan expenditure, and their debt to 247,917*l*.

The first Melbourne tramways were constructed by a Trust at a cost of 1,705,794*l*., provided for by loans secured on the rateable property of the Municipalities. The debt was gradually extinguished by a sinking fund, contributed by the Melbourne Tramways Company, a public company, to which the lines were let for a period of 30 years. The lease expired on 1st July, 1916, when the balance of the outstanding debentures (450,000*l*.) was paid off. A Board consisting of five members, was nominated by the Government to take over and operate the cable tramways from 1st July, 1916, to 31st October, 1919, or such earlier date as might be proclaimed by the Governor-in-Council. This Board was on 1st November, 1919, superseded by another Board of seven members appointed under authority of the Melbourne and Metropolitan Tramways Act, 1918. On 2nd February, 1920, the electric tramways systems were vested in the board. The capital cost of the tramways under the control of the board, including the suburban lines, amounted to 8,279,647*l*. at 30th June, 1930. The cost of the cable system, which is included in this sum, amounted to 1,487,012*l*. The Board is empowered to borrow up to 5,500,000*l*., this being in addition to the transferred liabilities attaching to the tramways vested in it.

In 1929-30 ordinary revenue was 2,349,154*l*. and ordinary expenditure 2,519,093*l*. The loan liability at 30th June, 1930, was 5,720,143*l*.

## Governors of Victoria.\*

Name.	Office.	Date of Assumption of Office.
Sir H. B. Loch, G.C.M.G., K.C.B. ....	Governor	15 July, 1884

*Switzerland*, Consul, P. Frossard.  
*Uruguay*, Consul, H. P. Ogilvie (Hon.).  
*United States*, Consuls, W. Kelling, J. C. Hudson; Vice-Consul, R. H. Hunt.  
*Yugoslavia*, Consul, T. D. Oldham (Hon.).

**WESTERN AUSTRALIA.**

*Situation and Area.*

Western Australia comprises nearly one-third of the Australian continent, namely, all that portion west of the 129th meridian. The total area is 975,920 square miles (equal to half European Russia, or to over one-fourth of Europe). The city of Perth, the capital, is in lat. 31° 57' S., long. 115° 51' E.

*Coast Line.*

The Southern and Western coast lands are to a great extent of a more or less flat and sandy character, even though mostly protected by rocky cliffs and headlands, or dunes; there are here comparatively few natural harbours or other indentations, until the Kimberley Division is reached, where the character of the coast changes, and it becomes bold and broken, and fringed with numerous islands. The total length of the coast line, not including minor features, is estimated to be 4,360 miles.

*Bays, Gulfs, &c.*

The principal inlets, beginning from the north, are: Cambridge Gulf, Napier Broome Bay, Vansittart Bay, Admiralty Gulf, Montague Sound, York Sound, Brunswick Bay, Camden Sound, Collier Bay, King Sound, Beagle Bay, Roebuck Bay, Lagrange Bay, Port Walcott, Nickol Bay, Exmouth Gulf, Shark Bay, Champion Bay, Cockburn Sound, Koombana Bay, Geographie Bay, Flinders Bay, King George Sound, Bremer Bay, and Esperance Bay. With the exception of Princess Royal Harbour (the inner harbour of King George Sound), the principal anchorages used to the south of the 19th parallel of latitude are open roadsteads, which, as a rule, are only partially protected; but the holding grounds of these are fairly good, and accidents seldom happen to vessels properly found. Fine harbours have, however, been artificially provided at Fremantle, at the mouth of the Swan River, and at Bunbury, in Koombana Bay.

*Capes.*

The principal capes are: Capes Domett and Dusséjour at the entrance of Cambridge Gulf; Cape Londonderry, which is the most northerly point of the State, with Cape Talbot, on the same peninsula; Cape Bougainville, lying between Admiralty Gulf and Vansittart Bay; Cape Voltaire, which is the western boundary of Admiralty Gulf; Cape Torrens, at the entrance to York Sound; Cape Lévêque, the western boundary of King Sound; Cape Bruguieres, to the west of Nickol Bay; North-West Cape, which forms the western boundary of Exmouth Gulf; Cape Cuvier, at the northern extremity of Shark Bay; Cape Inscription, at the north end of Dirk Hartogs Island, so named because of an inscription plate placed there by Dirk Hartogs in 1616; Steep Point, situated on the southern entrance to Shark Bay, which is the most westerly point of the Continent; Cape Vlaming, being the Western extremity of Rottnest Island; Capes Naturaliste and Leeuwin at the south-western extremity of the Continent, and Point D'Entrecasteaux, West Cape Howe, Bald Head, Cape Riche, Hood Point, Cape le Grande, and Cape Arid on the Southern coast.

### Tides.

As would naturally be expected with so extensive a coast line, the tides are very varied, little or no rise and fall being experienced on the South and South-Western coasts, whilst from Shark Bay northwards they increase rapidly, though not uniformly in range, attaining at King Sound a height of 46 feet.

### Islands.

The islands which occur on the coast are, as a rule, small and unimportant, those best known being Garden and Rottnest Islands off Fremantle; the Houtman Abrolhos, near Champion Bay, on which guano is found; Dirk Hartogs and other islands in Shark Bay, used for pastoral purposes; Dampier Archipelago and the Montebello Group on the North-West coast; and off the Kimberley or extreme Northern coast, the Lacepedes, on which are guano deposits, and the Bucaoner and Bonaparte Archipelagos, for the most part unexplored.

### Rivers.

The principal rivers are: in the North, the Ord, with its tributaries, the Denham, Bow, Negri, and Panton; the Pentecost, with its tributary, the Chamberlain; the Durack, Drysdale, King Edward, Prince Regent, Charnley, Isdell, and the Fitzroy, with its tributaries the Margaret and Hann Rivers and Christmas Creek. In the North-West the De Grey, with its tributaries, the Oakover, Shaw, and Strelley; the Yule, the Fortescue, and the Ashburton, with its tributaries, the Henry and Hardy. Then, falling to the Western Coast, the Minilya, the Gascoyne, with its tributary, the Lyons; the Wooramel, the Murchison, with its tributary, the Sanford; the Greenough; the Swan, on which is situated the capital of the State, and which, inland, is called the Avon; the Murray, the Collie, and the Preston. And lastly, on the Southern Coast, the Blackwood, Donnelly, Warren, Deep, Frankland, Denmark, Hay, Kalgan, Pallinup, Gairdner, FitzGerald and Phillips Rivers.

### Mountains.

In the Kimberley District the principal range of hills is the King Leopold range. The highest point in it is Mount Broome, 3,040 feet. In the North-West, between the Fortescue and Ashburton Rivers, the highest range is the Hamersley, with Mount Bruce (4,024 feet) in the vicinity. The Darling range, which extends from Yatheroo in the North to Point D'Entrecasteaux in the South, a distance of about 300 miles, attains its highest elevation, 1,910 feet above the level of the sea, at Mount Cooke in the Cockburn Sound District. In the South, the loftiest range is the Stirling range, the highest point of which is Bluff Knoll (3,640 feet). Between it and the coast, and parallel with both, extends the less elevated Forongorup range.

### Lakes.

There are no lakes of any considerable importance in the State. Between the Darling range and the coast there are a few salt water lagoons, and many fresh water lakes, the majority of which are nothing more than swamps during the dry season, and none of them are of any economic importance. The so-called lakes in the interior of the State, which are frequently of very considerable area, are, except after the occasional heavy rains, merely immense salt marshes or clay-pans.

### Contour of the Country.

That part of the State lying to the north of the 19th parallel of latitude may be described as mountainous, consisting of alternating high and lower lying plateaux; the highest country here is principally of sandstone formation. The North-West Division and much of the Gascoyne Division also are distinctly mountainous, the ranges here being principally granite. The north and north-eastern parts of the State contain a large area of good pastoral country. A large proportion of the South-Western and Southern sea-boards shows indications of a recent geological formation, and may be described as a vast forest, principally timbered with jarrah, karri, wandoo, tuart, marri (or red gum), most of which timbers are of great commercial value. From some points on the Western sea-board settlement has extended for about 500 miles inland. That portion of the interior lying between the 19th and 30th parallels of latitude, and between the 123rd and 129th meridians is to a very large extent unexplored, but from information furnished by gold prospectors and other travellers, this area may be described as a great tableland, with an altitude of from seven hundred and fifty to two thousand feet above sea level, the surface of which consists partly of sand dunes, varied by wide stretches of clayey soils and ranges. Between the 30th parallel of latitude and the Great Australian Bight, much of the country is of limestone formation, and here there are immense areas of grass land, which only await the discovery of subterranean water to make them rank amongst the most productive areas of the State.

### Early History.

The first authentic record of European explorers visiting any portion of Western Australia is contained in the words cut into the tin plate, now in the State Museum at Amsterdam, which was nailed on the 25th October, 1616, by Dirk Hartogs, the commander of the Dutch vessel *Eendragt*, to a post erected on Point Inscription on what is now called Dirk Hartogs Island. Other vessels successively visited, or were driven by stress of weather to the West coast of the Continent, notably the *Leeuwin* in 1622, the *Butavia* (Capt. Pelsart) in 1628, the *Limmen* (Capt. Tasman) in 1644, and the *Geelvinck* (Capt. de Vlaming) in 1696. The first Englishman, however, to land on these coasts was William Dampier, who, in 1688, in the *Ogyneet*, landed at King Sound. French navigators followed during the next century and after, viz., de St. Alouarn, in *Le Gros Ventre*, in 1772, d'Entrecasteaux, in *La Recherche*, in 1792, Baudin, in the *Géographie*, in 1801, de Freycinet, in the *Uranie*, in 1818, and De Bougainville, with the vessels *Thétis* and *Espérance*, in 1825. In 1791, Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1801, Matthew Flinders, in the *Investigator*, explored the Southern coast of the Continent, which, at his suggestion, subsequently received the name of Australia; whilst from 1818 to 1822 Philip Parker King, first in the *Mermaid* and afterwards in the *Bathurst*, explored and carefully charted its Northern Coasts.

In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Fredericks Town. In 1827 Captain James (afterwards Sir James) Stirling, in H.M.S. *Success*, surveyed the coast from King George Sound to the Swan River, and in May, 1829,

Captain Fremantle (afterwards Sir Charles Fremantle, G.C.B.), in H.M.S. *Challenger*, took possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle, and was appointed Lieutenant-Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the Settlement was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts were sent out. The Imperial convict establishment was transferred to the Colonial Government on the 31st March, 1886.

### *Constitution and Government.*

In 1870 the constitution, which was what is called "Representative," was established by Act 33 Vict., No. 13. The Governor was assisted by an Executive Council composed of the principal officers of the Government, and the Governor also had power to appoint two unofficial members to the Executive Council. There was also a Legislative Council, consisting then of three official members of the Executive Council, three unofficial nominees of the Governor, and 12 elected members.

Responsible government was granted to Western Australia in October, 1890, and the first Ministry was sworn in on 29th December, 1890.

The Legislature consists of two Houses: the Legislative Council, consisting of 30 members, and the Legislative Assembly, of 50 members.

Both Houses are elective.

By the Parliament (Qualification of Women) Act, 1920, it has been enacted that a woman shall not be disqualified by sex or marriage for being elected to, or sitting and voting as a member of the Legislative Council or the Legislative Assembly.

### *Legislative Council.*

*Provinces.*—The State is divided into 10 electoral provinces, each returning 3 members.

*Tenure of Seat.*—6 years.

*Qualification of Member.*—Any person who is (1) 30 years of age, and free from any legal incapacity; (2) a natural born subject of His Majesty and a resident in the State for at least 2 years; or (3) naturalised for 5 years, and a resident in the State during that period.

*Qualifications of Electors.*—"The Constitution Act Amendment Act, 1899," has extended the right to vote equally to both sexes. The qualifications of an elector are as follows:—is not under 21 years of age, and not otherwise disqualified; is a subject of the King, either natural-born, or having been naturalised for at least 12 months; has resided in the State for 6 months; and in the province for which enrolment is claimed has freehold property of the clear value of £50, or is a householder or a leaseholder in respect of property of the clear annual value of £17, or a ratepayer of property of the annual rateable value of £17, or a Crown leaseholder paying a rental of £10 per annum.

### *Legislative Assembly.*

*Districts.*—There are 50 electoral districts for the Legislative Assembly, each represented by one member.

*Tenure of Seat.*—The members of the Assembly are elected for a period of 3 years.

*Qualification of a Member.*—Any person, 21 years of age, who has resided in the State for 12 months, is not subject to any legal incapacity, is a natural-born subject of the King, or naturalised for 5 years, and has resided in the State for 2 years.

*Qualifications of Electors.*—Subject to certain qualifications every person not under twenty-one years of age, who—

- (a) is a natural born or naturalised subject of His Majesty; and
- (b) has resided in Western Australia for six months continuously; and
- (c) has resided in the district for which he claims to be enrolled for a continuous period of one month immediately preceding the date of his claim,

is entitled to be enrolled as an elector, and when enrolled, and so long as he continues to reside in the district for which he is enrolled, to vote at the election of a member of the Legislative Assembly for that district. No person can be a registered voter in more than one electorate.

The claiming of enrolment is compulsory.

The Governor is advised by the following responsible Ministers, who form the Cabinet:—The Premier and Treasurer; the Minister for Lands, Immigration and Health; the Attorney General; the Minister for Railways, Mines, Police, Forests and Industry; the Minister for Public Works and Labour; the Chief Secretary and Minister for Education; the Minister for Country Water Supplies and Trading Concerns and the Minister for Agriculture.

Western Australia is represented in the Federal Senate of Australia by six members, and in the House of Representatives by five members.

### *Local Government.*

*Municipalities.*—There are 21 Municipalities in the State, which function under the Municipal Corporations Act, 1906, and its amendments.

Municipal Councils are allowed to levy general rates, not exceeding 2s. 6d. in the £, and a lighting rate not exceeding 6d. in the £ upon the Annual value, and may levy a loan rate sufficient to pay interests and sinking fund on money borrowed for specific purposes.

All license fees, tolls and dues, etc., under the Municipal Corporations Act, 1906, are appropriated by the Council of the Municipality.

License fees for vehicles under the Traffic Act, 1919-30, are collected by Municipalities, except those within the Metropolitan Area, where the Commissioner of Police collects them and are paid into a Traffic Trust Account which is distributed to these Councils within that area by the Minister for Works, in order to obtain a more proportioned allocation.

The Municipal Councils in towns where the population does not exceed 1,000 consists of a Mayor and six Councillors: where the population is between 1,000 and 5,000, of a Mayor and nine Councillors: where the population exceeds 5,000, a Mayor and 12 Councillors—the Mayor being elected annually by the ratepayers, by whom also the Councillors are elected for a term of three years.

*Road Boards.*—The number of Road Boards in the State is 126, which administer the Road Districts Act, 1919.

Road Boards may levy rates of not less than 1d. in the £, and not more than 3d. (except with the consent of the Minister to meet special cases, when a rate up to 6d. in the £ may be levied), on the unimproved Capital value of land and on the annual value a rate of 9d. up to 2s. in the £.

Boards may also strike a loan rate to pay interest and sinking fund on money borrowed for specific purposes.

Representation on a Road Board consists of not less than 5, or more than 13 members, including a Chairman, who is elected by the members at the first meeting of the Board.

All Licence Fees, fines, etc., under the Road Districts Act and Dog Act are appropriated by the Board, and included in its Local Revenue.

Vehicle Licence fees under the Traffic Act 1919-30, are, as in the case of Municipalities, collected by Road Boards, with the exception of those Districts within the Metropolitan Area, when the Commissioner of Police collects the fees, which are paid into the Traffic Trust Account, to be distributed by the Minister for Works, among the Boards in that area.

Both Municipalities and Road Districts are invariably created Health Authorities and Road Boards are generally created Vermin Boards and levy rates and carry out the functions provided in the respective Health and Vermin Acts.

Both Authorities (Road Boards and Municipalities), are entrusted with powers under the Electric Light Act and in addition thereto can undertake W.S., Gas and other trading concerns under their respective Acts.

#### *Population and Chief Towns.*

The total population of the State at the census of 4th April, 1921, was ascertained to be 322,732, and on the 30th June, 1931, was estimated at 420,612, excluding the aboriginal natives. The number of Chinese at the 1921 census was 1,327, of whom 1,280 were males and only 47 females. In addition to these there were 67 male and 52 female half-caste Chinese.

The chief town is Perth (population, including Fremantle and the various suburbs within the Metropolitan Area, estimated to be, at 31/12/30, 204,780). The capital is picturesquely situated on the right bank of the Swan River estuary. The King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, is one of unique natural beauty. The chief ports are:—Fremantle (33,535), Albany (3,980), Bunbury (5,100), Geraldton (4,627), and Broome, with a considerable floating population of pearlers, mostly Asiatics. The chief centre of the agricultural districts is Northam (4,975), and of the goldfields areas Kalgoorlie (including Boulder), with a population of 11,105.

#### *Crown Lands.*

Of the total area of the State, 36,208,804 acres only were, on the 30th June, 1931, alienated or in process of alienation, while 216,627,175 acres were leased, viz., 214,403,147 for pastoral, and the balance for other purposes. No less than 371,752,785 acres were still unoccupied, and in great part unexplored. At present, the whole of the coast line, a length of 4,360 miles, not including minor features, from Eucla in the south to Cambridge Gulf in the north, may be said to be more or less settled, for a distance inland varying from one hundred to, in some places, five hundred miles, though a considerable portion of the land taken up, especially in the Kimberley, Eucla, and interior goldfields districts, has not yet been stocked or occupied.

North of Champion Bay large tracts of rural lands are only held on lease from the Crown for pastoral purposes. The south-west corner of the State, however, where the older settlements are situated, is destined to become one of the world's greatest wheat producing areas, and agriculture here is progressing at an almost phenomenal rate. The wheat harvest having increased from 2,450,823 bushels in 1909, to 52,891,492 bushels

in 1931. As a rule, a sufficient rainfall can be relied upon. The areas under farms and cultivation are constantly and rapidly extending. The total area of land under cultivation on 28th February, 1931, was 14,407,244 acres, viz., under crop 4,794,500 acres, under permanent artificially sown grasses 336,376 acres, new ground cleared during the season and prepared for next season's crops 481,490 acres, land in fallow 2,821,639 acres, area of other cleared land, previously cropped, now used for grazing or lying idle 4,101,414 acres, ring-barked or partially cleared land 1,871,825 acres; beyond this, the traveller's way still lies for the most part through Savannahs or forests, varied by open sand plains covered in the season with shrubs and flowering plants in infinite variety and beauty. Western Australia is famed for its "bush flowers." The flora is the most highly specialised in the world, four-fifths of the plants being endemic.

The Agricultural Bank, established under the "Agricultural Bank Act, 1894," had, to 30th June, 1931, advanced a total amount of 8,754,616*l*. The Industries Assistance Board, established in 1915, had, to 31st March, 1931, advanced to assisted settlers a total amount of 13,037,292*l*. Under the Government scheme for Soldier Settlement, advances made to 30th June, 1931, amounted to 6,258,730*l*. Up to the same date, 5,213 returned soldiers had been assisted.

#### *Industry.*

One of the principal industries, as in the case of the other Australian States, is wool-growing. Sheep (of which in 1930 there were 9,874,970) are depastured in all parts of the State. The export of wool in the year ended 30th June, 1931, was 70,783,133 lbs. valued at 2,386,538*l*. A considerable quantity of wine is made, over three hundred thousand gallons annually. To show the advance of the wheat (and flour) industry it may be pointed out that in 1907 the export of wheat was valued at 96,675*l*, that of flour at 34,565*l*. In 1910 the figures were respectively 406,326*l*. and 25,427*l*, and for the year ended 30th June, 1916, 1,023,362*l*. and 214,166*l*. The figures for 1931 were 5,288,252*l*. and 635,618*l*. Another progressive industry is fruit-growing, especially apples, which latter are already exported in considerable quantities. The export of fruit rose in value from 925*l*. in 1907 to 32,274*l*. in 1913, whilst the figures for the three years ended 30th June, 1929, 1930 and 1931, were 533,354*l*., 156,194*l*. and 302,085*l*.

The principal forest areas lie between south latitude 31° and 35°. Western Australian Jarrah is well known throughout the world for its extraordinary durability, and is in great demand for paving, railway sleepers, piles for bridges, harbour works, etc., and is being used in increasing quantities for the manufacture of furniture and office fittings. There is a large and increasing export of this and other timbers, and the forests are worked by companies enjoying concessions from the Government, and also by the State itself. The export of timber for the years ended 30th June, 1929, 1930 and 1931, were respectively 960,435*l*., 807,427*l*. and 503,696*l*. Sandal-wood is still abundant, and was exported to Asiatic countries to the value of 225,208*l*. in 1928-29, 22,223*l*. in 1929-30 and 43,790*l*. in 1930-31.

At Broome and on the north-west coast generally, during the year ended 30th June, 1930, a fleet of 130 schooners, cutters, and luggers were employed on the pearling banks,

giving occupation to 54 white, 24 aboriginal, and 824 Asiatic pearlers. The export of pearls and shell amounted to 174,743*l.* in 1930-31.

For a long period lead and copper mines were held and worked in the neighbourhood of Champion Bay, but of late years little continuous work has been done in them. Copper, however, has since been found also in several other districts, notably those of Mt. Morgans, Phillips River, and West Pilbara.

The other mineral resources of Western Australia were almost unknown, and quite undeveloped until three decades since. Gold was found in considerable quantity in the Kimberley goldfield in 1887, and this attracted a large number of experienced miners to Western Australia. The result was the discovery of gold in great quantities elsewhere.

After the discovery and opening up of the Central and Eastern Goldfields of Western Australia, gold-mining became for the time being the principal industry of the State, and so rapidly did the annual output of gold increase for a number of years, that it placed Western Australia at the head of the gold-producing States of Australia—a position it still occupies, producing 89 per cent of the total gold output during 1930.

The value of gold produced up to the end of December, 1930, exclusive of premiums, was 162,704,164*l.* During 1930, the value of the gold production was 1,768,626*l.*

There is good coal in the south-west corner of the State, and evidence of its existence in the vicinity of Champion Bay and the Irwin river. Coal is also said to exist in the Kimberley district. On the Collie Coalfield, situated in the Wellington district, several companies are successfully working coal-leases. The output in 1930-31 was 472,275 tons.

At the end of 1888 large deposits of stream tin were discovered at Greenbushes, on the Blackwood river. Considerable quantities of tin have also been raised at Marble Bar.

Silver is found, mostly together with other minerals, and extracted in conjunction with gold. Other minerals found are antimony, gadolinite, bismuth, tantalite, lead, arsenical ore, asbestos, copper, mica, wolfram and scheelite, zinc, graphite and magnesite, molybdenite, gypsum, manganese, pyritic ore, also limestone and ironstone.

#### *Currency and Banking.*

The legal tender and usual currency is exclusively British sterling.

The following banks have establishments in the State: The National Bank of Australasia, Limited, Union Bank of Australia, Limited, Bank of New South Wales, the Commercial Bank of Australia, Limited, the Bank of Australasia, the Commonwealth Bank of Australia, the English, Scottish and Australian Bank, Limited, the Bank of Adelaide, the Primary Producers Bank of Australia, Limited, and the Australian Bank of Commerce, Limited.

The deposits in the banks during the quarter ended 30th June, 1931, averaged 12,766,900*l.*

The Commonwealth Bank of Australia commenced business in Western Australia on 20th January, 1913. The average deposits for the quarter ended 30th June, 1931 (included above), amounted to 1,997,726*l.*, excluding Commonwealth Savings Bank Deposits.

The State Government Savings Bank at Perth, with branch offices, was established in 1863; the deposits during the year ended 30th June, 1931,

amounted to 7,184,793*l.*, exclusive of amounts deposited in the Schools Savings Bank, viz., 32,875*l.*

Branches of the Commonwealth Savings Bank were opened in this State at the beginning of 1913, and the deposits during the year ended 30th June, 1931, amounted to 2,451,229*l.*

A branch of the Royal Mint exists in Perth. The number of sovereigns minted during the year ended 30th June, 1931, was 1,927,357. The total value of sovereigns and half-sovereigns minted since the foundation in June, 1899, was, on 30th June, 1931, 106,388,874*l.*

#### *Education.*

Government Primary Schools exist in all parts of the State, and are under the control of the Minister for Education. The whole cost of the schools is borne by the Government, and the staffs are appointed by the Education Department.

Attendance at school is compulsory for all children between the ages of six and fourteen, and only in cases of poverty or sickness on the part of the parents is exemption granted to children between the ages of twelve and fourteen. General religious teaching, exclusive of dogmatic or polemic theology, is included in the course of instruction given, whilst representatives of various denominations are admitted to give instruction during school hours to the children of adherents.

The number of Government Primary Schools open in 1930 was 864. The average enrolment for the year was 55,196, and the average attendance 50,192.

Where an average attendance of eight children cannot be maintained, the Department pays an annual grant (from 12*l.* to 13*l.* 10*s.*) for each child if the parents secure a suitable teacher and provide her with suitable accommodation.

Children in isolated localities are taught by correspondence.

Children who complete satisfactorily the primary course may pass to a District High School for a five years' Secondary Course, or to the upper classes of a Central School for a two or three years' course.

Four courses—General (including Commercial), Professional, Industrial, and Domestic—are provided in the classes at the Central Schools.

The five years' course in the Government High Schools is divided into two sections. The work of the lower section is, with very few exceptions, common to all students. In the upper section there is a considerable amount of specialisation.

Manual training in woodwork is included in the course of all the larger Primary Schools. In the Central Schools and High Schools metalwork is also taken.

Domestic work—Cookery, Laundry and Housewifery—is included in the course of all the larger Primary Schools, and also in the course of the Central Schools and High Schools.

Technical Schools are established in the principal centres. They include advanced work in Science, Trades Classes, Commercial Classes, Art Classes, Domestic Classes, etc. There is also a School of Mines at Kalgoorlie.

A School of Agriculture and an Agricultural College, leading up to a Diploma in Agriculture, are provided.

The University in Perth provides courses for Degrees in Arts, Science (including Agriculture), and Engineering.

Scholarships are provided by the Government to enable pupils from the Primary Schools to pass

to the Secondary Schools. Thirteen exhibitions are offered each year for the University.

A number of scholarships is offered each year to enable children from country schools to attend District High Schools or the Narrogin School of Agriculture.

Scholarships for children of fallen or disabled soldiers are also offered. They are tenable at Secondary Schools, District High Schools, Narrogin School of Agriculture, Technical Schools, School of Mines, and the University.

Private Schools are open to Government inspection, and must be declared efficient. The Government Secondary School Scholarships may be held at non-Government Secondary Schools.

The total Government expenditure upon education during 1929-30 (apart from the University and the cost of buildings) was 692,672. The amount expended on buildings for the Education Department was 65,440. There was also a grant of 33,933. to the University. Other Educational expenditure amounted to 22,784. The aggregate expenditure upon Education was therefore 814,829.

#### Means of Communication.

Division.	Main Line. Miles.
1. EASTERN RAILWAY— Fremantle to Perth and Northam, including Belmont, Karragullen, Mundaring Weir, and Miling Branches, and Mahogany Creek Deviation ... ..	219
2. SOUTH WESTERN RAILWAY— From East Perth Junction Southward to Bunbury and Jardee, including Canning and Bunbury Race-course lines, Armadale-Fremantle, Pinjarra-Narrogin, Railway Mill Dwellingup, Brunswick-Narrogin, Bowelling-Wagin, Boyanup-Busselton-Flinders Bay, Wonnerup-Nannup, Donnybrook-Katanning and Jardee-Pemberton lines ... ..	795
3. GREAT SOUTHERN RAILWAY— Spencer's Brook to Albany, including York-Bruce Rock-Merredin, Brookton-Corrigin, Narrogin-Bruce Rock, Yilliminning-Merredin, Wagin-Newdegate, Katanning-Pingrup, Tambellup-Ongerup and Elleker-Hay-Nornalup lines ... ..	1,015
4. EASTERN GOLDFIELDS RAILWAY— From Northam Eastward to Southern Cross, Coolgardie, Kalgoorlie; north to Laverton and south to Norseman and Esperance ... ..	792
5. EAST NORTHAM-MULEWA RAILWAY— Including the Goomalling-Merredin Railway and Wyalkatchem-Lake Brown-Southern Cross, and Amery Northward Branches ... ..	669
6. NORTHERN RAILWAY— Geraldton to Meekatharra, including Narngulu-Walkaway, Mt. Magnet-Sandstone, Geraldton-Ajana, and Wokarina-Yuna lines ... ..	542
7. HOPETOUN-RAVENSTHORPE RAILWAY—	34
8. PORT HEDLAND-MARBLEBAR RAILWAY—	114
Total ... ..	4,180

These lines have numerous sidings, totalling in all 431 miles.

On the 1st July, 1913, the Government took over the Perth Electric Tramways which now have a total length of 41 miles of lines laid.

There are 277 miles of private railway open for general and passenger traffic, also several other private railway lines, mostly constructed by timber companies in the south of the State, total some 600 miles.

Since 1917 the Transcontinental Railway (4ft. 8½ in. gauge) from Kalgoorlie to Port Augusta, unites the railway systems of Western and South Australia, a distance of 1,051 miles.

The earnings of the Government railways for the year ended June, 1931, were 3,198,913½, and the working expenses 2,610,839½. The total cost of construction has been 24,083,950½.

Of electric telegraph on the 30th June, 1930, there were 15,897 miles of wire. During 1929-30 the revenue received by the telegraph branch was 134,766½; telephone receipts amounted to 350,385½, and postal and other revenue of the post and telegraph department to 423,842½; expenditure on posts, telegraphs and telephones, for year ended 30th June, 1930, was 920,429½. There is telegraphic communication with Europe, *via* South Australia, also with South Africa by Cocos Island. Postal arrangements embrace the whole of the settled portion of the State, both by inland services and by steamers on the coast. There are 140,863 miles of telephone wire in the State; further there are 9,072 miles of railway telephone circuits and 1,748 miles of telegraph, comprising a total length of 10,820 miles; in addition, about 600 miles of private railway telephone wire.

A high-power wireless station has been erected at Applecross, between Perth and Fremantle, by the Commonwealth Government. Stations of lower power have been erected at Esperance, Geraldton, Broome and Wyndham.

The steamers of the P. and O. and Orient Companies carry mails to and from the United Kingdom and Europe, whilst the Blue Funnel, P. & O. branch, line, etc., of steamers conveys those from and to South Africa. Mails are despatched to and received from Australian States, New Zealand, and Polynesia, by the Trans-Australian Railway. Local steamers supply coastal communication. Letters from England reach Perth in about 26 days *via* France.

The federal postal statistics for the year ended 30th June, 1930, give the following as the number (each counted once) of letters, postcards, etc., received and despatched in this State:—

	Within Common- wealth.	Beyond Common- wealth.
Letters, Post Cards and Letter Cards . . . . .	42,375,000	6,439,400
Newspapers . . . . .	6,683,800	2,708,000
Packets . . . . .	10,195,400	1,308,300
Parcels . . . . .	865,890	60,700
Registered Articles . . . . .	541,220	102,902

Fremantle is a modern port equipped with all up-to-date appliances necessary to give rapid despatch to shipping. It is the first and last port of call in Australia for all mail and other liners using the Suez route and for many on the Cape route. All ships up to 35 feet draft can berth day or night at dead low water. It is an important fueling port for coal or oil and all other provisions are available and all repairs can be effected.

The cargo handling equipment is the best in Australia. For the year ending 30th June, 1931, the number of vessels which used the port was

720 of an aggregate gross tonnage of 5,726,277 tons. The largest vessel to berth at the wharves to date was H.M. Battleship "Hood" in February 1924.

The tonnage of cargo, including live stock, handled during the year ending 30th June, 1931, was 1,605,392.

#### Aborigines Department.

It was estimated that the aboriginal population of the State on 30th June, 1931, was, including half-castes, 26,707, 16,707 of whom are in touch with civilization and the remainder in those portions of the State as yet uninhabited by the white man.

The Aborigines are still assisting, to no small extent, in the development of the Northern portion of the State, and, had it not been for their assistance in the past, this work would not have proceeded so satisfactorily as it has done.

Approximately 4,202 aborigines are engaged throughout as stock-boys, shepherds, station-hands, domestic servants, etc., all of whom are engaged under permit in accordance with the provisions of "The Aborigines Act, 1905."

Generally speaking the Aborigines are not hostile, though they at times become somewhat troublesome owing to their predilection for cattle killing. Some years ago, cattle killing by natives was very prevalent, and the State spent a considerable amount of money in apprehending offenders and maintaining them in prison while undergoing sentence. To minimise these depredations amongst settlers' stock, the Government has established three Cattle Stations in the Kimberleys in order to breed cattle with which to supply the natives with meat and so prevent them from killing cattle belonging to pastoralists. The scheme has proved most successful.

Other Settlements have been established both in the North and in the South, while some nearly 70 Rationing Stations are controlled by the Aborigines Department. One large Settlement has been established for some years on the Moore River, about 80 miles north of Perth, especially for aged and indigent natives and children requiring the care of the Department. The male adults who are capable of working are employed on farm and garden work, and the women assist with domestic duties. The children are schooled and trained in various ways. The establishment includes a sewing room, in which the girls and young women are taught to sew and manufacture garments for natives throughout the state. In addition there are nine Mission Stations, six in the north and three in the south. Six of these Missions are subsidised by the State.

There are 100 Protectors of Aborigines, including two women, scattered throughout the State. These Officers assist in the administration of "The Aborigines Act," and generally look after the welfare of the natives.

The total expenditure of the Aborigines Department for the year ended 30th June, 1931, was 28,215*l*.

The policy of the Department is in the direction of inducing the natives to support themselves by their own labors, and it is hoped that all Native Stations will eventually become entirely self-supporting.

Approximately, 13,853*l*. was spent during the year mentioned in direct relief in the shape of clothing and medical attendance, while a considerable sum was spent upon buildings and improvements at Stations.

#### Climate.

The climate of Western Australia, though hot towards the north, is one of the finest and healthiest in the world. The average death-rate during 1930, was 9.02 per 1,000. The average rainfall at Perth is 34.70 inches (for 55 years), and the mean temperature is 63.1°. The rainy season extends from May to October.

#### Governors of Western Australia.†

Sir W. C. F. Robinson, G.C.M.G., 20th Oct., 1890. Alexander Campbell Onslow, Administrator, 21st Sept., 1891.

Sir W. C. F. Robinson, G.C.M.G., Gov., 9th July, 1892.

Sir Alexander Campbell Onslow, Kt., Administrator, 18th Mar., 1895.

Sir Gerard Smith, K.C.M.G., Gov., 23rd Dec., 1895.

Sir Alexander Campbell Onslow, Kt., Administrator, 23rd Mar., 1900.

Edward Albert Stone, Administrator, 4th Mar., 1901.

The Hon. Sir Arthur Lawley, K.C.M.G., Gov., 1st May, 1901.

Sir Edward Albert Stone, Kt., Administrator, 14th Aug., 1902.

Admiral Sir Fredk. G. D. Bedford, G.C.B., 24th March, 1903.

Sir Gerald Strickland, Count della Catena, K.C.M.G., 31st May, 1909.

Major-General Sir H. Barron, K.C.M.G., C.V.O., 17th March, 1913.

Rt. Hon. Sir William Grey Ellison-Macartney, P.C., K.C.M.G., 9th April, 1917.

Sir Francis Alexander Newdegate, K.C.M.G., 9th April, 1920.

Sir Robert Furse McMillan, Kt., Lieutenant-Governor, 7th June, 1921.

Sir Francis Alexander Newdegate, K.C.M.G., 14th December, 1922.

Sir Robert Furse McMillan, Kt., Lieutenant-Governor, 17th June, 1924.

Col. Sir William R. Campion, K.C.M.G., D.S.O., 12th July, 1924.

DEPARTMENT OF MINISTER FOR MINES.

*Minister for Mines, also Minister for Railways  
 and Forests,* Hon. J. Scaddan, 1,500l.  
*Under-Secretary for Mines,* M. J. Calanchini,  
 865l.

*Principal Registrar*, A. H. Telfer, 365*l*.  
*State Mining Engineer*, Supt. of State Batteries  
 and *Chief Inspector of Machinery*, A. M. Howe,  
 865*l*.  
*Asst. State Mining Engineer*, R. C. Wilson, 725*l*.  
*Inspector of Plans and Surveys*,  
*Chief Draftsman*, S. E. C. Underwood, 430*l*.  
*Wardens*, C. Joyce (acting), W. O. Mansbridge,  
 J. E. Geary, E. Y. Butler, L. L. Crockett, A. P.  
 Davis (acting).  
*Inspectors of Mines*, W. Phoenix, 475*l*, H. P.  
 Rockett, A. W. Winzar, E. J. Gourley, J.  
 McVee, 455*l*.  
*Principal, Mining School*, B. H. Moore, 672*l*.

#### Chemical Branch.

*Government Mineralogist and Analyst*, E. S. Simpson,  
 920*l*.

#### Geological Survey.

*Government Geologist*, T. Blachford, 810*l*.

#### DEPARTMENT OF THE MINISTER FOR FORESTS.

*Minister for Forests* (also *Minister for Railways*,  
 Mines, etc.), Hon. J. Scaddan, C.M.G., M.L.A.  
*Conservator of Forests*, S. L. Kessell, M.Sc. (Adel.),  
 Dip. For. (Oxon.), 1,080*l*. p.a.  
*Senior Assistant Conservator and Working Plans*  
*Officer*, T. N. Stoste, B.Sc. (Adel.), 725*l*. p.a.  
*Assistant Conservator*, A. C. Shedley, B.Sc., Dip. For.  
 (Adel.), 725*l*. p.a.  
*Divisional Forest Officers*, G. E. E. Brockway, B.Sc.  
 (Adel.), 455*l*. p.a.; W. Lockhart, B.Sc. (Aberd.),  
 390*l*. p.a.; B. H. Bednall, B.Sc. (Adel.), 430*l*. p.a.;  
 D. R. Moore, B.Sc. (Adel.), 430*l*. p.a.; A. C. Harris,  
 B.Sc. (Adel.), 430*l*. p.a.; G. W. M. Nunn, Dip. For.  
 (Canb.), 430*l*. p.a.  
*Officer in Charge, Seasoning Investigations*, F. Gregson,  
 B.E. (Perth), 345*l*. p.a.

#### DEPARTMENT OF MINISTER FOR RAILWAYS.

*Minister for Railways and Tramways* (also *Minister*  
*for Mines*), Hon. J. Scaddan, C.M.G., M.L.A.,  
 1,500*l*.

#### Government Railways.

*Commissioner*, E. A. Evans, M.I.M.E., M.Inst.T.,  
 2,000*l*.  
*Secretary and Assistant to Commissioner*, J. F.  
 Tomlinson, 1,080*l*.  
*Chief Traffic Manager*, C. S. Gallagher, 1,200*l*.  
*Chief Engineer Way and Works*, H. A. Cresswell,  
 M.I.C.E., 1,200*l*.  
*Chief Mechanical Engineer*, J. W. R. Broadfoot,  
 1,020*l*.  
*Comptroller of Accounts and Audit*, W. H. C. Brom-  
 field, M.Inst.T., 900*l*.  
*Comptroller of Stores*, C. S. Holm, 900*l*.

#### Government Tramways.

*General Manager, Tramways, Electricity Supply and*  
*Ferries*, W. H. Taylor, M.I.E.E., 1,200*l*.  
*Electrical Engineer*, R. H. G. Clark, 760*l*.  
*Traffic Superintendent*, E. E. Shillington, 640*l*.  
*Permanent Way Engineer*, A. N. Davies, 550*l*.

#### DEPARTMENT OF ATTORNEY-GENERAL.

*Attorney General*, Hon. Thomas Arthur Lewis Davy,  
 M.L.A.

#### Crown Law Officers.

*Under-Secretary for Law*, H. G. Hampton, J.P.,  
 980*l*.  
*Crown Solicitor and Senior Parliamentary Draftsman*,  
 J. L. Walker, 1,200*l*.  
*Assistant Crown Solicitor and Parliamentary Drafts-*  
*man*, A. A. Wolff, 852*l*.

*Crown Prosecutor*, C. B. Gibson, 708*l*.  
*Clerk-in-Charge, Civil Business*, W. H. Nairn, 552*l*.  
*Accountant*, J. Simpson, 504*l*.  
*Conveyancing Clerk*, J. G. Wilcox, 432*l*.

#### Supreme Court.

*Acting Chief Justice*, J. A. Northmore.  
*Puisne Judges*, T. P. Draper, C.B.E., J. P. Dwyer,  
 2,000*l*. each.  
*Registrar and Master of Supreme Court, etc.*, T. F.  
 Davies, 900*l*.  
*Deputy Registrar and Taxing Officer*, E. E. Fewings,  
 600*l*.  
*Sheriff*, T. F. Davies.  
*Official Trustee and Curator of Intestates' Estates*,  
 A. A. Moffat, 600*l*.

#### Land Titles Department.

*Commissioner and Registrar of Titles, Registrar of*  
*Deeds and Parliamentary Draftsman*, F. L. Stow,  
 900*l*.  
*Assistant Registrar of Titles and Deeds*, A. G. Harvey,

#### Electoral Department.

*Chief Electoral Officer*, H. R. Gordon, J.P., 576*l*.

#### Stipendiary Magistrates.

G. T. Wood, 900*l*; H. J. Graig, 80*l*; A. E. Burt,  
 756*l*; L. L. Crockett, 756*l*; H. D. Moseley, 752*l*;  
 E. McGinn, 672*l*; F. M. I. Read, 708*l*; C. Joyce,  
 400*l*; J. Kenny, F. W. Cotton; W. T. Hodge;  
 V. H. Webster, 450*l*; W. P. Davis; A. B. Kidson  
 (acting), 700*l*; F. F. Horgan (acting), 672*l*; J. E.  
 Geary, 756*l*; E. Y. Butler, 708*l*; W. O. Mans-  
 bridge, 708*l*; T. Y. A. Lang, 708*l*; C. H. Nicholson  
 (acting), 125*l*.

#### Chairman of Courts of Session.

L. L. Crockett.	C. Joyce.
A. E. Burt.	T. Y. A. Lang.
E. McGinn.	J. E. Geary.
V. H. Webster.	E. Y. Butler.
F. W. Cotton.	W. O. Mansbridge.
W. T. Hodge.	J. Kenny (acting).
W. P. Davis.	

(The salaries shown above are subject to statutory  
 reduction temporarily.)

#### DEPARTMENT OF MINISTER FOR EDUCATION.

*Chief Secretary and Minister for Education*, Hon. N.  
 Keenan, K.C., 1,500*l*.  
*Director of Education*, Wallace Clubb, B.A., 970*l*.  
*Secretary*, J. L. S. Miller, 570*l*.  
*Chief Inspector of Schools*, J. A. Klein, M.A., 765*l*.  
*Senior Inspectors of Schools*, J. A. Miles, B.A., 680*l*.:  
 C. Hadley, B.A., 680*l*; W. C. S. McIntock, B.A.,  
 680*l*.  
*Inspectors of Schools*, H. Thomas; E. A. Coleman,  
 B.A.; J. A. Hatfield; J. Blair; T. Edmondson.  
 B.A.; W. Rockliff; V. Box, B.A., and W. G.  
 Warner, B.A., 635*l*. each.  
*Principal of Teachers' College*, R. G. Cameron, M.A.,  
 900*l*.  
*Superintendent of Technical Education*, J. F. Lynch,  
 680*l*.  
*Organiser and Inspector of Manual Training*, J. Hart  
 (F. Coll.H.), 640*l*.  
*Organiser and Inspector of Household Management*,  
 Miss M. Wylie, 480*l*.  
*Superintendent of Music*, O. Egan, 580*l*.  
*Advisory Teacher in Agricultural and Manual Work*  
*for Rural Schools*, A. Rogers, 480*l*.  
*Instructor of Drawing*, R. Hetherington, A.T.C.,  
 F.R.S.A., 500*l*.  
*Inspector of Needlework*, Miss E. Sheath, 345*l*.

\*University pays £150.

*Head Master of Perth Modern School, J. Parsons, M.A., 760l.*  
*Head Master Goldfields High School, Kalgoorlie, A. Irvine, B.A., 640l.*  
*Head Master Northam High School, T. N. Lee, M.A., B.Sc., 590l. and 50l.*  
*Head Master Bunbury High School, F. Sherlock, B.A., 640l.*  
*Head Master Albany High School, F. M. Reedy, B.A., 590l.*

**PUBLIC WORKS, LABOUR TRADING CONCERNS, WATER SUPPLY AND DRAINAGE DEPARTMENT.**

*Minister for Public Works Labour, and Metropolitan Water Supply, etc., Hon. J. Lindsay, M.L.A.*  
*Minister for Goldfields and Agricultural Water Supply, etc., Hon. C. F. Baxter, M.L.C.*

**Administrative Division.**

*Under-Secretary, C. A. Munt, J.P., 920l.*  
*Asst. Under-Secretary (excl. of Labour), vacant.*  
*Asst. Under-Secretary Labour, W. S. H. Andrew, 520l.*  
*Accountant, F. H. Young, 540l.*  
*Chief Correspondence Clerk, H. D. Poole, 345l.*  
*Officer in Charge Land Resumption, T. S. J. Hall, 540l.*  
*Officer in Charge Local Government, A. E. Sanderson, 475l.*

**Branch Offices.**

*Northam Managing Clerk, H. W. Sergeant, 390l.*  
*Kalgoorlie Managing Clerk, J. C. Hutchinson, 390l.*

**Engineering Division.**

*Director of Works and Buildings and Commissioner of Main Roads, E. Tindale, 1,500l.*  
*Hydraulic Engineer and Engineer for Agricultural Water Supplies, B. S. Crimp, 865l.*  
*Engineer for Harbour and Rivers, J. S. Young, 865l.*  
*Engineer for Goldfields Water Supply, W. K. Weller, 725l.*  
*Engineer for North West, G. D. Brockman, 680l.*  
*Superintendent of Machinery, W. H. J. Lewis, 540l.*  
*Assistant Engineers, R. W. Edwards, 540l.; J. J. Cadden, 540l.; C. P. Morgan, 540l.; R. J. Dumas, 540l.; H. Bregenzner, 540l.; N. Fernie, 540l.; A. M. Hutchinson, 540l.*  
*Assistant Engineer (Mechanical), H. Bennett, 605l.*  
*Assistant Engineer in Charge Drawing Office, E. C. B. Bone, 606l.*

**Architectural Division.**

*Principal Architect, A. E. Clare, 725l.*  
*Senior District Architect, C. H. Trigg, 500l.*  
*Architect in Charge Drawing Office (vacant).*

**Trading Concerns.**

*Manager State Implement and Engineering Works, F. E. Shaw, 1,000l.*  
*General Manager State Saw Mills, E. B. Sinclair, 900l.*  
*Assistant Manager State Saw Mills, S. D. Gomme, 606l.*  
*General Manager State Hotels, J. R. Campbell, 725l.*

**Factories and Shops.**

*Chief Inspector of Factories, A. C. Bradshaw, 676l.*

**METROPOLITAN WATER SUPPLY, SEWERAGE AND DRAINAGE DEPARTMENT.**

*Minister of Water Supply, Sewerage and Drainage, Hon. James Lindsay, 1,500l.*

**Administrative Division.**

*Under Secretary, G. C. Haywood, J.P., 810l.*

**Accounts Division.**

*Accountant and Assessor, G. H. Long, 540l.*

**Engineering Division.**

*Engineer, Metropolitan Water Supply, John Parr, B.S., A.M.I.C.E., 865l.*  
*Principal Assistant, R. J. Cavanagh, 635l.*  
*Mechanical Engineer, C. H. Hickson, 520l.*  
*Assistant Engineers: E. H. Oldham, 520l.; F. M. Kenworthy, 455l.; F. L. W. Morison, 455l.; P. H. Wright, 365l.*

Officer Commanding R.A.A., Major C. A. Kelly, 6801.

Officer Commanding R.A.E., Capt. W. F. Routley, 4461.

Director of Works, W.-Officer H. C. R. Korner, 4171.

District Finance Officer, W. F. Spence, 5581.

Chief Ordnance Officer, J. H. Beavin, 5221.

Chief Clerk, A. J. Bollard, 4501.

## THE NORTHERN TERRITORY.

### *Area and Population.*

The first attempt at settlement in North Australia was made in 1824.

Upon the extension of New South Wales westward to the 129th meridian in 1827, the portion of North Australia subsequently known as the Northern Territory was included within that colony, and in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911.

The total area of this Territory is 523,620 square miles, or 335,116,800 acres. Its length from

north to south is about 900 miles, while its breadth from east to west is 560 miles. Its eastern boundary, dividing it from Queensland, is the 138th meridian of east longitude; and its western boundary, separating it from Western Australia, the 129th meridian. Its southern boundary is the 26th parallel of south latitude, dividing it from South Australia. The northern boundary is the coast line of those parts of the Indian Ocean known as the Timor and Arafura Seas at about the 11th parallel of south latitude. The length of coast line is about 1,040 miles. The Territory includes a number of islands most of them being small and of little importance. The best known are Melville Island, Bathurst Island and Groote Island.

In 1881 there were 670 Europeans in the Territory, and at the Census of 4th April, 1921, there were 2,459. The Chinese population, at its maximum during the years of railway construction, 1887 and 1888, has gradually dwindled, the number recorded at the Census of 1921 being only 722. Japanese, first recorded in 1884, increased up to the year 1898, falling again after five years, the number at the Census of 1921 being 34. The highest recorded population, excluding aborigines, was 7,533 in 1888. The estimated population on 30th June, 1931, was, exclusive of full-blood aborigines, 4,174.

The interior of the Territory is the most thickly populated by the natives, but it is believed that they are dying out. In the regions remote from contact with other races the native has maintained his primitive simplicity, and furnishes an interesting subject of study to the anthropologist and the ethnologist. At the census of 1921, full-blood aborigines in the employ of whites, and those who were living in a civilised or a semi-civilised condition in the vicinity of European settlements, were enumerated—the males being 1,184, females 866; total 2,050. The estimated number of natives in the Northern Territory is about 20,000. There are, however, areas in the north-east and north-west, where it is difficult to obtain satisfactory information, and is quite possible that with fuller knowledge the estimate will need adjustment.

### *Historical.*

#### *Exploration and Colonisation.*

(i.) *Coastal Surveys.* The coast was surveyed by King in 1818, and by Wickham and Stokes in 1838 and 1839. Port Darwin, the site of Darwin, the present capital, was discovered in the latter year.

(ii.) *Exploration of Interior.* Leichhardt traversed a great deal of the country in 1844-5, journeying from Queensland to Port Keating. Gregory started from Point Pearce in 1855, and reached Brisbane. Minor explorations were also successfully undertaken.

(iii.) *Crossing the Continent.* In 1861, Stuart began his transcontinental journey from Adelaide, and reached the north coast in July, 1862. His track has become the main route, and along it the telegraph line is constructed.

(iv.) *Demarcation of Boundaries.* Upon the extension westwards of New South Wales, in 1827, the Territory was included in that colony, and remained so until 1863, when it was added to South Australia, which in 1836 had been created a separate province.

(v.) *The Military Settlement.* A military post was formed on Melville Island in 1824. This was

transferred in 1827 to Raffles Bay, and a few years later to Port Essington. Little public attention was given to the station, and no attempt at colonisation was made. It was abandoned in 1849.

#### *Control by South Australia.*

(i.) *Transfer.* As a result of representations to the Imperial Government by South Australia, the Territory was incorporated with that State in 1863, and administered through a Government Resident located at Port Darwin up to 31st December, 1910. Early attempts at settlement failed. Ultimately, Port Darwin was chosen for the site of the capital, and Palmerston (now officially named Darwin) founded.

(ii.) *Land Legislation.* The South Australian Government's land legislation was framed to attract settlers, viz., low rents with easy entry and unencumbered holding over long periods; or grant of fee simple at low price. Special arrangements were made to foster tropical agriculture, including the establishment of botanic gardens at Port Darwin, for observation and experiment. Large "runs" were established on the northern well grassed and watered pastures.

(iii.) *Mining.* The survey and construction of the overland telegraph revealed the auriferous nature of the country, and gold and other minerals were discovered in various localities. The Government regulated the area of claims and the conditions upon which they were held.

(iv.) *Cessation of Supervision by South Australia.* Progress was not as marked as was desired, the Territory being thought capable of more rapid development. Accordingly the Federal and State Governments agreed upon a surrender by the latter as from 1st January, 1911, since which date the Territory has been a dependency of the Commonwealth.

#### *Transfer to Commonwealth.*

(i.) *The Agreement.* An agreement of transfer, afterwards ratified by the representative Parliaments, was made between the two Governments. In accordance with a proclamation issued in the terms of the Commonwealth Acceptance Act (No. 20 of 1910), the transfer was effected on 1st January, 1911.

(ii.) *The Northern Territory Acceptance Act.* By the Commonwealth Act, the agreement was ratified and approved, and the Territory was accepted together with the Palmerston and Pine Creek Railway; laws and courts of justice remained in operation, powers and functions of magistrates and officials remained vested; estates and interests continued upon the same terms; trade with Australian States was declared free. The Commonwealth assumed responsibility for the State loans in respect of the Territory, paying the interest yearly to the State, providing a sinking fund to pay off the loans at maturity, and paying off the deficit in respect of the Territory. It also purchased the Port Augusta to Oodnadatta railway, and agreed to complete the construction of the trans-continental railway from Port Darwin to Port Augusta.

(iii.) *The South Australian Surrender Act.*—The State Act approved and ratified the agreement surrendering the Territory.

(iv.) *The Northern Territory (Administration) Act, 1910.*—The Act provided for Government officials. South Australian laws applicable

to the Territory at the date of the transfer were declared to continue in force as laws of the Territory and certain Commonwealth Acts to apply. Power was given to the Governor-General to make Ordinances having the force of law.

(v.) *Administration.*—A Resident Administrator, vested with authority in internal affairs, was appointed in the Department of the Minister for External Affairs in February, 1912.

#### *Division into North Australia and Central Australia.*

The *Northern Australia Act, 1926*, provided for the division of the Northern Territory for administrative purposes into North Australia and Central Australia, separated by the twentieth parallel of South latitude. This division took effect on the 1st March, 1927.

#### *Reversion to Northern Territory.*

The *Northern Australia Act, 1926*, was repealed by the *Northern Territory (Administration) Act, 1931*. As from the 12th June, 1931 the division of the Northern Territory into the separate Territories of North Australia and Central Australia was repealed.

Lt.-Col. R. H. Weddell who is the Administrator of the Northern Territory has his headquarters at Darwin. A deputy Administrator (Mr. V. G. Carrington) is stationed at Stuart in the Southern portion of the Territory.

Subject to any Ordinance made by the Governor-General under the Northern Territory (Administration) Act, 1910, the South Australian laws in force at the date of acceptance continue in force in the Northern Territory.

A Supreme Court with original and appellate jurisdiction has been established. A Sheriff, a Registrar-General, and a Health Officer are provided for, also the registration of births, marriages and deaths, and of deeds and documents. Custody and control of aborigines with extensive powers of supervision are vested in the Chief Protector. Provision is made for the control of fisheries and pearl fishing. Crown lands are classified, and their mode of acquisition, entry and holding defined. By the Crown Lands Ordinance 1931 a Land Board of 3 members is, under the control of the Minister for Home Affairs, charged with the general administration of Crown Lands in the Territory. The prevention and eradication of diseases in plants have been provided for. Under the Stock Diseases Ordinance the Chief Inspector of Stock has wide powers in regard to the movement of stock control and prevention of diseases, etc. A town council has been constituted for Darwin and provision made for assessment, rates, etc. Mining is encouraged by the provision of rewards for the invention of new processes, and the discovery of valuable deposits and of new mineral fields; subsidization of the industry and the issue of prospecting licences are also provided for. Provision has been made for the issue of licences to search for mineral oil, and leases of land for the working of the industry. A Board is constituted for the purpose of making advances to settlers, who intend to improve and stock their holdings, to purchase farm implements, plant, etc., or to pay off mortgages, the rate of interest and terms of repayment being set out. Provision has also been made for the compensation of injured workers, for controlling the sale, etc., of necessary commodities, for the appointment of a Public Trustee, and for the imposition, assessment and collection of a tax upon incomes.

*Parliamentary Representation.*

By an Act of Parliament passed in 1922, the Northern Territory elects a member of the House of Representatives. As this member represents a very small number of electors, he is not entitled to vote, but he may take part in any debate in the House.

*Physiography.*

**Tropical Nature of the Country.**—The territory is within the torrid zone, with the exception of a strip 2½ degrees wide, which lies south of the Tropic of Capricorn.

**Contour and Physical Characteristics.**—The low flat coast line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl, and ironstone form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets, and intersected by numerous rivers many of which are navigable for considerable distances from their estuaries.

Inland, the country is generally destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea, and those that form the scanty supply of the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

*Climate.*

On the northern coast, as in the tropics generally, there are two main climatic divisions—the wet season, November to April, and the dry season, May to October. The changes of season are uniform and regular. Immediately after the vernal equinox, the wet season is heralded by the cessation of the east-south-easterly monsoon, which gives place to calm and light variable winds. Intensely hot weather prevails for a few days, thunder-clouds gathering and increasing daily until they burst in heavy thunderstorms accompanied by hurricanes, and increasing in strength and frequency until the end of November, when they become of almost daily occurrence, about an inch of rain falling during each storm. During December the north-west monsoon sets in gradually, with rain nearly every day, and increasing in force until about the end of January. At this period of the year the wet season penetrates into the heart of the continent. This monsoon dies away at the autumnal equinox, and is succeeded by light and variable winds till the end of April, when the dry season commences with the setting in of the south-east monsoon. Nearly the whole of the rainfall occurs in the summer months.

*Fauna and Flora.*

**Native Animals.**—The ordinary types of Australian fauna inhabit the territory. As elsewhere on the continent, the higher *Theria* are rare. There are many genera of marsupials, and individuals are numerous. The birds also are typically Australian, with brilliant plumage, and not generally gifted with song. Crocodiles and fresh-water tortoises frequent the northern rivers. There are some species of snakes, mostly non-venomous, the most numerous being the harmless python. Frogs abound, the water-holding frog being common in Central Australia.

The rivers contain many varieties of freshwater fish. The molluscan fauna of the coast is mostly carnivorous, the vegetable feeders being very poorly represented, probably on account of the dearth of seaweed. Land and freshwater shellfish are not abundant. Among insects, many beautiful butterflies thrive in the warm damp atmosphere. Beetles also are strongly represented. The white ant is a pest, very few timbers being immune from its ravages. Anthills in the Territory sometimes attain a height of twenty-five feet and a diameter of ten feet. Another destructive insect, particularly active and mischievous inland, is the borer. Mosquitoes and sandflies are very troublesome, particularly from January to April. There are not many crustaceans.

**Imported Stock.**—Buffalo thrive in the coastal districts, but their numbers have been greatly reduced through indiscriminate shooting for the sake of the hides. Timor ponies have also been introduced. Sheep-breeding has so far not been a success, but cattle thrive well.

**Protection of Fauna.**—Ruthless destruction of native birds is prohibited. An Ordinance gives the Administrator power to declare that any bird is protected; and provides that permits to export protected birds, or the skins or eggs of such birds, will only be issued subject to such conditions as the Administrator directs.

**Flora.**—The vegetation is tropical, many of the forms belonging to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriantly to the water's edge. The indented arms of the coast are thickly fringed with the mangrove. On the ranges, pines, fig trees, and orange trees flourish. The Roper River drains extensive forest lands. Leichhardt pines and palms form the vegetation of the tableland, which stretches across the Territory about the 14th degree of south latitude. On the higher steppes there are a few varieties of eucalyptus, and many fibre plants are also indigenous. On the wide expanses of plain country of the interior, there is little vegetation, tree growth being very scanty, consisting chiefly of stunted eucalypts, such as the gimlet gum, black box, and desert sheoak. In the north-western districts there is an almost entire absence of lichens and mosses, though ferns are plentiful in the vicinity of the Victoria River. The following orders are well represented:—*Euphorbiaceae*, *Compositae*, *Convolvulaceae*, *Rubiaceae*, *Goodeniaceae*, *Leguminosae*, *Urticaceae*.

*Production.*

**Agriculture.**—Up to the present agriculture has not made much progress in the Territory, although it has been proved that various industrial plants thrive. Peanuts, rice, tobacco, coconuts, mangoes, cotton, and various fodder plants can be grown. Expense of harvesting at present appears to be against the economic production of rice. Trial plantations of tobacco and cotton have given promising results. Good crops of peanuts are being obtained. Much of the coastal area is suitable for coconuts, but except at the Mission Stations and one or two small isolated plantations, little attention has been devoted to planting.

**Pastoral.**—The spacious, well-grassed "runs" of the Northern Territory are suitable for horse and cattle breeding. It is anticipated that the cattle trade with the East will develop. Large numbers are overlanded to neighbouring States,

which also take considerable quantities of horse and cattle hides. The estimated number of stock on 31st December, 1929, was:—

Cattle, 711,607; horses, 24,093; goats, 9,247; sheep, 11,803; pigs, 359; donkeys, 789; mules, 95; camels, 707.

Dairying as an industry is non-existent. The abundant indigenous herbage is, however, well suited for stock, and the making of hay and ensilage would ensure the development of the industry.

**Mining.**—Gold, tin, wolfram, copper and mica are mined. Both alluvial and reef gold are found, and there are several batteries and cyanide plants. The total mineral production in 1929-30 was valued at 16,657*l.* which included tin ore valued at 3,345*l.*, wolfram valued at 3,867*l.*, and mica valued at 6,099*l.*

#### *Pearl Shell and other Fisheries.*

In 1884 mother-of-pearl shell was discovered in the harbour of Port Darwin. Difficulty in working, principally through heavy tides and muddy water, retarded the development of the industry for many years. Subsequently, however,

the opening up of new patches led to a revival, but the war gave the industry a setback. During the year 1929-30 there were 32 boats working from Darwin.

The territorial waters abound in marketable fish, and despite inadequate transport facilities a commencement has been made with a trade in fish, dried or otherwise preserved.

The value of sea products exported from Darwin, overseas during 1928-29 was as follows:—

Pearl Shell .. ..	£27,837
Dried Fish .. ..	99
Bêche-de-mer .. ..	2,882

**NOTE.**—These figures do not include shipments to Australian States. The total take of pearl shell for the year ended 30th June, 1930, was valued at 84,000*l.*

#### *Commerce and Shipping.*

No record is kept of the direction of trade between the Commonwealth States and Territories. It is, therefore, impossible to give the total imports and exports of the Northern Territory. The figures for imports from and exports to outside Australia for 1920-21, and following years are given below.

Period.	Annual Imports.	Annual Exports.
	£	£
1920-21	19,857	14,752
1921-22	12,115	5,036
1922-23	12,804	14,627
1923-24	14,432	8,000
1924-25	20,636	41,944

Period.	Annual Imports.	Annual Exports.
	£	£
1925-26	34,168	35,902
1926-27	36,814	29,786
1927-28	30,387	29,265
1928-29	32,069	53,720
1929-30	38,883	58,471

#### *Shipping, Darwin Harbour, 1929-30.*

52 ships berthed, 7,997 tons of general cargo, and 2,175 tons of coal were discharged; 2,460 tons of general cargo and 359 tons of coal were shipped. 6,179 head of cattle were exported by overseas boats.

#### *Internal Communication.*

**Railways.**—Under the Northern Territory Acceptance Act, No. 20 of 1910, the Commonwealth is to extend the railway running from Port Darwin southward, to a point on the northern boundary of South Australia.

The Commonwealth, also, is to construct or cause to be constructed as part of the Transcontinental Railway, a railway from Oodnadatta to connect with the Northern part of the Transcontinental Railway.

The Railway from Port Augusta to Oodnadatta has been constructed for many years, but recently in accordance with the Railways (South Australia) Agreement Act, No. 2 of 1926, it was extended to Stuart (Alice Springs).

Stuart is situated 292 miles from Oodnadatta and 981 miles from Adelaide. The railway from Port Augusta to Stuart, a distance of 770 miles, is owned and operated by the Commonwealth, being vested in the Commonwealth Railways Commissioner under the provisions of the Commonwealth Railways Act, 1917-25.

The railway from Darwin southward is now open for public traffic as far as Birdum, a distance of 316 miles. The Northern Territory Railway Extension Act, No. 11 of 1923, provides for the construction of the railway as far as Daly Waters, an additional 44 miles beyond Birdum, but it is not proposed to continue this extension for the present. The distance between Birdum and Stuart is 638 miles.

**Posts.**—Postal communication is maintained by vessels belonging to Burns, Philp & Co., which maintain a monthly service between the Territory and the Eastern States. In addition the vessels belonging to the State Steamship Service of Western Australia give a service once every 60 days between Fremantle and Darwin. Inland the northern part of the territory receives its mail via Darwin, while the southern districts are served via Adelaide. A shipping service from Burketown, Queensland, to the McArthur and Roper Rivers in North Australia is also in operation. An air mail service between Brisbane, Queensland and Daly Waters, North Australia, was inaugurated on the 20th February, 1930. This provides a weekly mail service between Darwin and the Southern capitals.

**Telegraphs.**—The transcontinental telegraph line, covering a length of 2,230 miles, was completed on 2nd August, 1872, at a cost of nearly half-a-million sterling. The line runs in a northerly direction from Adelaide to Darwin, whence telegraphic communication is provided with Asia and Europe, via Banjoewangie (Java), Singapore and Madras.

Between Darwin and Banjoewangie the submarine cable is duplicated. High-power wireless stations have been constructed by the Federal Government at Wave Hill, in the Territory, and at Camooweal, just over the Eastern boundary, in Queensland.

#### *Land Tenure.*

A Lands Ordinance was passed in 1931 repealing all previous Acts and Ordinances and may be summarized as follows:—

(i.) **Pastoral Leases.** A pastoral lease may be granted for such term, not exceeding 42 years, as the Land Board determines. The rental for the first period is fixed by the Land Board and

is subject to re-appraisal on such dates as are specified in the lease or are prescribed. A lessee must within five years stock the land to the extent provided in the lease, and keep the land so stocked during the continuance of his lease.

(ii.) *Agricultural Leases.* Agricultural lands are classified, and the maximum area which may be included in any one lease is as follows:—Division A, Cultivation Farms, Class 1, 1,280 acres, Class 2, 2,560 acres; Division B, Mixed Farming and Grazing, Class 1, 12,800 acres, Class 2, 38,400 acres. Agricultural leases are granted in perpetuity, and the rent for the first period is fixed by the Land Board, and is re-appraised every 21 years. The lessee must—(a) in the case of lands for mixed farming and grazing, stock the land to the extent prescribed by the regulations and keep it so stocked; (b) establish a home within two years and reside on the leased land for six months in each year in the case of land for cultivation, and for four months in each year in the case of land for mixed farming and grazing; (c) cultivate the land to the extent notified by the Land Board; and (d) fence the land as prescribed.

(iii.) *Lease of Town Lands.* Leases of town lands are granted in perpetuity, the rental being fixed every fourteen years. Such leases must, in the first instance, be offered for sale by public auction, and if not so sold, may be allotted by the Land Board to any applicant, at the rental fixed by the Land Board. The lessee must erect, within such time as is notified, buildings to the value specified in the conditions of sale.

(iv.) *Miscellaneous Leases.* The Land Board may grant a lease of any portion of Crown lands, or of any dedicated or reserved lands, for any other prescribed or approved purpose. Such leases are for a term not exceeding 21 years, and may be offered for sale by public auction, or granted to any applicant at an annual rental fixed by the Land Board.

(v.) *Grazing Licences.* Licences may be granted to any person to graze stock on any vacant Crown lands or on any reserved or dedicated lands for such period, not exceeding one year, as is prescribed and at the rent and on the conditions prescribed.

(vi.) *Occupation Licences.* Licences may be granted for any period not exceeding five years, and on prescribed rentals and conditions, for the purpose of drying or curing fish, or for any manufacturing or industrial purpose, or for any prescribed purpose.

(vii.) *Miscellaneous Licences.* The Land Board may grant licences for miscellaneous purposes for a period not exceeding twelve months on prescribed terms and conditions.

(viii.) *Leases to Aborigines.* The Governor-General may grant to any aboriginal native, or to the descendant of any aboriginal native, a lease of Crown lands not exceeding 160 acres for any term of years upon such terms and conditions as he thinks fit.

#### Freehold.

Under the Crown Lands Ordinance, 1931, provision is made for the granting of freehold in respect of:—(a) Town lands; (b) agricultural lands; (c) garden lands; and (d) tropical lands.

The following is a summary of the freehold provisions of the Ordinance.

*Town Lands.* The holder of any existing Town Lease or of a Town Lease that may hereafter be granted, may, at any time, apply for a grant in fee simple of the lands included in the lease, and the grant may be made, provided that, in addition to complying with the conditions of

the lease, the lessee has—securely fenced the land; erected on the land a residence of the value of at least 50*l.*, within the first twelve months of the lease; resided on the land continuously for twelve months immediately prior to the application; and paid the purchase money and all moneys due in respect of the land. The purchase price fixed by the Land Board with the approval of the Minister shall not in any case be less than 5*l.* per block.

*Agricultural Lands.* Agricultural Lands consist of any lands within an area declared to be an agricultural area for the purposes of the Ordinance. The holder of any existing Agricultural Lease or of any Agricultural Lease that may hereafter be granted, may at any time apply for a grant in fee simple of the lands, or portion of the lands, included in the lease. A grant of the fee simple may be made, provided that the applicant, in addition to complying with the conditions of the lease, has—securely fenced the land over which the fee simple is required; cultivated not less than one-tenth of that land; stocked and kept stocked the land as directed by the Land Board; erected a residence and buildings on the land of the value of at least 50*l.*; and paid the purchase money and all moneys due in respect of the land. The purchase price fixed by the Land Board with the approval of the Minister shall in no case be less than 2*s.* 6*d.* per acre. The maximum area of agricultural lands which may be granted in fee simple to any one person is 1,280 acres of Class 1 lands, or 2,560 acres of Class 2 lands. Where the lands included in an agricultural lease, or leases, include both Class 1 and Class 2 lands, the maximum area that may be granted in fee simple shall be the maximum area that could be so granted if the lands were all of the same class. For this purpose one acre of Class 1 lands shall be deemed to be equivalent to two acres of Class 2 lands.

*Garden Lands.* Garden lands consist of Crown Lands or dedicated or reserved lands within ten miles of a town, which have been declared by the Minister to be Garden Lands. Leases of Garden Lands may be granted for vineyards, orchards or gardens, but for no other purpose. The maximum area of a lease of garden lands may not exceed ten (10) acres. The holder of a lease of garden lands may at any time apply for a grant in fee simple of the land or any portion of it. A grant of the fee simple may be made, provided the lessee has—complied with the conditions of the lease; fenced the land; cultivated and kept under cultivation at least one-third of the area for a period of not less than two years prior to the issue of the grant; erected on the land a residence and buildings of the value of at least 50*l.*, and is permanently residing on the land; and has paid the purchase price, which shall be not less than 10*s.* per acre.

*Tropical Lands.* Tropical Lands consist of areas north of the 16th parallel of South latitude which have been declared by the Minister to be tropical lands, for the purposes of the production of cotton or tropical products. Any Company incorporated or registered in the Northern Territory may, upon entering into an agreement in the prescribed form, hold an area of tropical lands, not exceeding, in the aggregate, 20,000 acres, for a term of 14 years. Every such agreement shall be laid before both Houses of Parliament, and no transfer of any agreement shall be permitted by the Minister except to a Company, but not to a

Company which would thereby hold more than 20,000 acres of tropical lands. If the Company fails to comply with any of the terms, conditions, or provisions of the agreement, the Minister may resume the whole or any portion of the lands, and, on such resumption, all improvements (except tenant's fixtures), upon the land resumed will become the property of the Crown. The agreement will provide that the Company shall use the land for the growth of cotton or other tropical products, and that it shall plant, during the first three years of the term, one twenty-fifth of the land, and keep cultivated the said one twenty-fifth of the land so planted, and, during the last four years of the term, it shall cultivate and keep cultivated at least one-fifth of the land. The Company will also be required, after the first seven years of occupation, to pay an annual rental of 1½d. per acre per year or portion of a year thereafter until the completion of the purchase or other determination of the agreement. The Company will be entitled to a grant of the land in fee simple at any time during the term of the agreement, on payment of 2s. 6d. per acre, and provided that it proves to the satisfaction of the Minister:—That it has spent 10s. per acre in the aggregate in cultivation and for necessary plant and machinery; that it has produced from the land two hundred pounds weight of cotton, or tropical products of an equal amount in value, for every acre held under the agreement; and that it has cultivated one-third of the land.

*Miscellaneous.* Miscellaneous provisions of the Ordinance provide, *inter alia*, that:—(a) A husband and wife shall not hold jointly in fee simple a greater area of land than the maximum area which may be granted to any one person under the Ordinance; (b) no person shall be entitled to hold in fee simple, for his own use and benefit, whether by grant from the Crown or by transfer from any person, a greater area of any lands than the maximum area which may be granted to him in the name of the Crown in pursuance of the Ordinance; (c) no alien shall be entitled to acquire any land in fee simple; (d) no application from an alien for the fee simple of any land shall, therefore, be accepted unless it is accompanied by the statutory declaration of the alien that he has resided in the Northern Territory continuously during the period of 12 months immediately preceding the application and intends to apply within five years after the date of the application for a certificate of naturalisation; (e) the grant of any land in fee simple shall be subject to the following reservation:—A reservation to the Crown of all minerals and mineral substances in or upon the land, including gold, silver, copper, tin, metals, ores and substances containing metals, gems, precious stones, coal, shale, mineral oils, and valuable earths and substances, together with the right to authorise any persons to enter upon the land and to mine, work for, win, recover and remove them or any of them, and to do all things necessary or convenient for those purposes.

*Area held under Leases, Licences and Permits.  
Central Australia.*

Particulars, 31/12/1930.	Square Miles.
Pastoral Leases and Grazing Licences	73,577
Other Leases and Licences ..	387
Total .. ..	73,964

On the 31st December, 1930, the areas held under leases and licences were:—Pastoral leases, 69,830 square miles; grazing licences, 3,747 square miles; miscellaneous leases (including water leases), 387 square miles; mining leases and protected mining leases, 4,400 acres.

There were also 21,875 square miles under reserve for aboriginal natives of Australia; 901 square miles under Mission Station lease, and 1,000 square miles under licence to prospect for mineral oil and coal.

*Area held under Leases, Licences and Permits.  
North Australia.*

Particulars, 31/12/1930.	Square Miles.
Pastoral Leases and Grazing Licences	155,459
Other Leases and Licences ..	2,274
Total .. ..	157,733

On the 31st December, 1930, the areas held under leases and licences were:—Pastoral leases, 134,215 square miles; pastoral permits, 2,084 square miles; grazing licences, 21,244 square miles; agricultural leases, 183 square miles; mining leases and protected mining leases, 2,665 acres.

There were also 8,049 square miles under reserve for aboriginal natives of Australia; 1,220 square miles under licence to prospect for mineral oil and coal, and 611 square miles Mission Station leases.

*Finance.*

*Revenue and Expenditure.* The following shows the receipts and expenditure for the financial years 1927-28; 1928-29 and 1929-30.

*Revenue and Expenditure, North and Central Australia.*

	REVENUE.		EXPENDITURE.	
	Admin'v'e Services.	N. Aus. Commn.	Admin'v'e Services.	N. Aus. Commn.
1927-28	£ 115,202	£ 27,700	£ 403,592	£ 27,700
1928-29	107,608	18,222	397,196	18,222
1929-30	83,023	38,811	419,078	38,811

PAPUA.

*Situation and Area.*

Papua (formerly called British New Guinea) is composed of a portion of the island of New Guinea, and of a number of islands, most of which lie to the south-east of New Guinea. The boundaries of the Territory are as follows:—"The S. and S.E. shores of New Guinea, from 141° E. long. eastward as far as East Cape, thence N.W. to 8° S. lat. in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8° S. parallel to 147° E. long., then in a straight line N.W. to the intersection of 6° S. lat. and 144° E. long., and continuing W.N.W. to the intersection of 5° S. lat. and 141° E. long., thence proceeding Southward along the 141st meridian of E. long. to its intersection with the right bank of the Fly River, thence by the right bank of the Fly

its intersection with the right bank of the Fly River, thence by the right bank of the Fly

River bearing Southerly to its intersection with the meridian  $141^{\circ} 1' 47.9''$  of East longitude, thence by the said meridian bearing South to a point on the Southern coast of the Island of New Guinea at the middle of the mouth of the Benabach River, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between  $8^{\circ}$  and  $12^{\circ}$  S. lat. and between  $141^{\circ}$  and  $155^{\circ}$  E. long., and not forming part of Queensland; and including all islands and reefs lying in the Gulf of Papua to the north of  $8^{\circ}$  S. lat."

New Guinea, the largest island in the world if Australia is excluded, lies some 80 miles to the north of Queensland, between  $0^{\circ} 0'$  and  $12^{\circ} 0'$  S. lat., and between  $130^{\circ} 50'$  and  $154^{\circ} 30'$  E. long. Its greatest length is 1,490 miles, and its maximum breadth 490 miles; its area being about 234,768 square miles. The islands which lie near Papua, and which form part of that Territory, number, great and small, about two hundred. Of these the principal ones are: Kiriwina (in the Trobriand group of D'Entrecasteaux), Woodlark, Normanby, Goodenough, Fergusson, St. Aignan, Rossel and Sudest.

### *History.*

The island of New Guinea was discovered in 1511 by Antonio de Abrea, and it was touched at by several of the early navigators. The islands lying to the south-east of New Guinea were visited by Torres in 1606, and by French navigators towards the close of the eighteenth century. The waters that are adjacent to the islands, and to the south-eastern coasts of New Guinea, have at different periods been partly surveyed and mapped by British warships.

The whole island to the west of  $141^{\circ}$  E. long. is claimed by the Dutch as suzerains of the Sultan of Tidore. The Dutch have established a post on the south coast of New Guinea, known as Merauké, which is in charge of a Resident. It is a little to the West of the S.W. extreme of the Anglo-Dutch boundary. That portion of the island which lies to the eastward of  $141^{\circ}$  E. long. and to the north of British New Guinea belonged to the German Empire and is now administered by the Australian Government, under a mandate issued by the Council of the League of Nations. The Government of Queensland annexed that portion of the island not claimed by Holland to the British Empire on the 4th of April, 1883, but this proceeding was not ratified by the Imperial Government. The Intercolonial Convention held at Sydney in November and December, 1883, passed resolutions urging the annexation of Eastern New Guinea, and undertook to recommend their respective Legislatures to provide for defraying a part of the cost of a Protectorate if one were established by the Imperial Government. On the Australasian colonies agreeing to guarantee 15,000*l.* a year to meet the cost, a Protectorate was proclaimed by Commodore Erskine on the 6th November, 1884, over the south-east coast of New Guinea and the adjacent islands.

General Sir Peter Scratchley was appointed Special Commissioner for the Protectorate, and arrived in 1885, but he succumbed, in the Protectorate, to malarial fever in November of the same year. He was succeeded by the Hon. John Douglas, C.M.G., formerly Premier of Queensland. At the Colonial Conference held in 1887, the Colonies of Queensland, New South Wales and Victoria undertook to guarantee £15,000 a year for ten years, for defraying the cost of administer-

ing the territory now forming the Possession, on the understanding that Her Majesty's Sovereignty would be proclaimed over it. By the Queensland British New Guinea Act, 1887, that colony undertook to be responsible for the payment of the £15,000 a year. The territory was annexed to the Crown by the newly appointed Administrator, Dr. (afterwards Sir W.) Macgregor, on 4th September, 1888.

The Imperial Government contributed some £52,000 towards the founding of the Possession. The local revenue raised in the Possession was formerly paid over to Queensland, for distribution amongst the guaranteeing colonies, in reduction of their contribution of £15,000 a year, but is now kept and expended by the Government of the Possession.

At the end of 1901 the Government of the Commonwealth agreed to take over the Possession as a territory of the Commonwealth, and brought proposals before the Federal Parliament (which were adopted) for providing towards the expenses of administration a sum not exceeding £20,000 a year. The provision ran from 1st July, 1901, and was subject to revision at the end of five years. On the 1st Sept., 1906, a Proclamation was issued by the Governor-General of the Commonwealth of Australia, under the provisions of the Papua Act, 1905, declaring British New Guinea a Territory of the Commonwealth, under the name of "Papua." The above Act provides that a sum of £20,000 shall be paid out of the Consolidated Revenue Fund of the Commonwealth towards the revenue of the Territory in each financial year, up to and including 30th June, 1906, and thereafter such sums, if any, as the Parliament appropriates for that purpose. In 1929-30, £42,000 was paid by the Commonwealth towards Administration.

### *Description and Formation.*

Papua extends from east to west upwards of 800 miles, and about 200 from north to south towards either end, but is only about 50 miles deep behind Freshwater Bay, near the middle of the portion of the Territory that is situated on the island of New Guinea. The total coast line of the Territory has been computed at 3,664 statute miles, 1,728 on the mainland and 1,936 on the islands. The total superficial area is about 90,540 square miles, of which about 87,786 are on the mainland of Papua, and 2,754 made up of many islands.

With the exception of the low coral islands of Kiriwina, Nada, part of Murua, and a few others of small dimensions, the islands are mountainous and principally of schistose formation, the highest, Goodenough, 8,000 feet. The eastern end of the Territory is also mountainous, and as the mountains extend westward they rise and coalesce to form a great central chain, which attains its greatest altitudes in the Owen Stanley range, the highest point of which is Mount Victoria, 13,200 feet, and in Mount Scratchley, the Wharton Range, and Mount Albert Edward, the latter about the same height as Mount Victoria. Further west the main range becomes more broken and lower, while pursuing nearly the same general trend towards the north-west as it had in the more eastern part of the colony. The western end of the Territory is for nearly 300 miles generally low and swampy until a long distance from the coast is reached. The mountains near the east end, on the mainland, are of igneous origin; the great masses of the central part of the main range are all schistose, while in the west sandstone predominates, but there are outcrops of igneous formation, such as Mount Yule,

upwards of 10,000 feet high. On the Fly River, near the point of junction of Papua, Dutch New Guinea and the mandated Territory of New Guinea, there are limestones with fossil corals, and these are also met with at many other places in the low and swampy regions of the western end of the colony and elsewhere. The whole Territory is remarkably well watered. The great mountains, and by far the larger portion of the lower country, are all covered by forest.

#### *Rivers.*

The majority of the principal rivers open into the Gulf of Papua. They have a general direction towards a point near the middle of the Gulf. The two largest are the Fly and the Purari. The Fly spreads out its head branches over a large area in the centre of the island, comprising considerable portions of the three different territories. Its course is about 620 miles from the sea to the boundary of Papua. The influence of the tide is felt for six or seven score of miles up the Fly. It is navigable by a steam launch for over 500 miles.

The Purari River is the second in point of size, and seems to start from the southern side of the Bismarck range of Kaiser-Wilhelmsland. It is navigable by steam launch for 120 miles. The Vailala and Lakelamu rise in undetermined mountains in the central main range. The Angabunga River has its origin from the western spur of Mount Albert Edward; the Vanapa from the Owen Stanley Range, the Wharton Chain and the southern slopes of Mount Albert Edward; the Brown from the Owen Stanley Range east of Mount Victoria. On the northeast coast the rivers are all small, except four that open into the sea between Cape Nelson and the former German boundary. These are, proceeding northwards, the Musa, Kumusi, Mambare, and Gira. Each of them pursues a course from the central main range towards the north-east until it enters the sea. The Gira rises from the eastern spur of Mount Albert Edward, and is smaller than the other three, all of which are nearly of the same size.

#### *Climate and Natural Resources.*

As Papua lies between five and eleven and a half degrees of south latitude, the climate of the lower part of the country is warm. It is outside the range of the hurricanes that pervade the southern part of the Western Pacific. At Port Moresby, the seat of Government, and situated near the middle of the Territory, the average temperature for the year 1929-30 at 9 a.m. was 80°5. The average maximum readings for the same period, 84°9; the average minimum readings, 75°9. The hot season is from November to May; the hottest months are January and February; the cold season is from June to October, the coldest month is August. During the hot season winds on the south coast are from the north and west, and are unsteady; during the cold season they are from the south-east, and are much more regular.

At Port Moresby the rainfall for the year 1929-30 was 57·79 inches, and at Kikori 267·95 inches, these represent the minimum and maximum rainfalls near the coast. It is much greater, but undetermined, on the central mountain ranges. On the south coast the climate is rather comfortable than oppressive during the cold season. It is generally agreeable at an altitude of 2,000 feet, a height that can be reached on foot in one day from Port Moresby. At 5,000 to 6,000 feet it becomes

distinctly cold at night, the thermometer sometimes reading 55° F.; at 10,000 feet ice is met with in the early morning. Above that the grass is often covered with hoar frost, and the cold is severe.

Malarial fever, as a rule quite mild, is not rare in the low parts of the country. About the time of the change of seasons inflammatory diseases of the chest have always frequently occurred amongst the natives, and more recently the country has suffered from influenza. The mortality from this latter complaint has been estimated to be about two per cent. of the population.

The obstinate scaly ringworm, so common in many parts of the Pacific, occurs frequently amongst the natives. Plague, smallpox and cholera have not been met with since the country has been occupied by Europeans. Yaws is prevalent amongst the natives, and is now being dealt with by means of the new salvarsan compounds. Dysentery, once very prevalent in epidemic form, seldom occurs now. Europeans suffer from cancer much as they do in non-tropical countries, but cases of cancer amongst the natives are exceedingly rare. As in other parts of the tropics, the natives, with the exception of the dry Port Moresby area, are frequent carriers of ankylostomiasis (hookworm). Syphilis is practically unknown amongst the natives, but gonorrhoea occurs in most districts. Granuloma inguinale occurs especially in the west, east and northern parts of the Territory.

The climate is favourable to the cultivation of all tropical products. The cocoanut palm bears well everywhere, and is common anywhere along the coast line, but in the far interior it is not met with. Cotton would be specially suited to the dry climate of the central district. Tobacco, in certain localities, of superior quality, and sugar cane seem to be indigenous or to be long domesticated; there are several native trees and plants that yield good classes of rubber. There are some good varieties of timber, including sandal wood, ebony, and cedar. Tea, cocoa, and coffee thrive well, but are not indigenous; the latter has been introduced and propagated. The climate is very congenial to rice and maize and all kinds of tropical fruit. The mineral deposits comprise gold, which exists over a large area; osmiridium, which has been found from the Gira River to the Owen Stanley Range; and in the Purari sandstone district there is coal. Indications of petroleum have been located at scattered intervals over an area of country covering about 1,500 square miles between Yule Island and the Purari Delta, in the Gulf Division of Papua. Quantities of oil and inflammable gas have been met with in the test bores put down, but not in sufficient bulk as yet for commercial purposes.

The marine resources comprise pearl-shell and pearls, trepang, sponges, trochus, snail and turtle shell.

#### *Fauna and Flora.*

There are no dangerous wild beasts in the Territory; wild swine are common. There are several varieties of wallaby, phalanger, and echidna. There are no hares or rabbits; deer are found in the vicinity of Port Moresby, they were introduced many years ago and are apparently doing well; the most dangerous creature is the crocodile. Many lives are lost each year through these amphibians and by snake-bite. The snakes are nearly related to those of Australia. The birds include the cassowary, many birds of paradise, a great variety of pigeons, the hornbill, the black and the white

cockatoo, geese, many species of ducks, quails, and on the mountain tops snipe and woodcock.

The flora is as varied as the climate. On the tops of the highest mountain chains there are many species of grasses: several kinds of buttercup, forget-me-nots, daisies, rhododendrons, heaths, and other flowers of temperate climates. The forest there is principally cypress. From seven to ten thousand feet it is chiefly myrtaceous, often covered by trailing bamboo or mixed with pandanus. From two to five thousand feet the evergreen oaks are common. On the low lands there are several varieties of hardwood trees, *afzelia*, *bijuga*, *calophyllum*, etc. Native cloth is made by beating out the bark of the paper mulberry, of the bread fruit tree, or of certain trees of the nettle family. Fibre is obtained from the banana, the cocoanut, from the bark of many saplings, and the best of all from the aerial roots of certain species of pandanus. Most of the trees and flowers that are met with in the tropical islands of the Pacific, or in North Queensland, occur also in Papua.

#### *The People.*

The races of Papua are now known to be very diverse as regards physical type and language. As regards culture there is less difference. When Europeans first arrived, the inhabitants used stone, wood and bone implements, but no metals. They cultivated the taro, yam, sweet potato, the banana, and on the coast, the cocoanut. Weaving and the use of the potters wheel were unknown.

There are believed to be three constituent elements in the native population of Papua. The first is the Negritto, a short dark race. After the Negritto probably came a race called "Papuanas," who are dark but taller than the Negrittoes. Subsequently the Melanesians settled along the coast, and are now so mixed with the Papuanas that it is difficult to distinguish them. They were of medium height and light-skinned, and probably were the first seamen of the Pacific and travelled in out-rigger canoes.

The present day population of Papua consists of these three elements mixed together in varying proportions.

The European population of Papua is 1,525. A census of a portion of the indigenous population has been taken and the total number of natives actually counted is 181,509, chiefly residing on the coasts. The balance of the population is estimated by District Officers at 93,034, making a grand total of 274,543.

The country and people have no history, and but few current well-defined traditions. These refer to only local movements and actions of tribes within the last four or five generations.

A large part of the interior of Papua is still in the stone age, much of it is in a stage of transition in which the stone axe and the steel tomahawk are used side by side. The aboriginal methods of house-building, of canoe-making, of pottery manufacture, of cultivation, are still generally maintained. Nearly all the coast line and considerable part of the interior has been brought under missionary influence. With the exception of two blocks between the Strickland and the Kikori, and north of the Samberigi Valley, practically the whole of the territory has been explored and most of it brought under Government control.

Five missionary societies are established in the Territory. They are the London Missionary Society, which has for its field the south coast of New Guinea; the Society of the Sacred

Heart, which is established at Yule Island, and along the banks of the St. Joseph River extending to the Main Range; the Methodist Missionary Society of Australasia, which extends its influence over all the archipelagos; the Church of England Mission, which has as its field the north-east coast of New Guinea, the last-named constituting the Diocese of New Guinea, organised under a Bishop of the Church of England; and the 7th day Adventist, whose sphere of influence is comprised in the Central Division and is bounded on the North by the Brown River, on the South by the Laloki River and on the East by a line bearing approximately north-east from the coastal village of Kaile to the Main Range. The two first-named societies were in New Guinea before annexation was proclaimed: the last two have come there since the proclamation of sovereignty. The native population take readily to civilisation in most great matters, while they often cling tenaciously to their own habits and customs in smaller and less important things.

#### *Mode of Government.*

Papua had formerly the constitution of a Crown colony, regulated by Royal letters patent of 8th June, 1888, under which the Government was carried on by an Administrator, with the advice and assistance of an executive and a legislative council. The correspondence of the Administrator of British New Guinea with the Secretary of State passed first through the Governor of Queensland, and afterwards through the Governor-General of Australia. By Letters Patent, of 18th March, 1902, provision was made for placing the Possession under the authority of the Commonwealth, and for the revocation of the Letters Patent governing the Constitution as soon as the Commonwealth Parliament had provided by law for the future government. Provision was made by the Papua Act, 1906, proclaimed on the 1st September, 1906, as above stated. There was no form of Government among the native population, the Polynesian system of chiefs being practically unknown; patriarchal authority did not extend beyond near family relatives, and even then was only loose. A certain measure of chiefly influence is being created now by a few men under Government authority, but control over the natives is being best acquired by the gradual creation of a force of village policemen. The Administration has at its disposal an armed constabulary, consisting of about 300 natives, enrolled from many different districts. Special laws have been passed for the protection of the native population, and for dealing with lands. A code consisting of a series of simple regulations, which are from time to time being added to, has also been passed for the benefit of the native population. The courts of the Territory consist of the Central, Petty Sessions, and Native Magistrates' Courts.

#### *Magisterial Divisions.*

The Territory is divided into eight magisterial divisions, in each of which there is a resident magistrate, who is also invested with the executive authority of dealing in the first instance with any administrative matter that may arise. Besides these there are assistant resident magistrates in certain more populous districts. The Central Court, which possesses the jurisdiction of an ordinary Supreme Court, sits wherever there is occasion. The principal seat of Government is at Port Moresby. This place is centrally situated. It is easy to approach the harbour, and the latter

is large, commodious, and sheltered from all winds. It is not well watered, but is very picturesque, and comparatively healthy. The immediate neighbourhood is not well suited for ordinary cultivation on account of the rather scanty rainfall. Port Moresby is a port of entry.

Samarai, the next place in importance, is an island of some sixty acres two miles from the south-east end of the mainland. There is no native village on that island. It is a port of entry, and the headquarters of the Resident Magistrate of the district. There is good anchorage there, but no convenient water supply. It is the port from which miners, pearl fishers, etc., generally obtain their supplies. Like Port Moresby, the neighbourhood of Samarai is very picturesque. Its rainfall is nearly three times as great as at the former place.

The third port of entry is the island of Daru, the headquarters of the Resident Magistrate for the Western Division. It has a good and safe harbour, with an approach that presents no difficulty. It is the only harbour Papua possesses in the west, and the island supplies the best building sites obtainable in that part of the country. It is visited by many boats engaged in the pearl-shell fishery of Torres Straits. Kwaiapan Bay, Woodlark Island, in the extreme east of the Territory is the fourth Port of Entry.

#### Industries.

There are no European manufactories in the Territory.

The chief industry worked by Europeans is agriculture, principally coconuts, para rubber and sisal hemp. Two plantations, one in the Central and the other in the Eastern Division, now produce desiccated coconut. Cotton is still in the experimental stage. Gold mining is carried on and petroleum of good quality has been obtained in the Gulf Division, but not as yet in commercial quantities. During 1929-30 there were 32 white miners and 356 indentured labourers employed in gold mining. Gold to the value of £22,320 in 1925-26; £29,115 in 1926-27; £6,364 in 1927-28; £6,767 in 1928-29 and £10,362 in 1929-30 was declared at the custom house for export. The gold-bearing country is extensive, but it is for various reasons very difficult to prospect. There are also indications of auriferous reefs, and several crushing plants have been established. There were exported:—*Pearls*, £13,249 in 1925-26; £8,968 in 1926-27; £827 in 1927-28; £1,861 in 1928-29 and £11,422 in 1929-30. *Trochus-shell*, £14,134 in 1925-26; £7,365 in 1926-27; £12,013 in 1927-28; £9,044 in 1928-29 and £10,975 in 1929-30. *Beche-de-mer*, £10,205 in 1925-26; £16,193 in 1926-27; £14,907 in 1927-28; £11,833 in 1928-29 and £6,381 in 1929-30. *Rubber*, £194,849 in 1925-26; £156,274 in 1926-27; £102,158 in 1927-28; £46,816 in 1928-29 and £50,640 in 1929-30. Since 1907, coconuts have been largely planted by white settlers, the acreage on 31st December, 1929, being 49,072 acres. There is also a very large area of native-owned coconuts, the product of which is extensively used as an article of food. The value of copra exported was £204,125 in 1925-26; £186,837 in 1926-27; £194,019 in 1927-28; £214,051 in 1928-29 and £176,485 in 1929-30. There are large sago fields in the Territory, but this article has not yet been worked for export. Hemp and mangrove bark are also exported.

#### External Trade and Customs.

The customs tariff is comparatively a light one; *ad valorem* duties do not exceed 10 per cent. From the 16th July, 1931 a general duty has, in addition, been imposed on all goods imported into the Territory, whether dutiable or free, at the rate of 4 per cent. on the value of such goods as if all goods were subject to *ad valorem* duty. The external trade is chiefly with Queensland and New South Wales. The external trade, imports and exports, as entered at the customs, amounted to £657,442 in 1920-21; £525,941 in 1921-22; £494,875 in 1922-23; £504,373 in 1923-24; £826,709 in 1924-25; £1,156,670 in 1925-26; £910,366 in 1926-27; £753,924 in 1927-28; £698,636 in 1928-29 and £698,693 in 1929-30.

A service from Sydney is carried on by a steamer belonging to Burns, Philp and Co. under contract for the conveyance of mails and passengers. The coasting and general inter-island trade is carried on by means of 2 small steamers and some small cutters or luggers, many of which are manned exclusively by Papuans. There are suitable substantial wharves for working cargo at Port Moresby and Samarai, at which places all manner of supplies are obtainable at reasonable prices. Much of the internal communication will be made by the rivers. Tracks have been cut in many directions, and the natives are becoming accustomed to travel alone or with Europeans over great areas. During the prevalence of the south-east trades, travelling by small boat is uncomfortable and difficult west of Yule Island, where there is no barrier reef; but east of that the coast is largely protected. East of Yule Island harbours and good anchorages are numerous. In the interior travelling is done always on foot, but in the central district horses can be used on many tracks.

	Local Revenue.	Imports.	Exports.	Shipping.
	£	£	£	Tons.

#### Executive Council.

Lieut.-Governor and Judge, Sir John H. P. Murray, K.C.M.G.  
 Government Secretary, H. W. Champion.  
 Treasurer, E. C. Harris.  
 Chief Medical Officer, Dr. W. M. Strong.  
 Commissioner for Native Affairs, J. T. O'Malley.  
 Director of Public Works, A. P. Lyons.  
 Official Secretary, H. L. Murray.  
 Commissioner for Lands, Mines and Agriculture, C. R. Pinney, M.C.

#### Legislative Council.

The same members as the Executive Council, and 5 non-official members appointed by the Governor-General of Australia:—

The Hon. J. G. Neelson.  
 The Hon. A. Jewell.  
 The Hon. A. H. Bunting.  
 The Hon. G. W. Guttridge.

*Civil Establishment.*

*Lieutenant-Governor*, Sir John H. P. Murray, K.C.M.G., 1,800*l*.  
*Official Secretary*, H. L. Murray, 804*l*.

*Judicial.*

*Judge*, Sir John H. P. Murray, K.C.M.G.  
*Judge*, C. T. Gore, 1,200*l*.  
*Crown Law Officer*, E. B. Bignold, 828*l*.  
*Registrar, Central Court*, L. V. Brossey, 618*l*.

*Government Secretary's Department.*

*Government Secretary*, H. W. Champion, 900*l*.  
*Chief Clerk*, A. J. Bates, 638*l*.

*Magisterial Department.*

*Resident Magistrates—*

*Central Division*, C. T. Wurth, 708*l*.  
*Eastern Division*, E. R. Oldham, 684*l*.  
*South Eastern Division*, A. C. Rentoul,  
*Western Division*, R. A. Woodward, 582*l*.  
*North Eastern Division*, W. R. Humphries, 660*l*.

*Gulf Division*,  
*Delta Division*, L. Austen (acting).  
*Northern Division*, E. M. Bastard, 660*l*.  
*Relieving Resident Magistrate*, R. L. Dick, 528*l*.

*Resident Magistrates—*

*1st Grade*, G. F. W. Zimmer, 582*l*. ; F. R. Cawley, 582*l*.

*Assistant Resident Magistrates—*

*1st Grade* R. W. Grist, 546*l*. ; H. W. H. Huntington, 546*l*. ; A. E. Cridland, 546*l*. ; L. A. Flint, 546*l*. ; R. A. Vivian, 546*l*. ; L. Austen, 546*l*. ; O. J. Atkinson, 546*l*.

*Machinist*, S. J. Anderson, 400*l*.

NORFOLK ISLAND.

Norfolk Island is the principal of three small islands lying 930 miles E.N.E. of Sydney, in 23° 4' S. lat. and 167° 58' E. long., the other islets being Phillip and Nepean Islands. They comprise altogether about 15 square miles, and were discovered in 1774 by Captain Cook. They remained uninhabited until 1788, when a penal settlement was formed there. This was removed in 1855, and in 1856 the inhabitants of Pitcairn Island were brought to the group, about 194 persons settling there, with their cattle, sheep, and pigs. The Pitcairn Islanders were the descendants of the mutineers of H.M.S. "Bounty," who occupied Pitcairn in 1790, and were removed at their own request to Norfolk Island. Of these 40 returned to Pitcairn. The total population at 30/6/30 was 942, consisting of 517 males and 425 females. The chief occupation is agriculture, but the men take part in the whale fishery. The cultivation of bananas is now a staple industry, 25,707 cases were exported during the year ended 30th June, 1930.

There was formerly but little regular administration, the community being presided over by two of the leading inhabitants as unpaid magistrates, with a simple code of laws. The island was on the 24th June, 1856, placed under the control of the Governor of New South Wales, who was given power to appoint officers, make laws and grant lands. On 1st July, 1914, the island was made a territory of the Commonwealth. It is now under the control of the Prime

Minister's Department, Canberra. A shipping service is maintained under contract with the Commonwealth Government to the Pacific Islands. One steamer leaves Sydney, at 5 weekly intervals and proceeds to Lord Howe, Norfolk Island and New Hebrides, returning to Norfolk Island thence to Auckland (New Zealand) and to Sydney via Norfolk Island and Lord Howe Island.

There is a resident doctor. Education is free, and there is an efficient school which is conducted by a head master placed at the disposal of the Commonwealth Government by the Department of Public Instruction, New South Wales. The village is Kingston.

*Administrator and Chief Magistrate*, Col. A. J. Bennett, C.M.G., D.S.O., V.D., 800*l*.

*Private Secretary*, C. A. Leonard.

*Government Medical Officer*, Dr. L. S. Duke.

*Chaplain*, Rev. F. Berry.

*President Executive Council*, E. C. Robinson.

*Registrar of Lands*, E. Stephenson.

*Registrar of the Magistrates' Court*, E. Stephenson.

*Collector of Customs*, E. J. C. Stopp.

*Postmaster*, G. H. Wickstead.

## THE TERRITORY OF NEW GUINEA.

(FORMERLY GERMAN NEW GUINEA).

In 1884, Germany declared a Protectorate over Kaiser Wilhelm Land (the north-eastern part of the Island of New Guinea) and the adjacent Islands of the Bismarck Archipelago, and in later years the Protectorate was extended to the German Solomon Islands, Nauru, and to the Marshall, Caroline, Mariana and Pelew groups, North of the Equator.

The control and development of Kaiser Wilhelm Land was from 1885 to 1899 vested in the German New Guinea Company, which, to all intents and purposes, constituted a Government in itself, and issued its own coinage, but in 1899, the Imperial German Government again assumed control, making annual grants from the Imperial Treasury towards the cost of administration. The seat of Government was at Rabaul in New Britain.

That portion of German New Guinea, which, has, since the 12th September, 1914, been administered by Australia, consists of Kaiser Wilhelm Land, the Bismarck Archipelago, and Buka and Bougainville (Solomon Islands). At the meeting of the council of the League of Nations in December, 1920, a mandate to administer these territories was issued to the Commonwealth. The islands North of the Equator are administered by Japan.

During the German regime, German New Guinea was administered by a Governor, who was appointed by the Imperial Crown. He was not assisted by any advisory council; to a great extent the laws of Germany were enforced, these being supplemented by the issue of ordinances by the Governor or higher authority. For better administrative control, the Colony was divided into seven districts, each in charge of a District Officer with certain judicial powers. This system has been amended by the Australian authorities to the extent that there are now eight Districts and the

Administrator is assisted by an advisory council consisting of the permanent heads of the various departments.

### Geographical Description.

The Mainland of New Guinea (Kaiser Wilhelm Land) is the North East part of New Guinea, having an area of about 70,000 square miles, nearly one third of the whole Island of New Guinea, the balance of which is divided between Holland (Dutch New Guinea), and the British Empire (Papua). It is divided into four districts namely, Aitape, Sepik, Madang and Morobe, the most important of the three being Madang, with head-quarters at Madang (formerly Friedrich Wilhelm Hafen) on Astrolabe Bay.

Possessing a long, but little indented coast line, the Mainland has few good harbours, the best being probably Madang and Vanimo Harbour, Sek Harbour, Hatsfeldt Harbour, Monumbo Harbour, and Finch Harbour, though Morobe Haven on which Morobe is situated is a well protected little port. Aitape is practically an open roadstead, and here, as is the case generally right along the coast, shipping, when desiring to anchor during heavy weather, is forced to do so under the lee of one of the many islands which dot the coast.

In respect of rivers, however, these three districts are more fortunate. The Sepik River in the Sepik and Aitape districts is a fine stream which rises in the mountains of Dutch New Guinea and has its mouth situated about 70 miles south east of Aitape. For vessels of, up to about 600 tons it is navigable for a distance of over 400 miles from its mouth, whilst vessels of greater size have covered a distance of over 200 miles. The Ramu or Ottilien River, a long but smaller river than the Sepik, rises in the Bismarck Ranges in the Madang District and discharges at a spot not many miles South East from the mouth of the Sepik. In the Morobe District is the Wussi (or Markham) River, which is smaller than the two above-mentioned streams. It flows into the Huon Gulf.

The whole of the Mainland is very mountainous, some peaks rising to a height of about 13,000 feet. One or two of the islands along the coast are also mountainous, Vulcan Island being an active volcano. The mainland is believed to possess considerable mineral wealth, though, owing principally to the difficulties encountered in inland transport, no extensive mining operations have yet been undertaken. At various points along the coast, large plantations are found and Mission stations exist at many places, but comparatively little is known yet of the interior, though extensive patrols are now despatched from time to time by the Government. These it is anticipated will serve the double purpose of opening up the unknown country, and of bringing the inland native into touch with the representatives of the Government in the various districts.

The Bismarck Archipelago consists of New Britain, New Ireland, the Admiralty Islands and all the smaller adjacent groups of islands such as Lavongai and the Duke of York Group.

New Britain, a long, narrow crescent shaped island is the largest and most important island of the Archipelago.

The total area of the island is estimated at 13,000 square miles and as the mean breadth is only 50 miles, its extreme narrowness can be easily realized. A high and very rugged range of mountains runs from one end of New Britain to the other. The island has been crossed by patrols at the northern and western extremities and also

near the centre from Cape Beechy on the south coast to Bangula Bay on the north coast, the same patrol crossing also from north to south, travelling a distance of 90 miles. No hostile natives were encountered. With the vigorous system of patrols now in operation, and the development of roads into the interior, it is hoped that before long, the whole interior will have been explored.

The highest peak in New Britain is an active volcano, The Father, 7,500 feet high, on the north west coast, near which are the two mountains, the North and South Son. Close to Rabaul are three peaks, the Mother and the South and North Daughter, the first named being an extinct volcano.

Volcanic action is very evident throughout New Britain, especially in the north, where, close to Rabaul, are found the Matupi Sulphur Springs situated at the foot of the Mother in Matupi Harbour. Vulcan Island, 193 acres in area, which lies on the south side of Blanche Bay, made its appearance in one night, in 1878, during an eruption from Mount Mother, when violent earthquakes were also experienced. At the present time earth tremors are of frequent occurrence.

Unlike the Mainland, New Britain is fortunate in possessing several good harbours, the best being Simpson Harbour, the inlying portion of Blanche Bay; others are Jaquinet Bay, Arawe, Linden Harbour and Powell Harbour on the south-east and south coasts and Rein Bay and Talasea Harbor on the north coast.

There are no rivers of any importance in the island, those that do exist being short rapid-flowing streams.

Rabaul is situated upon Simpson Harbour, which is house-shoe in shape, with good depths, well protected from winds and weather, and affords a most excellent anchorage for overseas shipping.

The bulk of the white population of New Britain has grouped itself in or near Rabaul, though settlers with coconut plantations, have operated at various suitable points practically round the whole coast line.

*New Ireland* lies close and practically at right angles to the northern end of New Britain. It is a long narrow island, very mountainous, without any rivers of size, and geologically older than New Britain. The volcanic appearances so definite in the latter island are not evident in New Ireland. Its coast line is fairly unbroken and its best harbours are at Kavieng, Namatanai and Mulima on the north and east coasts and Kalili on the west coast. Crossings of the island have been made from time to time in several places, and here and there very fair roads exist.

The whole of New Ireland is included in one District under the control of a District Officer stationed at Kavieng, which is a substantial little tropical town with good Government Buildings. During recent years a Government Wharf capable of berthing ships of 2,000 tons has been built.

For some years, concern has been felt at the rapid decrease of the native population of New Ireland. This was believed to be to a great extent attributable to the fact that too many men were being recruited for labour in other parts of the Territory; and for several years some parts of the island was closed against recruiting.

The *Admiralty Islands* comprise a small group lying about 380 miles to the north west of Rabaul, and constitute the district of Manus, with headquarters at the principal port, Lorungau, situated on the north east corner of the island of Manus,

which is the largest of the group and of the same rugged mountainous type as its neighbours, New Britain and New Ireland, though apparently free from volcanoes. It is only recently that government patrols have succeeded in pushing their way right across Manus, thus gaining some idea of the interior. What rivers exist are naturally small and unimportant. Several useful though small harbours provide good anchorages for small shipping which touches at these islands.

To the north west of the Admiralty Islands, at a distance of about 200 miles, are the three small groups, the Ninigo, Hermit and Anchorite Islands, better known as the North Western Islands. A particularly fine type of native is found inhabiting these islands. The groups contain no harbours, excepting in the lagoons at The Hermit and Ninigo Groups; and in most cases depths ranging to about 200 fathoms are found close inshore, rendering it impossible for vessels to anchor while loading copra, of which a fair quantity is produced.

It is in the waters adjacent to the Admiralty Islands that most of the shell fishing in the Territory is carried on, trochus and gold-lip being obtained in large quantities.

*The Solomon Islands.*—Germany's share of the Solomon Islands consisted of the islands of Bougainville and Buka, which constitute the district of Kieta, their total area being about 3,400 square miles.

These two islands are very mountainous, particularly Bougainville, where there are found several volcanoes. Mount Balbi, a peak in the Emperor Range in the centre of the island, with a height of over 10,000 feet, is a dormant volcano, whilst Mount Bagana, in the Crown Prince Ranges is at the present time an active crater.

There are several good harbours along the coast, the principal being Kieta on the East coast of Bougainville. This is a very well protected bay, almost landlocked, with its entrance protected by a well defined coral reef. Shipping of fair draught finds a suitable anchorage close inshore to the little town of Kieta. Other good harbours are found at Rava and Tinputs, also at Carola Haven on Buka Island.

The interior of Bougainville was practically unknown, but during 1919, it was partially explored by Australian patrols, and a well equipped expedition commenced to construct a road which will ultimately link up the Eastern and Western sides of the island. It will then be possible to get into touch with the tribes of the interior which at present are principally notable for their aggressive attitude towards white men.

#### *Industry Trade and Customs.*

The Territory comprises some 24,000,000 hectares of land, most of which is capable of cultivation under tropical staples. Of this area, about 267,387 hectares are alienated, and approximately 83,000 hectares are under cultivation.

In the many islands of the Archipelago and the North-East New Guinea, land of all kinds is to be met with, from coral atolls to granite peaks. A considerable portion is flat and comparatively low lying, with soil ranging from sand to light sandy loam, usually overlying a sub-soil of broken coral ideal for coconuts, with which much has been planted.

Larger islands, while they frequently have a margin, or at least stretches of soil similar to the above, rise into undulating foot-hills, with or

without peaks and headlands. On these the soil is of a heavier nature, ranging from sedimentary deposits to rich, and in some cases, comparatively recent, volcanic soils. Still larger islands, which often have a range of hills as a backbone, and areas of swamp near the coast, have soils grading from light sand to rich heavy clays. Many of these are well watered with creeks and rivers, in the valleys of which the richest of alluvial soils are to be met with, capable of growing anything.

Not only is the Territory particularly favoured in the matter of soils and rainfall, but the fact that it is outside the cyclone and hurricane belts, enables agricultural industries to be undertaken with greater security than many places afford.

At present the Territory is entirely dependent upon the one industry of agriculture, and almost entirely on the one staple of coconuts for the manufacture of copra. There are at present, some 350 to 400 coconut plantations opened, owned and worked by Europeans, of an average area of between four and five hundred acres, scattered through the Archipelago.

Other staples being cultivated to a smaller extent are, in about the order mentioned, cocoa, coffee, tobacco, arrowroot and kapok, often in conjunction with coconuts or each other.

The mineral wealth of the islands can only be surmised. Gold was discovered in February, 1926, at Edie Creek, 65 miles south-west of Salamaua, the Port of the Goldfields. Salamaua is situated on an isthmus of a bay in Huon Gulf, on the mainland of New Guinea. The amount of gold exported from the inception of the field to 30th June, 1930, was 350,873 ozs., valued at 761,067*l.* and all the production was obtained from alluvial mining. Promising lodes have recently been discovered. Access to the field is difficult, as it is situated at an altitude of 6,600—6,800 feet, and the journey from the coast by road occupies seven days. The journey by air takes about one hour, and several companies are operating air services. Mineral oil has been found although as yet not in commercial quantities. Sulphur is obtainable, whilst it is believed that copper and nickel deposits exist. The transport difficulty has proved a very effectual bar to the efforts of prospectors up to the present; and it is only with the expenditure of considerable capital that any venture is likely to be successful until the country has been opened up.

The shell fishing industry is one that cannot be overlooked when assessing the commercial value of the colony. Large quantities of trochus, green snail, gold-lip and black-lip are obtained yearly and the revenue obtained therefrom, which includes a royalty, is considerable. The value of marine products exported from the Territory during the year ended 30th June, 1930, amounted to 24,848*l.*

The import tariff is largely on a 10 % *ad valorem* basis. Export duties are levied on copra, trepang, tortoise shell, mother of pearl shell and the feathers of certain birds.

#### *Climate and Health.*

The climate, and particularly the rainfall over so widely spread a group of islands, must naturally vary considerably in different parts. Generally speaking, the rainfall is plentiful and reliable. A N.W. monsoon period between December and February; and a S.W. between March and November are experienced. The latter, during which steady trade winds occur,

and the islands are seldom without a breeze, constitutes the cooler and more pleasant portion of the year. No especial dry belts exist, and droughts of more than a few months' duration are unknown.

The average rainfall for the Territory may be taken as 100 to 125 inches per annum. The following are the averages for the districts:—

Rabaul, New Britain .. ..	87·19
Aitape, New Guinea .. ..	95·41
Madang, New Guinea .. ..	137·19
Kavieng, New Ireland .. ..	124·08
Manus, Admiralty Islands ..	150·03
Kokopo, New Britain .. ..	95·70
Morobe, New Guinea .. ..	98·50
Kieta, Bougainville .. ..	133·87
Namatani, New Ireland .. ..	132·30
Gasmata, South New Britain ..	257·65

The following are results of observations taken at Rabaul, the capital, on the Island of New Britain, about 4½ degrees south of the equator, from 1916 to 1923:—

Shade temperature—

Average monthly mean .. ..	81·3° F.
Yearly average rainfall .. ..	86·19 ins.

Many settlers, after a few years, affirm that the climate is pleasant, and certainly the lure of the tropics is no myth to those who have the temperament. For all this, the climate is tropical, and is not to be treated with disdain. Reasonable care and the exercise of common sense, with due attention to hygiene, are necessary to avoid the effects of malaria and other tropical ailments that any neglect of precautions render practically inevitable.

Malarial fever offers the principal obstacle to white colonists in this territory, some parts of the islands being more subject to the ravages of the fever than others. The efforts of the Australian medical authorities have met with great success, and the percentage of people suffering regularly from malaria has gradually decreased from year to year. In Rabaul, where much work has been performed on sanitation and bush clearing around the town, the malarial carrier, the anopheline mosquito, has been almost eliminated, with the result that malaria cases are at present few and far between. The man who suffers is of course the planter living in places remote from the activities of the medical authorities. Elephantiasis makes an appearance occasionally amongst the native population; and, as is the case in most tropical countries, dysentery and tubercular diseases yearly claim a number of victims from the colored races.

Constant care has to be exercised to prevent the introduction of epidemic diseases, such as smallpox, influenza or measles, the latter of which, while comparatively harmless among white races, becomes calamitously destructive among the careless living slightly clad natives.

#### *Native Population.*

Head-taxes are collected every year and a census is taken regularly in the parts of the Territory under Government influence. The total native population is estimated at 521,385. The non-native population is 4,143.

Generally speaking the New Guinea aborigine is of a good type, well built, and, when civilised, very amenable to discipline. As a rule he is fairly stolid, though flashes of brilliance are found amongst members of some of the tribes. In every island the different branches or tribes appear to be

innumerable, and even at short distances it is found that great physical differences occur in the types; while tribes only ten or twelve miles from each other often speak totally different dialects. The result is that interpretation is very difficult for travellers or for the natives amongst themselves, but throughout the colony the use of "pidgin" English has become so established, that even the Germans spoke "pidgin" English to their labourers. Natives are recruited for many purposes; they make good plantation labourers, boats' crews, or domestic servants, whilst many who have received special training have become adept artisans. The German Government had commenced a technical school for natives at Rabaul. This school has been continued by the Australian Authorities who have also established an Elementary School and a school for half-caste children.

Work of this nature is also carried out by the Missions.

#### Communications.

A regular subsidized shipping service between Sydney (Australia) and New Guinea is maintained by vessels of Burns Philp & Co. Ltd., pursuant to an agreement with the Commonwealth Government.

In addition vessels from Europe, Australia, U.S.A. and the East call at Rabaul.

Between Rabaul and the various islands small steamers maintain a regular service, carrying mails and stores to the outlying districts, and loading with copra, etc., for transhipment at Rabaul. Radio-telegraphic communication is maintained throughout the group by a number of wireless stations.

#### Revenue and Expenditure.

	REVENUE.	EXPENDITURE.
1922-23 ..	£259,286 ..	£250,431
1923-24 ..	£248,743 ..	£268,337
1924-25 ..	£242,775 ..	£250,902
1925-26 ..	£259,018 ..	£242,991
1926-27 ..	£305,522 ..	£280,190
1927-28 ..	£364,581 ..	£331,297
1928-29 ..	£351,000 ..	£377,507
1929-30 ..	£339,643 ..	£356,312
1930-31 ..	£290,234 ..	£293,378

Public Debt on 30th June, 1928, £66,775; 1929, £103,999; 1930, £97,899; 1931, £101,740.

#### Trade.

	IMPORTS.	EXPORTS.
1921-22 ..	468,711 ..	499,197
1922-23 ..	516,455 ..	630,892
1924-25 ..	537,940 ..	858,990
1925-26 ..	568,339 ..	1,105,158
1926-27 ..	660,753 ..	1,079,855

1928-29 ..	871,441 ..	1,146,112
1929-30 ..	882,016 ..	997,335
1930-31 ..	750,130 ..	919,420

#### CIVIL ADMINISTRATION.

The following are the names of the principal officials of the Civil Administration, which came into force on the 9th May, 1921:—

##### Central Administration.

*Administrator*, Brig.-Gen. Evan A. Wisdom, C.B., C.M.G., D.S.O., V.D.  
*Government Secretary*, H. H. Page.

##### Legal Department.

*Chief Judge*, D. S. Wanliass, C.M.G.  
*Judge*, F. B. Phillips.  
*Crown Law Officer*, G. Hogan.  
*Stipendiary Magistrate (vacant)*.

##### Treasury.

*Treasurer*, H. O. Townsend.

##### Audit Branch.

*Local Auditor*, H. W. King.

##### Department of Customs.

*Collector of Customs*, E. F. Phibbs.

##### Native Affairs Department.

*Commissioner*, H. C. Cardew.

##### Government Store.

*Superintendent*, J. E. Savage, M.B.E., M.O.

##### Department of Lands, Surveys, Mines and Forests.

*Secretary*, E. P. Holmes (acting).

##### Harbour Master's Department.

*Harbour Master*, C. J. R. Webb.

##### Post and Telephones Department.

*Postmaster*, E. K. Abraham.

##### Department of Public Health.

*Director*, Dr. E. T. Brennan.

##### Department of Agriculture.

*Director*, G. H. Murray.

##### Anthropological.

*Anthropologist*, E. W. P. Chinnery.

##### DISTRICT OFFICERS.

*District Inspector and Superintendent of Police*, J. Walstab.

##### New Britain.

*District Officer*, E. Taylor.  
*Assistant District Officers*, H. A. Gregory, G. Ellis, B. Calcutt, J. I. Merrylees.

##### Madang.

*District Officer*, A. J. Hunter.  
*Assistant District Officer*, H. E. Woodman.

##### Kiata.

*District Officer*, T. L. McAdam.  
*Assistant District Officer*, J. H. Jones.

##### New Ireland.

*District Officer*, D. Waugh.  
*Assistant District Officers*, J. H. McDonald, E. W. Oakley.

##### Manus.

*District Officer (vacant)*.  
*Assistant District Officer*, N. Penglase.

##### Aitape.

*District Officer*, R. Melrose.  
*Assistant District Officers*, F. W. Mantle, B. W. Sherman.

##### Morobe.

*District Officer*, E. A. Feldt.  
*Assistant District Officer*, H. L. Downing.

##### Sepik.

*District Officer*, G. W. L. Townsend.  
*Assistant District Officer*, E. D. Robinson.

## DOMINION OF CANADA.

### THE DOMINION.

The Provinces of Ontario, Quebec (formerly constituting the Colony of Canada), New Brunswick and Nova Scotia, were, by the Imperial Act, 30-31 Vict., c. 3, formed into one Dominion. This Act was brought into force on July 1st, by Royal Proclamation, bearing date the 22nd May, 1867. Its essential provisions are given below.

The Governor-General of Canada was, by Letters Patent of 1st April, 1870, appointed Governor of Rupert's Land. The admission of Rupert's Land into the Dominion of Canada after the 15th July, 1870, was provided for by Order in Council of the 23rd June, 1870, and the Province of Manitoba was erected out of this Territory by a Canadian Act, 33 Vict., cap. 3, and made a Province of the Dominion 15th July, 1870.

By Order of Her Majesty in Council, dated 16th May, 1871, issued on the authority of the British North America Act, 1867, on Addresses from the Houses of Parliament of Canada and the Legislature of British Columbia, that Colony was incorporated in the Dominion, the union taking effect from the 20th of July, 1871.

Prince Edward Island was admitted by Order in Council, bearing date 26th of June, 1873, on the 1st of July in that year.

By an Act passed in 1876, the portion of the N.W. Territories lying to the north of Manitoba was created into a separate district, under the name of the District of Keewatin, but under the control of the Lieutenant-Governor of Manitoba.

By a Canadian Act, 38 Vict., cap. 49 (1875), the territories formerly known as "Rupert's Land" and the North-Western Territory (with the exception of the portion forming the Province of Manitoba) were placed under the jurisdiction and control of a Lieutenant-Governor and Council, separate and distinct from Manitoba.

On the 31st of July, 1880, in compliance with the prayer of an address from the Parliament of Canada, dated the 3rd of May, 1878, Her Majesty issued an Order in Council annexing to the Dominion of Canada from the 1st of September, 1880, such British Possessions in North America (other than Newfoundland) as were not previously included in the Dominion.

By Minute of Council of May 17th, 1882, the districts of Assiniboia, Saskatchewan, *the* Alberta, and Athabaska, were created, and

by Order in Council October 2nd, 1885, modified by Order in Council 18th December, 1897, the remaining territory was subdivided into the districts of Ungava, Franklin, Mackenzie, and Yukon, the last-named being made a separate territory, distinct from the North-West Territories, under special regulations by chapter 6 of the Acts of the Federal Parliament, 1898.

By chapters 3 and 27 of the Act of 1905 the four provisional districts of Alberta, Assiniboia, Saskatchewan, and Athabaska were formed into the two provinces of Alberta and Saskatchewan, and were admitted into the Dominion as such on the 1st September, 1905. The dividing line runs north and south. Alberta has an area of 255,285 square miles, and Saskatchewan of 251,700 square miles.

By Federal Act passed in the Session of 1912, the boundaries of the Provinces of Ontario, Quebec, and Manitoba were extended. Ontario was enlarged by 146,400 square miles, Quebec by 354,961, and Manitoba by 178,100. The area of Quebec was reduced by 112,400 square miles as a consequence of the Labrador Boundary Award, made on March 1st, 1927, by the Judicial Committee of the Privy Council.

### *History.*

Particulars as to the history of each province will be found in the following pages, but it may here conveniently be stated that the north-east coast of the Dominion seems to have been first discovered by the Norse seamen of the middle ages. Cabot reached Labrador in 1497, and the fisheries off this coast were frequented early in the sixteenth century. In 1535 Cartier settled on the St. Lawrence on behalf of France, and others followed. The whole territory became British by the Treaty of Paris, 1763.

### *Constitution.*

The Executive Government is vested in the Crown, and is exercised by a Governor-General appointed by the King, assisted by a Privy Council chosen and summoned by himself. The Cabinet, as in England, is a Committee of the Privy Council, formed of the principal members of the Government. The seat of Government, until the King shall otherwise direct, is Ottawa, in Ontario.

The supreme legislative power is vested in a Parliament, consisting of the King, a Senate, and a House of Commons. The Senate now consists of 96 members nominated for life by the Governor-General, and so chosen that 24 represent Ontario, 24 Quebec, 24 the Maritime Provinces, and 24 the Western Provinces. The qualification for Senator is the possession of property worth \$4,000, age of not less than thirty years, British nationality and residence within the province for which he is appointed. The House of Commons consisted originally of 181 elected members, which number has been increased by additions on the accession of new provinces, and by the increase in population, and is at present 245; 82 representing Ontario, 65 Quebec, 14 Nova Scotia, 11 New Brunswick, 17 Manitoba, 14 British Columbia,

Alaska, were created, and | Ontario, 10 Quebec, 12 Nova Scotia, 11 New Brunswick, 17 Manitoba, 14 British Columbia,

4 Prince Edward Island, 16 Alberta, 21 Saskatchewan, and 1 the Yukon Territory. The basis on which the number of members allotted to each province is regulated, is that Quebec shall always have 65, and the other provinces a proportional number according to their population at each decennial census. There is no property qualification. Each member of the Senate receives \$4,000 per annum, and each member of the Commons a maximum of \$4,000 per session, with certain deductions for days of non-attendance. A Parliament lasts five years if not sooner dissolved. Election is by ballot.

For each province there is a Lieutenant-Governor, appointed by the Governor-General, and holding office during pleasure, but not removable within five years of appointment, except for cause assigned. He receives a salary fixed and provided by the Dominion Parliament, and is assisted by an Executive Council or Cabinet possessing the confidence of the Provincial Assembly.

Each province has a "Legislative Assembly," and in Quebec there is also a "Legislative Council," forming a second chamber. The Provincial Legislatures possess the power of altering their constitutions. The territory not comprised within any province (Yukon and the North-West Territories) is very thinly inhabited. The Yukon Territory is governed by an appointed Gold Commissioner and an elective council of three members. The Northwest Territories are governed by a Commissioner and six councillors appointed by the Governor-General in Council.

The Dominion Parliament has exclusive legislative power in all matters except those specifically delegated by the constitution to the Provincial Legislatures. The Canadian Constitution is in this respect the reverse of that of the United States. Among such general matters may be named public finance, trade regulation, postal service, currency, coinage, banking and navigation matters, defence, the law relating to crimes, bankruptcy, copyright, patents, naturalisation, and Indian affairs.

The powers of the Provincial Legislatures are confined to certain specified subjects, of which the chief are the alteration of their own constitutions, direct taxation within the province and provincial loans, the management of provincial public lands, and of provincial and municipal offices, hospitals, gaols, &c., licences, local works, and the general civil law and procedure. With regard to education, they have full powers, subject only to certain provisions to secure protection to religious minorities. In agricultural, quarantine, and immigration matters, they possess concurrent legislative powers with the Dominion Parliament.

The Judges are appointed by the Governor-General in the superior, district, and county courts throughout the Dominion, except in the probate courts of Nova Scotia and New Brunswick.

The Dominion Government assumed the Provincial debts existing at the time of the Union, and agreed to pay to each Province an annual subsidy at the rate of 80 cents per head. Each Province also received an annual allowance for Government.

The Provinces of Nova Scotia and New Brunswick, whose public debts were less, proportionally, at the Union than that of the old Province of Canada became entitled to receive an interest allowance, payable half-yearly, on the difference between their respective debts and certain stipulated amounts.

The annual subsidies granted to the several provinces were revised by Imperial enactment (1907), with the following effect:—

(a) A fixed grant according to population:

Where population is—	\$
Under 150,000.....	100,000
150,000, but does not exceed 200,000	150,000
200,000 " " "	400,000
400,000 " " "	800,000
800,000 " " "	1,500,000
over 1,500,000.....	220,000
	240,000

(b) A grant at the rate of 80 cents per head of the population of the province up to 2,500,000, and at the rate of 60 cents per head of so much of the population as exceeds that number.

(c) An additional grant of \$100,000 yearly to the province of British Columbia for a period of ten years, from 1907.

In Alberta and Saskatchewan, each province receives until its population reaches 400,000, an annual sum of \$375,000, payable half-yearly; thereafter until the population reaches 800,000, an annual sum of \$562,500; thereafter until the population reaches 1,200,000, \$750,000; thereafter the sum payable shall be \$1,125,000.

Each of these two provinces, inasmuch as they were not in debt at the time (1906) of their statutory creation, are entitled to be paid half-yearly, in advance, an annual sum of \$405,375.

By chapter 32 of the Acts of the Parliament of Canada, 1912, the boundaries of the Province of Manitoba were extended northward to the 60th parallel of north latitude, and eastward to the shores of Hudson Bay, the area of the enlarged province as a result approximating the respective areas of the Provinces of Alberta and Saskatchewan. In consequence of this enlargement allowances from the Federal Treasury practically identical in amount and upon the same basis as the allowances or grants to Alberta and Saskatchewan, as recited in the preceding paragraphs became payable to the Province of Manitoba.

By chapter 42 of the Acts of 1912, an additional annual grant of one hundred thousand dollars was made to the Province of Prince Edward Island.

In 1930, the Crown lands of Manitoba, Saskatchewan, and Alberta, also the Crown lands in the Railway Block and the Peace river block in British Columbia, which had previously been held in the right of the Dominion Government, were transferred to the respective provinces except for the existing Indian reserves and national parks, which remain Dominion lands.

Bills passed by the Provincial Legislatures require the assent of the Lieutenant-Governor, and may be disallowed within a year by the Governor-General. Those passed by the Dominion Parliament require the assent of the Governor-General, and may be disallowed within two years by the King.

Provision was made in the Act constituting the Dominion for the admission into it of any of the other British possessions on the continent of North America, and they have all been since admitted except Newfoundland. Provision was also made for the construction of a railway from the River St. Lawrence to Halifax, and (in the Order in Council admitting British Columbia) for the construction of a railway from the Atlantic to the Pacific Ocean. Both these have been constructed.

#### Local Government.

In all the provinces local self-government has been developed to the fullest extent. In the complete form as adopted by Ontario,

By chapter 42 of the Acts of 1912, an additional annual grant of one hundred thousand dollars was made to the Province of Prince Edward Island.

In 1930, the Crown lands of Manitoba, Saskatchewan, and Alberta, also the Crown lands in the Railway Block and the Peace river block in British Columbia, which had previously been held in the right of the Dominion Government, were transferred to the respective provinces except for the existing Indian reserves and national parks, which remain Dominion lands.

Bills passed by the Provincial Legislatures require the assent of the Lieutenant-Governor, and may be disallowed within a year by the Governor-General. Those passed by the Dominion Parliament require the assent of the Governor-General, and may be disallowed within two years by the King.

Provision was made in the Act constituting the Dominion for the admission into it of any of the other British possessions on the continent of North America, and they have all been since admitted except Newfoundland. Provision was also made for the construction of a railway from the River St. Lawrence to Halifax, and (in the Order in Council admitting British Columbia) for the construction of a railway from the Atlantic to the Pacific Ocean. Both these have been constructed.

#### Local Government.

In all the provinces local self-government has been developed to the fullest extent. In the complete form as adopted by Ontario,

Manitoba, British Columbia, and other provinces, the whole municipal organisation comprises: (a) the townships, being rural districts of an area of 8 or 10 miles square (in the Prairie Provinces 6 miles square); (b) villages; (c) towns. Such of these as are comprised within a large district, called a county, constitute (d) the county municipality; (e) cities in the provinces of Manitoba and Ontario are established from towns when their population exceeds 10,000 and 15,000 respectively. In the other provinces they are incorporated under certain Municipal Codes and Acts. The townships and villages are administered by a reeve and councillors; the towns by a mayor and councillors, and the cities by a mayor and aldermen. The governing body of the county municipality is composed of the members elected by districts containing one or more townships or villages, the presiding officer being styled "Warden." The Councils have powers to levy rates, create debts, promote agriculture, trade or manufactures, or railways, powers relating to drainage, roads, paupers, cemeteries, public schools, free libraries, markets, fire companies, preservation of the peace, &c.

The number of Municipalities in Canada, by Provinces and Classes, in 1929, was:—

Prince Edward Island	..	..	..	7
Nova Scotia	..	..	..	69
New Brunswick	..	..	..	45
Quebec	..	..	..	1,492
Ontario	..	..	..	937
Manitoba	..	..	..	175
Saskatchewan	..	..	..	790
Alberta	..	..	..	593
British Columbia	..	..	..	73
Total	..	..	..	4,181

#### *Situation and Area.*

The Dominion of Canada occupies the northern half of the American continent (except Labrador, Newfoundland, and Alaska, the latter belonging to the United States), stretching from latitude 49° to beyond the polar circle, and including the islands of the northern archipelago lying in the Canadian sector. It comprises an area computed at 3,690,043 square miles (30 times the area of the United Kingdom, over three times that of British India). The seven older Provinces of the Dominion (including territory added to the Provinces of Ontario, Quebec and Manitoba) comprise a little over 1,666,300 square miles. The Dominion includes the islands of Anticosti, Prince Edward Island, and Cape Breton on the east, and Vancouver and Queen Charlotte Islands on the west.

#### *Population of Dominion.*

	1911.	1921.	1931*.

Total	7,206,643	8,788,483	10,353,778

\* Preliminary figures.

Approximately 2½ million of the people are of French extraction, mostly residing in Quebec, where French is the language generally spoken.

The total population includes about 108,012 (1929 departmental census) Indians, living chiefly in Manitoba, British Columbia, and the North-West Territories. They are under the supervision of Government agents, and have large districts reserved for them, where they live mainly by hunting, fishing, and traffic in furs. According to the census of 1921 there were 39,587 Chinese in Canada, many of whom (23,533) were in British Columbia, and a few thousand Esquimaux along the northern coasts, included with Indians in census figures.

The number of immigrants arrived during the year ended 31st March, 1931, was 88,223, of whom 27,584 were British, and 24,280 were from the United States.

The population of the chief towns according to the preliminary figures of 1931 census, was as follows:—

Montreal	..	..	..	810,925
Toronto	..	..	..	637,582
Winnipeg (1926)	..	..	..	217,587
Vancouver	..	..	..	245,307

Canadian manufacturing has grown steadily to reach the stage indicated by the table which follows. The utilization of hydro-electric power in Ontario and Quebec, which lack coal, is an important phase of the recent development. In the Dominion as a whole, 6,125,012 horse power had been developed up to Jan. 1st, 1931, about 78 per cent. of it in Quebec and Ontario.

The imports for home consumption from the United States in 1930-31 were \$584,425,581. \$108,670,348 of dutiable goods were imported from the United Kingdom.

### Industry.

The main industry of the Dominion is agriculture, an enormous quantity of cereals and dairy produce being raised and exported. "Homesteads" of 160 acres can be obtained without any payment, and the process of settlement on the land in the west is rapidly going on; about 35 per cent. of the population is engaged in agriculture, and 17,504 "homesteads" were granted in the fiscal year 1930. In 1930 there were 2,693 butter and cheese factories and 26 factories producing condensed milk and cream. In 1930 the quantity of creamery butter made was 187,151,247 lbs., valued at \$57,177,798, and the quantity of cheese made was 118,919,558 lbs., valued at \$18,105,447. The value of land, buildings and plant was \$57,098,215 in 1929. The number of persons employed in factories during 1929 was 12,746, and the amount paid for salaries and wages was \$13,826,891.

#### Immigration.

The immigration policy of the Government of Canada is administered by the Department of Immigration and Colonization, with headquarters in Ottawa. Canadians prefer that settlers should be of a readily assimilable type, related to one or other of the great races now inhabiting the country, and thus prepared for the assumption of the duties of democratic citizenship. There are strong prohibitions against undesirable classes; special legislation is also in effect with regard to the immigration of Orientals, the latter problem being fundamentally economic rather than racial.

The policy for many years prior to the summer of 1930 was one of encouragement to agriculturists and female domestic help. An important change in immigration regulations was made by Order in Council on August 14, 1930, when immigration, except of British from the Mother Country or a Dominion and of U.S. citizens coming from the United States, was limited to two classes—(a) wives and unmarried children under eighteen years of age, joining family heads established in Canada and in a position to look after their dependents; (b) agriculturists with plenty of money to begin farming in Canada. This limitation applies to the whole continent of Europe as well as to many other countries. Regulations have not been changed affecting immigration from the British Isles, Overseas British Dominions or the United States, but a policy of no solicitation has been rigidly adopted.

For many years the immigration regulations have contained a general provision that immigrants coming to Canada must have sufficient funds to look after themselves until employment is secured. This regulation was not always strictly enforced when times were good and work was plentiful. It is now strictly enforced as a protection both to the immigrant and to Canada.

In 1931, immigration decreased to 88,223.

### Products.

The total yield of wheat in Canada for the year 1930 was returned as 397,892,000 bushels from 24,897,900 acres. The average yield per acre for Canada was 16.0 bushels. For oats the production was 423,148,000 bushels from 13,258,700 acres. The average yield per acre was 31.9 bushels. Barley yielded 135,160,200 bushels from 5,558,700 acres, the average yield per acre being 24.3 bushels. Flaxseed gave a total yield per acre of 4,399,000 bushels from 581,800 acres. The yield per acre was 7.6 bushels. For the remaining grain crops the total yields and average yields per acre were in bushels as follows:—Rye, 22,018,500 average 15.2; peas, 2,370,600, average 18.3; beans, 1,438,600, average 14.6; buckwheat, 10,903,300, average, 22.2; mixed grains, 44,276,000, average 36.9; husking corn, 5,526,000, average 36.1.

The production of potatoes in Canada in 1930 was 48,241,000 cwts. from 571,300 acres, an average of 84.4 cwts. per acre. Turnips, mangolds, etc., yielded 41,064,000 cwts. from 225,930 acres, an average of 181.8 cwts. per acre. Sugar beets yielded 471,000 tons from 52,500 acres, or 8.97 tons per acre. The yield of hay and clover was 16,397,000 tons from 10,618,200 acres. The average yield per acre was 1.5 tons. Grain hay yielded 3,159,000 tons from 1,798,000 acres, the average being 1.76 tons per acre. Alfalfa yielded 1,640,000 tons from 744,000 acres, or an average of 2.20 an acre.

The fisheries of the seaboard provinces are very extensive, British Columbia leading in recent years, and large quantities of dried, pickled and canned fish and lobsters are exported. There are also important fisheries in the Great Lakes and other inland waters. The value of the yield of all fisheries in the calendar year 1930 was \$47,798,920, and the number of persons employed in connection with the fisheries was 79,549.

The principal minerals produced in 1930 were coal, \$52,849,748; gold, \$43,453,801; copper, \$37,948,369; nickel, \$24,455,133; stone, sand and gravel, \$21,379,122; cement, \$17,713,067; lead, \$13,102,635; natural gas, \$10,289,985; silver, \$10,089,376; zinc, \$9,635,166; asbestos, \$8,390,163; lime, \$4,038,698; gypsum, \$2,818,788; salt, \$1,694,631; cobalt, \$1,144,007. The total production of minerals was \$279,873,578.

(c)

The pulp and paper industry made satisfactory progress in 1930; there were 109 mills in operation, and the value of pulpwood exported, pulp exported, and paper manufactured was \$226,297,979.

A century ago the value of the furs exported was greater than that of any other product. Canada is still the great fur preserve of the world; furs to the value of \$15,093,798 were exported in the fiscal year 1930-31.

The value of lumber production in 1929 was \$113,349,886. The timber on about two-thirds of the forest area is either too small or too far from transportation facilities to be worked profitably under present conditions.

### Shipping.

The arrivals and clearances show, in the fiscal year 1929, a total tonnage of 177,173,562 tons. Engaged in the sea-going trade, 52,992,232 tons; 87,734,773 tons engaged in coasting trade, and 36,446,567 tons engaged on inland waters between Canada and the United States.

The number of vessels on the Register Books of the Dominion on 31st December, 1929, was 8,899 with a net tonnage of 1,375,493. Of this number 5,666 were steamers, with a gross tonnage of 1,483,068. The estimated number of men and boys (inclusive of masters) employed was 45,339.

Sea-going shipping figures in 1930 were as follows:—

Nationality.	Entered.		Cleared.	
	No. Vessels.	Tons Register.	No. Vessels.	Tons Register.
British ..	2,858	10,724,845	2,776	9,446,538
Canadian ..	8,926	4,829,904	9,219	4,844,044
Foreign ..	9,799	11,601,107	9,890	11,545,884
<b>TOTAL..</b>	<b>21,583</b>	<b>27,155,766</b>	<b>21,885</b>	<b>25,836,466</b>

The inland international shipping traffic on the Great Lakes is also very important.

On March 31st, 1930, the number of lights shown was 1,855, lightships 11, and fog-alarm stations, 13; the number of fog whistles 8, hand fog horns, fog bells, etc., was 370; the number of gas buoys, whistling buoys, bell buoys, and submarine bells, 588; the number of light keepers and engineers of fog-alarms, with masters of lightships, was 1,207.

### Railways.

The total railway single-track mileage in Canada in 1930 was 42,075 miles. On the same date the capital liability was \$4,101,124,842. Of this amount \$1,455,492,922 represents stocks, and \$2,645,631,920 funded debt.

During the year 1930, the steam railways carried 34,698,767 passengers and 115,229,511 (excluding duplications 96,194,017) tons of freight. The total earnings during the year were \$454,231,650. The operating expenses were \$380,723,412 as against \$433,077,113 in the previous year.

The aid granted in the form of cash subsidies, loans, subscription to shares, etc., by the Dominion and Provincial Governments and Municipalities up to December 31st, 1930, is as follows:—

Dominion Government:—			
Cash subsidies .. .. .	..	..	\$118,659,359
Loans .. .. .	..	..	15,142,633
Cost of Lines handed over to C.P.R. ..	..	..	37,790,025
Paid to Quebec Government .. .. .	..	..	5,180,063
<b>Total .. .. .</b>	<b>..</b>	<b>..</b>	<b>\$176,752,070</b>
Provincial Governments .. .. .	..	..	\$33,285,615
Municipalities .. .. .	..	..	12,988,128
<b>Grand Total .. .. .</b>	<b>..</b>	<b>..</b>	<b>\$223,025,813</b>

The Dominion and Provincial Governments have also made land grants amounting to 47,290,566 acres.

The implement clause of the Grand Trunk Pacific agreement provides that the Government shall make up the difference between the amount realised in certain bonds and their par value. Since 1886 the aid granted to other railways includes the sum of \$10,189,521 paid by the Government to the Canadian Pacific Railway Company for land taken over by the Government from the Company's land subsidy.

In 1917 an Act was passed authorising the Dominion Government to take over the Stock of the Canadian Northern System. This was appraised and finally acquired for \$9,733,333 and the road taken over in September, 1919, and operated by the Government through a Board of Directors.

In 1918 certain branch lines in New Brunswick were taken over by the Dominion Government, and during 1920 the Lotbinière and Megantic, Caraquet and Gulf Shore, Cape Breton, and Quebec and Saguenay also became part of the Government railways. The system known as the Canadian Government Railways, to distinguish from the Canadian Northern system, both systems comprising the Canadian National Railways, now includes the Intercolonial, National Transcontinental, Prince Edward Island, and several small lines. The Canadian Government Railways also operate the St. John and Quebec Railway which was purchased in 1929.

In 1920 the Government took over control of the Grand Trunk Pacific Railway and branch lines as receiver, and during the same month entered into an agreement with the Grand Trunk Railway Company whereby the Government agreed to acquire the preference and common stock of the company, the value to be determined by arbitration and to guarantee payment of dividends on the present guaranteed stock amounting to 12,500,000, and payment of interest upon the present debenture stock aggregating 31,926,125.

In 1923 the whole of the preference and common stock of the Grand Trunk Railway Company was, by Order in Council, vested in the Minister of Finance in trust for His Majesty.

In the same year an Order in Council was passed handing over to the Canadian National Railway Board the management and operation of the Canadian Government Railways, designated specifically as: The Intercolonial Railway, The National Transcontinental Railway, The Lake Superior branch, leased from the Grand Trunk Pacific Railway Company, The Prince Edward Island Railway, The Hudson Bay Railway, and all other railways and branch lines vested in His Majesty, and comprising what has been known as the Canadian Government Railways. This Order in Council superseded and cancelled the Order in Council of November 20th, 1918, which had appointed the Canadian Northern Board to operate and manage these railways.

The unification of the Grand Trunk and Canadian National Railways was provided for by Order in Council of January 30th, 1923, which also brought into effect the Act to incorporate the Canadian National Railway Company and respecting Canadian National Railways (Chap. 13, 1919). This was followed on February 5th, 1923, by an Order in Council establishing the head office of the Canadian National Railways at Montreal, Quebec.

Under the Maritime Freight Rates Act, effective from July 1st, 1927, the accounts of the lines of the Canadian National Railway east of Lewis, and Diamond Junction, Quebec, were segregated from the accounts of the remainder of the system, and the Act ordered a reduction of 20 per cent. in certain

freight rates on these lines designated as the Eastern Lines of the Canadian National Railways. Any deficit resulting from the operation of these lines will be met by a separate appropriation by the Dominion Government.

The mileage operated, gross earnings, operating expenses and net operating revenue of the two large systems of Canada, are as follows:—

Canadian National (including 1,829 miles in United States) ...	23,768
Canadian Pacific ...	15,106 miles of single track.
Total in Canada...	37,045 " " " "

The total single track mileage operated in Canada was 42,075.

	1930.	
	Gross Earnings.	Operating Expenses. Net Operating Revenue.
Canadian National ...	\$250,368,998	\$228,288,023 \$22,080,975*
Canadian Pacific	180,022,386	138,523,657 41,498,729
Totals ...	\$430,391,384	\$366,811,680 \$63,579,704

The Canadian National lines and the Canadian Pacific, the latter with 15,106 miles of track—comprise 87% of the total mileage in Canada and form three transcontinental systems. The Canadian Pacific main line extends from St. John to Vancouver, about 3,367 miles. The Canadian National has practically two complete lines across the continent from Halifax to Vancouver and St. John to Prince Rupert.

#### Telegraphs.

There were in 1930, 52,824 miles of telegraph line, and 371,747 miles of wire in operation in Canada, of which 11,399 are owned and operated by the Dominion Government; 15,558,224 land messages were sent in 1930 (not including weather and shipping reports), and the number of offices was 4,661. Canada ranks seventh in actual telegraphic mileage among the various countries of the world, and first with respect to the number of offices in proportion to population. There is direct cable communication with Great Britain, Newfoundland, and Bermuda, and also a deep-sea cable between Vancouver Island and the United States. In the latter part of 1902 telegraphic communication was opened up between Canada and the Australian Colonies by the Pacific Ocean Cable.

Wireless Telegraphy.—On March 31st, 1931, there were 1,075 coast and land wireless stations, 319 ship wireless stations, 88 broadcasting stations, and 523,100 private receiving stations for the reception of broadcast programmes.

The ship and shore wireless traffic for the twelve months ended 31st March, 1931, amounted to 396,727 messages and 8,534,982 words.

Wireless "beam" stations are operated at Montreal, Quebec, for direct communication with Great Britain and Australia, and a station at Louisbourg, N.S., provides a long distance service to ships.

The telephone is very generally used. On the 31st December, 1929, there were 1,399,986 telephones and 4,476,213 miles of telephone wire in use. The revenue amounted to \$65,240,610, and the operating expenses to \$56,569,517. On December 31st, 1929, the capital liability of telephone companies in Canada was \$234,943,307, of which \$93,737,979 are stocks and \$141,205,328 are funded debt.

#### Canals.

There are six important systems of Government canals, affording, with the St. Lawrence River connections, magnificent inland communications. From

\*C.N.R. Canadian Lines only.

Lake Superior to the sea there is water passage nowhere less than 14 feet deep. The total length of canals proper open is 1,594 miles (of which 117.2 are constructed canals), but the aggregate length of inland navigation rendered available by them is 3,000 miles, the St. Lawrence system alone having a length of 2,384 miles. The receipts for the year ending March 31st, 1930, were \$1,043,647, which are from water and other rentals, the canals being free of tolls, and the working expenses including repairs were \$2,811,977. The sum of \$225,900,708 has been expended on the construction, enlargement and repairs of these canals, including the amount expended on the Sault St. Marie Canal to connect Lakes Superior and Huron, which was opened in the season of 1895. The new Welland Ship Canal between Lakes Erie and Ontario, with (at present) a 25 foot channel but 30 foot locks, was officially opened on April 20th, 1931, allowing the largest Upper Lake steamers to proceed through Lake Ontario and as far as Prescott on the St. Lawrence.

The Canal tolls were abolished by way of experiment in 1903, and have not been reimposed.

Total vessel tonnage through the canals during 1930 was 16,173,621, carrying 133,266 passengers, and 14,803,334 tons of freight.

#### Currency and Banking.

There is an uniform currency throughout the Dominion, consisting of dollars and cents, \$4-86¢ being equal at par to one pound sterling. For convenience in reckoning, especially in taxation, the mill, one-tenth of a cent., is used, although it is not a unit of currency. In addition to this Canadian coinage, the gold coins of the United States as well as British gold coins are legal tender.

The Ottawa Branch of the Royal Mint was established in pursuance of The Ottawa Mint Act, 1901 (1 Edw. VII., c. 4), under which an annual sum not exceeding \$75,000 is payable to the Imperial Treasury for the purpose of defraying the salaries of officials and other expenses of the Mint, the fees and all sums received being retained by Canada. Arrangements are now concluded for the taking over of the Ottawa Mint by the Dominion Government.

Memorandum of silver, bronze and nickel coin issued by the Ottawa Mint during the calendar years:—

Description of Coins.	1928.	1929.	1930.
	Issued.	Issued.	Issued.
Silver .. .. .	\$ 867,000	\$ 1,081,000	\$ 326,000
Bronze .. .. .	92,100	123,300	13,400
Nickel .. .. .	250,000	267,000	164,500

The Mint issues silver, nickel, and copper coins for circulation in Canada.

The Postal Savings Banks, on March 31st, 1931, had \$23,977,564 on deposit. There are two savings banks operating under special charter, and these had on deposit on March 31st, 1931, \$69,820,422. In addition all the 11 chartered banks have savings departments, in which the deposits are "payable after notice or on a fixed day." The average amount of such deposits for 1930 was \$1,427,569,716.

The following banks were established in Canada, October, 1931:—

#### Ontario—(Headquarters).

Bank of Toronto      Canadian Bank of Commerce  
Dominion Bank.      Imperial Bank.  
Bank of Nova Scotia.

#### Quebec—(Headquarters).

Bank of Montreal.      Banque Canadienne  
Banque Provinciale du      Nationale.  
Canada.      Royal Bank of Canada.

Barclay's Bank (Canada).

The chartered banks had, Dec. 31, 1930, 4,083 branches distributed throughout the Dominion and 179 in other countries.

### BANKS AND BANKING.

General statement of Chartered Banks, 1928-1930.

Note.—The statistics in this table are averages computed from the twelve monthly returns.

Calendar year.	Capital paid up.	Notes in Circulation.	Totals on Deposit.	Current Loans in Canada.*	Liabilities.†	Assets.
	\$	\$	\$	\$	\$	\$
1928.....	122,839,879	176,716,979	2,610,594,865	1,177,484,482	3,044,742,165	3,323,163,195
1929.....	137,269,085	178,291,030	2,096,747,857	1,342,683,355	3,215,503,098	3,528,468,027
1930.....	144,560,874	159,341,085	2,516,611,687	1,285,836,995	2,909,530,263	3,237,073,853

† Excluding capital and rest or reserve fund. \* Not including call and short loans, nor loans to the Dominion or Provincial Governments.

In addition to the notes issued by the chartered banks, the Government issues notes of small denominations (and of large denominations for the use of the banks only) and the average monthly circulation in 1890 amounted to \$15,501,360, and at March 31st, 1931, to \$141,066,257. Under the Dominion Notes Act, 1914 (5 Geo. V. c. 4), the Dominion Government is authorised to issue notes up to and including \$50,000,000 against a reserve in gold equal to one quarter of the amount. By Chapter 4, Acts of 1915, "an Act respecting the issue of Dominion Notes," the Dominion Government is

authorised to issue notes up to \$26,000,000 without any reserve of gold, \$16,000,000 of the notes to be against certain specified Canadian railway securities guaranteed by the Dominion Government. Notes may be issued to any additional amount in excess of \$76,000,000, but (except as provided by the Finance Act, 1927) an amount of gold equal to the excess must be held. Thus Dominion notes are under normal conditions gold certificates. No notes are issued below five dollars except by the Government. In 1912, the Dominion Government issued five-dollar notes for the first time.

*Post Office.*

The number of offices on March 31st, 1930, was 12,409. The net revenue for the year ended March 31st, 1930, was \$32,969,293, and the expenditure \$35,036,629. At the end of the fiscal year 1929-30, there were 4,210 rural mail delivery routes, on which were erected 237,351 boxes.

On March 31st, 1930, there were 6,209 Money Order offices; Orders issued, 17,525,979, value \$197,699,353. During the year ended March 31st, 1930, the Dominion Government paid \$1,083,436 in Ocean Mail subsidies and steamship subventions.

The mail communication with Great Britain is now an average of nine times a week via Montreal or Quebec and New York in summer, and four or five times a week via Halifax or Saint John and New York in winter. With the West Indies there is a weekly mail service via Halifax and from three to four trips per week via United States ports. There is a through service three times daily in the summer and twice daily in the winter across the continent from Halifax on the Atlantic to Vancouver on the Pacific coast by the Canadian Pacific and Canadian National Railways, at least a semi-monthly direct steamship service with New Zealand and Australia via Vancouver and San Francisco. With Japan and China there is a direct connection by steamer from Vancouver at least once a week throughout the year.

Air mail services link up the important cities of Eastern Canada with air-mail routes in the United States. As much as 48 hours can be saved on mail delivery between Western and Eastern Canada by their use.

The rates of postage are as follows:—

LETTERS.—To Canada, Great Britain and all other places in the British Empire, France, United States, and all other places in North America, 3 cents for the first oz., 2 cents for each additional oz.; other countries, 5 cents for the first oz., 3 cents for each additional oz.

POSTCARDS.—Canada, Great Britain and all other places within the Empire, France, United States and all other places in North America, 2 cents each; other countries 3 cents each.

NEWSPAPERS.—To Canada, United States and Mexico, and (if published in Canada) to United Kingdom and certain British Colonies, 1 cent per 4 oz.; in all other cases 1 cent per 2 oz.

There is a direct parcel post to the following countries: Argentina, Australia, Bahamas, Barbados, Belgium, Bermuda, Brazil, Br. Guiana, Br. Honduras, China, Colombia, Cuba, Denmark, Fiji, France, Germany, Great Britain and Northern Ireland, Grenada, Holland, Hong Kong, Irish Free State, Italy, Jamaica, Japan, Leeward Is., Mexico, Newfoundland, New Zealand, Norway, Philippine Is., Poland, St. Lucia, St. Pierre and Miquelon, St. Vincent, Sweden, Trinidad and Tobago, Union of South Africa and Venezuela.

AIR MAIL.—6 cents for first oz., and 10 cents for each additional oz. over the main air routes.

## COMMISSIONS.

*Railway Commission.*

*Chief Commissioner, Hon. C. P. Fullerton, K.C., \$12,500.*

*Assistant Chief Commissioner, S. J. McLean, M.A., LL.B., Ph.D., \$9,000.*

*Commissioners, John Angus Stoneman, T. C. Norris, \$8,000 each.*

*Counsel, A. G. Blair, K.C., \$6,000.*

*Secretary, A. D. Cartwright, \$6,000.*

*Chief Operating Officer, George Spencer, \$6,000.*

*Chief Traffic Officer, W. E. Campbell, \$7,000.*

*Civil Service Commission.*

*Commissioners, Hon. W. J. Roche, M.D., LL.D.,*

*Chairman, \$7,000; Newton MacTavish; J. Emile Tremblay, \$6,000 each.*

*Secretary, Wm. Foran, \$5,220.*

*International Joint Commission.**Canadian Section.*

*Chairman, C. A. Magrath.*

*Commissioners, Sir William Hearst, K.C.M.G.,*

*Geo. W. Kyte, K.C., \$7,500 each.*

*Secretary, L. J. Burpee, \$4,120.*

HIGH COMMISSIONER IN CANADA FOR H.M.G.  
IN THE UNITED KINGDOM.

*High Commissioner, Sir Wm. H. Clark, K.C.S.I., C.M.G., 2,500*l.* and local allowance 2,500*l.**

*Secretaries, J. H. Le Rougetel, P. Liesching, 700*l.* to 900*l.* and local allowance 600*l.**

*Registrar, C. E. Lambert, 80*l.* to 250*l.* and local allowance 350*l.**

## FOREIGN REPRESENTATIVES AT OTTAWA.

*Japan, Iyemasa Tokugawa.*

*U.S.A., Lieut.-Col. the Hon. Hanford MacNider.*

*France, Charles Arsène Henry.*

## III. THE PROVINCES.

## ONTARIO AND QUEBEC (OLD CANADA).

*History.*

It is claimed that Sebastian Cabot discovered Cape Breton Island in 1497, but the first discoverer of Canada, properly so called, was Jacques Cartier, who having spent some time in Gaspé Harbour took possession of the country by setting up a cross, on the 24th July, 1534. In 1535 he sailed up the St. Lawrence which he named the River of Hochelaga, the name applied by the Indians to the region about the Lachine Rapids.

In 1608 Quebec, the first settlement, was founded. During their early days and for a considerable time after, the French settlers were few in number, suffered great hardships, and were

much engaged in conflicts with the Indian tribes, the aboriginal inhabitants. The principal incentives to their colonisation were the profits of the fur trade and missionary zeal.

In 1759 Quebec succumbed to the British forces under General Wolfe; and in 1763 the whole territory of Canada was ceded to Great Britain by the Treaty of Paris. It may be mentioned that for three years, from 1629 to 1632, Quebec had been in English possession, having been captured by David Kirk, but was retroceded to France by the peace of *St. Germain-en-laye*.

From 1763 to 1774 Canada was governed in the main by military authority. In the latter year a nominee council was established by Act of the Parliament of Great Britain. By the same Act the Roman Catholics were given the free exercise of their religion; the Catholic clergy were declared entitled to receive their accustomed dues and rights, but with respect only to those professing the Catholic religion; and in civil cases it was declared that resort should be had to the Laws of Canada for the decision of the same.

In 1791 an Act of Parliament was passed (31 Geo. III., cap. 31), authorising the Crown to issue a proclamation dividing Canada into two Provinces, Upper Canada (now Ontario) and Lower Canada (now Quebec), and establishing a constitution for each. As the form of government was similar in each Province, a description of that of the Lower Province will suffice. By the Act in question the Legislative authority was vested in a Legislative Council appointed by the Crown, and in a House of Assembly elected by the inhabitants; the Lower Province was under a Governor, whilst the Upper was under a Lieutenant-Governor. Both the Houses of Assembly thus created, and especially that of Lower Canada, were in constant conflict with the Executive Government from the end of the American War, in 1814, until the Canadian Rebellion of 1837-8. The risings in both Provinces were caused by Governor after Governor attempting to rule by the aid of Executive Councils not possessing the confidence of the Provincial Assemblies. The rebels were suppressed with very little difficulty. Afterwards the constitution of Lower Canada was suspended, and Lord Durham was sent out from England as Governor-General, with special powers and instructions to report on the affairs of the country. He recommended a Union of the Provinces, and indeed foreshadowed the larger confederation, which has since been adopted. In accordance with Lord Durham's recommendation, the two Provinces were re-united by Act 3 & 4 Vic., cap. 35, and the Legislative Bodies of the united Provinces were consolidated: the new Legislative Council was to consist of not less than 20 members (it used in fact to exceed double that number); the members were appointed for life. Subsequently, by 17 & 18 Vict. c. 118, the Canadian Legislature was empowered to alter the Constitution of the Legislative Council. This power was utilised in 1856 by an Act of Canada which made half of the Legislative Council elective for terms of eight years. This modification was an important one, for it was because of the dissatisfaction caused by the behaviour of the elected Councillors that, on the creation of the Dominion of Canada in 1867, the new Senate was made appointive. The new House of Assembly, created in 1840, consisted of 84 members, there being an equal number from each Province. Municipal Institutions were established in Canada in 1841.

*Constitution.*

The constitution of Canada in operation under this union was defined in its main features under title I. of the Local Consolidated Stat., 1859. Canada was divided into 125 electoral districts and boroughs, returning in all 130 members to the House of Assembly, 65 for Upper Canada, and 65 for Lower Canada; whilst the Legislative Council consisted of 48 elected members, and 22 members nominated under the old constitution.

In 1854 the question of the "Clergy Reserves" was settled by the application of the property to municipal purposes, vested interests being respected. In the same year seigniorial tenure was abolished in Lower Canada.

As years passed, increasing difficulty was experienced in the conduct of public affairs owing to the antagonism of the members for Upper and Lower Canada. Things having come almost to a "deadlock" about 1864, an escape from the difficulty was sought in a project for the union of all the British North American provinces, which, after negotiation, was agreed to, and embodied in the "British North America Act, 1867."

There is an elected Legislative Assembly in each Province (Ontario, 112 members; Quebec, 85 members), elected for four years in Ontario and five years in Quebec by general suffrage, with no property qualification. Members in Ontario are paid mileage and \$20 per day for 30 days, or a maximum of \$2,000. Members in Quebec receive \$2,500 for each session of more than 30 days. Quebec also possesses a Legislative Council or Upper House of 24 members, who hold their seats for life, nominated by the Lieutenant-Governor in Council. The members are paid \$2,500 as sessional indemnity.

*Industry.*

The industrial wealth of Ontario is derived, primarily, from its farms, its forests, mines, and fisheries; secondarily, from its manufactures. In 1930, the value of the farm land, buildings, implements, production, and live stock of the province was estimated at \$2,138,037,000. There are over 23 million acres of cleared farm land occupied and over 30,000,000 acres still available. The farms average 114 acres in extent, of which 84% are owned by the occupants. The average value of farm products per acre is greater than in any other province, and the total production of field crops was placed at \$179,919,000 in 1930. Dairying and the breeding and feeding of live stock are combined with general farming. The value of the manufacturing production of the province is over \$2,103,000,000 annually.

All the fruits usually grown in the temperate zone may be produced in Ontario, not only successfully, but in a very high degree of excellence. Apples constitute the principal crop, but tender fruits such as peaches, pears, plums, and grapes, are very extensively grown in the Niagara peninsula. The canning and preserving of fruits and vegetables is a well established industry. Total commercial apple crop in 1930 was estimated at 598,039 barrels.

The value of the output of the mines and mineral industries of Ontario in 1930 was \$113,530,976 as compared with \$117,662,505 in 1929. The value of the gold produced in 1930 was \$35,886,552 as compared with \$33,535,234 in 1929. In 1930 the quantity of nickel produced was 103,768,857 lbs. and of copper 127,718,871 lbs., which were valued at \$24,455,133 and \$15,187,259 respectively. The

quantity of cement produced was 3,942,690 barrels, worth \$5,779,404. Natural gas, amounting to 7,965,761 m.cu.ft., was produced in 1930, with a total value of \$5,034,828, silver 10,206,683 oz., valued at \$3,893,876, crude petroleum 117,302 barrels worth \$235,746, as well as 2,750,887 lbs. of arsenic valued at \$109,932.

*Education.*

In Ontario the central control is vested in the Minister of Education, who is a member of the Provincial Cabinet. General regulations are framed by him with the approval of the Cabinet for the elementary (public and separate) the continuation and high schools (including collegiate institutes) and the Vocational schools, all of which number 7,971, with 738,477 scholars (exclusive of evening school pupils) in 1929. The schools are under the control of local boards of trustees, are required to have only certificated teachers, and are efficiently inspected. There is a provincial (non-denominational) university (Toronto), with an affiliated university college, and five theological colleges are also affiliated. There are also two non-denominational and two denominational universities in the Province, and numerous high schools or colleges (private foundations) for boys and girls. Ample provision is made for the instruction of the deaf and the blind. There is also a well-equipped agricultural college, now affiliated with the provincial university. Schools are attached to the reformatories for juvenile offenders of both sexes. Education, elementary and secondary, is free and is practically compulsory up to 16 years of age in urban centres. In rural sections it is compulsory up to 14 years. Public libraries receive Government grants.

*Climate.*

The climate is dry, bracing, and very healthy, although the range of temperature is great. The mean temperature at Toronto is 45°, at Montreal 41°; the extreme range at Toronto being from 7° below zero to 91°. The average annual rainfall at Toronto is 25 inches; at Montreal 29 inches, principally from May to September. The snow-fall between December and March is about 122 inches on the average at Montreal.

## PROVINCE OF ONTARIO.

*Lieutenant-Governors since 1897.*

## ONTARIO.

- 1897 Hon. Sir Oliver Mowat, G.C.M.G.
- 1903 Sir William Mortimer Clark, K.C.
- 1908 Hon. Sir John Morison Gibson, K.C.M.G., K.C., LL.D.
- 1914 Sir John Strathearn Hendrie, K.C.M.G., C.V.O., LL.D.
- 1919 Lionel Herbert Clarke, Esq.
- 1921 Hon. Colonel Henry Cockshutt.
- 1926 Hon. W. D. Ross.

## SEAT OF GOVERNMENT, TORONTO.

The Province is represented by 24 Members in the Senate and 82 Members in the House of Commons of Canada.

The population at the 1931 census was 3,426,488 (preliminary figures).

*Provincial Revenue and Expenditure.*

	Total Ordinary Revenue.	Dominion Subsidy.	Ordinary Expenditure.
1930	\$57,343,291	\$2,848,289	\$57,989,352

*Lieutenant-Governor*, The Honourable W. D. Ross, \$10,000.  
*Official Secretary*, Colonel Alexander Fraser, LL.D., F.S.A.S., A.D.C.

## EXECUTIVE COUNCIL.

*Prime Minister and Minister of Education*, Hon. G. S. Henry, LL.B., \$12,000.  
*Minister of Highways*, Hon. Leopold Macaulay, \$10,000.  
*Attorney-General*, Hon. William H. Price, K.C., \$10,000.  
*Provincial Secretary and Registrar*, Hon. George H. Challies, \$10,000.  
*Provincial Treasurer*, Hon. Edward A. Dunlop, \$10,000.  
*Minister of Mines*, Hon. Charles McCrea, \$10,000.  
*Minister of Public Works and Labour*, Hon. J. D. Monteith, M.D., \$10,000.  
*Minister of Lands and Forests*, Hon. William F. Finlayson, \$10,000.  
*Minister of Health*, Hon. John M. Robb, M.B., \$10,000.  
*Minister of Agriculture*, Hon. Thomas L. Kennedy, \$10,000.  
*Minister of Public Welfare*, Hon. William G. Martin, \$10,000.  
*Ministers without portfolio*, Hon. John R. Cooke, Hon. Paul Poisson, Hon. Henry C. Scholfield.

## LEGISLATIVE ASSEMBLY (112 MEMBERS).

*Speaker*, Hon. Thos. A. Kidd.  
*Clerk*, Alex. C. Lewis.  
*Clerk Assistant*, C. F. Bulmer.  
*Librarian*, A. T. Wilgress.  
*Sergeant-at-Arms*, Col. G. H. Ogilvie.  
*King's Printer*, Herbert H. Ball.  
*Law Clerks*, A. M. Dymond, K.C., W. B. Wilkinson, K.C.  
*Clerk of the Crown in Chancery*, C. F. Bulmer.  
*Deputy Minister of Archives Department*, Alexander Fraser, LL.D.

 Registrar of Bankruptcy, W. J. Reilly.

#### EXCHEQUER COURT OF CANADA.

#### TORONTO ADMIRALTY DISTRICT.

Judge, Hon. F. E. Hodgins.  
 Registrar, John Bruce.

### PROVINCE OF QUEBEC.

Quebec is growing rapidly through its agriculture, its industry, and its forests. The municipalities of the Province have a total area of 25,443,226\* acres, which is about one-ninth of the total area, excluding the northern part (formerly Ungava), which was annexed in 1912.

Most farmers own their farms, and the chief products are hay, oats, and potatoes.

The value of the field crops, for the year 1930, is estimated at \$120,366,000, compared with \$88,000,000 for the year previous to the war (1913).

The raising of beef cattle is a business of considerable importance in the Eastern Townships, and throughout the Province mixed farming is a general practice.

Dairying is one of the most important industries on the farm. The total yield of the butter and cheese factories was \$22,947,787 in 1930. The butter of the Province of Quebec is renowned for its flavour, and has taken first prizes in International competitions, and the cheese commands the highest prices paid on the Montreal market by exporters to Europe.

In industrial development, Quebec has made rapid progress. The census of 1911 showed that the total value of manufactured products for 1910 was \$350,901,656; since then the growth has been quite phenomenal. A statement published by the Dominion Bureau of Statistics shows that the industrial production of Quebec for 1930 had a gross value of \$1,160,612,992. Montreal's share of that production was \$637,906,135.

Amongst the most important industries are the following: pulp and paper, railway rolling stock, cotton yarn and cloth, cigars and cigarettes, central electric stations, clothing, leather boots and shoes, butter and cheese, sawmills, slaughtering and meat packing, electrical apparatus and supplies, flour and feed mills.

To those interested in the mining industry, the Province of Quebec offers an attractive diversity of geological formations, including the Keewatin, Laurentian and Huronian, containing gold, silver, asbestos, lead, nickel, copper, iron, zinc, phosphate, mica and granite.

In the Eastern Townships are located the well renowned mines of asbestos. Their production, which had a value of only \$2,677,829 in 1910, reached in 1930 a production estimated at \$3,390,164. The Province produces also several of the so called "War minerals," such as pyrite, molybdenite, magnesite, the mining of which received a very strong impetus during the hostilities. Copper, with a production estimated at \$10,425,891 in 1930, is now the first mineral in

Quebec, while gold ranks third (excluding production of structural materials and clay products), with a production valued at \$2,930,480 in 1930.

While land values, both in town and country, show a steady improvement in this Province from year to year, Quebec has never experienced the speculative crises that have characterized real estate transactions elsewhere, especially during the years previous to the war. During the war, production was greatly intensified in the Province, and every fiscal year ended with a material surplus. Quebec was the only Province where the moratorium was not imposed during the hostilities, and its credit, on the foreign markets, instead of diminishing, during the last years was increasing, and, hence, has largely escaped the financial stringency of the after-war readjustment.

The entire primary school organization in the Province of Quebec is under the immediate control of the Superintendent of Public Education, who is under the Provincial Secretary. The Superintendent is assisted by an English Secretary and a French Secretary, who have the rank of deputy-minister. The Council of Public Education is vested with advisory powers, and it is divided into two Committees, a Roman Catholic and a Protestant, and each of these Committees have the right to make the regulations in regard to the organization and discipline of their respective schools. These powers include the adopting of a programme of studies, the authorization of text books, the issuing of diplomas and all such matters as directly affect the internal management of the schools. The local control is vested in local elective boards. The schools are maintained partly by local taxation and fees, and partly by grants from the Provincial Government. There were, in 1929, 8,200 schools, with 624,601 scholars. There are included in the total given above forestry schools, dairy schools, trade schools, technical schools, schools for agriculture, normal schools, a school for higher commercial studies and classical colleges, and four universities—two protestant: McGill University (Montreal) and Bishop's College (Lennoxville), and two Catholic: Laval University (Quebec) and Montreal University (Montreal).

In 1898, the schools' revenue was \$3,055,771; ten years later, it amounted to \$5,148,887; in 1926-29, it was \$32,917,489.

The average cost of education per pupil in the Province of Quebec has increased rapidly; in 1900, it was \$9.87; in 1910, \$15.72; in 1929, \$52.70.

Population (1931 preliminary figures): 2,869,793, an increase of 21½% over the 1921 figures.

#### Lieutenant-Governors since 1898.

- 1898 Sir L. A. Jetté, K.C.M.G., appointed for a second term in 1903.
- 1908 Sir C. A. P. Pelletier.
- 1911 Sir François Langelier, K.C.M.G.
- 1915 Sir Pierre Evariste Le Blanc, K.C.M.G.
- 1918 Rt. Hon. Sir Charles Fitzpatrick, P.C., G.C.M.G.
- 1923 Hon. Louis P. Brodeur.
- 1924 Hon. Narcisse Pérodeau.
- 1929 Sir Lomer Gouin, K.C.M.G.
- 1929 Hon. H. G. Carroll.

#### SEAT OF GOVERNMENT, QUEBEC CITY.

The Province is represented in the Council by 24 Councillors, and in the Assembly by 90 Members.

Lieutenant-Governor, Hon. H. G. Carroll.  
 Private Secretary, L. J. Paquin.

*Clerk of the Crown, Quebec*, Alph. Pouliot, K.C.

*Clerk of the Peace, Quebec*, Charles Gendron.

## NOVA SCOTIA.

*Situation, Area, and Population.*

Nova Scotia is a peninsula (and the Island of Cape Breton) between the 43rd and 47th parallels, connected with New Brunswick by an isthmus about 14 miles wide; its length is about 386 miles, and its breadth about 100 at its widest, with much variation. The island of Cape Breton, separated by the Gut of Canso, forms part of the Province. The Province is 21,428 square miles in area, a small part of which consists of lakes, rivers, and inlets of the sea. The population at the census of 1931 was 512,027 (preliminary figures).

*History.*

Nova Scotia was discovered by John Cabot in 1497; it was colonised by the French in 1598; was taken by the English, and a grant of it made to Sir W. Alexander by James I. in 1621. In 1632 it was restored to France, with Quebec, by the Treaty of St. Germain-en-laye, but again ceded to England at the Peace of Utrecht in 1714. After the Peace of Aix-la-Chapelle, in 1748, a settlement of disbanded troops was formed there by Lord Halifax, and the city which now bears his name is the capital of that province. Cape Breton was not finally taken from the French until 1758. From 1784 to 1819 it formed a separate colony.

*Description.*

Halifax is the capital; population at the census of 1931 was 58,939 (preliminary figures). Its harbour is open at all seasons, and is not surpassed by any in the world, affording safe anchorage for at least 1,000 ships. A dry dock and ship-building plant is also situated at Halifax capable of accommodating the largest ships.

There are many other fine harbours which are able to afford shelter to the largest vessels. There is no point in the province distant over thirty miles from a good seaport.

Some of the other chief towns are: Annapolis, Antigonish, Dartmouth, Digby, Glace Bay, Kentville, New Glasgow, Truro, Yarmouth, Pictou, Windsor, Sydney Mines, North Sydney, Amherst, Lunenburg, and Liverpool.

Extensive iron and steel works are established at Sydney and New Glasgow.

Minerals of almost all kinds abound. The production of some of the principal minerals, that are at present mined, for the calendar year 1930, is as follows:—

Coal raised	...	6,252,552 short tons.
Gypsum	...	827,063 " "
Gold	...	1,272 ounces.

There are large deposits of other minerals which have not, as yet, been commercially mined.

The greater portion of the inhabitants are engaged in mining, fishing, agriculture and the growth of fruit, for which the province is well adapted. Apples of different varieties and of very superior quality are extensively grown and exported to England and other parts of Europe. The 1930 crop was estimated at 1,146,103 barrels.

A considerable quantity of wood pulp is manufactured and exported, principally to England; the conditions prevailing are well suited for this industry, which is rapidly growing.

The fisheries of the province are very valuable. Their value in 1930 was \$10,411,200. There are many establishments for canning and preserving lobsters and drying and preserving other fish.

The timber trade is carried on to a considerable extent. England is the chief customer, but shipments are also made to other parts of Europe. Spruce and pine are the principal kinds of timber manufactured and exported.

There are a number of shipyards for the building of wooden vessels, and there are plants for the construction of steelships at New Glasgow and at Halifax. A large mill for the manufacturing of steel ships' plates is operating at Sydney.

The climate is remarkably healthy and more temperate than that of any other part of the Dominion.

#### Constitution.

Nova Scotia is represented in the Dominion Parliament by 10 Members in the Senate and 14 Members in the House of Commons.

The local government is administered by a Lieut.-Governor, advised by an Executive Council of nine members (five of whom are departmental heads), responsible to the Legislature, which consists of a House of Assembly of 41 representatives elected every five years. At the next election this number will be reduced to 38.

#### Education.

The present system of elementary education was established by law in 1864. The central control is vested in the Council of Public Instruction—a body identical in membership with the Executive Council of the Province. The local management of schools is vested, so far as the ordinary school sections or districts are concerned, in a Board of Trustees chosen by the ratepayers of the section or district. But in incorporated towns, the powers of trustees are exercised by a Board of Commissioners partly appointed by the Town Council and partly by the Government.

In 1930 there were 3,191 (classrooms) schools in operation, with a gross attendance of 113,860 in addition to 6,725 in technical schools. Education is compulsory, i.e., non-attendance exposes to pecuniary penalties between the ages of 7 and 14 in rural schools and 6 and 16 in towns and cities.

Under "The Technical Education Act," of 1907, local technical schools have been established in all the larger industrial centres in order to produce a class of educated, skilled workmen for the various manufacturing industries. A central institution called the "Nova Scotia Technical College" has been established at Halifax, where instruction of a college grade is provided in mining,

civil, mechanical, and electrical engineering. The principal of this college is the Director of Technical Education.

*Power Commission*, Hon. J. F. Fraser, *Chairman*.  
*Deputy Provincial Treasurer*, R. Gordon.

## NEW BRUNSWICK.

*Situation, Area, and Population.*

New Brunswick is situated between 44° 40' and 48° 5' N. lat., and 63° 30' and 69° W. long.; its area is 27,985 square miles, or about 17,910,400 acres. It is connected with Nova Scotia by a low isthmus. The population in 1931, was 408,255 (preliminary figures).

*History.*

New Brunswick was part of the ancient French Province of Acadia and was ceded to England by the Treaty of Utrecht in 1713. Great Britain, however, did not obtain full possession of the country until after the fall of Quebec in 1759. It was first colonised by British subjects from New England in 1762, and in 1783, at the close of the Revolutionary War, it received a large body of Loyalists from the Thirteen Colonies. In 1784 it was separated from Nova Scotia, of which it had formed a part.

*Climate.*

The mean temperature of Fredericton is about 40°, the extreme range being from 21° below zero to 90°. The average annual rainfall is 32.1 inches, and the snowfall 94.0 inches, the latter extending from December to March inclusive.

*Constitution.*

New Brunswick is represented in the Canadian Senate by 10 Members, and sends 11 Members to the House of Commons.

There is a Legislative Assembly of 48 Members, elected under a liberal franchise. An Act was passed in 1891 abolishing the Legislative Council from the end of the then present Parliament, and the Council came to an end with the dissolution of 1892.

Members receive \$1,000 per session, and their travelling expenses.

*Industries.*

Coal is abundant. Recent valuable discoveries of oil have been made; copper and gypsum exist in large quantities. There are also several salt springs, and antimony, iron, and manganese have been found in considerable quantities. There are also vast deposits of rich bituminous shale, which is likely to have a good commercial value. A great portion of the country is covered by dense forests of fine timber, the cutting and working of which—or "lumbering"—furnishes remunerative employment to many. Extensive development of the pulp and paper industry, in which the water powers are being utilized, is in progress. Live stock raising and dairying feature the agricultural activities. Wheat, Indian corn, barley, buckwheat, and oats, are the principal cereals raised. Potatoes are the most valuable field crop. Apples and plums of excellent quality are largely grown, also strawberries, raspberries, and other small fruits. The fisheries are extensive, both sea and river. Some of the finest salmon fishing in the world is to be had in this province. Fredericton, 65 miles inland, is the capital (pop. 8,114 (1921)), but Saint John, on the mouth of the river of the same name, is the leading commercial centre (pop. 46,640 (1931)). Other towns are Moncton (17,488 (1921)), Campbellton (5,570), Edmundston (4,035), Chatham (4,506), Woodstock (3,380), St. Stephen (3,452), and Newcastle (3,507).

**Education.**

A system of elementary education was established by Act, 1871. The central control is vested in a Board of Education, and the local management is in the hands of Boards of School Trustees. Education is free between the ages of 6 and 20. There were in 1929, 2,388 schools and 83,336 scholars, exclusive of schools for teacher training, which had an enrolment of 340.

The Provincial University is at Fredericton, and there are other universities at Sackville and Memramcook.

	Local Revenue.	Dominion Subsidy.*	Local Expenditure.
1929	\$ 5,309,462	\$ 1,266,766	\$ 6,566,860

*Bonded Debt*, 1929, \$39,525,606.66.

*Net Debt*, 1929, \$33,236,579.74.

\* Year ended Oct. 31, 1929.

*Registrar of the Supreme Court*, R. St. John Freeze, \$3,300.

**MANITOBA.***Area and Situation.*

Manitoba became a Province of the Canadian Federation by legislative enactments taking effect on the 15th July, 1870. It is bounded on the north by the 60th parallel of latitude; on the west by the Eastern boundary of the Province of Saskatchewan; on the south by the United States; on the east by the western boundary of the Province of Ontario to Hudson's Bay, and by Hudson's Bay for a distance of 300 miles.

The area of Manitoba is 251,832 square miles, of which 225,000 square miles are land and about 27,000 water.

*Description.*

The agricultural capabilities of the province of Manitoba are very great. The soil is a rich, black loam, the surface deposit showing a very high content of nitrogen, phosphoric acid and potash. It is, therefore, peculiarly adapted to the growth of cereal grains, and owing largely to the presence of the element nitrogen in large quantities, wheat possessing a high percentage of gluten is produced.

Manitoba No. 1 Northern, because of its superior milling qualities, is in great demand by English millers, and has made the Prairie Provinces of Canada famous. Winnipeg is now the leading grain market on the Continent. There is a steady trend toward diversified agriculture in Manitoba and but few farmers now confine their activities solely to grain growing.

The principal agricultural exports of the country are wheat, barley, beef, cattle, bacon, poultry and dairy products. In 1930, agricultural production included:—

*Manitoba Field Crops, 1930.*

Crop.	Area. Acres.	Yield per sown acre.		Total yield.
		Bush.	Bush.	
Wheat.....	2,470,000	18.3		45,278,000
Oats.....	1,590,000	31.8		50,562,000
Barley.....	1,991,000	25.1		49,974,000
Fall Rye.....	83,000	18.5		1,536,000
Spring Rye ..	30,000	17.2		516,000
Peas.....	1,300	17.0		22,000
Buckwheat ..	2,900	15.1		44,000
Mixed Grains	14,500	23.9		347,000
Flaxseed.....	112,000	9.7		1,066,000
		Cwt.	Cwt.	
Potatoes.....	31,700	83.8		2,657,000
Turnips, etc. .	4,800	97.9		466,000
		Tons.	Tons.	
Hay and Clover	437,300	1.80		787,000
Alfalfa.....	12,200	2.07		25,000
Fodder Corn ..	14,000	5.40		75,000

The average yield of wheat per acre for five years is 17.3 bushels per acre. Good farms within easy reach of a railway may be purchased at from \$12 to \$50 per acre.

The growth of Winnipeg, the principal city, is remarkable. In 1871 it contained about 241 inhabitants; in 1896, 35,000; and in 1931 (preliminary figures) 217,587. The other chief cities and towns of the province are Brandon, St. Boniface, Portage la Prairie, Neepawa, Emerson, Carman, Selkirk, Minnedosa, Morden, Manitou, Dauphin, Transcona, Souris, Virden, Morden and The Pas. Population of Manitoba, 1931 preliminary figures, 699,841.

Several brick manufacturing plants have been established throughout the province. Cement for building purposes is manufactured on a large scale. Hard wall plaster is extensively produced. A sand suitable for glass is found in great quantities. Gold, copper and other valuable minerals have been discovered in great quantities in different parts of the province, particularly in the new territory North of the Saskatchewan River, also to the East of Lake Winnipeg. Development is proceeding apace, and Manitoba, hitherto regarded as an agricultural province, gives every promise of becoming an important mining province.

Manufacturing industries are becoming numerous in Winnipeg, the net annual output having grown from \$8,616,248 in 1901 to \$74,755,870 in 1924, and to over \$109,320,746 in 1930. There were then 501 factories, employing 19,150 workers, with a capital invested of \$125,321,028 in the City of Winnipeg, while the gross value of production in the whole province amounted to \$159,435,094.

The Winnipeg Hydro Electric System on the Winnipeg River, 77 miles from the City, develops 105,000 h.p. and also develops 24,000 h.p. at Slave Falls, 6 miles below, where 96,000 will ultimately be developed. The Winnipeg Electric Company has a development of 37,800 h.p. at the Pinawa Channel of the Winnipeg River, the North Western Power Company, a subsidiary company, develops about 40,000 h.p. at Seven Sisters site where the ultimate installation is to be 225,000 h.p. at which time the Pinawa plant will be closed, and the Manitoba Power Company has a development of 168,000 h.p. at Great Falls. These constitute the total power of the river.

The cost of electricity is from 7 to 3 cents per kilowatt hour for power purposes and household lighting is supplied at 9 to 3 cents per kilowatt hour.

*Railway Facilities.*

In the year 1879 there was no railway in the whole of the country between Lake Superior and the Rocky Mountains. At the close of 1930 there were in the province of Manitoba 4,420 miles of single track steam railways in operation, not including second and third main track, industrial track, yard and sidings. These railways afford easy access to market from all parts of the Province.

*Climate.*

In 1929 the extreme range was 30° below zero to 100°. The climate is bracing and healthy. The average annual precipitation at Winnipeg is 14.36 inches.

*Constitution.*

Manitoba is represented by 6 members in the Dominion Senate and 17 members in the House of Commons.

The Province has a Legislative Assembly of 55 members elected by adult suffrage, for 5 years. The Legislative Council or Upper Chamber was abolished by a local Act passed in 1876. The members of the Legislative Assembly are paid \$2,000.00 per session.

*Education.*

By the "Public Schools Act" of 1890, a system of schools was established throughout the Province. This Act provides "that all public schools shall be free schools, and that every person between the ages of 6 and 21 years shall have the right to attend some school." Attendance is compulsory to the age of 14.

In 1930 there were 2,019 school houses employing 4,378 teachers and with an enrolment of 151,846 pupils. There are 47 high schools, 12 junior high schools, 11 collegiate departments, 22 collegiate institutes and 125 intermediate schools, i.e., high schools with one teacher devoting full time to high school work. Normal schools are provided for the training of teachers.

There is one University, The University of Manitoba, with four faculties, namely, Arts and Science (including Pharmacy), Medicine, Engineering and Architecture, Agriculture and Home Economics. The enrolment in 1929-1930 was 2,587 in regular courses, and in addition 1,593 in Summer School and Extension courses. The following colleges are affiliated: St. Boniface College (Roman Catholic), St. John's College (Church of England), Manitoba College and Wesley College (jointly administered by the United Church of Canada). Law is taught in Manitoba Law School, which is under the direction of trustees jointly appointed by the University and the Law Society of Manitoba. Brandon College, which is affiliated with McMaster University, does University work.

#### Finances.

Fiscal year ending 30th April, 1930:—

Total Revenue.	Dominion Subsidy.	Expendi- ture.
\$13,922,134-97	\$1,823,892-60	\$13,802,933-94

#### Lieutenant-Governors since 1895.

- 1895 Hon. James Colebrooke Patterson.
- 1900 Sir D. H. McMillan, K.C.M.G.
- 1911 Sir D. C. Cameron, K.C.M.G.
- 1914 Sir James Aikins, Kt.
- 1926 Hon. Theodore Arthur Burrows.
- 1929 Hon. James Duncan McGregor.

#### SEAT OF GOVERNMENT—WINNIPEG.

*Lieut. Governor*, Hon. James Duncan McGregor.  
*Private-Secretary*, Mrs. E. M. Nash.

#### EXECUTIVE COUNCIL.

*Premier, President of Executive Council and Provincial Treasurer*, Hon. John Bracken.  
*Attorney-General, Minister of Telephones and Telegraphs*, Hon. W. J. Major, K.C.  
*Minister of Public Works*, Hon. W. R. Clubb.  
*Minister of Health and Public Welfare*, Hon. E. W. Montgomery, M.D.  
*Municipal Commissioner, Provincial Secretary*, Hon. D. L. McLeod.  
*Railway Commissioner, Minister of Agriculture and Immigration*, Hon. Albert Prefontaine.  
*Minister of Education*, Hon. R. A. Hoey.  
*Minister of Mines and Natural Resources*, Hon. D. G. McKenzie.

*Deputy Provincial Treasurer*, R. McN. Pearson.  
*Deputy Minister of Agriculture and Immigration*, J. H. Evans.

*Deputy Provincial Secretary*, R. M. Fisher.  
*King's Printer*, Philip Purcell.

*Deputy Minister of Public Works*, A. McGillivray.  
*Clerk of Executive Council*, Fred. Axford.

*Deputy Attorney-General*, John Allen, K.C.  
*Comptroller General*, Robert Drummond.

*Deputy Municipal Commissioner*, R. M. Fisher.  
*Deputy Minister of Education*, Dr. Robert Fletcher.

*Deputy Minister, Mines and Natural Resources*, C. A. Attwood.

#### JUDICIAL ESTABLISHMENT.

*Chief Justice*, Hon. J. E. P. Prendergast.

#### Court of Appeal.

*Chief Justice*, Hon. J. E. P. Prendergast.

## BRITISH COLUMBIA.

*Situation and Area.*

British Columbia is the western province of the Dominion of Canada, situated on the north-west coast of North America, and comprising the territory bounded on the north by the 60th parallel, on the east by the 120th meridian to the 54th parallel, and the Rocky Mountains to the 49th parallel, on the south by the United States, and on the west by the Pacific Ocean to the 55th parallel and Alaska to the 60th parallel.

The length of the coast line in a direct line north and south, is 541 miles, but the total length, following the sinuosities of the coast, is 4,334 miles, exclusive of islands. The coastline of Vancouver Island is 1,884 miles, and the length 288 miles. The area (including Vancouver Island and Queen Charlotte Island) is 355,855 square miles.\* The distinguishing physical features of British Columbia are the rich valleys which produce in abundance all kinds of agricultural produce and intersect the country in parallel lines, the general direction being north and south; the extensive plateaux of the central interior; the vast forests of commercial timber; the great mountain ranges, and the deeply indented seaboard. The population, at the census of 1891, was 98,173; 1901, 178,657; 1911, 392,480; 1921, 524,582; 1931 (preliminary figures), 689,210.

*History.*

Vancouver Island was granted to the Hudson's Bay Company under certain conditions in 1849, and the same year it was made a Crown colony. British Columbia was constituted a Crown colony in 1858, in consequence of the large immigration on the discovery of gold in the Thompson and Fraser Rivers. In 1866 the colonies of British Columbia and Vancouver Island were united under the former name, and in 1871, British Columbia entered the Dominion of Canada as a Province. The Province is represented by six members in the Senate, and fourteen members in the House of Commons of Canada.

*Constitution.*

The Provincial Government is administered by a Lieutenant-Governor and an Executive Council, or Cabinet, of eleven Ministers, members of the legislative assembly of 48 members, on the British system of ministerial responsibility. The House of Assembly is elected for five years, every male and female adult (British subjects) having resided six months in the Province and duly registered, being entitled to a vote. In 1917 the franchise was extended to women. Members of the Legis-

lature receive a sessional indemnity of \$2,000, and a mileage allowance for travelling expenses.

*Crown Land and Surveys.*

The area of the Province of British Columbia is 238,483,200 acres. Of this area 14,808,764 acres are Crown granted and 4,809,743 acres are included in railway grants and about 518,000 acres in process of alienation.

About 23,000,000 acres are estimated to be available for agricultural and 160,000,000 for grazing purposes. About 4,355,329 acres are held under timber licenses or leases, 792,079 acres under grazing or coal leases, and 10,899,290 acres under parks and game reserves.

A total of 31,620,000 acres have been surveyed, 4,355,329 acres of which are surveys of timber areas, 340,837 acres of mineral claims and 338,600 of coal leases.

Approximately 4,600,000 acres of surveyed land is available for free pre-emption. Geographic and land maps can be obtained on application to the Department of Lands; also maps, handbooks, and descriptive matter from the Bureau of Provincial Information.

*Agriculture.*

Agriculture in British Columbia has progressed steadily during the past four years. Mixed farming, stock raising, dairying, fruit-growing, poultry raising and truck gardening are the principal sources of agricultural production in the province. Preserving of fruit and vegetables has become quite an industry in the last year or two. The total value of farm products in 1930 was \$55,957,734; live stock \$6,623,635; poultry products \$6,457,428; dairy products \$13,307,309; fruits \$7,820,034; vegetables \$6,982,951; fodders \$9,836,460; hops \$314,830; grains \$3,825,288; wool \$133,080; honey \$224,265; other \$52,904.

*Mining Industry.*

The total mineral production of British Columbia in 1930 amounted in value to \$55,391,993, towards which gold contributed \$3,475,901; silver \$4,307,270; coal \$9,435,650; copper \$11,738,525; lead \$12,535,191; zinc \$9,010,093.

Detailed reports are obtainable from the Bureau of Mines, Victoria.

*Shipping, 1930.*

<i>Coastwise.</i>		<i>No. of Vessels.</i>
Inward .. ..	.. ..	
Outward .. ..	.. ..	37,310
		37,796
<i>Sea-going.</i>		
Inward .. ..	.. ..	
Outward .. ..	.. ..	10,233
		10,420

*Exports and Imports, 1931.*

Exports.. ..	\$133,595,092
Imports.. ..	\$77,842,021

*Revenue and Expenditure, 1931 (Estd.)*

<i>Receipts.</i>	<i>Expenditure.</i>
\$25,498,409.	\$25,066,980.

*Forest Wealth.*

The stand of merchantable timber in the Province of British Columbia is estimated to reach the enormous total of 350 billion feet board measure which is over half the total of all Canada.

British Columbia occupies an especially advantageous position for supplying the overseas markets. It has vast quantities of timber unsur-

\* The Provincial Government, through its own departmental measurements, calculates the area of the province at 372,630 sq. m.

passed in size, quality, and suitability for the manufacture of all kinds of dimension timber, lumber, piling, railway ties, pulp, paper and other products. The principal export timber trees of British Columbia are Douglas Fir, Western Red Cedar, Western Hemlock, and Sitka Spruce or Silver Spruce. The total production from British Columbia forests during 1929 was \$93,301,000,\* including sawn lumber to the value of \$50,140,000,\* shingles \$8,300,000,\* pulp and paper \$14,400,000.\*

#### *Water Resources,*

There is probably no area on the continent of America so favoured in water power resources as between six to eight million horsepower is known as available for development. The total power developed is 652,792 horsepower. Large power sites are strategically situated so that in time many districts may be served with electrical energy by transmission lines of economic length and a number are within reasonable distances of tidewater making them convenient for industrial undertakings. It is of interest to note that contiguous to Vancouver, the largest centre of population, there is available within a radius of one hundred miles, over 750,000 horsepower, of which close to 200,000 is developed. On the Kootenay River near Nelson close to 250,000 horsepower is developed, the major portion of which is used for electro-electro-metallurgical refining at Tadoussac, near Trail. Electrical energy is transmitted from the Kootenay River over 200 miles to many cities and towns in the Okanagan Valley, where it is used for pumping water for irrigation as well as general commercial use. In regard to irrigation, such is largely practised south of the 51st parallel of latitude. Water has been recorded for upwards of 600,000 acres of lands, of which approximately 100,000 have been brought under cultivation. The fruit areas depend to considerable extent upon irrigation. The largest and one of the most important of these is the Okanagan Valley, which now has a well-established fruit and vegetable industry. Through co-operation in production and marketing, those areas dependent upon irrigation are becoming very attractive.

#### *Fisheries.*

The commercial fisheries of British Columbia are of considerable importance. Salmon, halibut, and herring are the principal food fishes, and ood, oolachans, pilehard, clams, oysters, shrimps, etc., are also produced in large quantities. The canning of salmon has been an important industry for half a century; 1930 pack, 2,221,783 cases. The whale fisheries are also a not unimportant branch of the fishing industry.

Value of total production, 1930, \$23,103,302, being nearly half the total for the Dominion.

#### *Iron and Steel.*

Large iron deposits, magnetite, limonite, and hematite, exist, with large metallic iron content and sufficiently free from impurities to be within the "Bessemer limit." Anticipations are that steel and iron will be developed in the near future.

#### *Railways.*

British Columbia has 4,056 miles of steam railway in operation (single track mileage). Electric railways have mileage of 224 miles, including about 100 miles of interurban roads. The Canadian Pacific Railway, the Canadian National Railways, and the Pacific Great Eastern Railway,

are the main railways of the Province, with various branches of the Canadian Pacific and Canadian National Railways extending through the southern and south-western portions of the Province, and additional lines entering the Province from the United States.

#### *Education.*

A complete system of free and compulsory education was established by Act No. 16 of 1872. The central control is vested in the Council of Public Instruction, composed of members of the Executive Council. The Minister of Education directs the general management of the schools through the Superintendent of Education. In each rural school district three trustees are elected to attend to the local affairs of the school, and in municipal school districts seven, five or three (according to grade, whether cities of the first, second or third class, or district municipalities) trustees are elected for this purpose.

There were in 1929-30, 82 high schools, with 14,675 scholars in the Province, 5 junior high schools and 29 superior schools. The number of school districts in operation is 803, with 3,854 teachers and 111,017 pupils. In addition there were 2,610 students at the University of British Columbia; 279 at Victoria College, 365 at the two Normal Schools; 6,671 attending night schools and 1,190 pupils in correspondence classes. The schools are free and non-sectarian. The highest morality must be inculcated, but no religious dogma or creed is permitted to be taught. Schools are established wherever there are 6 children between the ages of 7 and 15 years available for school purposes.

#### *Lieutenant-Governors since 1900.*

- 1900 Sir Henri Joly de Lotbinière, K.C.M.G., LL.D., D.C.L.
- 1906 James Dunsmuir, Esq.
- 1909 Thomas W. Paterson, Esq.
- 1914 Sir Frank Stillman Barnard, K.C.M.G.
- 1919 Hon. Edward G. Prior.
- 1921 Walter Cameron Nichol, Esq.
- 1926 R. R. Bruce, Esq.
- 1931 J. W. Fordham Johnson.

#### *SEAT OF GOVERNMENT, VICTORIA.*

*Lieut.-Governor*, His Honour J. W. Fordham Johnson, \$9,000.  
*Private Secretary*, A. M. D. Farsbairn, \$2,400, and residence.

#### *EXECUTIVE COUNCIL.*

*Local Judge in Admiralty of the Exchequer Court*, Hon. Archer Martin.

*Deputy Judge in Admiralty of the Exchequer Court*, Hon. W. A. Galliher.

## PRINCE EDWARD ISLAND.

### Situation and Area.

This island, which was admitted into union with the Dominion of Canada on the 1st July, 1873, is situated almost wholly between 46° and 47° N. lat., and between 62° and 64° W. long. Its area is 1,397,990 acres, or 2,184 square miles; it is about 150 miles long, and 34 its greatest breadth. It was discovered by Sebastian Cabot, 1497; it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, but, on the petition of the inhabitants, was constituted a separate Colony in 1769.

The population at the last census (1931) was 88,040 (preliminary figures).

### Description.

The climate is milder than in the neighbouring provinces, and is considered very healthy. The island is generally well wooded and watered, and the soil is fertile.

Besides the usual domestic industries of an agricultural people, there are numerous grain mills, and establishments for canning and preserving lobsters, fish, etc. Many cheese and butter factories have lately been established. The breeding and raising of silver and black foxes in captivity is an important industry, there being in 1931, approximately 600 fox ranches in the province.

The waters adjoining comprise by far the most valuable section of the fishing grounds of America, and are very largely resorted to.

The chief towns are Charlottetown (12,357) and Summerside (3,914). A line of railway traverses the island, belonging to, and worked by, the Dominion Government. It is 210 miles in length, including branches. A railway is constructed through Belfast and Murray Harbour (about

50 miles), and one of the longest bridges in Canada is erected across the Hillsboro' River, over which trains and carriages run. Branch railways are built to Montague and Vernon River Bridge.

## Constitution.

Responsible Government was established in Prince Edward Island in 1851. There is a Lieutenant-Governor, appointed by the Governor-General, an Executive Council (the Cabinet) of 9 members, and a Legislative Assembly of 30 elected members.

Each member receives a payment of \$400 per annum.

The island is divided into three counties, King's, Queen's, and Prince, each of which elects ten representatives to the Assembly. The island is also represented in the Dominion Parliament by four members in the Senate and four in the House of Commons.

## Education

A system of general education is established by law. The central control is vested in a Board of Education, consisting of the Executive Council and the Chief Supt. of Education and the Principal of Prince of Wales College. The local management is in the hands of a chief superintendent. Education is free, non-sectarian, and compulsory between the ages of 7 and 13 years. There were in 1930, 467 schools, with 17,277 pupils. There is one higher college amalgamated with the normal school. In addition to the above there is also a Roman Catholic University not under the control of the Government. There are also two private Kindergartens.

## Finance.

There is a provincial tax on Land, Incomes and personal Property, also a Succession Duty. There is a road tax in the country, and municipal rates in the towns.

Total Ordinary Revenue  
for the year ended 31st

Dec., 1930 .. .. \$1,148,748.

Total Expenditure, same year \$1,133,366.

Dominion Subsidy ,, ,, \$497,181 (included in above receipts).

## Lieutenant-Governors since 1899.

- 1899 Peter A. McIntyre, Esq., M.D.
- 1904 D. A. Mackinnon, Esq., K.C., LL.B.
- 1910 Benjamin Rogers, Esq.
- 1915 Augustine C. Macdonald, Esq.
- 1919 Murdoch Mackinnon, Esq.
- 1924 Hon. Frank R. Hertz, Esq.
- 1930 Charles Dalton, Esq.

## SEAT OF GOVERNMENT—CHARLOTTETOWN.

### CIVIL ESTABLISHMENT.

*Lieutenant-Governor*, His Honour Charles Dalton, Esq., \$7,000.

*Private Secretary*, Alban Farmer, B.A., LL.B.

### JUDICIAL ESTABLISHMENT.

*King's Printer*, Frank L. Dillon.

*Collector of Customs at Charlottetown*, J. D. Macmillan.

#### PROVINCES OF SASKATCHEWAN AND ALBERTA.

By a Canadian Act, 38 Vict., cap. 49, the territories formerly known as "Rupert's Land" and the North-Western Territory, were, with the exception of such portions thereof as form the Province of Manitoba and the district of Keewatin, called and known as the North-West Territories, and were created into a Government entirely separate and distinct from Manitoba. The Act was put into force by Proclamation of 7th October, 1876. The Territories were governed by a Lieutenant-Governor, aided by an Executive Council.

By chapters 3 and 27 of the Acts of 1905, the two provinces of Alberta and Saskatchewan were formed out of the southern portion of the Territories, and were admitted into the Dominion as such on the 1st September, 1905. The dividing line runs North and South being meridian 110 West of Greenwich.

#### SASKATCHEWAN.

Saskatchewan, called after the river of the same name, meaning "rapid current," has an estimated area of 251,700 sq. miles, and a population in 1931 (preliminary figures) of 921,281 persons, an increase of 163,771 over that of 1921. It lies between 102°-110° West and 49°-60° North, with Manitoba on the East and Alberta on the West. The Government consists of a Lieut.-Governor, an Executive Council and a representative Assembly of 63 members. The Province is represented in the Dominion Parliament by 21 members in the House of Commons, and 6 in the Senate. The seat of Government is at Regina (named in honour of Queen Victoria).

The remarks regarding the agricultural capabilities of Manitoba apply to Saskatchewan. Free grants of lands can still be had, although the bulk of the land within convenient reach of the railways has already been allotted. The agricultural industry of the Province has made phenomenal progress, and marked development is seen in manufacturing spheres.

Particulars of the principal agricultural products in 1930 :—

*Estimate, Acreage, Yield, Production and Price, also Total Value of Grain and other Crops of Saskatchewan for 1930.*

*Inspector of Legal Offices, D. M. Woodhams, \$3,800.*

### PROVINCE OF ALBERTA.

Alberta, as noted above, was created a Province by an enactment of the Parliament of Canada, taking effect September 1st, 1905, out of the territory acquired from the Hudson's Bay Company. Previously it formed part of the North-West Territories. The total area of the Province is 255,285 square miles, including about 6,485 square miles of water. The Government is vested in a Lieut.-Governor, an Executive Council, and a Legislative Assembly composed of sixty-three (63) members elected by the people, for five years. The Executive Council consists of eight Members. The seat of Government is at Edmonton.

The population of Alberta increased from 73,022, in 1901, to 588,454, in 1921, to 607,599 in 1926, and to approximately 660,000 in 1930. The preliminary census figures for 1931 show a population of 727,497, an increase of 23.63 p.c. over 1921.

Alberta has about 87 per cent. of the coal resources of the Dominion, and 21 per cent. of the coal resources of North and South America. It has some anthracite, and very large supplies of domestic, also steam and coking coal. Coal beds cover a large part of the area of the province. The production of coal mines for 1930 was 5,755,528 tons.

It has valuable fish and timber resources in the centre and north, and is noted for its game of all kinds.

The total area in field crops, 1930, was 12,561,400 acres. Of this over 10,000,000 was in grain.

	1930	Acres.	Yield.
Fall Wheat ... ..	124,000	3,000,000	
Spring Wheat... ..	7,040,000	130,240,000	
Oats ... ..	2,185,000	77,840,000	
Barley ... ..	748,000	18,998,000	
Rye ... ..	247,000	3,714,000	
Flax ... ..	28,000	190,000	

Millions of acres of free lands are open for entry, chiefly in the northern part of the province.

The dairy factory productions in 1930 were worth approximately \$5,778,406. The province has a large outside market for surplus creamery butter.

There are 5,607 miles of steam railway in operation (Dec. 31, 1930). The Government of Alberta own, control, and operate practically all the telephone system of the Province, mileage of wire consisting of approximately 292,135 miles.

There is a University of Alberta at Edmonton.

There were in 1930, 3,647 public school districts, with 5,558 classrooms and 168,076 pupils.

#### Revenue and Expenditure (Year ended Mar. 31).

## NORTHWEST TERRITORIES.

RECONSTITUTED 1ST SEPTEMBER, 1905. AREA  
 1,309,682 Sq. MILES. POPULATION (preliminary  
 figures 1931) 7,133.

### SEAT OF GOVERNMENT, OTTAWA.

The Northwest Territories comprise the territories  
 formerly known as Rupert's Land and the North-  
 western Territory, except such portions thereof as  
 form the provinces of Manitoba, Saskatchewan and  
 Alberta and the Yukon Territory, together with all  
 British territories and possessions in North America  
 and all islands adjacent thereto, not included within  
 any province, except the Dominion of Newfoundland  
 and its dependencies. For administrative purposes  
 the Territories were sub-divided into the provisional  
 districts of Mackenzie, Keewatin and Franklin. By  
 Order in Council of the 16th March, 1918, the North-  
 western Territories are governed by the Commissioner,  
 the Deputy Commissioner and five Councillors  
 appointed by the Governor General in Council. The  
 Commissioner in Council has power to make  
 ordinances for the Government of the Territories  
 under instructions from the Governor General in  
 Council or the Minister of the Interior respecting  
 direct taxation within the Territories in order to  
 raise revenue, etc., establishment and tenure of  
 territorial offices, and the appointment and payment  
 of officers, maintenance, etc., of prisons, municipal  
 institutions, licensees, solemnization of marriage,  
 property and civil rights, administration of justice  
 and generally all matters of a merely local and private  
 nature in the Territories.

### TERRITORIAL COUNCIL.

(Appointed by the Governor General in Council).  
*Commissioner,* Hugh Howard Rowatt.  
*Deputy Commissioner,* Roy Alexander Gibson.  
*Councillors,* Charles Camell, Oswald Sterling Finnie,  
 Vacant, Duncan Campbell Scott, (James Howden  
 MacBrien.  
*Secretary,* David Livingstone McKeand.

### DOMINION OFFICIALS.

*Director,* O. S. Finnie, B.Sc., D.L.S., Ottawa.  
*Assistant Director,* D. L. McKeand, Ottawa.

*Special Investigators* (Reindeer), A. E. Porsild; R. T.  
 Porsild.  
*Radio Telegraph Service,* Royal Canadian Corps of  
 Signals.  
*Customs Department,* Royal Canadian Mounted Police.

## YUKON TERRITORY.

ORGANIZED 13TH JUNE, 1898. AREA—207,076 Sq. MILES. POPULATION IN 1931—4,213.  
SEAT OF GOVERNMENT—DAWSON.

The boundaries of the Yukon Territory were defined by a Proclamation of the 16th August, 1897, amended by C. 41 of 1 Ed. VII.

By 61—62 Vict., C. 6, the Yukon Provisional District was declared and constituted a separate territory, and by C. 63, S. 7, the local government of the territories is vested in a Commissioner and an elective council. The Commissioner administers the government of the territory under instructions from time to time given him by the Governor in Council or the Minister of the Interior.

By Order in Council dated the 28th March, 1918, the Office of Commissioner was abolished and the duties transferred to and vested in the Gold Commissioner of the Territory.

## TERRITORIAL COUNCIL.

(Three members elected 1931 for 3 years).

*Moderator*, Rt. Rev. W. G. Brown, M.A., B.D., Saskatoon.

The year given after the names is the date of election to the bishopric.

## NEWFOUNDLAND.

#### Situation and Area.

Newfoundland is an island situated between 46° 37' and 51° 39' N. lat., and 52° 35' and 59° 25' W. long., on the north-east side of the Gulf of St. Lawrence; the greatest length from north to south is 350 miles, and average breadth about 130; its estimated area is 42,000 square miles, or one-third of that of the United Kingdom. Population, 259,358.

#### Labrador.

Labrador, discovered by the Norseman Lief, son of Eric the Red, in A.D. 1,000, and (in 1498) by Cabot, was early frequented by Basque,

and subsequently by Breton, fishermen. It became British on the conquest of Canada (1759). In 1763 the Atlantic coast was annexed to Newfoundland, but was temporarily re-annexed to Quebec from 1774 to 1809. The first judicial court was established in 1824; it was revived in 1863 and again in 1909. During the summer months several Justices of the Peace are upon the coast.

By the decision, on March 1st, 1927, of the Judicial Committee of the Privy Council, the Atlantic watershed of the Labrador peninsula, including the basin of the Hamilton, was awarded to Newfoundland. This decision was the outcome of a dispute between Canada and Newfoundland as to the ownership of this region, which has lasted for 25 years and was ultimately by agreement submitted to the arbitrament of this Tribunal. Canada claimed that the "Coast of Labrador" which was attached to Newfoundland in 1763, was merely a strip of seaboard necessary for carrying on of the fisheries prosecuted there, and suggested that Newfoundland should only be awarded a strip one mile deep following the sinuities of the seaboard. Newfoundland, however, contended that the word "coast" should be interpreted in its larger sense as a region or country, such as "the Cold Coast" or the "Coromandel Coast," and that this should embrace the whole territory to the height of land. This contention was upheld by the Tribunal which fixed the boundary as follows: "A line drawn due north from the eastern boundary of the bay or harbour of Anse Sablon as far as the fifty-second degree of north latitude, and from thence westward along that parallel until it reaches the Romaine river, and then northward along the left or east bank of that river and its head waters to their source and from thence due north to the crest of the watershed or height of land there, and from thence westward and northward along the crest of the watershed of the rivers flowing into the Atlantic Ocean until it reaches Cape Chidley," at the entrance to Hudson's Strait. The remainder of the Labrador peninsula forms part of Canada. The area is about 120,000 square miles (equal to that of the United Kingdom), with a coast line of some 600 miles. The outside coast line is bleak, but the shores of the bays and rivers are well wooded, and in some cases densely so, the timber being high and sound, the temperature of the interior being, as a rule, like that of northern Canada. There are about 4,000 permanent inhabitants (some 1,300 Eskimo, the remainder of British descent), occupied in the fisheries and in trapping. The population is greatly increased in summer by fishermen and sportsmen, over 1,000 vessels being employed. Battle Harbour (Strait of Belle Isle) is the chief port, amongst the other villages being the Moravian Mission stations (commenced 1770) at Hopedale, Nain, Okkak, Hebron, Ramah, and Killisnoak. The Customs duties are those of Newfoundland.

#### History.

The island was discovered by John Cabot in 1497; it was as early as 1500 frequented by the Portuguese, Spanish, and French, for its fisheries. Sir Walter Raleigh and others, in the reign of Queen Elizabeth, attempted to colonise this island, but were not successful. In 1583 Sir Humphrey Gilbert formally took possession of the Island in the name of Queen Elizabeth, and it was incorporated into the realm of England. In 1623, Sir G. Calvert, afterwards Lord Baltimore, established

himself in the Peninsula of Avalon, the south-east part of the island, and appointed his son Governor. In 1634 a party of colonists were sent over from Ireland, and twenty years after some English colonists arrived, having emigrated by means of a Parliamentary grant.

The French, about 1620, established a station at Placentia; and for many years the French and English settlers were constantly annoying each other. At the Peace of Utrecht in 1713, subsequently ratified by the Treaty of Paris, the exclusive sovereignty of Newfoundland was acknowledged to belong to Great Britain, certain rights being granted to French fishermen, the extent of which long remained in question between the two nations. The French possess the small islands of St. Pierre and Miquelon, and the district is resorted to annually by a French fishing fleet from St. Malo, Granville, St. Brieuc, Bordeaux, Quimper, St. Nazaire, &c. They claimed the exclusive right to fish along the coast from Cape John on the east coast round the north to Cape Ray on the west coast, upon which they were allowed temporary structures for drying the fish. That this right was an exclusive one was never admitted by Great Britain, which also contended that it did not include a right to the lobster fishery. By the declaration attached to the Treaty of Versailles in 1783, the King of Great Britain undertook to remove the fixed fishery settlements on the part of the coast to which the French rights extend. A proposal for the settlement of all the questions was agreed to in 1885 by commissioners representing France and England, but was rejected by Newfoundland. An agreement for the reference to arbitration of the lobster fishery question was signed in 1891, but the law approving it did not pass the French Chamber. Pending the arbitration, the *modus vivendi*, which had been adopted in 1890, limiting the erection of new factories, was renewed. The Colony reluctantly passed legislation in 1891 for enforcing it for three years, but rejected the draft permanent Bill for giving effect to the treaty obligations in the session of 1892. The Act was first continued to 31st December, 1895, then to 31st December, 1897, and in 1897 it was further continued to 31st December, 1898. By legislation passed in each subsequent session the Act of 1891 was continued until the 31st day of December.

The dispute was finally settled by the Anglo-French Convention of the 8th April, 1904, in connection with other outstanding questions between the two countries. Under that Convention, France renounced the privileges under Art. xiii. of the Treaty of Utrecht (see Cd. 1962). The arrangement has been of great benefit to the Colony, since it removed an obstruction to local development, to mining and other industrial enterprises, over some two-fifths of the whole coast line.

#### Industries.

The industries of the island—fishing, agricultural, mining, and lumbering—are mainly confined to the sea coast. Dried cod is the largest export (1,252,479 qtls. in 1929-30); other large exports are herrings, lobsters, salmon, iron, fish oils, seal skins, timber, and paper (249,537 tons). Copper has been worked for export at Tilt Cove and Little Bay, iron pyrites at Pilley's Island, on the N.E. coast, and asbestos in the interior from Port-au-Port, west coast, and lead, silver, coal, and gold are also found. Immense beds of hematite iron ore have been

laid bare at Bell Island, Conception Bay, and large quantities are being exported. Buchan's Mine, Red Indian Lake, in the interior of Newfoundland, has proved to be one of the greatest mineral discoveries of recent years. The ore is complex, containing zinc, lead, copper, silver, and gold. Many millions of tons of ore are in sight giving values of approximately \$35 per ton. The mine is in the producing stage and concentrates are shipped regularly to the smelting plants of the American Smelting and Refining Company. Promising areas (extent—32,000 acres) are held by the Porcupine Goldfields, Ltd., in the same locality and ore similar to that of Buchan's has been discovered on their holdings. Large areas in this neighbourhood are being investigated by other Companies drawn to Newfoundland through the widespread interest created by the Buchan's discovery.

There are good signs of the speedy revival of the Copper industry. Drilling operations are being carried out by a Toronto Syndicate at Great Gull Lake fourteen miles inland from Notre Dame Bay. The results of the drilling, up to the present time, are favourable. Successful operations at Great Gull Lake will help to bring about the re-opening of Tilt Cove and other mines in Notre Dame Bay.

The Lead situation is promising. La Manche Lead Mine is being investigated and should soon reach the producing stage. Systematic sampling is being done and the results should warrant the re-opening and extending of this mine.

The establishment of large and well-equipped paper mills at Grand Falls, in the interior, by the Anglo-Newfoundland Development Company, has opened up a very large industry. The paper and paper pulp is shipped to the United Kingdom and used in the principal London printing offices. A model town has been laid out which is well lighted, watered, and drained. It is very picturesque situated, and is on the line of the Reid Newfoundland Company's railway through the interior, while a private line of rail connects the works with Botwood, the principal port on the Exploits for summer shipments.

The Albert Reed Company, of London, have completed a large pulp mill at Bishop's Falls, about nine miles from Grand Falls, where pulp is being manufactured for English mills. This company have also installed machinery for the manufacture of paper. At Lomond, in Bonne Bay, on the West Coast, the St. Lawrence Lumber and Pulp Co. are erecting large mills for the manufacture of lumber and pulp, and propose to erect mills for the making of paper. At Glovertown, on the Terra Nova River, Bonavista Bay, a company is now installing a plant for the manufacture of sulphite pulp. Both these companies will operate on a large scale.

The Humber development scheme, launched by the Newfoundland Power and Paper Co., Ltd., with the full sanction of the Newfoundland Government, was designed to utilize water power capable of developing hydro-electric energy of 250,000 horse power, and to involve the employment of more than 1,500 people, and the making of a new town at Comer Brook of about 7,000 people in the western portion of the Island. The mills were to have a producing capacity of 400 tons of finished paper daily. Apart from the power required for the mills, a surplus was estimated sufficient for all local or domestic purposes on the whole of the west coast, and also for the large mining areas in that part.

The scheme received support from both the British and Newfoundland Governments, the British Government guaranteeing £2,000,000 under the Trade Facilities Act. Early in 1927 it became known that this enterprise was in financial difficulties and that its owners were trying to dispose of it. Eventually they interested the International Paper Company of New York one of the largest American paper-making companies, which in turn effected an agreement with the Newfoundland Government, ratified by the Legislature in September, 1927, whereby the International acquired the enterprise, and undertook its enlargement, under certain concessions from the Colony. At the same time the Legislature validated another agreement with the International Co. for the establishment of another paper-making industry in the Gander Valley, on the East Coast.

The cod-fishery is the staple industry, and after this in importance rank the fisheries for seal, lobster, herring, and salmon. Haddock and mackerel are now only taken occasionally. The cod appears off the coast early in May, and the fishery extends north for over 1,000 miles, including the coast of Labrador, the grounds varying in depth from 50 to 360 feet. The home consumption is about 300,000 quintals, and the export in 1927-28 was 1,573,748 quintals, value \$11,540,976; 30 bank cod go, on an average, to one quintal. A fair average of fish (general run) per quintal would be 125. The export is mainly to Portugal, Spain, Brazil, Italy, Greece, and the United Kingdom. The chief imports are flour, textiles, woollens and cottons, hardware, cutlery, salt pork, molasses, butter, and salt. These are obtained mainly from Canada, the United Kingdom, and the United States.

#### *Currency and Banking.*

Branch banks of the Bank of Montreal, Bank of Nova Scotia, Royal Bank of Canada, and Canadian Bank of Commerce have been opened in St. John's, branches of the Bank of Nova Scotia in Harbour Grace and in 10 other towns; branches of the Bank of Montreal at Bay of Islands, Grand Falls, and 2 other places; and 4 branches of the Royal Bank of Canada at various points.

The legal tender currency (see Act IV. of 1895) is British sterling, United States gold, and Colonial coins. Silver is legal tender to the extent of \$10, and copper to the amount of 25 cents. Accounts are kept in dollars and cents. Exchange \$4'86½ to the pound sterling.

In the Government Savings Bank deposits in 1930 were \$2,026,426.

#### *Means of Communication.*

There is a railway from St. John's to Carbonear, 84 miles in length, the property of the Government. The total approximate cost of construction was \$2,500,000. A branch line has been constructed by the Government, connecting with Placentia. Its length is 27 miles, and it was built at a cost of \$525,000. The railway to the Exploits River, a distance from Whitbourne of 200 miles, was built at a cost of \$3,120,000. The line from Exploits, via Bay of Islands and Bay St. George, to Port-aux-Basques (a distance of 285 miles approximately) is completed, the cost being \$4,446,000. Branch lines to Carbonear, and Lewisport, N.D.B., are also completed. The total length of these lines, with branches, is about 638 miles. Other branch lines have been constructed to Bonavista, Hearts' Content, Grate's Cove and Trepassay, in all about 289 miles. By the transinsular railway

regular connection is made with the continent thrice weekly, the intervening strait being crossed in the first-class passenger steamer "Caribou" which makes the passage in six hours. About 750 miles of postal and 1,700 miles of district roads are maintained. A Highroad Policy was adopted in 1925, and as a result there has been built in the last 6 years 565 miles of Highroads, and 315 miles of other roads have been improved. Concrete bridges have been substituted for wooden bridges to the number of 133, varying in length from 15 feet to 1,140 feet, and hundreds of wooden culverts have been replaced by concrete culverts. This work was performed by the Highroads Commission, a new body created in 1925. There are 7,000 miles of postal telegraph lines and 2,000 miles of postal telephones. There are 246 Postal Telegraph stations, 55 of which are internal point-to-point wireless stations; also 11 wireless stations along the Labrador coast. Cape Race and Fogo wireless stations, operated by the Marconi Wireless Co., have constant communication with ships at sea. Cape Race has also a Navigation direction finding station available to ships crossing the Atlantic. The Government cable, laid in 1905 between Port-aux-Basques and Canoe in Nova Scotia, gives quick communication with both America and Europe. This cable was sold to the Commercial Cable Company in 1922. The Anglo-American cables start for Europe (at Hearts' Content) and America (at Placentia). The Commercial cable landed at St. John's, the Direct (now "Imperial") cable at Harbor Grace, and the Western Union at Bay Roberts, and all connect with both Europe and America. Constant connection by water with Montreal, Halifax, Boston and New York is made by private lines of steamers. The Furness-Withy Line of steamers runs between Liverpool and St. John's, and between St. John's, Halifax, and Boston, U.S.A., making about sixteen trips each way annually, monthly in winter, and at intervals of about three weeks in summer. The south and west coast has a weekly steamer service from Argentina, P.B., and also a fortnightly service by steamer from St. John's. Two steamers make trips from St. John's to the Labrador Coast with mails and passengers during the summer at intervals of eight to ten days, and another makes fortnightly trips between St. John's and Cape Norman in the north of the island, calling at all the important intermediate settlements. Smaller steamers ply on the five great bays, while another steamer visits each week the ports in the Strait of Belle Isle. All these steamers make close connection with the railway. The rates of postage are as follows:—

	Letters.	News-papers.
In St. John's	1st 1 oz.	} under 4 oz.
Within Colony	2 cents	
	3 cents	1 cent.
To United Kingdom, Dominions and Colonies	} 4 ..	1 cent for 4 oz.

South America, etc.		
To United States	4 cents	1 .. ditto.
St. Pierre	{ 6 cents 1st oz. 3 cents. each addi- tional 3or.	...

### *Climate.*

The climate is milder than that of Canada; the mean temperature at St. John's is about 42°, the extreme range being from 0° to 81°. There is an almost total absence of spring, the summer setting in very suddenly in May. The rainfall in 1918 was 49 inches. Two-thirds of the inhabitants are descended from the British settlers, English being everywhere spoken, but about one-third belong to the Roman Catholic religion, and a small number of these are of French extraction. The last of the aboriginal inhabitants died out about 1829; they were of the Beothuck tribe.

### *Education.*

The Government system of primary education rests upon the Education Act of 1927. By this Act the Central Administration is vested in the Bureau of Education, presided over by the Prime Minister. The Executive officer of the Bureau is the Secretary for Education. He is also Deputy President and presides in the absence of the President. There are three Superintendents of Education belonging respectively to the Roman Catholic, the Anglican and the United Church Denominations. There were in 1929-1930, 1,177 schools, 1,565 school Departments and 60,580 scholars. The schools are denominational, and fees are charged. Grants are also made in aid of secondary schools, and a small sum of \$4,767 is voted for technical education. In 1910 a special grant of \$100,000 was made for the erection, remodelling and equipment of school buildings in places outside the city of St. John's.

In 1893 an Act was passed appointing a council of higher education, and empowering them to adopt certain rules and regulations with the object of fostering higher education in the Colony. A sum of money in aid of the council is annually granted by the Legislature.

A general Training School for teachers was opened in 1921, and in September, 1925, the first real attempt at University work was made, when the Newfoundland Memorial University College was opened, an institution which gives a two years' University Course. The Training School for teachers has been combined with the new College and the whole institution is now known as the Newfoundland Memorial University College and Normal School.

### *Chief Towns.*

The capital is St. John's, with 41,678 inhabitants. Other towns of importance are Harbour Grace, with a population (1921 census) of 3,825; Bonavista, 4,052; Carbonear 3,320; Twillingate 3,217; Grand Falls, 3,769; Burin, 2,763, and Bay Roberts, 2,168. St. John's, which had similarly suffered in 1846, was almost completely destroyed by fire in 1892, the Cathedral and many Government buildings being burnt, with the public records which they contained. The city has been rebuilt in an improved manner.

### *Constitution.*

Newfoundland has had a Legislature since 1832, but it was the last of the North American Colonies to which responsible Government was conceded; it was established in 1856. In 1925, a Redistribution Act was passed by the Legislature establishing 37 Districts in the Colony instead of 18. In the same year an amendment to the Election Law extended the suffrage to women of twenty-five years and upwards. The Government is at present administered by a Governor, aided by a responsible Executive Council in which the

Governor presides, a Legislative Council of 24 members, and a House of Assembly of 40 members, the latter being elected by ballot under the new suffrage—that is, men of 21 years and upwards, and women of 25 years and upwards. In the registration of 1928, there were 66,255 male electors, and 52,343 female electors, making 118,598 electors registered on the Electoral Roll. Of the 37 Districts, 34 return 1 member each and 3 Districts return 2 members each. There is a property qualification for members, namely: Property exceeding \$2,400.00 in amount or value, or a net annual income of \$480.00. The ordinary duration of the restricted Session is about three months, and the Legislature generally meets about the middle of February.

Members of the Council receive \$150 each (President \$250) per session. Members of the Assembly receive \$1,000 each per session. The Speaker receives \$750. This pay to the Legislature is provided for annually in a local Act. The city of St. John's is governed by a Mayor and 6 Councillors elected under the provisions of the Municipal Act, 1921.

## NEW ZEALAND.

*Situation and Area.*

The Dominion of New Zealand consists of three principal islands, called respectively the North, the South, and Stewart Islands. There are several small islets (mostly uninhabited) within the boundaries of the Dominion: the chief of these are the Chatham Islands, 536 miles eastward of Lyttelton, in 43° 45' S. lat., 176° 17' W. long. (Chatham and Pitt are the principal islands); and the Auckland Islands. The main group lies between 33° and 53° S. lat., and 162° E. long. and 173° W. Long. The three principal islands extend in length 1,100 miles, but their breadth is extremely variable, ranging from 46 miles to 250 miles, the average being about 140 miles. The area of the North Island and adjacent islets is 44,281 square miles, of the South Island 58,092 square miles, of Stewart Island 670 square miles, of Chatham Islands 372 square miles, and other islands, including the Cook Islands, 600 square miles, a total area of 104,015 square miles (twice the size of England).

In April, 1842, by Royal Letters Patent, and again by the Act 26 & 27 Vict., cap. 23, all islands between 162° E. and 173° W. long., and 33° and 53° S. lat., were annexed to New Zealand.

By Letters Patent, dated 18th January, 1887, the group called the Kermadec Islands, situated about 614 miles N.E. of the Bay of Islands, was annexed to New Zealand. These are a chain of widely separated islets, lying between 29° and 32° S. lat., and 177° and 180° W. long. The principal are Raoul or Sunday, and Macaulay, the next in size being Curtis and Espérance. Raoul comprises 12 square miles, is covered with forest, and rises to a height of 1,720 feet.

The Protectorate over the Cook Islands was administered through the Governor of New Zealand until 1900; in October of that year the group was annexed to Her Majesty's Dominions, and resolutions were passed by the New Zealand Parliament for the extension of the boundaries of the Dominion to include the group as well as Savage (Niue) Island and other small islands. By proclamation finally fixing the date from which the boundaries of New Zealand are deemed to be extended, from the 11th June, 1901, the following islands are included:—Barotonga, Mangaia, Atiu, Aitutaki, Mitiaro, Maukē, Manuae and Te Au-o-tu (Hervey Islands), Palmerston (Avarau), Savage (Niue), Pukapuka (Danger), Nassau, Rakaanga, Manihiki, Penrhyn (Tongareva), and Suwarow.

An account of the Cook Islands is given below. The principal Allied and Associated Powers, assembled at Versailles, decided that the islands of Western Samoa should be assigned under mandate to New Zealand; and a mandate was issued by the Council of the League of Nations in December, 1920, in favour of New Zealand. The group which lies about 400 miles N.E. from Fiji contains several islands, of which Savai'i and Upolu are the largest. The total area is 1,133 square miles.

It was also decided that the phosphate island of Nauru (Pleasant Island), lying in 0° 33' south latitude, and 166° 55' east longitude, should be administered by New Zealand conjointly with the United Kingdom and Australia.

By Order-in-Council of 30th July, 1923, the Government of the Ross Dependency, comprising the coasts of the Ross Sea and adjacent islands and territories, was transferred to the Governor-General of New Zealand.

Arrangements were made in 1925 for the administration of the Tokelau or Union Islands, part of the colony of Gilbert and Ellice Islands, to be taken over by New Zealand. This transfer was effected as from February 11th, 1926, on the publication of the Union Islands Orders in Council, 1925, in the respective Government Gazettes. The islands are administered by the Administrator of Western Samoa on behalf of New Zealand.

*Climate.*

The climate is temperate and very healthy, the average death rate in recent years being less than 9 per 1,000. The temperature is more equable than in the British Isles. While the summers are as cool as those of England, the winters are as warm as those of Italy. The mean annual temperature at Auckland (59°) is nearly the same as at Rome; at Wellington (56°) nearly the same as at Milan; at Dunedin (51°) nearly the same as at London. The extreme range of temperature at Wellington in 1930 was 44° 7', from 77° 0' on the hottest day in summer to 32° 3' on the coldest day in winter. The rainfall varied for the year 1930 from 10 inches in Central Otago and 23 inches on the east coast of Canterbury, to 215 inches in the west coast flocks of the South Island, and from 26 inches in Hawke's Bay (east coast), to 68 inches on the Taranaki coast, and 100 inches in the central mountain ranges of the North Island.

The average birth rate for the 5 years 1926-1930 was 19·7 per 1,000 living, and the average death rate for the same period 8·6. The birth rate in 1930 was 18·8 per 1,000; the death rate in that year was 8·6. New Zealand has the lowest rate of infant mortality in the world, a fact attributed to such matters as climate, virility of race, comparative absence of large industrial undertakings, and partly to legislative and educative measures. The average rate for the last 5 years was 36·7 per 1,000 births, and the rate for the year 1930 was 34·5.

*History.*

New Zealand was discovered in 1642 by the Dutch navigator, Tasman, who, however, did not land upon its shores. In 1769 it was visited by Captain Cook, who in that year, and during subsequent voyages, explored its coasts. The country subsequently became a resort for whalers and traders, chiefly from Australia, as well as a field for the labours of the Missionary Societies from 1814. In 1840 the native chiefs ceded the sovereignty of New Zealand to the British Crown by the Treaty of Waitangi, concluded by the British Consul, Captain Hobson, and the islands became a British colony.

The aborigines, called Maoris, are a remarkable people—a branch of the Polynesian race. According to their own traditions, their forefathers came about 600 years, or twenty generations ago, from Hawaiki, which was probably Hawaii in the Sandwich Islands, or Savai'i, in the Navigator, or Samoa, group. They are divided into about twenty different clans, analogous to those of the Highlands of Scotland. There have been two Maori wars; the first lasted from 1845 until 1848; the second lasted from 1860, with little intermission, until 1870. But fully half the clans have always been friendly to the English; and many of them fought on the side of the Colonial Government against their own countrymen. Permanent tranquillity was established in 1871 throughout the country. An agitation amongst certain tribes in 1881, which threatened for a time to

create a disturbance, was promptly quelled. Contrary to the results found in other civilised countries the Maoris in New Zealand are steadily increasing. The estimated Maori population at 30th June, 1931, was 68,523, almost all of whom dwelt in the North Island.

#### *Constitution.*

The country was at first a dependency of New South Wales, but was separated by Letters Patent in 1842. Its settlement was largely effected by the New Zealand Company, with a royal charter, which was surrendered in 1850.

Down to 1847 the Executive and Legislative Councils were both nominated by the Governor, and a constitutional form of Government was established by the Imperial Statute 15 & 16 Vict., cap. 72. By that Act New Zealand was divided into six provinces, afterwards increased to ten, but subsequently reduced to nine—viz., Auckland, Taranaki, Wellington, Nelson, Canterbury, Otago, Hawke's Bay, Westland, and Marlborough—each governed by a Superintendent and Provincial Council, elected by the inhabitants under a franchise which practically amounted to household suffrage.

By an Act of the General Assembly, 39 Vict., No. XXI., passed in 1876, the provincial system of government was abolished. The powers previously exercised by superintendents and provincial officers were now exercised by the Governor or by local boards. The provincial system being abolished, provision was made for the division of the Dominion into counties and boroughs, and the necessary machinery for their self-government was provided.

A Central Legislature, called the General Assembly, was also established by the Imperial Statute of 1852, consisting of the Governor (now Governor-General), a Legislative Council, and House of Representatives. The Governor-General is assisted by an Executive Council, composed of the Responsible Ministers of the Dominion for the time being, according to the usual practice of Parliamentary Government. The Legislative Councillors are appointed by the Governor-General, and up to 1891 held their seats for life. Under the Act passed in that year, future appointments were made tenable for seven years only. Provision was made by legislation some years ago for an elective Legislative Council to consist of 40 European members and not more than 3 Maori members, the latter to be appointed by the Governor-General, but the Act has not yet been brought into operation. The members of the House of Representatives are chosen by electors possessing a liberal franchise. Every elector, male or female, is qualified to become a member (the Women's Parliamentary Rights Act, passed in 1919, gives women the right to be elected to either house). The House of Representatives now consists of 80, including 4 Maori members, elected by the natives. The session is usually from June to October.

Payment of Members of the Legislative Council is at the rate of 283*l.* 10*s.* a year, payable monthly.

Members of the House of Representatives receive 406*l.* per annum.

The Electoral Act, 1893, extended to women (of both races) the right to register as electors, and to vote at the elections for members of the House of Representatives.

The franchise for European representation is as follows:—Every adult person, other than aliens, lunatics, and certain criminal offenders,

if resident one year in the Dominion and three months in an electoral district, is required to be registered as an elector.

The property qualification was abolished by "The Electoral Act Amendment Act, 1896," and residence alone now entitles a man or woman to have his or her name placed upon an electoral roll. Compulsory enrolment of electors was introduced in 1924.

For Maori representation every adult Maori resident in the district can vote, and no registration is required. There are four Maori electoral districts.

For local bodies the qualification is a property or residential one. Women can vote and are eligible for election as well as men.

The control of native affairs, and the entire responsibility of dealing with questions of native government were transferred in 1863 from the British to the New Zealand Government. In 1865 the seat of Government was removed from Auckland to Wellington, on account of the central position of the latter city.

#### *Local Government.*

For the purposes of local government the Dominion is divided into 122 municipalities and 129 counties; the latter being subdivided into 18 road districts and 67 town districts, besides River, Drainage, Water Supply, Local Railway, Harbour, Electric Power, Fire, and Rabbit Districts, a special Tramway District, a Transport District, and a Gas-lighting District. For the year ended 31st March, 1930, the total receipts of the above local authorities amounted to 22,253,145*l.* and their expenditure to 22,061,088*l.* Their outstanding loans at the same date amounted to 64,052,021*l.* (net 55,638,966*l.*), exclusive of 5,128,048*l.* (net) outstanding in loans from the State Advances Office, or Main Highways Board and also of 2,027,470*l.* (net 828,726*l.*), inscribed by the Treasury under the now-repealed Local Bodies' Loans Acts and outstanding at 1st Feb., 1930. A class of local district not included in the statistical returns for which the above statistics are compiled consists of the Hospital Districts. The receipts of Hospital Boards for the year ended 31st March, 1930, amounted to 2,055,665*l.* and the expenditure to 1,951,982*l.*

#### *Education.*

A Government system of primary education was established in 1877. The central administration is vested in a Minister of Education, and the local control is in the hands of nine Education Boards, and of School Committees with functions subordinate to those of the Boards. Number of primary schools (called "public schools"), 2,593; scholars on roll, 216,698. Primary education is free, secular, and compulsory. There are also 9 junior High schools in operation, with a total enrolment of 2,337 pupils. In addition for native (Maori) education there are 138 village schools maintained by the Government and under the control of the Minister, ten Native mission schools, and twelve denominational boarding schools. Scholars on roll of village schools, 7,070 (including 850 Europeans); on the roll of mission schools, 520; and on roll of boarding schools, 535, of whom 167 hold Government free places. Net cost of native school education in 1930-31 was 99,101*l.* In the Chatham Islands four schools are maintained, and there are fourteen schools, under the control of the Cook Islands Administration, in the Cook Islands (including Niue). During the year 1930.

306 private primary schools with a roll number of 26,451 were registered under the Education Act. A School Journal providing suitable reading matter is provided by the Department and issued free to all children in Government schools. A comprehensive system of physical education and schemes of dental and medical inspection are in operation in the primary schools, the latter now being under the control of the Department of Health. Four training colleges make provision for the training of teachers, the total number in attendance during 1930 being 1,164. There is also provision for training classes at smaller centres. The number of adult primary school teachers in 1930 was 6,433, and the number of probationers 550. The total expenditure by the Government under the head of primary education was for 1930-31, 2,537,419. There is a system of superannuation for teachers giving an annuity of one-sixtieth of the average of the final three years' salary for each year of service up to forty years.

Secondary education is provided at secondary schools, district high schools, technical high schools and technical day schools, the numbers of operative schools under each heading in 1930 being 46, 81, 15, and 7 respectively, with a total roll number as follows:—Secondary schools, 16,149; district high schools (secondary departments), 4,115; technical high schools and technical day schools, 6,963. In addition 48 private secondary schools were registered under the Education Act, the roll number being 3,825. Of the total number of children in attendance at Government post-primary schools, 97 per cent. are holders of free places which carry free secondary education. Provision is made for manual instruction in both primary and secondary schools, cookery, dressmaking, woodwork, elementary agriculture, dairy-work, and the various branches of elementary science being included in the subjects taken. Instruction of a technical or vocational character is provided at a large number of technical schools and classes, besides the technical high schools and technical day schools mentioned above, the courses of instruction followed being commercial and general, industrial, domestic, agriculture, and art. The total number of students attending such classes in 1930 was 11,829 of whom 5,994 received free education.

For higher education there are four endowed colleges affiliated to the University of New Zealand, and each specializes in one or more directions. At Dunedin the special subjects are mining, medicine, dentistry, veterinary science, and domestic science; at Christchurch, engineering, technical science and forestry; at Wellington, law and science; at Auckland, commerce, engineering, architecture and forestry. There is an agricultural college at Lincoln possessing a large endowment and an experimental farm of a very complete character. Another agricultural college connected with the New Zealand University, Massey College, has been established at Palmerston North. The number of students on the books of the University Colleges was, in 1930, 4,801, of which number 2,009 were receiving free education. The total expenditure by the Government on university education in 1930-31 was 191,936.

The Child Welfare Act, 1925, provided for the creation of a special branch of the Education Department known as the Child Welfare Branch. The Act was designed to make better provision with respect to the maintenance, care, and control of children who are specially under the protection of

the State, and to provide generally for the protection and training of indigent, neglected, or delinquent children.

An important section of the Act provided for the establishment of Children's Courts, to be presided over by Stipendiary Magistrates or Justices specially authorized to exercise jurisdiction in these courts. Honorary associates of either sex are appointed, whose function it is to consider all the facts concerning children brought before the Courts and to advise the presiding Magistrate or Justice as to what action should be taken. Child Welfare Officers are also appointed for the investigation of all cases coming before the Courts.

The Act gives very wide discretionary powers to the Magistrates of these special Courts in dealing with children. The ordinary procedure of requiring the child to plead, of taking evidence on oath, and, in fact, of hearing the particular charge may be dispensed with altogether. Wherever practicable the Children's Court is held in premises apart from the ordinary Police Court, and no newspaper is permitted to publish either the names of children appearing before these Courts or any particulars that are likely to identify the child.

The Children's Court may exercise jurisdiction over any young person under eighteen years of age charged with any offence. Such cases would be referred by a Stipendiary Magistrate or Judge of the Supreme Court.

In order to provide for the greater protection of infants of unmarried mothers and for the assistance and guidance of the mothers themselves, Child Welfare Officers, on being notified of such births, investigate each case and render such assistance as is required, either in placing the child in a suitable foster-home or in advising the mother in the matter of affiliation proceedings, or in assisting her in obtaining employment, etc.

An amending Act of 1927 raises the age of a "child" from sixteen to seventeen years, and provides for the registration and inspection of all private or denominational institutions where children are maintained apart from their parents or guardians.

In addition to the work in connection with the maintenance and education of destitute, neglected, and delinquent children committed by the Courts, the Child Welfare Branch (1) supervises all infants and young children under the age of six years who are living apart from their parents; (2) makes inquiry through its field officers, for the information of Magistrates, of all applications for the adoption of children and for widows' pensions; (3) supervises all children and young persons placed under the field officers by order of the Court; and (4) provides for the maintenance, education, and training of all afflicted children who are deaf, blind, feeble-minded or have speech-defects.

The total number of children under the supervision of the State in 1930-31 was 7,225, classed under the following headings:—

Boarded out, in receiving-homes, &c. . . . .	4,633
Under supervision . . . .	952
Infant-life protection . . .	1,280
Deaf Children . . . . .	121
Feeble-minded children . .	269

The expenditure in 1930-31 in connection with the Child Welfare Branch was 159,124.

For the financial year 1930-31 the total cost to the Education Department of the services mentioned above was 4,101,937.

*Population.*

The population of New Zealand in 1926, was found by the census to be 1,344,469 persons, excluding the Maoris, who numbered 63,670, Cook and other Pacific Islands (13,877), Western Samoa (40,229) and Tokelau Islands (1,033). The estimated population of New Zealand proper (including Maoris), on 30th June, 1931, was 1,512,627.

The population of the four principal urban areas in 1931, was as follows:—

	1931.	
	City.	Urban Area.
Auckland . . . . .	105,600	217,000
Christchurch . . . . .	89,600	127,300
Dunedin . . . . .	68,200	86,500
Wellington . . . . .	111,500	143,000

*Industry.*

All the productions of the temperate climates of Europe and Asia can be cultivated with great success in New Zealand. There are extensive coal mines and rich gold fields. The gold entered for exportation from the Dominion up to 31st December, 1930, was valued at 94,458,512s. The wool exported in 1930 amounted to 197,239,614 lbs., valued at 7,664,362s. In 1929, however, wool exports were 234,955,978 lbs., valued at 15,359,206s. In 1856 they amounted to 2,569,618 lbs., valued at 146,070s. The trade in frozen meat, which began in 1882 with an export of 15,244 cwt., valued at 19,339s., had developed an export for 1889 of 656,822 cwt., valued at 783,374s., in 1898, 1,551,773 cwt., valued at 1,698,750s., in 1913, 2,578,693 cwt., valued at 4,449,933s., in 1925, 3,414,206 cwt., valued at 11,174,667s., and in 1930, 4,036,639 cwt., valued at 10,937,382s. Butter exports rose from 172,583 cwts, valued at 740,820s., in 1900 to 1,884,237 cwts., valued at 11,854,056s., in 1930. Cheese exports at the same time increased from 102,849 cwt. (229,111s.) to 1,812,981 cwt. (6,438,438s.). The live stock in New Zealand, as returned in 1930 was: horses, 297,195 against 137,768 in 1878; cattle, 3,770,223 against 578,430 in 1878; sheep, (1931) 29,792,506 against 13,069,338 in 1878; pigs, (1930) 487,793 against 207,337 in 1878. The total area of occupied holdings over one acre in extent in 1930 was 43,368,653 acres; in 1929-30, 235,942 acres were in wheat (for threshing only), having a total yield of 7,239,556 bushels. Of an area of 282,814 acres under oats for all purposes 67,722 acres were threshed, giving a total yield of 3,002,288 bushels.

Auckland, Dunedin, Invercargill, Lyttelton, Napier, Nelson, Wellington, and Timaru are ports of registry, and had, on 31st Dec., 1930, 531 vessels registered, of 111,970 (net) tons in the aggregate.

The imports consist chiefly of textiles, hardware and machinery, sugar, tea, tobacco, alcohol, books, stationery, motor vehicles and accessories, drugs and chemicals, and oils; and they are obtained almost entirely from the United Kingdom, Australia, the United States, Canada, Ceylon, India, Japan, Pacific islands, Germany, and France.

*Banking and Currency.*

Of the following banks which have branches in the Dominion, the first two are New Zealand Institutions:—Bank of New Zealand, National Bank of New Zealand (Limited), Union Bank of Australia (Limited), Bank of New South Wales, Bank of Australasia, and Commercial Bank of Aus-

tralia (Limited). The total amount of their deposits in New Zealand for the year 1930 (average of four quarters), was 56,175,014s., and of their note circulation 6,255,717s. There is also a Post Office Savings Bank established in the Dominion, having on 31st March, 1931, 894 branches; the amount deposited therein at that date was 47,668,547s. The trustee savings banks number five, and the total amount to credit of depositors at March 31st, 1931, was 9,686,586s.

The currency and legal tender is exclusively British sterling, but the issues of the six banks operating in the Dominion have been declared legal tender until 10th January, 1932.

*Government Life Insurance Department.*

This department commenced to transact business in 1870. It is under the management of the Government Insurance Commissioner, and is conducted almost exactly on the same principles as those generally adopted by private mutual life offices.

It has canvassing agents, and pays its own expenses including postage and taxes. Besides its low premiums the Department makes a feature of its liberal and sympathetic administration.

Profits belong absolutely and entirely to the policyholders themselves and are distributed annually in the form of compound reversionary bonuses. The basis employed in the actuarial valuation—the most stringent in use by Australasian Offices, namely, the O.M. (British Offices) Tables with interest at 3%—indicates the strength of the Department and when taken in conjunction with the fact that the rate of interest earned on the funds is over 6½% constitutes the best possible augury of future bonus prospects. The figures for the last five years in respect of new business, premium income, funds, and total business in force are as follows:—

Year.	New Business.	Premium Income.	Funds at end of year.	Business in Force.
	£	£	£	£
1926	1,883,705	566,440	7,029,584	20,218,404
1927	1,791,845	586,535	7,303,925	21,277,350
1928	1,915,465	609,205	7,582,679	22,084,471
1929	1,918,600	633,225	7,926,525	22,965,608
1930	1,946,322	656,761	8,248,847	23,845,034

*State Fire and Accident Insurance.**Fire Branch.*

In 1903 an Act was passed "to establish a State Fire Insurance Office and to make other provisions for the insurance and protection of insurable property in New Zealand against loss or damage by fire." The statute provided for the establishment of an office to be administered by a General Manager appointed by the Governor-General, and for the necessary staff.

The Board of the Office consists of the Minister of Finance, the General Manager and three other persons appointed by the Governor-General, of whom at least one must be an officer of the Public Service. The appointed members hold office for two years with eligibility for re-appointment.

The Department opened for business with branches and agencies throughout the Dominion in 1905. The opening of the office resulted in a reduction in the rates then current of 33½ per cent. on dwellings and the less hazardous risks, and of 10 per cent. on all others.

Under an Amending Act passed in 1922, the Board is authorised to declare rebates to insured persons out of surplus profits and the first rebate

of 15 % was declared for a period of 12 months from 8th August, 1923. The rebate was reduced to 10 % during 1924-25 and has been fixed at 12½ % since January, 1926.

The amount granted in rebates up to 31st December, 1930, is estimated at 181,297½, and as the Associated Companies adopted the same system of rebates as the State Office the total saving to the public is estimated at 1,516,266½ to the end of 1928.

The total accumulated profit made to the end of December, 1930, was 689,731½, and the net income and net losses for each of the five years to that date have been as follows:—

	Net Income, less Re-insurances.	Net Losses.
	£	£
1926	233,545	79,062
1927	243,496	98,135
1928	252,094	81,585
1929	258,995	75,317
1930	272,213	90,001

#### *Accident Branch.*

The Government Accident Branch, attached since 1925 to the State Fire Insurance Office, was opened in 1901, for the purpose of transacting Personal Accident Insurance and Employers' Liability Insurance. General accident business is undertaken, but the branch was opened more especially with a view to relieve employers of labour of the liability imposed upon them by "The Workers' Compensation for Accidents Act, 1900." This Act greatly extended the liability of employers, and gave to a workman the right of compensation for all injuries arising out of, and in the course of, his employment, not attributable to his own serious and wilful misconduct.

This liability has been extended by subsequent Acts, the principal amendments being in 1908, 1920, 1922, and 1926.

The scale of compensation is as follows:—

- (a) Where death results from the injury and the workman leaves dependants wholly dependent upon his earnings, the compensation is two hundred and eight times his average weekly earnings, but not to be less than 300½, nor to exceed 1,000.
- (b) If the dependants are only partially dependent upon the workman's earnings, the compensation is to be such sum as is reasonable and proportionate to the injury to such dependants, but not exceeding the amount payable under paragraph (a).
- (c) In either of the above cases the employer is also liable for medical and burial expenses not exceeding 50½, and an amount not exceeding this sum can be claimed where there are no dependants.
- (d) Where a workman is totally incapacitated for work, he is entitled to a weekly payment of 66½ %, of his average weekly earnings. Persons employed otherwise than by way of manual labour, whose earnings exceed 400½ a year, are excluded from the benefits of the Act and the maximum weekly payment is limited to 4½.
- (e) Where the workman is partially incapacitated only, the compensation is 66½ % of the loss of wages, with a maximum of 4½ per week.
- (f) In addition to the compensation for incapacity, medical or surgical expenses are allowed, not exceeding 1½.

Weekly payments are not to extend over a longer period than six years, and the aggregate amount is not to exceed 1,000.

The Department's policies cover the full liability of an employer to his workmen under the Workers' Compensation Act, and also suitably protect him against liability under the Deaths by Accident Compensation Act, and the Common Law.

Personal accident policies are also issued securing amounts for accidental death and permanent total or partial disablement, and weekly allowances during temporary disablement, whether caused by accident or sickness.

Under the Government Accident Insurance Amendment Act of 1924, the Department is authorised to underwrite all classes of Accident Insurance accepted by Accident Insurance Companies, and the office now accepts motor-vehicle (third party risk), motor car comprehensive, plate glass and fidelity guarantee insurance.

The premium income and claims of the Accident Branch during the last five years have been as follows:—

Year.	Premium Income.	Claims.
	£	£
Year ending 31st December, 1926	58,340	33,854
" " " 1927	65,560	38,972
" " " 1928	71,731	43,807
" " " 1929	81,353	49,863
" " " 1930	104,934	61,040

#### *Public Works.*

All the more important public works of New Zealand are in the hands of the Government and other public bodies, comparatively few having been undertaken by companies. In 1870 a great impetus was given to the progress of the country by the inauguration of the "Public Works Policy," which provided for carrying out works in advance of settlement, and for immigration.

**Roads.**—The first public works initiated were roads, many thousands of miles having been constructed in all directions. Development of motor road transport has necessitated a change in the construction and maintenance of main roads in recent years. A Main Highways Board for the whole Dominion was established in 1923 under the authority of the Main Highways Act, 1922, and at 31st March, 1931, that Board controlled 10,427 miles of the main arterial roads in the two Islands. The object of the change of policy was to make the construction and maintenance of main Highways, suitable for modern traffic, more of a national than a local undertaking.

Road and railway formation works are carried out under contracts, but principally by the co-operative system, under which the Government provides all materials and lets the work of construction to parties of labourers and artisans at rates fixed by Government officers on the ground. These rates are calculated so that an average workman will be able to earn the current rate of wages ruling in his trade in the district where the work is situated. Buildings and most of the large bridges are built by contract, let after inviting tenders through the press; but the Public Works Department frequently erects large road bridges and railway viaducts by day labour and on the co-operative system.

All the cities and principal towns are supplied with water at the cost of the corporations.

All the principal towns in the Dominion have gasworks, some of them belonging to private companies, but the majority to the corporations. The native coal from Greymouth is stated to be one of the best in the world for making gas.

**Railways.**—At the end of the financial year, 31st March, 1931, there were 3,322 miles of Government and 116 miles of private railways in operation in New Zealand, and 253 miles of Government railway under construction. The construction of new lines and the extension of existing ones has proceeded steadily in recent years.

The expenditure on the 3,322 miles of opened Government railways has been 60,546,154*l.*, or an average of 18,226*l.* a mile. This includes all charges connected with the construction and equipment of the lines.

The operating revenue from the Government railways for the year 1930–31 was 6,781,388*l.*, and the operating expenses 6,406,143*l.* The gauge throughout is 3ft. 6in.

**Telegraphs and Telephones.**—Of telegraph and inter-urban telephone circuits there are 12,588 miles of pole line and 63,656 miles of wire. There are 361 Morse telegraph offices, 1,670 telephone offices, and 349 telephone exchanges, the latter having 157,767 connections with 15,126 miles of pole-line and 1,667 miles of cable (underground and aerial), the total length of wire involved being 523,668 miles. 739 coin-in-the-slot telephones are in use.

There are now 27 automatic exchanges in operation, covering 82,272 connections. Extensions to telegraph, toll and telephone exchange systems are being proceeded with in all parts of the Dominion to meet the increasing demands for telegraph and telephone facilities. There are eight submarine cables, connecting the two islands of New Zealand; two Wellington–Sydney, one Auckland–Sydney, and one Auckland–Brisbane, *via* Norfolk Island, connecting the Dominion with Australia, and one connecting Auckland with Suva.

The Pacific cable, which was opened for traffic to Australia and Fiji in April, 1902, was completed to Bamfield, Vancouver Island, on the 31st October following, and opened for international traffic on the 8th December, 1902. The laying of the Auckland–Suva cable was completed in 1923. The duplicated cable between Suva (Fiji) and Bamfield (British Columbia) was opened for traffic in 1926.

On the opening of the Pacific cable for through traffic the ordinary rate to Great Britain was 3*s.* per word, Government messages 1*s.* 6*d.*, and Press 1*s.* per word.

By successive reductions the rates to Great Britain and Ireland have been now reduced to 1*s.* 8*d.* per word ordinary rate, 10*d.* for Government messages, 4*d.* for Press messages, and 3*d.* at deferred Press rate.

A system of deferred ordinary telegrams, i.e., telegrams subject to a delay of twenty-four hours, was introduced in 1912, these messages being accepted at one-half the ordinary rate.

Two other classes of cheap cable messages known respectively as Daily Letter Telegrams (which are subject to 48 hours delay during transmission) and Week-End Letter Telegrams are exchanged with the United Kingdom and Canada. The rates are as follows:—

*Daily Letter Telegrams.*

	Per Word.	Min. Charge.
Great Britain ..	6 <i>d.</i>	10 <i>s.</i> 0 <i>d.</i>
Canada ..	6 <i>d.</i> to 1 <i>s.</i> 0 <i>d.</i>	10 <i>s.</i> 0 <i>d.</i> to 20 <i>s.</i> 6 <i>d.</i>

*Week-End Telegrams.*

	Per Word.	Min. Charge.
Great Britain ..	5 <i>d.</i>	8 <i>s.</i> 4 <i>d.</i>
Canada ..	5 <i>d.</i> to 7 <i>d.</i>	8 <i>s.</i> 8 <i>d.</i> to 11 <i>s.</i> 8 <i>d.</i>

The average number of messages transmitted to and from New Zealand prior to the opening of the Pacific cable was about 425 per day. The present average is over 2,000 a day by both routes. In 1929 the Imperial and International Communications, Ltd., assumed control of the Eastern Extension and the Pacific Cable Board cable systems.

In the year ended 31st March, 1931, excluding the value of service messages, the telegraph revenue was 2,127,824*l.* (including telephone exchange and other telegraph receipts); number of messages 17,222,462 (of which number 17,185,444 were private or press messages). The minimum rate on ordinary telegrams is 1*s.* for 12 words; additional words 1*d.* each. Letter-telegrams (inland), for delivery by post on the morning of the day following lodgment, are accepted at the rate of 1*s.* for the first 24 words and 1*d.* for each additional 2 words.

**Wireless Telegraphy.** There are nineteen public radio stations in and around New Zealand, which are under the control of the New Zealand Government, namely: Auckland, Wellington, Awarua, on the mainland and in addition Chatham Islands, Kawau Island, and Stephens Island on the Islands of those names off the coast of New Zealand, Puysegur Point (at the entrance to Preservation Inlet), Atiu, Aitutaki, Mangaia, Mauke and Rarotonga, in the Cook Group; Apia, Aleipata, Fagamalo, Salailua, and Tuasivi, in Western Samoa; Fakaofu, in the Tokelau or Union Group; and Niue Island. The small stations at Aitutaki, Aleipata, Atiu, Fagamalo, Fakaofu, Salailua, Tuasivi, Kawau Island, Mangaia, Mauke, Niue Puysegur Point, White Island, and Stephens Island engage exclusively in point-to-point communication. By means of the Wellington, Apia and Rarotonga stations communication is maintained between New Zealand and the Pacific Islands.

In addition there are 74 wireless ship-stations registered in New Zealand.

A radio telephone service between New Zealand and Australia was opened in 1930 and was extended to Great Britain, Northern Ireland, Dublin in the Irish Free State, and the Isle of Man in 1931. Charges per minute are as follows:—

To Australia ..	£1	(minimum £3)
Great Britain ..	£2 5 <i>s.</i>	( „ £6 15 <i>s.</i> )
N. Ireland ..		
Dublin ..	£2 7 <i>s.</i>	( „ £7 1 <i>s.</i> )
Isle of Man ..		

**Tramways.** Tramways have been established in most of the principal towns in New Zealand. Auckland, Dunedin, Christchurch, Wellington, New Plymouth, Invercargill, Napier, and Wanganui have electric tramway systems on the overhead principle. In Wellington and Dunedin there are cable tramways connecting with the higher levels. In Wanganui the higher levels of Campbelltown are reached by means of an elevator. In Christchurch, in addition to electricity, some casual traffic is operated by means of steam tramway locomotives.

**Electricity.** The retail electrical supply in the Dominion is now largely in the hands of electric power boards. Until 1915, when the Government schemes at Lake Coleridge commenced supply, the distribution of the power was carried out by

local authorities and companies operating various power stations, subject to licenses issued under the Public Works Act. On the Government entering into the business of generating electricity for sale in bulk, it was found desirable to delegate the responsibility for the retail distribution to the local authorities. The smaller local authorities had only a few hundred consumers each, and with annual revenue ranging from 1,000*l.* to 4,500*l.* each were found too small to take a comprehensive grasp of the commercial problems involved. The Electric Power Boards Act, 1918 (consolidated in 1925), set up a new local authority especially charged with the responsibility of electric power supply and its retail distribution. The areas to be constituted are determined by petition, which must be signed by at least 25 per cent. of the ratepayers in the proposed district. The Board is elected by the ratepayers of the various constituent areas of the district, and has full powers of borrowing for the construction of works and rating to make up any deficiency in the revenue. The areas of the power districts are intended to be large, and to include several constituent local districts, boroughs or counties. The Boards have wide powers to purchase energy from the Government when available, or to develop it from water power or any other source where such a supply is not available. Up to March, 1931, forty-five Boards had been gazetted covering an area equal to 64 per cent of the total area of the Dominion and containing 68 per cent of the total population of the Dominion. The unimproved value of the land included in the above area equals 73½ per cent of the total unimproved value of the Dominion. Thirty-nine Boards have so far taken their loan polls, and have received authority from their ratepayers to borrow a total of 13,047,156*l.* Twenty-four Boards are distributing power purchased in bulk from the Government hydro-electric plants at Arapuni, Hora Hora, Waikaremoana, Mangahao or Lake Coleridge. One Board has taken over a large city steam power-house, and has extended both the generating plant and the mains. It has also agreed to take the whole of its power from the Government when the Arapuni plant is completed, the first unit of which went into operation in June, 1929. Seven Boards have their own power stations in operation and one other is constructing a water power plant. Eight others are constructing distribution lines and will purchase power from the Government Stations. Three others have arranged to purchase power in bulk from other authorities. Including the Government stations, there are 33 water power plants, 2 gas power plants, 3 steam power plants and 3 oil power plants, making a total of 41 plants with a total installed capacity of 223,963 kilowatts. The total population included in the various areas of electric power supply is 94 per cent of the total population of the Dominion. The maximum demand per head of population in the areas supplied is 0.129 kilowatts and the units sold per head of population supplied were 489. The total length of distribution lines, mostly overhead, is 20,658 route-miles. Out of the 99 distributing authorities 83 showed a profit, for the year ended 31st March, 1931, amounting to 755,415*l.*, after payment of working costs, interest and sinking fund and 16 showed a loss amounting to 65,539*l.*, making a net profit for the whole Dominion of 689,876*l.*

The Dominion is particularly well supplied with available water power, the total available

in sources of 1,000 h.p. or over is about 770,000 h.p. in the North Island and 4,100,000 h.p. in the South Island. Of the total of the installed capacity in the power stations of the Dominion, 179,878 kilowatts, or 80.4 per cent, is driven by water power, and the proportion is increasing each year. The Government have 4 hydro-electric plants in operation and one under construction. Those in operation are Lake Coleridge 34,000 kilowatts, Hora Hora 13,000 kilowatts, Waikaremoana 30,000 kilowatts, and Mangahao 24,000 kilowatts. The scheme under construction is at Waitaki (40,000 kilowatts). One station (Arapuni) 45,000 kilowatts (ultimate capacity 120,000 kilowatts) is temporarily out of commission. Current is transmitted from Lake Coleridge at 66,000 volts, Hora Hora at 50,000 volts, Waikaremoana and Mangahao 110,000 volts. The total capital expenditure on Government schemes to 31st March, 1931, is 10,235,504*l.*

The total capital outlay on all plants in the Dominion in operation at March 31st, 1931, is 29,185,268*l.*, the units generated were 759,827,056, and the number of consumers 300,809.

*Ports and Docks.* The coasts of the Dominion are well marked with lighthouses and beacons, and all the ports are provided with wharves and jetties in proportion to the trade. Important works to afford shelter and increase the depth of water have been executed or are in course of construction at Thames, Gisborne, Warroa, Napier, Wanganui, Patea, New Plymouth, Opuake, Waitara, Nelson, Westport, Greymouth, Hokitika, Wairau, Lyttelton, Timaru, Oamaru, and Dunedin. There are graving docks at Port Chalmers, Lyttelton, and Auckland. At Wellington there are two patent slips capable of taking up a two thousand ton ship. A floating dock having a deadweight lifting capacity of 17,000 tons has just been built in England and is expected to arrive in New Zealand early in 1932.

#### *Mail Communication.*

There is regular mail communication with England and Europe and with Australian ports, the South Sea Islands, United States of America, and Canada.

#### *Postage Rates.*

The postage on inland letters is 2*d.* for the first ounce or fraction thereof, and 1*d.* for each additional ounce or fraction thereof, and to such places as accept letters at the reduced rate, 2*d.* for the first ounce or fraction thereof, and 1*d.* for each additional ounce or fraction thereof. The reduced rate applies to British possessions, and to a number of foreign countries. The letter postage to other places beyond New Zealand is 2*d.* for the first ounce, and 1½*d.* for each succeeding ounce, or fraction thereof. The inland rates for newspapers are:—for each copy not exceeding 3 oz., ½*d.*; exceeding 3 oz., 1*d.* for each 16 oz. The minimum rate for newspapers printed and published in New Zealand, for Great Britain, is, for each newspaper, 1*d.* for each 16 oz. or fraction thereof, irrespective of weight, but subject to certain conditions as to despatch. This is also the ordinary rate for Australia and New Guinea (except Dutch New Guinea) and for certain other British possessions. The rate for newspapers for other places, and for newspapers not printed and published in New Zealand addressed to Great Britain, is for each newspaper: ½*d.* for each 2 ounces or fraction thereof. The

inland parcel post rates are :—not exceeding 1 lb., 6d.; not exceeding 2 lb., 1s.; for each additional lb. up to 11 lb., 3d. The postage rates applicable to an 11 lb. parcel are charged on all parcels (except parcels containing fishing rods, golf clubs or similar articles, and parcels not exceeding 1 in. in thickness) that weigh less than 11 lb. if such parcels exceed 4 ft. length and girth combined. A fragile fee is charged on all inland parcels which the senders desire forwarded to destination in hampers, the fee being 1s. 6d. in cases where length and girth combined exceed 4 ft., and when parcels, not exceeding 1 in. in thickness, exceed 4 ft. in length and width combined. In all other cases the fee is 1s.

## DEPENDENCIES OF NEW ZEALAND.\*

### COOK ISLANDS.

The Cook Islands were declared to be under British protection in October, 1888, by Captain Bourke, of H.M.S. "Hyacinth," and Manuae, Te Au-o-Tu and Takutea (at that time known as the Hervey Group) by Commander Nicolls, of H.M.S. "Cormorant," in June, 1889. The latter name has fallen into disuse, all of the Islands collectively being known as the Cook Group.

Until 1901 British authority was represented by a Resident who was paid by the Government of New Zealand, and reported direct to the Governor of that Dominion. The first British Resident, Mr. F. J. Moss, who was appointed in 1890, succeeded in 1891 in arranging for the establishment of an Elective Federal Parliament to make laws for the whole group. Each island, however, continued to enjoy self-government in such purely local affairs as it could properly manage for itself. The Federal Executive Council or Government was composed of the Ariki, who are also the principal landowners. The chief of these, Queen Makea, Ariki of Avarua, was the nominal head of the Government. A Supreme Court was established, and a law was passed regulating the sale of intoxicants, and imposing a general *ad valorem* duty of 10 per cent. on imports. All laws and administrative acts were subject to the approval of the Resident, who was also a Deputy and Judicial Commissioner for the Western Pacific, and Chief Justice of the High Court of the Cook Islands.

The Islands became part of the Dominion of New Zealand from the 11th June, 1901. The administration and laws were continued in force subject to the provisions of the Cook Islands Government Act, passed in that year.

In 1915 an Act was passed by the New Zealand Parliament consolidating the laws relating to the Cook Islands and Niue Island, and providing for the appointment of a member of the Executive Council of New Zealand as the Minister for the Cook Islands, who is charged with the administration of the government of the Islands.

The Act also makes provision for the constitution of Island Councils; for the establishment of public schools, Courts of Justice, Native Land Court, etc. The estimated population of the Cook Islands at 30th June, 1931, was 15,048 (including Niue).

\* A full account of these Dependencies will be found in the "New Zealand Official Year Book," to which the Editors desire to express their acknowledgments.

*Minister for the Cook Islands, Hon. Sir Apirana Ngata, Kt., M.A., LL.B.*

*Secretary, Cook Islands Department, Wellington, S. J. Smith.*

*Resident Commissioner at Rarotonga, H. F. Ayson, C.M.G.*

### RAROTONGA.

Distant from Auckland, 1,638 miles; circumference, 20 miles; height, 2,100 ft.; area, 26 square miles; estimated population 1931, 4,390.

Rarotonga is the most fertile and valuable of the Cook group, and it has the largest population. The island has been exceptionally favoured by nature, not only with delightful scenic attractions, but also with a remarkably rich and productive soil.

The aborigines are very closely akin to the Maoris of New Zealand.

The seat and centre of the government of the Cook Islands—the double township of Avarua and Avatiu—is situated on the north or lee side of the island of Rarotonga, opposite two small openings in the coral reef. The former has the advantage of a boat harbour, where small craft can be moored in safety when the wind is not blowing in from the sea. The residence of the Commissioner is situated here.

Rarotonga is a port of call for Wellington (N.Z.)—San Francisco mail steamers, which provide a four-weekly service each way.

New Zealand postal notes apply in the Cook Islands and a government money-order office is in operation. Wireless stations are established at Rarotonga, Aitutaki, Mangaia, Atiu, Mauke and Niue, and further stations are to be installed as funds permit.

The total value of exports from the Cook Islands (excluding Niue) for 1930 was 109,438*l.*, and imports amounted to 103,468*l.* The principal items of export are fresh fruit, coconuts, copra, and pearl shell.

Receipts and payments of the Cook Islands (excluding Niue) for the year 1930-31: Receipts, 38,847*l.*; payments, 37,852*l.*

### MANGAIA.

Distant from Rarotonga, 110 miles; circumference, 30 miles; height, 656 ft.; area, 30 square miles; population, 1931, estimated at 1,393.

A government wireless station is established here.

Mangaia is the most southerly island of the Cook group.

Coconuts, bananas, oranges, limes, citrons and other fruits grow plentifully.

*Resident Agent, J. McGruther.*

### ATIU.

Distant from Rarotonga, 120 miles; circumference, 20 miles; height, 374 ft.; area, 22 square miles; population, 1931, estimated at 1,041.

A wireless station is erected at Atiu.

Atiu resembles Mangaia in formation, being a raised mass of coral with high jagged cliffs facing the sea.

On the highest point of the central ridge coconuts, bananas, oranges, and coffee grow with the utmost luxuriance; and the kumera, one of the most valuable of South Sea vegetables, yields large crops. The coconut-palm grows well everywhere, but especially so on the coral rock formation.

*Resident Agent (vacant).*

## MAUKE.

Distant from Rarotonga, 151 miles; circumference, 10 miles; height, about 60 ft.; area,  $5\frac{1}{2}$  square miles; population, 1931, estimated at 570.

Mauke is a low circular island about two miles across, lying to the north-east of Rarotonga. Like Mangaia and Atiu, it is surrounded by an unbroken fringing reef. It is marvellously fertile, and produce of considerable value and quantity is exported. There is a wireless station on the island.

*Resident Agent, E. C. Vellenoweth.*

## MITIARO.

Distant from Rarotonga, 142 miles; circumference, 5 miles; height, about 50 ft.; area, 6 square miles; population, 1931, estimated at 265.

This island is a good instance of an elevated coral reef, thinly coated with sand and gravel of the same material. The greater part of the surface is not more than six feet above high-water mark.

*Resident Agent, Tou Ariki.*

## TAKUTEA.

Distant from Rarotonga, 120 miles; area,  $\frac{1}{2}$  square mile; population nil.

This island was presented to the Crown by the Ariki of Atiu to whom it belonged. It is a coral island, moderately fertile.

## AITUTAKI.

Distant from Rarotonga, 140 miles; circumference,  $14\frac{1}{2}$  miles; height, 450 ft.; area, 7 square miles; population, 1931, estimated at 1,596.

The name includes the island anciently known as "Ara-ura," and some seven or eight smaller islands on the vast barrier reef. Some of these are volcanic, and would seem to have been small peaks on the lip of an extinct volcano, now submerged.

The island itself is pear-shaped, about four miles by two; its highest part being 450 feet high.

Copra is the chief production, and some of the best oranges and pineapples on the market are grown here.

The Aitutakians are naturally a hardy race, and industrious. They are said to be the best sailors in the Cook group. They make fans and mats, and are expert at plaiting various fibres for hatmaking.

A wireless station is erected on the island.

*Resident Agent, A. A. Luckham, C.B.E.*

## MANUAE AND TE AU-O-TU.

Distant from Rarotonga, 128 miles; area of Manuae,  $2\frac{1}{2}$  square miles.

These two small islands are situated about midway between Atiu and Aitutaki, and are owned by the people of the latter place. Population, 28.

## NIUE.

Distant from Auckland, 1,343 miles, and from Rarotonga, 590 miles; circumference, 40 miles; height, 200 ft.; area, 100 square miles; population, 3,802 on 30/6/31. Steamer connection with the four New Zealand main ports—about ten trips each year are made. There is a wireless station at Alofi, the port of the island.

Niue, was placed under a separate administration by an Amending Act of 1903. It is a long, low island, fringed with a misty

cloud of fine spray. The shores being too deep and steep to support a barrier reef, the coastline is deprived of its protection. It is fertile, but fresh water is very scarce.

The orange, the coconut, the banana, and other tropical products grow well, and the lemon flourishes on the rocky shores.

The natives of Niue are somewhat different in character from other Polynesians. They are very industrious. The girls and women plait hats, which are exported to New Zealand and Australia. They are keen traders, but are averse to strangers obtaining a foothold in the island itself.

The exports for 1930 amounted to 15,877*l.*, and the imports to 18,630*l.* The receipts for 1930-31 amounted to 15,001*l.*, and payments to 16,357*l.* The principal exports were copra, 4,382*l.*; hats and baskets, 1,470*l.*; bananas, 9,877*l.*

*Resident Commissioner, W. M. Bell.*

## PALMERSTON ATOLL.

Distant from Rarotonga, 277 miles; area, 1 square mile; population, 108.

The Palmerstons are situated upon an irregular ring of coral reef, measuring outside about four miles and a half by two miles and a half, just awash with the tide. The narrow ring is about half a mile in width, and it supports eight little islets, nearly all covered with coconut palms. The largest of these is little more than half a mile in length and about a quarter of a mile wide.

Copra is the only article of export.

*Resident Agent, J. Marsters.*

## PENRHYN.

Distant 740 miles from Rarotonga; area, 3 square miles; population, 1931, estimated at 441.

This atoll is known to the Polynesians as Tongareva or Ma-ngaro-ngaro and is valuable by reason of the existence of pearlshell beds in the extensive lagoon. The lagoon is proclaimed a reserve for public pearlshell fishing, and regulations control pearlshell diving.

The coconut crop is considerable. Fresh water is very scarce, and large concrete tanks have been built by the Administration in the various villages for storage of rain water.

*Resident Agent, W. Wilson.*

## SUWARROW.

Distant from Rarotonga, 525 miles; area,  $\frac{1}{2}$  square mile. It is at present uninhabited.

Suvarrow is an atoll with a splendid lagoon, which produces a very good class of pearlshell. Part of the anchorage has been gazetted as a naval reserve. The remainder of the island is leased to private enterprise.

## MANIHIKI AND RAKAHANGA.

Distant from Rarotonga, 650 and 670 miles respectively; area, each 2 square miles; estimated population, 1931, Manihiki, 464; Rakahanga, 365.

Manihiki is nearly circular. Bêche-de-mer is obtained from the lagoon. The island occasionally suffers from drought and similar tanks to those at Penrhyn have been erected.

Rakahanga is also an atoll.

The Manihiki lagoon has been proclaimed a reserve for public pearlshell fishing, and regulations control diving as at Penrhyn.

The only industry is now that of copra-making.

*Resident Agent, H. Williams.*

#### PUKAPUKA, OR DANGER ISLAND.

Pukapuka is a small solitary atoll about three miles in diameter, which produces pearlshell. It is 720 miles from Rarotonga, and has an area of two square miles. The population in 1931 was estimated at 587.

*Resident Agent, G. Henry.*

#### NASSAU.

This small island has an area of about 360 acres, of which 300 acres are under cultivation with coconuts. It lies a few miles distant from Pukapuka. The plantation belongs to the Burns, Philp (South Sea) Coy., Ltd. There is no indigenous population. The present residents consist of labourers, introduced by the Company to work the plantation.

#### Education.

The control of education in the Cook Islands has, by the Cook Islands Act, 1915, been placed under the Minister for the Cook Islands. Four schools have been established in Rarotonga. Schools have also been established at Aitutaki, Mauke, Mitiaro, Pukapuka, Mangaia, and Atiu. The instruction given is similar to that of the New Zealand State Schools. Technical instruction is being made a special feature.

At Niue Island there are two schools conducted on the same lines.

#### Trade of Cook Islands.

Oranges, bananas, tomatoes, and copra are the chief exports and trade is developing satisfactorily. Tomatoes are sent to New Zealand in winter and spring.

The Wellington-San Francisco mail steamer makes 4-weekly calls (North and South bound) at Rarotonga, and during the fruit season (April to September) regular monthly visits are paid by cargo steamer from Auckland to Rarotonga, Aitutaki, Mangaia, Atiu, and Mauke.

#### FINANCE, SHIPPING AND TRADE OF NEW ZEALAND.

FOREIGN CONSULS.—CONSULS OF FOREIGN COUNTRIES RESIDING IN, OR WITH JURISDICTION IN NEW ZEALAND, AUGUST, 1931.

*Argentine Republic, Vice-Consul, F. S. Battley (Auckland); E. S. Baldwin (Wellington); J. A. Johnstone (Dunedin).*  
*Belgium, Consul (with jurisdiction in New Zealand), Armand Nihotte (Wellington); Consuls, A. M. Ferguson (Auckland), Sir J. J. Kinsey (Christchurch); G. L. Denniston (Dunedin); Vice-Consuls, Sir C. B. J. Ward, Bart. (Christchurch); R. A. Anderson, C.M.G. (Invercargill).*  
*Brazil, Vice-Consul, G. Robertson (Wellington).*  
*Chile, Consul-General for Australia and New Zealand, R. Dundas Smith (Sydney); Consuls, E. A. Craig (Auckland); Thomas C. Ross (Dunedin).*  
*China, Consuls, Ou Tsun-Shuin (Wellington), Chu Chih-Ching (Samoa); Vice-Consul, Yue H. Jackson (Wellington).*  
*Czecho-Slovakia, Consul-General (with jurisdiction in New Zealand), Dr. R. Kuras (Sydney); Hon. Consul, E. J. Hyams (Wellington); Hon. Vice-Consul, C. P. Agar (Christchurch).*

- Denmark**, Consul-General for Australia and New Zealand, G. L. Host (Sydney); Consul (for South Island), H. D. Acland (Christchurch); Vice-Consuls, S. P. Anderson (Auckland), William Perry (Hokitika), Odin Henry Möller (Dunedin).
- Ecuador**, Honorary Consul, W. Birse (Auckland).
- Finland**, Consul (with jurisdiction in New Zealand), Harald Tanner (Sydney); Vice-Consuls (honorary), Robert Burns (Auckland), Vaino Sarelius (Christchurch).
- France**, Consul for New Zealand and Western Samoa, E. M. W. M. Joubert (Auckland); Consular Agents, George Humphreys (Christchurch); O. R. Bendall (Wellington); S. E. D. Neill (Dunedin).
- Germany**, Consul-General (with jurisdiction in New Zealand), Dr. Hans Busing (Melbourne); Honorary Consul for New Zealand and its Dependencies and Western and American Samoa, W. Penseler (Wellington).
- Greece**, Hon. Consul for New Zealand, Joseph Frank Dyer (Wellington).
- Honduras**, Consul-General for Australia and New Zealand, Frederic Walsh (Sydney).
- Italy**, Consul-General for Australia, New Zealand, and Fiji; Commendatore Nob. A. Grossardi (Melbourne); Consul, Giovanni Formichella (Wellington); Consular Agents, Joseph Wallace (Christchurch), J. A. Roberts (Dunedin), Geraldo G. Perotti (Greymouth).
- Japan**, Consul-General (with jurisdiction in New Zealand and dependencies, excluding Western Samoa), Kojiro Inoue (Sydney); Honorary Consuls, A. B. Robertson (Auckland); A. Young (Wellington).
- Latvia**, Consul-General (with jurisdiction in New Zealand), C. L. Seya (London); Hon. Consul, N. E. Heath (Auckland).
- Liberia**, Consul, Dr. A. W. Izard (Wellington).
- Mexico**, Consul (with jurisdiction in New Zealand), Don Carlos Zalapa (Sydney).
- Netherlands**, Consul-General for Australia and New Zealand, P. E. Teppema (Sydney); Consul (with jurisdiction in New Zealand), Walter Goring Johnston (Wellington); Vice-Consuls, George Ritchie (Dunedin), M. Copeland (Auckland), N. Francis (Christchurch).
- Norway**, Consul-General for Australia and New Zealand, H. H. T. Fay (Sydney); Consul, Alex. W. Newton (Wellington); Vice-Consuls, Robert Millar (Auckland), V. E. Hamilton (Christchurch), Mathias Ericksen Wiig (Invercargill), John Hayes Enright (Westport), William Fraser Edmond (Dunedin).
- Paraguay**, Consul, A. E. Kernot (Auckland).
- Peru**, Consul-General (for Australia and New Zealand), J. Maitland Paxton (Sydney); Consul, G. H. Baker (Auckland).
- Poland**, Consul-General (with jurisdiction in New Zealand), Hon. George Earp (Sydney).
- Portugal**, Consul, David L. Nathan (Auckland); Hon. Vice-Consul, Alfred Nathan (Auckland); Vice-Consuls, Arthur Donald Stuart Duncan (Wellington), Charles William Rattray (Dunedin).
- Spain**, Acting Consul (with jurisdiction in New Zealand and dependencies), Sir Stephen Morell (Melbourne).
- Sweden**, Consul-General for Australia, New Zealand and Fiji, E. H. Lindquist (Sydney); Consul, J. T. Martin (Wellington); Vice-Consuls, J. T. F. Mitchell (Auckland), W. Machin (Christchurch), J. S. Ross, C. M. G. (Dunedin).
- Switzerland**, Consul (with jurisdiction in New Zealand), M. Stahel (Sydney); Gerant of consulate, J. A. C. Allum (Auckland).
- United States of America**, Consul-General, Calvin M. Hitch (Wellington); Consuls, B. Gotlieb and John W. Dye (Wellington); W. F. Boyle (Auckland); Vice-Consuls, L. A. Bachelder (Auckland), William P. Cochran, jun. (Wellington); Q. F. Roberts (Apia); Consular Agents, H. P. Bridge (Christchurch), H. Reeves (Dunedin).
- Yugoslavia**, Hon. Consul, John Totich (Dargaville).

### THE ROSS DEPENDENCY.

The Ross Dependency, the government of which was placed under the Governor-General of New Zealand by Imperial Order-in-Council of 30th July, 1923, is defined as "all the islands and territories between the 160th degree of east longitude and the 150th degree of west longitude, which are situated south of the 60th degree of south latitude." The dependency includes Edward VII Land, and portion of South Victoria Land. There are no permanent inhabitants of the territory, but whaling is carried on extensively.

Captain W. W. Stuart is the New Zealand Government representative and administrative officer.

### TOKELAU OR UNION GROUP. BRITISH.

This Group consists of three islands, or groups of islets (Atafu, Nukunono and Fakaofu), and lies about 4 degrees due north of Apia, Samoa. Copra is the chief article of trade.

The Natives are Polynesians, numbering 1,048 in August, 1931, and the language is allied to that of Samoa. The islanders are ruled by their own Chiefs with the assistance of Native Village Committees. There is a wireless station at Fakaofu.

An invitation from the British Government that the New Zealand Government should take charge of the Union Islands was accepted in 1925, and the administration of the Group was accordingly transferred from the High Commissioner for the Western Pacific to the Governor General of the Dominion on February 11th, 1926, by the publication of the Union Islands Orders in Council, 1925. The Islands are administered from Apia, Samoa, which is the nearest natural trading port and (since 1923) the port of entry for the Group.

### WESTERN SAMOA.

The Territory of Western Samoa, formerly in the possession of Germany, was seized and occupied by New Zealand Troops on behalf of the Imperial

Government on the 29th August, 1914. It remained in military occupation during the war, and was surrendered by Germany under the Treaty of Peace to the Allied and Associated Powers, by whom the mandate to govern the ex-German territory was assigned to the Dominion of New Zealand. The mandate was approved by the Council of the League of Nations in December, 1920.

On the 1st May, 1920, by Orders passed by the Governor-General of New Zealand in Council, provision was made for the Civil Administration of the Territory; and by the Samoa Act, 1921, of New Zealand, the constitution and legal system of the territory were settled.

Western Samoa is administered by an Administrator appointed by the Governor-General of New Zealand and responsible to the Minister of External Affairs (a member of the N.Z. Executive Council who is charged with the Government of the territory). There is a Legislative Council consisting of not less than four nor more than six official members appointed by the Governor-General, two elected European members, chosen by the votes of European population, and two native Samoan members appointed by the Governor-General. The Administrator, acting with the advice and consent of this Council, is empowered to make Ordinances for the peace, order, and good government of the Territory, subject to disallowance by the Governor-General. A High Court is established, and the Supreme Court of New Zealand is given jurisdiction over Western Samoa.

*Minister for External Affairs at Wellington,*  
Rt. Hon. G. W. Forbes, P.C.

*Secretary for External Affairs at Wellington,*  
C. A. Berendsen.

*Administrator of Samoa, Brigadier-General H. E. Hart, C.B., C.M.G., D.S.O., V.D.*

*Secretary Samoan Administration, A. C. Turnbull.*

The Territory consists of the Islands of Upolu, Savai'i, Apolima, and Manono, together with several small islets lying between the 13th and 15th degree S. Lat., and 171st and 173rd degrees West Long., situated some 130 miles North of Tonga and 450 miles N.E. of Fiji. The sailing distance from Auckland (N.Z.) is 1,560 miles, from Sydney 2,570 miles, and from San Francisco 4,400 miles.

The total area of Western Samoa is 725,000 acres. 143,630 acres are alienated, of which (apart from native cultivation) 18,926 acres are under cultivation. The main products for 1930 were copra, 12,285 tons (of which three quarters was produced by the Natives), cocoa, 1,006 tons, all European produced. 1,750 acres of hevea rubber are under cultivation. Exports for 1930 were 100 tons.

There is a four-weekly steamer between Auckland and Apia, which connects en route with the Vancouver-Sydney mail steamers at Suva (Fiji), and also a three-weekly connection at Pago Pago (American Samoa), with a San Francisco-Sydney service.

The N.Z. Government motor-ship "Maui Pomare" has now inaugurated a five-weekly passenger and fruit carrying service to New Zealand main ports.

The bulk of other produce is carried direct to England and Europe by cargo steamers.

A radio station situated at Apia works directly with New Zealand and Honolulu, and is also the transmitting station for the stations at Fiji,

Tonga and Tahiti. There are four sub-stations within the Group, which work through the Apia station.

*Postal and Banking.*—New Zealand postage rates apply in the Territory. A Government Money Order and Savings Bank Office and a Branch of the Bank of New Zealand are in operation at Apia. British currency is in circulation.

#### *Population.*—

Estimated 30th June, 1931.

Europeans .. ..	595
Half-castes .. ..	1,934
Native Samoans .. ..	42,269
Chinese Labourers ..	960
Melanesian Labourers ..	136
	<hr/> 45,884

*Education.*—Practically every Samoan can read and write his own language. Government Schools are maintained at Apia and Avele (Upolu) and Vaipouli (Savai'i), which, together with 36 subsidised schools and schools operated by the Missions, provide for 14,000 pupils.

*Medical Services.*—A Government Hospital is maintained at Apia, with a staff of European doctors and nurses; district hospitals have been established at Tuasivi and Safotu (Savai'i) and Aleipata (Upolu) and 10 outstations, in charge of trained native practitioners or nurses, are distributed elsewhere. The medical services of Samoa are a feature of New Zealand's administration, and annual reports thereon are made by the New Zealand Government to the League of Nations. Dangerous fevers and reptiles are unknown.

*Roads and Locomotion.*—Roads radiate from Apia chiefly following the coast line. 15 miles of roads are tar-sealed. Motor traffic is rapidly developing both on land and on water, some 300 motor vehicles being registered. The coral lagoons form natural highways around many parts of the Islands.

*Climate.*—The climate is tropical and very equable. The wet season extends from December to March, the remainder of the year being pleasant, with trade winds blowing.

The public debt at 31st March, 1931, was £165,200.

## SOUTH AFRICA.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. 7, ch. 9), passed by the Parliament of the United Kingdom, on the 20th September, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on the 31st day of May, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Act constituting the Union provides for the appointment by the Sovereign of a Governor-General, who, with an Executive Council (of which the members are chosen and summoned by him), administers the executive government of the Union as the Governor-General in Council. Departments of State are established by the Governor-General in Council, the Governor-General appointing not more than ten officers to administer them. Such officers are King's Ministers of State for the Union and members of the Executive Council.

The Senate consists of forty members. For ten years after the establishment of the Union eight were nominated by the Governor-General in Council and thirty-two were elected, eight for each province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy will be filled by the united choice of members of the Assembly and of the Provincial Council in respect of whose province a vacancy occurs.

The first Senate automatically dissolved in 1920 and a new Senate was appointed early in 1921. This second Senate was dissolved on 19th August, 1929, and the elections for the third took place on the 6th September following.

Under the provisions of Act No. 54 of 1926, some fundamental alterations were made in the constitution of the Senate. All members, whether elected or nominated, may be required to vacate their seats on a change of Government. The Governor-General is also empowered under the Act to dissolve the Senate within 120 days of the dissolution of the Assembly.

The House of Assembly originally consisted of 135 elected members, 51 of whom represented the Cape of Good Hope, 17 Natal, 50 Transvaal, and 17 the Orange Free State, but the 5th Delimitation Commission, appointed in July, 1927, has since divided

the Country into the following constituencies: Cape of Good Hope, 58; Natal, 17; Transvaal, 55; Orange Free State, 18. Members of both Houses must be British subjects of European descent.

Until the passing of Act 18 of 1930, enfranchising European women, and Act 41 of 1931, providing for European manhood suffrage throughout the Union, the qualifications of voters remained the same as in the Colonies at the time of union.

Under the South Africa Act no subsequent law is to disqualify any person in the Cape from voting, by reason of his race or colour, who could vote under the existing law, unless the bill is passed by both Houses sitting together in joint session, with a two-thirds majority of the total membership. [In the Transvaal and Orange River Colony the franchise was restricted to white men; in Natal a native could obtain a vote, but under conditions which made this very difficult; in Cape Colony any native could do so who had a certain property qualification and could write his name.]

Pretoria is the administrative capital and seat of government of the Union. Cape Town is the seat of the Legislature.

The first Parliamentary Election under the South Africa Act was held in September, 1910, and the Union Parliament was opened by H.R.H. The Duke of Connaught, K.G.

### Provinces.

A Provincial Council in each province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. The specified subjects include direct taxation for provincial purposes, the borrowing of money on the credit of the province, primary education, agriculture, hospitals, municipal institutions, local works other than railways and harbours, roads, markets, game preservation, and other purely local or private matters. In addition the Union Parliament may delegate the power of making Ordinances on any subject to Provincial Councils. All ordinances passed by a Provincial Council are subject to the veto of the Governor-General in Council. Members of the Provincial Councils are elected on the same system as members of Parliament, but the restriction as to European descent does not apply. The number of members in each Provincial Council is as follows:—

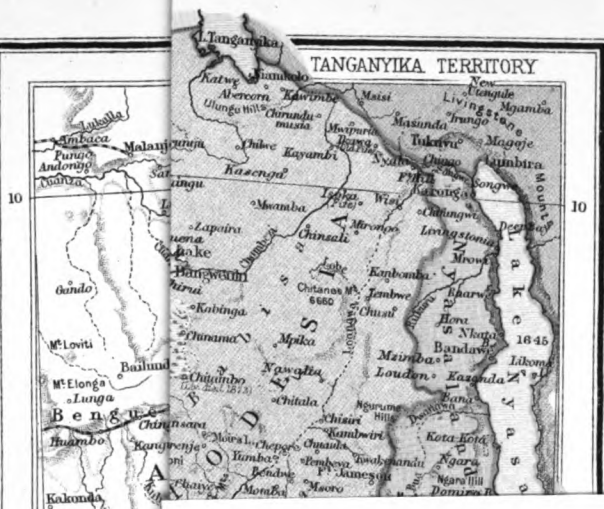

Cape of Good Hope	...	...	...	58
Natal	...	...	...	25
Transvaal	...	...	...	55
Orange Free State	...	...	...	25

The first Provincial elections for the Cape of Good Hope and the Transvaal were held in September, 1910; those for Natal and the Orange Free State in October, 1910.

Since the passing of the Financial Relations Act No. 10 of 1913 all expenditure incurred by any Province in respect of matters entrusted to that Province has been defrayed from the Provincial Revenue Fund. The Act quoted provided

for the payment to each Province by the Union Government of a subsidy based on the expenditure of the Province (approximately one-half) and for the transfer and assignment of certain Union revenues.

Act 46 of 1925 altered the basis of the subsidies which are now calculated on the number of pupils and students attending schools in each Province, and have no reference to expenditure.

The Provinces publish their own accounts and financial statements, and their revenues and expenditure are not included in the figures of revenue and expenditure published by the central government.

The executive power in the subjects on which the Provincial Council is empowered to make ordinances is vested in an Executive Committee consisting of an Administrator, appointed by the Governor-General in Council, and four members elected by the Provincial Council.

#### Areas and Population.

	Area, Square Miles.	Population, Census, May, 1921.	European Census, May, 1931.
Cape of Good Hope	276,536*	2,782,719	748,455
Natal ...	35,284	1,429,398	177,424
Transvaal ...	110,450	2,087,636	696,963
Orange Free State	49,647	628,827	205,324
Total ...	471,917*	6,928,580	1,827,166

Of the total 6,928,580 persons (1921), 3,536,992 were males and 3,391,588 females. Of the 1,827,166 Europeans (1931) 930,031 were males and 897,135 females.

The increase for the Union (1911-21) was 15.99 per cent. For the Provinces it was as follows:—Cape, 8.49 per cent.; Natal, 19.71 per cent.; Transvaal, 23.81 per cent.; Orange Free State, 19.06 per cent. The increase in the European population of the Union (1921-6) was 10.34 per cent. For the Provinces it was as follows:—Cape, 8.53 per cent.; Natal, 16.13 per cent.; Transvaal, 11.99 per cent.; Orange Free State, 7.66 per cent.

The increase in the European population of the Union (1926-1931) was 8.9 per cent. For the Provinces it was as follows:—Cape, 5.9 per cent.; Natal, 11.6 per cent.; Transvaal, 14.4 per cent.; Orange Free State, 1.2 per cent.

The population comprised (1921) 1,519,488 Europeans or whites (737,453 females); 5,409,092 non-Europeans (natives, Asiatics, and other coloured) (2,654,135 females). In 1911 the figures were:—Europeans, 1,276,242 (increase 1911-21 of 19.06 per cent.); non-Europeans (natives, Asiatics, and other coloured), 4,697,152 (increase 1911-21, 15.16 per cent.) The proportion of Europeans in the total population in 1904 was 21.58 per cent.; in 1911, 21.37 per cent.; and in 1921, 21.93 per cent.)

The principal urban centres in the Union with over 10,000 European inhabitants in 1921, had a population as follows:—

	1931	Census, 1926	1921 Non-European.
Cities (including Suburbs.)	European.	European.	European.
Johannesburg	203,273	170,741	136,295

#### Climate.

##### Cape Province.

The climate of the Cape Province is very favourable to Europeans. The air is dry and bracing, the heat seldom oppressive, and the winter weather mild and delightful; snow or ice is practically unknown except in the more elevated localities, particularly of the north-east. The mean annual temperature at the Royal Observatory, near Cape Town, in 33° 56' S. lat., and 18° 29' E. long., is 62.0°, the mean maximum being 70.4°, and the mean minimum 53.6°; the average rainfall for the last 34.85 years is 25.28 inches. Cape Town itself has a mean annual temperature of 62.6°, the mean day temperature being 71.8° and the mean night temperature 53.4°. Aliwal North, 30° 41' S. lat., and 26° 40' E. long. (4,350 feet above sea level), shows a mean temperature of 59.2°, the mean maximum being 74.2°, and the mean minimum 44.3°; the rainfall average of 42.43 years being 20.60 inches. At the Royal Observatory the warmest days occur in February, when the average maximum is 79.2° F., and the coldest nights in July, with an average minimum of 47.2° F.; compared with these data the average maximum temperature of the warmest month (February), in Cape Town, is 81.8°, and the average minimum of the coldest month (July), is 47.4°; at Aliwal North, January and February are the warmest months, the day temperature averaging 82.5°, whereas in July, when the coldest nights are experienced, the average minimum is only 29.1° F.

In the Eastern and Midland divisions the chief rainfall is during the summer months (November to April), in the Western districts during the winter months, while along the south coast the rainfall is fairly uniformly distributed throughout the twelve months.

The Cape offers many localities presenting the requisites of altitude and extreme dryness for the modern treatment of consumptive patients.

##### Natal Province.

The climate of the Natal Province varies at different levels. On the coast-line it is sub-tropical, but is considerably modified inland owing to increased altitude. Thus Umzimto in the south near the coast, at an altitude of 400 feet, has a mean annual temperature of 69.2°; Durban (261 feet), 70.8°; whilst Howick, at an elevation of 3,439 feet, has an average yearly temperature of 63.0°. In the winter the air is generally exceedingly dry, and several degrees of frost at night are not uncommonly experienced. Snowstorms occasionally occur. There is a large proportion of cloudless days in the summer and the sky is bright throughout the winter months. Hot winds occasionally occur towards the end of the year (September-November), when temperatures of 100° to 110° may be recorded. At Pietermaritzburg (2,200 feet) the annual temperature is 66.6°, with an average maximum of 79.9° and a minimum of 53.4°. The warmest days occur in February, when the mean maximum averages

85.3° and the coldest nights in June, when the mean minimum is 41.3°. Again, Weenen (2,840 feet), situated in a deep cup-shaped valley, has a mean annual temperature of 66.4°, the mean maximum being 83.7°, and the mean minimum 49.2°; the hottest month is December, when the mean maximum is 92.7°, and the coldest nights are experienced in July, when the mean minimum is only 31.4°.

The average rainfall over the Province is approximately 34 inches, being about 40 inches along the coast belt (Durban 44.87 inches) and mostly about 30.00 inches inland, but decreasing to 27.01 inches at Weenen. Thunderstorms are frequent and destructive hailstorms are common during the summer months.

Malarial fever was epidemic in coast districts during 1905 and 1906, but, thanks to the energetic measures taken by the authorities, it has been stamped out, while very few cases have occurred inland.

#### *Transvaal Province.*

Owing to the altitude (4,000 to 6,000 feet) of the plateau constituting the greater part of the Transvaal Province, the climate on the whole is healthy, cool, and bracing; over the Lowveld to the north and east, however, it is hot and fever-stricken, and not at all adapted for stock owing to various endemic diseases. During summer the days are hot, occasionally exceeding 100 deg., but tempered by frequent thunderstorms, while the nights are mild to warm. During the winter months (April to September) the days are usually bright, sunny and almost cloudless, being frequently almost as warm as in summer, while the nights are cold with frequent frost and haze or fog. The rainfall is greatest in the east, Woodbush in the north-east (Zoutpansberg District) having an average of 71.98 inches in 132 days; it decreases rapidly, however, westward from the escarpment falling to about 18 inches in the extreme south-west of the Province. The mean annual temperature shows considerable variation according to position and altitude; thus, Volksrust in the south-east, near the Natal border, at an elevation of 5,300 feet, has an annual temperature of 56.9 deg., whilst Komati Poort, bordering Portuguese East Africa, at a height of only 460 feet above sea level, has an average temperature of 73.2 deg. Pretoria, the administrative capital, has an annual average temperature of 63.5 deg., with a rainfall of 29.45 inches; the warmest days there occur in December, when the mean maximum is 84.0 deg., whereas the coldest nights are met with during July, when the mean minimum is 34.8 deg. The warmest month, however, is January, with a mean of 71.7 deg., and the coldest July, with 51.7 deg. The city of Johannesburg has a mean yearly temperature of 59.9 deg., with an average rainfall of 30.45 inches. Although the mean warmest month there is also January (67.5 deg.), the warmest days occur in December, when the mean maximum is 79.4 deg., and the coldest nights in July, when the mean minimum is 37.3 deg., and the monthly temperature 49.5 deg. Duststorms are frequent during the latter part of August and throughout September. Thunderstorms also are frequent during summer, more particularly from November to January, and destructive hailstorms are apt to occur at this season, destroying trees and crops. Strong, biting, cold, southerly winds blow from time to time during the winter, although the prevalent winds are mostly northerly.

#### *Orange Free State Province.*

The Orange Free State can be separated, roughly, into three divisions, viz., the Western, the Middle and the Eastern.

The Western division is the driest, but is the best for grazing of sheep. The soil is fertile. Rainfall averages 15 to 20 inches.

The Middle division, through which the main line railway runs, holds moisture longer than the Western division. There are large tracts of grass lands good for grazing stock. Rainfall averages 20 to 25 inches.

The Eastern division is the best watered of the three, the climate being moist. This division is the wheat-growing area, and large quantities of wheat and other cereals can be grown. It is fairly well adapted for stock, but the winter is somewhat severe. Rainfall averages 25 to 30 inches.

The heat, especially in the Middle and Western divisions, is great during the months of December, January and February, the temperature at Bloemfontein (altitude 4,610 feet above the sea) has risen on individual days to 102 deg. Fahr. at noon in the shade, the mean maximum being 74.2 deg. and the mean minimum 47.8 deg.

The Eastern division is cooler, and in winter it is no unusual sight to see snow on the mountains. Harrismith is a great summer resort for the people of Durban and Maritzburg (Natal), the temperature there being cool and delightful in summer.

The following is the mean monthly and annual rainfall at Bloemfontein:—January, 3.70 inches; February, 3.37; March, 3.56; April, 1.81; May, 1.10; June, 0.39; July, 0.33; August, 0.49; September, 0.86; October, 1.59; November, 2.12; December, 2.26. Total 21.58 inches.

#### *Vital Statistics.*

As the registration of births and deaths amongst the non-European population is imperfect, the birth and death rates cannot be calculated accurately.

The following are the latest available figures (1929) for Europeans in the Union and the several Provinces:—

	Birth Rate.	Death Rate.	Marriage Rate.
Cape .. ..	25.74	9.91	8.90
Natal .. ..	21.26	8.57	9.09
Transvaal ..	28.20	9.89	11.00
O.F.S. .. ..	25.24	7.70	9.25
Union .. ..	26.15	9.51	9.73

#### *Railways and Harbours.*

Prior to Union, which took effect in May, 1910, the state railways of the several colonies now comprising the Union were operated by the separate Governments. In May, 1910, the Government lines were merged into one system, the South African Railways, under the control of the Union Government. The total open mileage of this system at 31st March, 1931, was 13,048 miles (comprising Cape 5,177, Orange Free State 1,633, Transvaal 3,231, Natal 1,495, and South-West Africa 1,462), of which 12,152 miles are 3 ft. 6 in. gauge, and 896 miles 2 ft. gauge.

The capital expenditure on Government railways (open lines) up to 31st March, 1931, amounted to 146,076,674*l*.

The gross earnings for 1930-31 were 24,321,854*l*. and the net deficit after payment of interest 309,431*l*.

Working expenditure (including renewals), amounted to 19,308,445*l*., or 79.39 per cent. of the gross revenue, as compared with 20,878,539*l*.,

or 79.90 per cent. of the gross revenue in the preceding year.

#### Harbours.

During the year ended 31st March, 1931, 5,695 vessels of 16,600,003 tons net entered the harbours of the Union and South West Africa.

Harbour works on an extensive scale have been constructed at Table Bay (Cape Town), Port Elizabeth, East London, and Durban. All Union ports are under direct control of the Department of Railways and Harbours.

#### Table Bay.

The shipping accommodation consists of an outer harbour, formed in part by the Breakwater 4,770 feet long and the South Arm running parallel with it enclosing an area of 67 acres, which, with the Alfred Basin, makes a total area of 76½ acres with about 2½ miles of berthage and a depth ranging from 20 to 38 feet at low water. The depth at Harbour entrance is 36 feet L.W.O.S.T. Roadstead anchorage under shelter of the Breakwater is available for vessels of any draught. There is a Graving Dock of 500 feet capacity on the keel blocks with a depth of 26 feet over the sill at entrance at H.W.O.S.T., and a slip is available for vessels up to 750 tons, also a floating dock with lifting capacity of 450 tons.

The following harbour extension works are in hand:

- (1) Extension of the Breakwater by 1,500 feet to shelter entrance to new Basin; 1,130 feet have been completed.
- (2) Widening of South Arm to a width of 700 feet. The North wall has been equipped with four modern double-storey cargo stores with a combined capacity of 3,196,108 cubic feet and eleven 4-ton electric wharf cranes; a further eight 4-ton cranes are provided for. The new South wall has been constructed to its full length of 2,400 feet of which a length of 800 feet is equipped with single-storey shed of 677,914 cubic feet cargo capacity; this berth is also being equipped with five 4-tons and one 15-ton electric portable jib cranes.
- (3) A protecting Random Block Mole is under construction southwards of the widened South Arm and is practically complete. This Mole will enclose a new Basin of 196 acres.

*Heavy Lifts.* A 60-ton Floating Crane is being provided and is expected to be in service this year (1931).

*Fruit.* Large Pre-cooling stores of 3,828 shipping tons capacity are provided at the East Pier, Victoria Basin, and these are being connected by overhead traverser gallery to No. 7 Quay store so as to enable loading of two vessels to proceed simultaneously.

*Oil Fuel.* Oil fuel mains are provided at the principal berths. Bulk cargoes of petrol and inflammable oils are discharged at a specially equipped berth at the South Arm Elbow.

*Grain.* The Port is also equipped with a grain elevator of 30,000 tons capacity and overhead conveyor gallery loading facilities to No. 4 Jetty, Victoria Basin, adjacent thereto.

#### Port Elizabeth.

The landing and shipping facilities at Port Elizabeth consist of three jetties, 1,162 feet, 1,460 feet and 1,204 feet respectively long.

There is a slipway capable of carrying vessels of 400 tons dead weight drawing 9 feet 3 inches to 14 feet 7 inches at H.W.O.S.T.

The existing capacity of the Port so far as anchorage is concerned is very large, and is limited only by the available appliances for landing and shipping. These can handle approximately 4,000 tons of cargo per diem.

A scheme has been approved by Government for the provision of large sheltering works. The proposal involves the construction of a solid breakwater extending in continuation of the Dom Pedro Jetty for about 3,000 feet in an easterly direction, when it changes its course to a northerly direction.

Up to 31st March, 1931 4,110 feet length of breakwater wall had been constructed and the work is still in progress.

In order to provide increased accommodation for shore work, a scheme of foreshore reclamation was commenced during 1928, and at 31st August, 1931, approximately 99 per cent. of the scheme had been completed.

Approval has been obtained for the construction of a blockwork quay wall 800 feet long extending from the end of the North jetty; the work includes the construction of a protecting rubble stone mole 3,000 ft. long situated to the northward of the quay wall and extending 1,000 ft. beyond the eastern end thereof. Filling will be deposited between the back of the quay wall and the rubble mole, the whole forming an arm 350 ft. in width, the quay having a depth of water of 35 feet at L.W.O.S.T. This work is now in the course of construction.

#### East London.

The port of East London is situated at the mouth of the Buffalo River, the entrance being protected by solid breakwaters on both sides. The South Breakwater extends beyond the Eastern pier to the extent of 1,300 feet with a width between them of 700 feet.

The demolition of the old Eastern Pier is now complete and provides a width of 500 feet between the banks of the river inside the entrance, thus greatly facilitating navigation.

The Harbour area is 100 acres in extent. Vessels drawing up to 28 feet can enter the river and discharge alongside the quays, the total length of which amounts to 3,113 feet of deep water berthage with depths of from 27 feet 9 inches to 32 feet L.W.O.S.T. and 2,000 feet of lesser depth suitable for berthing smaller vessels.

The provision of berthage for oil tankers is in hand. The work necessitates the forming of a bay in the west bank of the Buffalo River, measuring 1,000 feet by 200 feet, and the erection of a wooden jetty, approximately 450 feet in length. This work is nearing completion.

A patent slip provides every facility for slipping and effecting repairs to vessels up to 1,000 tons dead weight.

Provision of a turning basin approximately 1,000 feet square has been approved, also the construction of a reinforced concrete wharf which will be equipped with sheds and up-to-date appliances for the rapid handling of cargo. From the harbour entrance to the turning basin the channel will be deepened to 35 feet L.W.O.S.T.

#### Durban.

Durban harbour is accessible at all times to the largest vessels navigating southern waters.

The harbour is approached through the Bluff Channel, 4,000 feet in length, formed by a north pier and a south breakwater. The width and depth of channel vary, but nowhere is there a less width than 400 feet and there is an average working depth of 32 feet at L.W.O.S.T. The average working depth at the entrance is 37 feet at L.W.O.S.T. With a view to improving the harbour entrance and affording safer navigation, the south breakwater is being extended by 300 feet and the entrance channel widened to 500 feet and deepened to 36 feet. The landlocked bay

inside these piers extends about  $3\frac{1}{2}$  miles east and west, and nearly two miles north and south. The wharves have a length of 3 miles, with depths alongside of from 23 feet to 38 feet 6 inches L.W.O.S.T. The deep-water space available for shipping covers about one-ninth of the area, and gives a low-water depth of not less than 30 feet over its greater part.

The harbour is equipped with a grain elevator of 42,000 tons capacity capable of handling bulk grain at the rate of 1,000 tons per hour; also cold storage facilities of a capacity of 2,000 shipping tons.

There is a floating dock of the following dimensions:—

Length over platform ..	475 feet.
Breadth ..	60 "
Draught over keel block ..	23 "
Lifting capacity ..	5,000 tons.

The Prince Edward Graving Dock was opened in 1925. The dock may be divided into two compartments, the inner 450 feet in length and the outer 678 feet 10 inches. Extreme length 1,166 feet 4 inches. Length on keel blocks, 1,150 feet (with cushion in outer emergency stop an extra length of 41 feet can be obtained); width at entrance, 110 feet; width at coping, 138 feet 6 ins.; width at floor, 110 feet; depth on sill, H.W.O.S.T., 41 feet, L.W.O.S.T., 35 feet; spring tide rise, 6 feet; coping above L.W.O.S.T., 12 feet; floor of outer end (below L.W.O.S.T.), 40 feet; rise of floor, 1 in 660. Available for vessels drawing up to 30 feet, the present depth of the approach channel.

#### *Sea and Land Communications.*

The mail steamers of the Union-Castle Mail Steamship Company, under contract with the Union Government, leave England and the Union (Table Bay) weekly on Fridays, the passage to be effected in 16 days 15 hours, and in 17 days 6 hours when the steamer is required to touch at St. Helena and Ascension. The calls at St. Helena and Ascension however are made by the intermediate steamers under agreement with the British Post Office. The distance by sea from England to the Union varies from 5,866 to 6,146 miles, according to the course followed. The mail steamers call at Madeira on the outward and homeward voyages.

The mail steamers leave Table Bay weekly on Tuesdays for Natal, calling at Port Elizabeth and East London to land and embark passengers, while a frequent service to Mossel Bay, Port Elizabeth, East London and Durban, is also maintained by the intermediate steamers of the Union-Castle Company. The passage to Port Elizabeth takes two days, to East London three, and to Natal four to five. From Natal the mail steamers leave weekly, calling at East London, Port Elizabeth (the call at Mossel Bay is fortnightly) and Cape Town. The Union-Castle Company also has a service *via* the Eastern route (through the Suez Canal), both outwards and homewards.

A frequent service to Australia is maintained by the steamers of the Aberdeen Line, White Star Line and Blue Funnel Line.

There is a mail Service with Mauritius and East Coast Ports (Inhambane, Chiloane, Beira, Mozambique, Ibo, etc.), once or twice a month and at intervals of ten or twelve days with India. There are also two direct lines of Steamers between London and Durban, the average passage of which is 26 days.

Passenger train services afford communication between all the principal towns in the Union several times each week; with Rhodesia four times a week, and with Lourenço Marques three times a week. Mail trains depart from Cape Town at 4 p.m. on Mondays, Wednesdays, Fridays, and Saturdays for the North, and at 9.0 p.m. daily, except Fridays, for Eastern portions of Cape Province, Orange Free State, Transvaal and Natal. Return trains depart from Pretoria at 7.55 p.m., and Johannesburg at 10.0 p.m. Mondays, Wednesdays, and Saturdays, for Cape Town *via* Kimberley, and daily, except Saturdays, *via* Orange Free State, from Johannesburg at 7.45 p.m. (Pretoria, 6.37 p.m.), arriving at Cape Town on the third morning and after noon respectively. Fast limited express trains, conveying first class passengers, are run twice weekly, leaving Cape Town 10.47 a.m. on Mondays and Thursdays, arriving at Johannesburg 4.30 p.m. Tuesdays and Fridays (Pretoria 6.25 p.m.), and leaving Johannesburg 9.50 a.m. Mondays and Thursdays (Pretoria 8.15 a.m.), arriving Cape Town 2.17 p.m. Tuesdays and Fridays. The train from Cape Town on Mondays connects with the incoming European mail steamer, and the train from Johannesburg on Thursdays connects with the outgoing mail steamer from Cape Town at 4 p.m. on Fridays. The trains are specially fitted throughout to ensure the comfort of passengers and are very popular with travellers.

On Mondays, Wednesdays, and Saturdays a train departs from Cape Town at 4.0 p.m. for Rhodesia. Bulawayo is reached at 7.30 a.m. on Thursdays, Saturdays and Tuesdays from which station connecting trains are run to Victoria Falls, the Congo, Salisbury and Beira. In the opposite direction trains depart from Bulawayo at 5.45 p.m. on Tuesdays, Thursdays and Saturdays and are due to arrive at Cape Town at 6.39 a.m. on Fridays, Sundays and Tuesdays. The "Rhodesia Express" leaves Cape Town at 11.42 a.m. on Mondays for Rhodesia, arriving at Bulawayo at 2.30 p.m. on Wednesdays; the "Rhodesia Limited" leaves Bulawayo at 10.20 a.m. on Wednesdays and arrives at Cape Town at 12.49 p.m. on Fridays. These trains connect with the incoming and outgoing mail steamers respectively. Trains leave Johannesburg for Rhodesia at 8.0 p.m. on Tuesdays, Thursdays, Saturdays, and Sundays, arriving at Bulawayo at 7.30 a.m. on Thursdays, Saturdays, Mondays, and Tuesdays respectively. In the opposite direction trains depart from Bulawayo at 5.45 p.m. on Mondays, Tuesdays, Thursdays, and Saturdays, arriving at Johannesburg at 4.34 a.m. on Wednesdays, Thursdays, Saturdays, and Mondays respectively.

A train conveying the European mails brought by the incoming mail steamer is despatched from the docks Cape Town to all parts of South Africa.

Mail trains depart from Durban at 2.15 p.m. and 5.40 p.m. daily for Johannesburg and Pretoria. In the return direction trains depart from Johannesburg for Durban at 9.15 a.m., and 8.45 p.m. daily, and at 2.15 p.m. on Sundays, Tuesdays, Thursdays and Saturdays.

#### *Posts and Telegraphs.*

At the end of March, 1931, there were in the Union 3,260 post offices, and 2,849 telegraph offices. An air mail service operates between Cape Town, Port Elizabeth, Durban and Germiston.

During the year 376,480,000 articles of mail matter addressed to places within and without the Union were handled. 3,637,000 of the articles were registered. The number of money orders issued was 610,286 of a total value of 2,732,781*l.*, while the number paid was 576,972 of a total value of 2,496,420*l.* Postal orders issued numbered 4,370,364 amounting to 2,341,645*l.*

in value, and the number paid was 3,854,563, valued at 2,007,073*l*.

The revenue in respect of the postal service during 1930-31 amounted to 1,925,977*l*., the telegraph revenue was 506,275*l*., and telephone revenue 1,596,921*l*. The combined cash expenditure for the Department was 3,203,153*l*.

406,933 miles of telephone wire were in use; there were 104,050 telephone instruments, 77,964 subscribers, and approximately 170½ million calls were handled.

The number of depositors in the Government Savings Bank at 31st March, 1931, was 441,816, and the total amount standing to their credit 6,861,625*l*.

5,644,638 inland telegrams (including press messages) were received and despatched during the year. 36,075 miles of telegraph wire were in use.

The Union is in telegraphic communication with the rest of the world by means of cables and a Beam Wireless service Cape Town—London.

Wireless installations for ship—shore working are established at Cape Town, Durban, Port Elizabeth, and Walvis Bay, in addition to which a low power station exists at East London. With the exception of East London these stations have an effective range of approximately 2,000 miles, and even more when short wave apparatus is in use. During the year 16,828 messages were received from or transmitted to ships and 6,804*l*. accrued therefrom to Post Office revenue. The rates of postage are:—

	Letters.	Newspapers.
Internal .. .. .	2 <i>d</i> . for 1st oz. & 1 <i>d</i> . per oz. thereafter.	½ <i>d</i> . per 4 oz.
U.K., India & British Possessions	2 <i>d</i> . for 1st oz. & 1 <i>d</i> . per oz. thereafter.	½ <i>d</i> . per 2 oz.
Other Countries ..	3 <i>d</i> . per oz. 1½ <i>d</i> . each additional oz.	½ <i>d</i> . per 2 oz.
Air mail fee (Internal)	4 <i>d</i> . per oz. plus ordinary postage.	

#### *Customs and Excise.*

The four self-governing colonies prior to the operation of the Act of Union gave notice to the Administrations of Southern and Northern Rhodesia of their intention to retire from the South African Customs Union Convention in terms of Article xxiii. of that Convention, with effect from the 30th June, 1910; and subsequently on the consummation of the Union of South Africa, an agreement was concluded with these Administrations to continue all the essential features of the previous Customs Convention, which Agreement has been subsequently amended to permit of freedom of charges for excise.

A further Agreement entered into as from the 1st January, 1925, has now been superseded by new and separate Agreements entered into between the Union and Southern and Northern Rhodesia respectively, taking effect from the 1st July, 1930 (vide Union Act No. 17 of 1930) of which the following are the more important provisions.

- (a) The free interchange of the produce and manufactures of the Union and of the territories of Northern and Southern Rhodesia, except that in the event of one party to the agreement levying an excise duty on any article produced or manufactured in its territory, it shall be entitled to levy a corresponding customs duty on importation into its territory of a like article produced or manufactured in the territory of the other contracting party.
- (b) The following goods, when produced or manufactured in the territory of one party to the Agreements shall upon importation into the territory of the other party be subject to the lowest rates of customs duty leviable on similar goods imported from British
- (c)

Dominions or Possessions, rebated to the extent shown against the respective items, as follows:—

Ale, beer, stout, cider and perry, exceeding 3 per cent. of proof spirit .. .. .	50%
Wines .. .. .	50%
Cigarettes and tobacco manufactures	75%
Motor Vehicles (Southern Rhodesia only) .. .. .	10%

Spirits distilled in the Union on importation into Southern or Northern Rhodesia shall be subject to the customs duty leviable on spirits imported into Southern or Northern Rhodesia, as the case may be, from Great Britain, rebated to the extent of 25 per cent., and shall not be imported into Southern or Northern Rhodesia except through free-warehousing stations.

Spirits distilled in Southern or Northern Rhodesia shall on importation into the Union be subject to customs duties in accordance with the customs tariff in force in the Union, and shall not be imported into the Union except through free-warehousing stations.

In the case of matches, sugar and playing cards, manufactured in the Union or manufactured in Southern or Northern Rhodesia and removed from one territory to the other, the amount of excise duty leviable in the territory whence the goods are removed (not exceeding that leviable in the territory to which the goods are removed) shall be paid by the Government of the removing territory to the Government of the receiving territory.

In the case of cigarettes manufactured in the Union and removed to Southern or Northern Rhodesia the amount of excise stamp duty leviable in the Union (not exceeding that leviable in Southern or Northern Rhodesia, as the case may be) shall be paid by the Government of the Union to the Government of Southern or Northern Rhodesia, and similarly credit shall be passed by the Government of Southern or Northern Rhodesia to the Government of the Union to the extent of the excise stamp duties in force in the Union (not exceeding those leviable in Southern or Northern Rhodesia, as the case may be), on removals from Southern or Northern Rhodesia to the Union.

In the event of goods subject to excise duties in the Union being duty-paid on importation into Southern or Northern Rhodesia and being subsequently returned to the Union, credit shall be passed by the Government of Southern or Northern Rhodesia, as the case may be, to the Government of the Union to the extent of the excise duties payable in the Union; and vice versa credit shall be passed by the Government of the Union on similar excisable goods returned to Southern or Northern Rhodesia.

For the purpose of assessing duty on motor vehicles manufactured in the Union and imported into Southern Rhodesia, the value shall be the usual wholesale selling price to any purchaser in the Union for home consumption at the date of exportation, less the customs duties leviable in the Union on entry for home consumption.

- (c) The importation free of duty into the Union of leaf tobacco grown in Southern Rhodesia

shall, during each period of twelve months ending the 30th June, be limited to 2,000,000 lbs. weight of Virginia type, and 400,000 lbs. weight of Turkish type, and from Northern Rhodesia, to 400,000 lbs. in all.

The importation free of duty into Southern and Northern Rhodesia of leaf tobacco grown in the Union shall during each period of twelve months ending the 30th June, be limited to 150,000 and 50,000 lbs. respectively. Each party to the Agreements may prohibit the importation into its own territory, and may prohibit the exportation into the territory of the other contracting party, of scrap tobacco, dust tobacco and tobacco stems, and tobacco in any form manufactured therefrom.

- (d) Any party to the Agreements may prohibit the importation for consumption within its territory of beef, or cattle the weight of which, as ascertained on arrival within the said territory, is in the case of an ox less than 1,000 lbs. and in the case of a cow less than 750 lbs., or alternatively when the weight at the point of despatch in the territory whence imported is in the case of an ox less than 1,050 lbs. and in the case of a cow less than 790 lbs.
- (e) In respect of goods manufactured in the Union of Southern or Northern Rhodesia and removed from one territory to the other there shall be paid by the Government of the exporting territory to the Government of the importing territory twelve per centum of the export value of such of those goods as appear in Class I of the twenty-third Annual Statement of Trade and Shipping of the Union for the year 1928, together with the non-alcoholic beverages in Class II, and six per centum of the export value of such of those goods as appear in Classes IV to XIII of the said Trade Statement, (with the exception in the case of Southern Rhodesia of motor cars).

In respect of goods imported into the Union from any country not a party to the Agreements and subsequently removed to Southern or Northern Rhodesia, otherwise than in bond, there shall be paid by the Government of the Union to the Governments of Southern or Northern Rhodesia, as the case may be, the customs duties collected on importation into the Union, subject to a deduction of five per centum of such duties, to cover the cost of collection thereof.

The Government of the Union shall also be responsible for collecting and shall pay over to the Governments of Southern or Northern Rhodesia, subject to a deduction of five per centum, the difference between the duties leviable in Southern or Northern Rhodesia, as the case may be, and those levied in the Union on the goods specified in the Annexure to this Agreement, imported into the Union from any country not a party to this Agreement and subsequently removed to Southern or Northern Rhodesia otherwise than in bond, when the rates of duty in Southern or Northern Rhodesia, as the case may be, are higher than those in the Union. The list of goods so specified may be added to by mutual agreement, when rendered necessary by alterations in tariffs or trade conditions.

The arrangement set forth in the preceding paragraph shall not apply to goods despatched by parcels or letter post, the extra

duties in such cases being collected by the Governments of Southern or Northern Rhodesia.

- (f) Potable spirits not distilled in the Union shall not be removed from the Union to Southern or Northern Rhodesia except in bond.
- (g) When bioscope films for exhibition purposes on which duty has not previously been paid in the Union, are removed from Southern or Northern Rhodesia shall collect the difference in duties leviable in Southern or Northern Rhodesia as the case may be, and the Union respectively. Notwithstanding anything to the contrary contained in Articles X and XI upon removal from one territory to the other of bioscope films for exhibition purposes, the share of duty due to each territory shall be based on the showing value of such films in that territory, and the duties collected shall be apportioned and paid accordingly.
- (h) In respect of goods imported into Southern or Northern Rhodesia from any country not a party to the Agreements and subsequently removed to the Union otherwise than in bond, there shall be paid to the Government of the Union by the Governments of Southern or Northern Rhodesia, as the case may be, customs duties at the rates leviable in the Union, subject to a deduction of five per centum of such duties, to cover the cost of collection thereof.

In the case of goods liable to *ad valorem* duties the values shall be those entered for customs purposes on importation into Southern or Northern Rhodesia.

#### Annexure.

Carpets, floor rugs and mats (other than coir), linoleum floorcloth and carpet felt.

Hosiery, i.e., stockings.

Millinery, drapery, haberdashery and textile articles of furnishing and napery.

Piece goods, cotton.

Piece goods, other than cotton and woollen.

Threads, yarns, cottons, silks and twists; sewing knitting and crochet.

Cutlery, not gold or silver, nor gold or silver-plated.

Agricultural and railway fencing material, not including wire and wire netting.

Agricultural machinery, apparatus, appliances and implements (not being vehicles).

Fixed plant and machinery for factory installation, mining, and manufacturing and industrial purposes (including power laundry machinery).

Pumps, water and wine: and water pumping apparatus (not including pipes or tubes).

Refrigerating machinery and mechanically cooled refrigerators.

Sewing and knitting machines (not being industrial machinery), and needles therefor.

Sprayers and sprinklers and other apparatus used for the prevention or destruction of agricultural pests or of diseases in stock, plants or trees.

Traction engines, tractors, steam wagons, stone crushers, steam and motor road rollers, road scarifiers, street sweeping and street spraying machines, asphalt melting and mixing plant, tar and pitch boilers.

Glassware, chinaware and porcelainware, including household crockery of earthenware.

Bands and belting of all kinds for driving machinery.

Paper: plain or composite.

Mechanics' tools.

N.B.—The provisions of the Agreements shall not apply to that part of Northern Rhodesia falling within the Congo Basin, as defined in Article I of the General Act of Berlin of the 26th February, 1885,

as revised by the Convention of St. Germain-en-Laye of September, 1919, or as may subsequently be revised.

The Agreements shall remain in force until the 30th June, 1932, and thereafter for periods of twelve months: provided that any party thereto may give notice before the 31st December of the year 1931 or of any subsequent year of its intention to retire therefrom as from the 30th June following such notice, and provided further that should one of the contracting parties at any time take any steps in conflict with the spirit and intent of the Agreement, the other party shall be at liberty to retire therefrom forthwith.

A Customs Agreement has likewise been entered into between the Government of the Union and His Majesty's High Commissioner on behalf of the Territories of the Bechuanaland Protectorate, Basutoland, and Swaziland. The agreement is somewhat similar to that referred to above, but the basis laid down in Section No. 12 of the South Africa Act, 1909, for the adjustment of duties between the parties to the Agreement is followed, viz:—The Treasury of the Union will pay out quarterly a sum in respect of such duties which shall bear to the total Customs revenue of the Union in each year the same proportion as the average amount of the Customs revenue of such Territories for the three completed financial years last preceding the taking effect of the South Africa Act 1909. The percentage so arrived at is applicable to both Customs and excise duties, other than the excise duties on spirits and beer, which are collected by the Territories themselves.

The mandated Territory of South West Africa is, for the purpose of the collection of customs and excise duties, regarded as a part of the Union, with which there is free interchange of trade. The Customs and excise duties collected on goods consumed in South West Africa are paid over by the Union Government towards the cost of the Administration of the territory.

A uniform rate of excise duty now applies throughout the Union on spirits distilled, or beer brewed, within the Union, except in the case of spirits distilled from the products of the sugarcane, on which, when removed for consumption outside Natal, an additional excise duty is levied.

A rebate of the whole excise duty is granted on methylated spirits, on spirits used in the fortification of pure wine, or in the manufacture of motor-fuel, and on spirits exported, and a rebate of part duty on plain spirits used in any art or manufacture.

A rebate of the whole excise duty is allowed on sugar used in the manufacture of jams, bottled, tinned and other preserved fruits, biscuits, sweets, jellies, condensed milk, non-alcoholic beverages and such other commodities as the Minister of Finance may approve.

An excise duty is also levied throughout the Union on acetic and pyrolygneous acids, extracts and essences of vinegar, matches, playing cards, sugar and cigarette tobacco.

Excise is levied by means of stamps on cigarettes manufactured in the Union, or in the Bechuanaland Protectorate, Basutoland, and Swaziland, when entered for consumption in the Union, or in these Territories, and an equivalent surtax is levied on imported cigarettes, whether from overseas or from Southern or Northern Rhodesia.

The principle of granting a rebate of Customs duties on all goods the growth, produce, or manufacture of the United Kingdom has been abandoned in the Customs Tariff Act of 1925.

The Union, under the *Schedule* to Act 36 of 1925, gives a specified rebate of duties on certain

goods, the produce or manufacture of the United Kingdom, and similarly the United Kingdom gives preference on certain specified articles the produce or manufacture of countries within the British Empire.

The value of these rebates to the Union and to the United Kingdom in 1929 was:—value of Union products, 62,521,124*l.*; value of U.K. products, 33,119,654*l.*; amount rebated by U.K., 499,700*l.*; amount rebated by Union, 450,903*l.*

Rebates of duty are granted on numerous articles which are essential to certain specified industries.

All duties are rebated on goods in transit through any part of the Union to places outside the Union.

The duty paid on *bond fide* samples of commercial travellers is refunded if the samples are exported within twelve months from the date of importation.

A refund of the duty originally paid will be made on all articles not intended for consumption in the Union imported by *bond fide* tourists for their use while in the Union provided such articles are exported within twelve months from the date of importation. As regards tourists' motor cars the triptyque system is in vogue.

A rebate of Customs duty will be allowed on used household effects the *bona fide* property of settlers to the value of one hundred pounds for each adult and fifty pounds for each child but not exceeding four hundred in all for each family.

A refund of import duties is granted on goods subsequently exported to St. Helena, Mauritius, Kenya, Uganda, Tanganyika, Nyasaland, Belgian Congo, and Portuguese East Africa.

#### Commerce.

The total value of the imports and exports of the Union, exclusive of silver and copper specie, but including gold specie, has been as follows:—

Year.	Imports.	Exports.
	£	£
1926 ... ..	73,159,054	86,011,547
1927 ... ..	74,069,308	96,355,162
1928 ... ..	79,087,668	96,460,170
1929 ... ..	83,449,196	97,757,484
1930 ... ..	64,558,504	83,409,477

† Including flint and gypsum.

In 1930 the Witwatersrand mines produced 10,241,021 ounces of fine gold, valued at 43,501,095l.

The average number of employees on the mines in 1930 was : gold mines, 236,305 ; diamond mines, 63,297 ; coal mines, 32,594 ; other mines, 16,835.

The principal cereal and other crops for the Union of South Africa for the year 1928-29 were as follows:—

Description.	1928-29.

\* NOTE.—The notes circulate outside the Union. The S.A. Reserve Bank has sole right of note issue for twenty-five years and its notes alone circulate in the Union.

### Money, Weights and Measures.

**Coinage.**—A Coinage Act passed in 1922 provided for the minting of Union coins with the same denominations and relative values as those of Great Britain.

**Weights and Measures.**—The Weights and Measures Act, 1922, which came into effect early in 1923, makes provision for the standardization of the metric system of weights and measures, with the optional use of imperial standards in defined cases.

The following old Dutch measures are still used: **Liquid Measure:** Leaguer=about 127 imperial gallons; half aum=15½ imperial gallons; anker=7½ imperial gallons. **Capacity:** muid=3 bushels.

The general surface measure is *Morgen*, equal to 2·1166402 acres; 1,000 Cape lineal feet are equal to 1,033 British imperial feet.

### Land Administration. Union of South Africa.

The Land Settlement Act (No. 12 of 1912), as amended by Acts No. 23 of 1917, 28 of 1920, 21 of 1922, 38 of 1924, 26 of 1925, 6 of 1928, 1 of 1931, and 25 of 1931, provides *inter alia*, for the purchase by government—subject to the limit of funds specially appropriated by Parliament—of privately owned farms for persons able to contribute not less than one-tenth of the purchase price of such farms in cash and possessing all the qualifications prescribed in the Act.

All such applications are dealt with by the Land Board concerned to whom under the law they must be referred for consideration. The remainder of the purchase price including inspection, survey and transfer costs and an amount representing 4 per cent. interest for the first and second years, must be paid not later than 40 years reckoned from the date of the transfer of the farm to the Government. Until the whole of the purchase price has been paid the settler must pay yearly in advance interest at the rate of 4% per annum on such amount of the purchase price as remains unpaid. Interest payments commence at the expiration of two years from the aforesaid date of transfer. Ordinary Crown Land or lands acquired under the Act for general settlement purposes may be allotted on lease for five years, into the option of purchase. Applications for any land becoming so available are invited in the Gazette and it rests with the Land Board concerned to recommend to the Minister the applicant to whom the land should be allotted. One important condition of all allotments is that of continuous personal occupation of the land by the lessees. Advances may be made to lessees for the purchase of stock, implements, seeds and other things necessary for the development and working of the holding, but such advances must not exceed 500*l*. On the recommendation of a Land Board, the Minister of Lands may cause boring operations to be effected or improvements of a substantial and permanent nature to be constructed and add the cost thereof to the valuation of the holding.

The Act lays down the qualifications of intending lessees, and prescribes that they must possess capital sufficient for beneficially developing and working the holdings applied for.

Not less than ten years after the date of commencement of a lease, a lessee is entitled to a Crown grant of his own holding, provided the purchase price has been paid and the provisions of the Act have been complied with.

In special cases the 10 year period may be waived and the 1922 Act provides that if after 5 years the value of the farm, including permanent improvements effected therein, offers sufficient security for the settler's total indebtedness a Crown grant may be issued and a mortgage bond passed for the residue of the purchase price and any sums owing for advances.

#### Geological Survey.

The geological survey of the Transvaal, together with what was formerly controlled by the Cape Geological Commission, have been incorporated together as the geological survey of the Union of South Africa.

The publications consist of memoirs, maps, and palaeontological papers.

#### Forests.

The total area reserved for forest purposes in the Union of South Africa in March, 1931, was approximately 2,857,543 acres. The timbered area of the reserves is approximately 928,808 acres, of which some 213,775 acres consist of plantations. The Union is divided into six conservancies, each controlled by a Conservator of Forests, stationed at Cape Town, King William's Town, Knysna, Umtata, Pretoria, and Pietermaritzburg respectively, who is responsible to the Chief Conservator of Forests for the Union at Pretoria. The policy of the Forest Department is to conserve and utilise to the best advantage the indigenous forests, and to add to

the forest resources of the country by the afforestation of about 20,000 acres per annum. Expenditure on forests, including Railway Sleeper Plantations, for financial year 1930-31, 508,540*l*., and the total revenue 121,945*l*. Timber production on the forest estate during 1930-31 aggregated 1,741,985 cubic feet.

#### Education.

In the South Africa Act (1909), Section 85 (3), it is provided that "Education, other than higher education, for a period of five years and thereafter until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922, a definition is given of the term "higher education."

Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows:—

The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*—

- (a) education provided by Universities and University Colleges incorporated by law;
- (b) education provided by the South African native College;
- (c) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science), as the Minister of Education may declare to be places of higher education;
- (d) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education;
- (e) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses, (c), (d) and (e) above, the Provinces have been relieved of all vocational education (technical, industrial, and agricultural) and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following:—

1. *University of South Africa* with the following constituent colleges—Potchefstroom University College, Potchefstroom; Grey University College, Bloemfontein; Rhodes University College, Grahamstown; Huguenot University College, Wellington, C.P.; Natal University College, Pietermaritzburg.
2. *University of Capetown*.
3. *University of Stellenbosch*.
4. *University of the Witwatersrand*.
5. *University of Pretoria*.

II. Technical colleges which have been established under Act No. 30 of 1923 at the following centres—Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria, Pietermaritzburg and Bloemfontein.

III. Industrial, trade, housecraft, and agricultural training schools (State and State-aided), at various centres throughout the Union.

The number of internal students at Universities and University Colleges for the year 1930, was 7,006. The State expenditure on higher education as above defined during the financial year 1930-31, was 857,630*l*.

Provision is made on the vote of the department of a grant-in-aid to the South African Native

College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in 1916, and at the end of the 1930 Session (December), had 112 students.

#### *Native Affairs.*

The native population of the Union at the census of 1921 was as follows:—Cape of Good Hope, 1,640,162; Natal, 1,139,804; Transvaal, 1,495,869; Orange Free State, 421,978, making a total of 4,697,813, or 67·80 per cent. of the whole population. In the Cape Province the native population is centred in the native territories and a number of eastern districts, with Kingwilliamstown as the area with the densest native population. In Natal, about one-quarter of the native population is to be found in Zululand, while in the rest of the province the natives are distributed evenly throughout the various districts. In Zululand they are, however, less densely settled than in the remainder of Natal. In the Transvaal the bulk of the native population is contained in the Witwatersrand area, which is largely urban and has a high density, and in the northern portion of the province forming the greater part of the Bushveld. In the Orange Free State the natives are principally located in the central and eastern districts, adjoining the Basutoland border.

The South Africa Act preserves for the election of members of the House of Assembly the franchise laws of the different colonies comprising the Union, as they existed on the 31st May, 1910. In the Cape Province no distinction was made between European and native, and the names of a large number of natives who are qualified in respect of property or salary, as well as educationally, are included in the electoral rolls. In Natal, natives are only entitled to become parliamentary voters with the specific authority of the Governor-General. The number so authorized at the present time is negligible. There is no provision for the direct representation of the natives of the Transvaal and Orange Free State Provinces in the House of Assembly. In the Senate provision is made under the constitution for the inclusion of four members nominated by the Governor-General who "shall be selected on the ground mainly of their thorough acquaintance, by reason of their official experience or otherwise with the reasonable wants and wishes of the coloured races in South Africa."

The Native Affairs Act of 1920 established the Native Affairs Commission, which is an advisory body consisting of not less than three or more than five members, appointed by the Governor-General and presided over by the Minister of Native Affairs. The Act also revived for the Union the obsolescent provision of the Transvaal Law for the summoning of conferences of native persons and bodies representative of native opinion, with the object of enabling the Government to gauge more accurately the state of native thought and feeling and of affording to those not otherwise represented, the opportunity of expressing their views.

The control and administration of native affairs throughout the Union are vested in the Governor-General-in-Council, who is authorized to exercise all special powers in regard to native administration vested at the time in the Governors of the Colonies entering the Union, or exercised by other authorities as superior chiefs. The executive authority rests with a Minister of Native Affairs, who is in control of a department of state under a permanent Secretary for Native Affairs with an

under-secretary and staff. In all four provinces of the Union there are native chiefs and headmen, many of whom are subsidized by the Government. Their powers, duties and jurisdiction vary in different parts of the country. All serve under district officials and are in charge of tribes and locations, as the case may be.

Local government of natives is established under various bodies. A system providing for Local Government was first included in the Glen Grey Act, No. 25 of 1894 (Cape), whereby such local affairs were dealt with by a District Council. Subsequently the same system was extended to the Transkeian Territories in an extended form providing for a general council amalgamating the resources of the district councils in one general body which operates in a centralised capacity. This system has been singularly successful and has resulted in a further enactment (Act No. 23 of 1920) which provides for the formation of local (previously called district) councils and the amalgamation of these in a general council where circumstances permit. Apart from this provision local affairs are also administered in the Orange Free State under an Ordinance of 1907 and in the Cape Province under the Mission Stations and Communal Reserves Act of 1909. Apart from such native areas, the local government and control of natives rests with the various municipal and other local government bodies.

The tenure of land by natives outside their locations and reserves is regulated by the squatting laws of the various Provinces and the Natives' Land Act of 1913, which was avowedly a temporary measure with the object of maintaining the *status quo* as regards the ownership and occupation of land in the Union relatively by natives and by persons other than natives—so far as that could be done without imposing undue hardship "until Parliament should make other provision." In 1917, the further legislation contemplated in the Act was introduced into Parliament in the shape of the Native Affairs Administration Bill, which was not, however, enacted.

Various considerations led the Government to the conclusion that the time was not yet ripe for passing definite segregation legislation, which is the objective of the South African Government's native affairs policy, and the Native Affairs Act of 1920 was passed merely as a preliminary step in that direction.

In 1927, the Prime Minister, General Hertzog, introduced into Parliament a Series of Bills, usually referred to as the "Native Bills," consisting of the Natives' Parliamentary Representation Bill, the Union Native Council Bill, the Natives' Land (Amendment) Bill and the Coloured Persons Rights Bill.

These Bills after the first reading were referred to a Select Committee which functioned during the 1927 and 1928 sessions.

Three of the Bills, viz., The Natives' Parliamentary Representation Bill, the Coloured Persons Rights Bill and the Natives' Land (Amendment) Bill were re-introduced in 1929 and read a first time. The two former, having regard to their provisions, required to be dealt with by both Houses of Parliament sitting together in accordance with Sections *thirty-five and one hundred and fifty-two* of the South Africa Act, 1909, and were passed in second reading. At the third reading before the Joint Session, however, the Natives' Parliamentary Representation Bill failed to secure the requisite two-thirds majority,

and in the circumstances the Coloured Persons Rights Bill and the Natives' Land (Amendment) Bill were not proceeded with. Pending the enactment of further legislation on the Native land question the Government has not hesitated to supply by administrative action indispensable requirements, which it was originally intended should be met by the legislation foreshadowed in the Natives' Land Act.

Applications for permits to prospect in native areas are not encouraged. Several native locations in the Cape Province have been proclaimed as areas within which prospecting is not allowed. In the Transvaal permission to prospect in locations can only be obtained with the approval of the Minister of Native Affairs and since the discovery of platinum in the province, a limited number of permits have been issued having regard to the undesirability, from an economic point of view, of locking up what might prove to be assets of national importance.

All state and state-aided native education in the Union, with the exception of that represented by the South African Native College, is controlled by the provincial administrations in terms of the South Africa Act. Native education, other than state and state-aided education, is under the control of missionary societies.

There are numerous educational institutions in the Union which endeavour to provide for the needs of the native peoples in regard to higher education, i.e., education beyond Standard IV, including industrial, agricultural, and commercial education, preparation for religious ministry, and the teaching profession. By far the most important of these is the South African Native College, which was established in 1914, and has rendered inestimable service in the cause of native education. In 1923, it was declared to be "a place of higher education" under Act No. 30 of 1923. As a result of this development, the college became eligible for the receipt of grants in aid of higher education under the Act.

A Director of Native Agriculture has been appointed who is undertaking to complete reorganisation of the methods for improving native agriculture and who will control European Staffs in all the Provinces, who in turn will supervise the work of native demonstrators.

In this connection a School of Agriculture for training Natives will be an important section of the efforts of the Government.

There is a very large number of native separatist churches, and these are increasing rapidly. The Select Committee of the House of Assembly on Native Affairs in 1925 recommended that, with regard to applications by churches or religious bodies for sites or other privileges depending upon Government recognition, as a general rule permission should only be granted to churches long established and enjoying universal public recognition, and, in all other cases before any application is considered by the Native Affairs Department a report should be submitted by the Native Affairs Commission in regard to the applicant body as to the demand for its existence, its stability, its capacity both financially and educationally, and the general fitness for religious work amongst natives. The recommendation was adopted and now forms the basis for administration in connection with the separate churches.

The control and administration of matters affecting natives in urban areas are governed by the Natives (Urban areas) Act, No. 21 of 1923.

It is a comprehensive measure framed with the intention of securing a much needed improvement in urban conditions, not only from the point of view of the native population, but also in the interests of European residents. Generally, it defines and describes the powers and duties of urban local authorities in respect of the native population within their areas. These bodies may be required to set aside locations for the accommodation of natives and are given powers of expropriating land and borrowing money for this and other purposes. Means are provided for enforcing the residence of natives, with certain exceptions, in locations, native villages or hostels, and for the exercise of certain powers of control with the intention of limiting the native population to the number legitimately required for the needs of the community. The Act prohibits the introduction of intoxicating liquor into locations, but allows, subject to various circumstances, the private brewing of Kaffir beer or its manufacture and sale by the local authority. Idle, dissolute, and disorderly natives can be removed from urban areas either to the place to which they belong or to a farm or work colony, and wide powers of regulation are provided to give effect to the objects and policy of the Act. This Act, which has been amended and reinforced in several respects by Act No. 25 of 1930, has undoubtedly, during the few years it has been in operation, resulted in an improvement of the general conditions of native residence in urban areas. A system of Pass Laws is in force throughout the Union, with the exception of the Cape Province. Provisions for granting letters of exemption from these and certain other laws affecting natives is included in the Native Administration Act, No. 38, of 1927. Provisions of far-reaching effect are contained in this Act, the main purpose of which is to consolidate the systems of native administration throughout the Union and generally to facilitate this administration. With this end in view the Governor-General is now, except in the Cape Province, Supreme Chief of all natives, thereby centralizing in him the powers assumed to have been possessed by hereditary chiefs. Provision is made for tribal organization and control, with definite powers to remove individuals and even tribes in the public interest from place to place within the Union.

One of the most revolutionary changes is that contained in the recognition of native law and custom in special courts. Native Commissioners, Additional Native Commissioners, and Assistant Native Commissioners have now been appointed for these Courts as from the 1st January, 1929, with almost unlimited jurisdiction to hear civil cases and matters between native and native. Notwithstanding the provisions of any other law, it is in the discretion of these Courts, in all suits or proceedings between natives involving the question of customs followed by natives, to decide such questions according to the native law applying to such customs, except in so far as it shall have been repealed or modified, provided that such native law shall not be opposed to the principles of public policy or natural justice, and it is specially enacted that it shall not be lawful for any court to declare that the custom of *lobolo* or *bogadi* or other similar custom is repugnant to such principles. Certain native chiefs may be authorized to hear and determine civil claims subject to appeal to the Native Commissioner. Chiefs in British Bechuanaland have been allowed to maintain their criminal jurisdiction, and this may also be granted to other chiefs in other areas in respect of offences punishable under native law and custom.

As from the date of the establishment of the Native Appeal Court, the Native Territories Appeal Court

was abolished, and the Natal Native High Court ceased to exercise jurisdiction in any civil matter. Criminal jurisdiction conferred upon Magistrates by the Magistrates' Court Act, 1917, and the Criminal Procedure and Evidence Act, 1917, has, in terms of the Act under review, been conferred on Native Commissioners.

An amendment of the Act makes provision for the establishment of Native Divorce Courts under the presidency of the Presidents of the Native Appeal Courts.

A further chapter deals with marriages and succession. In this provision is made for the regulation of marriages by Christian rites between parties, who had previously been living in a customary union, and also for the exclusion of the ordinary consequence of marriage in community of property according to Common Law, except under certain circumstances, and succession under certain rules is also provided for.

Another outstanding feature of the Act is the provision for government by proclamation. The Governor-General is empowered to alter any existing law or make new laws for areas included in the Schedule to the Natives Land Act, 1913, or such areas as may be designated by both Houses of Parliament as native areas for this purpose. All the provisions contained in the laws in force in the Provinces dealing with the issue of Letters of Exemption have been repealed, and the Governor-General has been empowered not only to grant these privileges but to cancel them, whether they may have been granted under the provisions of the existing legislation or under the powers of prior Acts. Letters issued under the latter are regarded as having been issued under the provisions of Act No. 38 of 1927. Finally, apart from the preceding provisions, the Governor-General may make regulations for the prevention of misconduct and disorders, for the regulation of native living, and the control of certain villages and townships.

Section 37 of the Act provides for the date of coming into operation, either in whole or in part, being fixed by proclamation of the Governor-General. By Government Notice No. 201, *Government Gazette* dated the 5th August, 1927, the Act, with the exception of Chapter V having reference to Marriage and Succession, became law as from the 1st September following. Chapter V was eventually brought into force as from the 1st January, 1929, under the provisions of Proclamation No. 296, *Government Gazette Extraordinary* dated the 21st December, 1928.

#### SPECIAL NATIVE COURTS.

1. *Native Tribunals.*—Generally speaking, natives in both civil and criminal matters are subject to the ordinary laws and the ordinary courts of the land. Certain special tribunals have, however, been established for the hearing of purely native cases, with a view to affording the natives a simpler and less expensive method of procedure, also to ensure that cases arising out of native law and customs are heard by officials experienced and well versed in such laws and customs and, in so far as native chiefs' courts are concerned, to accord a measure of recognition to purely native institutions.

2. *Civil Matters.*—In so far as civil matters are concerned the following special native courts have been established:—

(i) *Native Chiefs' and Headmen's Courts.*—A native chief or headman appointed as such under the Native Administration Act, No. 38 of 1927, as amended by Act No. 9 of 1929, may be authorized by the Governor-General to hear and determine civil suits arising out of native law and custom between natives resident within his area of jurisdiction. An appeal from the decision of any such court lies to the court of the native commissioner.

(ii) *Native Commissioners' Courts.*—Under section 10 of the Native Administration Act, No. 38 of 1927, the Governor-General may establish Native Commissioners' Courts for the hearing of all civil causes and matters between native and native only, provided that no such court shall have jurisdiction in any matter in which:—

- (a) the status of a person in respect of mental capacity is sought to be affected;
- (b) a decree of perpetual silence is sought;
- (c) namptissement is sought;
- (d) the validity or interpretation of a will or other testamentary document is in question; or
- (e) a decree of nullity, divorce, or separation in respect of a marriage (contracted according to christian or civil rights) is sought.

Under this provision Native Commissioners' Courts have been established in all districts in which there is a large native population resident under tribal conditions.

These courts are authorized to decide cases involving questions of customs followed by natives, according to the native law applying to such customs, except in so far as this law shall have been repealed or modified, and provided that such native law is not opposed to the principles of public policy or natural justice. The custom of *lobolo* or *bogadi* or similar custom is specially declared not to be repugnant to such principles.

(iii) *Native Appeal Courts.*—There are two Native Appeal Courts in existence—one for the Cape and Orange Free State Provinces and one for the Transvaal and Natal. These courts are constituted under Section 13 of the Native Administration Act, No. 38 of 1927, for the hearing of appeals from Native Commissioners' courts. Each Native Appeal Court consists of a president and two members. The president is a full-time officer appointed by the Governor-General, while the members are appointed by the Minister from time to time as required, and are selected from magistrates, native commissioners, and other qualified persons. The decision of a Native Appeal Court is final, except:—

- (a) where conflicting decisions have been given by a Native Appeal Court within its area of jurisdiction, in which case the Minister may cause a special case to be argued before the Appellate Division of the Supreme Court;
- (b) where the Native Appeal Court consents to an application for leave to appeal, upon any point stated by the court, to the Appellate Division.

(iv) *Native Divorce Courts.*—Section 10 of the Native Administration Act 1927, Amendment Act No. 9 of 1929, made provision for the establishment of native divorce courts with jurisdiction to hear and determine suits of nullity, divorce, and separation arising out of native marriages contracted according to christian or civil rites. Each such court must consist of the president of a Native Appeal Court, and its area of jurisdiction must coincide with that of a Native Appeal Court. Two Native Divorce Courts have accordingly been established with areas of jurisdiction coinciding with those of the two Native Appeal Courts.

The jurisdiction of the Supreme Court as a forum of the first instance for native divorce cases is not ousted by the Native Divorce Courts, and, moreover, an appeal from the judgment of a Native Divorce Court lies to the Provincial or Local Division of the Supreme Court having jurisdiction.

3. *Criminal Matters.*—The special courts established for the exercise of criminal jurisdiction in respect of natives are as follows:—

(i) *Native Chiefs' and Headmen's Criminal Courts.*—Such courts are established under Section 20 of the Native Administration Act, No. 38 of 1927, as amended by Section 6 of Act No. 9 of 1929, which empowers

the Governor-General to grant to any native chief or headman jurisdiction over members of his own tribe resident or being upon tribal land, or in a tribal location within his area, in respect of offences punishable under native law and custom. His jurisdiction is limited to a maximum penalty of two head of cattle or £5.

An appeal from the decision of any such court in a criminal matter lies to the magistrate of the district concerned.

(ii) *Native Commissioners*.—Section 9 of the Native Administration Act, No. 38 of 1927, authorizes the Governor-General to confer criminal jurisdiction upon native commissioners in respect of offences, subject to the jurisdiction of a magistrate's court, committed by natives. Appeals from the decisions of native commissioners exercising criminal jurisdiction so conferred lie to the Supreme Court.

(iii) *Natal Native High Court*.—The Native High Court of Natal, as at present constituted, exercises criminal jurisdiction only. The court consists of a judge-president and three other judges and tries criminal cases, when the accused are natives, but without prejudice to the jurisdiction of magistrates' courts. It exercises jurisdiction in respect of all crimes (including capital offences) committed by natives, save certain particular classes of crimes specified in Section 6 of Natal Act No. 49 of 1898 as amended by Natal Act No. 30 of 1910. The jurisdiction of the Supreme Court as a court of first instance is expressly excluded in respect of such crimes committed by natives as are cognisable by the Natal High Court.

The principal sources of native revenue in the various provinces have been as follows:—Cape Province, hut tax, quitrent, and private location fees; Natal, hut tax and rent levied in respect of native huts on crown lands as distinct from locations; Transvaal, poll tax and rent from natives squatting on crown lands as distinct from locations; Orange Free State, poll tax. These different systems of taxation were abrogated by the Native Taxation and Development Act, 1925, which substituted a uniform system throughout the Union. Under that Act, as amended by Acts Nos. 28 of 1926 and 37 of 1931, every adult male native is liable annually for a general tax of 1*l*. and in addition every native occupier of a hut or dwelling in a native location, unless he be the holder of a quitrent allotment, is liable for a local tax of 10*s*. per annum. One-fifth of the general tax and the whole of the local tax are to be used for the direct benefit, educationally or otherwise, of the natives. The former charges in respect of the occupation of land, i.e., rents, etc., remain. No direct taxation can be imposed on natives by any body other than the Union Government.

The regulation of native labour employed by large industrial undertakings—a matter of fundamental economic importance to South Africa—is governed by an Act of 1911, which consolidated the laws in force in the various provinces with regard to the recruiting and employment of native labour. The law provides for the appointment of a director of native labour, the issue of licences to employers and agents to recruit natives, and to compound managers, and the assessment of compensation for injuries contracted during service. Owing to special measures adopted and improved conditions of work, the death rate among native labourers on the mines is remarkably low for this class of employment and the standard of health is generally satisfactory.

The supply of Native labour from Portuguese East Africa to the Witwatersrand Gold Mines is regulated by the terms of a Convention entered

into between the Portuguese and Union Governments, in September, 1928.

*Cape: The Northern Border*.—Early in 1878, while the war with the Amasosa was being carried on, a number of Koranas, Griquas, Kaffirs and others living along the Orange River took up arms against the colony, their object being simply plunder. It was difficult to move a military force to such a remote quarter, and it was more than a year before the insurrection could be suppressed. A magistrate with a body of police was then stationed at Upington, on the northern bank of the Orange. Since this date there have been no further disturbances. The northern border establishment was broken up and the special commissioner recalled on 30th June, 1888. The territory now forms the "Gordonia" district of British Bechuanaland, now part of the Cape Province.

*Fingoland, Idutywa Reserve and Noman's Land* were annexed to the Cape in October, 1879.

In 1877 the Gcalekas, a tribe residing beyond the Kei, under Krelli, one of the leaders of the great Kaffir war of 1850-53, defied the authority of the British Government and invaded what is now British territory. They were, however, defeated by the Colonial forces under the immediate leadership of Col. C. D. Griffith, C.M.G., then commandant of the frontier armed and mounted police. Their territory was overrun, and Krelli deposed, and his country taken as British in October, 1877.

In 1875-6 the Tembus, of Tembuland proper, gave themselves over to the Government, and in 1878 the Bomvanas did the same.

While giving effect to the desire of these tribes to come under the Cape government, it was also arranged to include in the same scheme of incorporation Gcalekaland, and a settlement of native British subjects called the Emigrant Tembus.

The above-named territories, viz., Tembuland, Emigrant Tembuland, Bomvanaland and Gcalekaland, were formally proclaimed British territory in November, 1881, and in 1885 they were annexed to the Cape Colony.

In 1885, the chief Krelli requested to be placed on the same footing as the others, and was located in Bomvanaland, on a tract of land purchased from the chief of the Bomvanas. Palir, chief of the Ametshazi, who had previously been living in practical independence in Lower Tembuland, formally tendered his submission to Colonial rule in 1886, and he and his people were registered in the same manner as the Tembus.

The Pandomisi tribe, under the chiefs Umditshwa and Umhlonhlo, and some of the most powerful clans, allied with the Tembu tribe, took up arms against the Colony at the outbreak of the Basuto Rebellion. The Tembus proper aided the Colony. The insurrection was suppressed, and a re-settlement of the lands previously occupied by the insurgents effected, by which greater security in the future is promised.

The port at the St. John's River mouth was annexed to the Colony in 1884, and Customs dues are now levied there under a Proclamation dated 2nd August, 1881.

By Proclamation of Sir Bartle Frere, dated the 4th September, 1878, Umqikela, for breach of treaty arrangements, ceased to be recognised as paramount chief of the Pondoas, and the sovereignty of the port and estuary of St. John's River was vested in Her Majesty's Government. A Resident was appointed to represent the Government with Umqikela, who remained Chief of East

Pondoland. Umqikela died in October, 1887, and in February, 1888, his son Sigcau was elected to succeed him. A Resident Commissioner in Pondoland was appointed on 6th July, 1888.

In March, 1894, in consequence of the failure of Sigcau and Nqwilis to put a stop to the cruelties and misrule prevailing in Pondoland, they were required to submit to Colonial rule and magistrates were placed in the country. By Act of the Cape Parliament, No. 5 of 1894, the whole country was annexed to the Colony.

West Pondoland was, until the date of annexation, under the chief Nqwilis. A small strip of his territory at the mouth of the St. John's River was acquired by the Cape Government for 1,000*l*.

The District of Mount Ayliff, or the Xesibe country, after having long been administered as a dependency of Griqualand East, was formally annexed to the Colony in October, 1886, and the Rode Valley in October, 1887.

The whole of these territories are now within the Province of the Cape of Good Hope and are grouped under one Chief Magistrate, who is stationed at Umtata, while there are 27 subordinate magistrates. *Griqualand East* with a population of 6,245 Europeans, 253,601 Bantu, 4,981 mixed, has eight magistrates; *Tembuland*, comprising Tembuland proper, Bomvanaland, Emigrant Tembuland, with a population of 4,204 Europeans, 228,512 Bantu, 1,849 mixed, has six magistrates; *Transkei*, comprising Fingoland, the Idutywa Reserve, Gealekaland, with population of 2,292 Europeans, 195,410 Bantu, 393 mixed, has six magistrates; *Pondoland*, comprising East and West Pondoland and Port St. John's, with a population of 1,512 Europeans, 261,467 Bantu, 1,925 mixed, has seven magistrates.

*Natal and Zululand*.—In 1873, Langalibalele, chief of the Amahlubi tribe, residing in a location at foot of the Drakensberg Mountains, rebelled and escaped into Basutoland with his people and cattle. A Colonial force was despatched against the tribe and Langalibalele and many of the tribe were secured in Basutoland and given up. Langalibalele, his sons, indunas, and certain of his tribe were brought to trial under "Native Law." About 290 prisoners were condemned to various terms of imprisonment. Langalibalele himself was condemned to banishment or transportation for life and one of his sons to a similar punishment for five years. The cattle and land of the tribe were confiscated. Langalibalele and his sons were transported to the Cape of Good Hope. They were allowed to return to Natal in 1886.

The native population had until then been governed chiefly under the authority of Ordinance No. 3 of 1849, which withdrew them from the authority of the Roman-Dutch law and placed them under the personal authority of the Governor as Supreme Chief, and made native law and custom the measure of justice among them in civil and criminal matters; a concurrent jurisdiction being reserved to the ordinary law courts in cases of crime, *Mala in se*. This system of Government remains in operation at the present time, under the provisions of Laws 26, 1875, and 44, 1887. The native population was debarred from the franchise by a Law, No. 11, of 1865; but at the same time and by the same Law, regulations were laid down by which any native may, in certain cases, apply to the Governor for a certificate entitling him to the privilege. Subsequently by a Law, No. 23 of 1865, machinery

was provided by which a native might procure his relief from the operation of native law.

It was decided to supersede very gradually the tribal organisation and the judicial and other authority of the chiefs. A Law No. 26 of 1875, established a Native High Court to administer civil justice to the natives and placed them under the ordinary criminal law of the Colony, except as regards political crimes, crimes arising out of native customs, and crimes declared triable under any local law by native law, all which crimes are reserved for the Native High Court. By Act No. 13, 1895, the Native High Court and the Court established by Law No. 10, 1876, were abolished and the jurisdiction of these courts transferred to the Supreme and Circuit Courts, and in certain cases to the Magistrates' Courts.

As it was found, however, that this arrangement did not work so well as had been anticipated, the Native High Court was re-established under Act No. 49, 1898, with effect from 1st July, 1899. Certain locations were specially reserved by Government and vested in the Natal Native Trust, for exclusive occupation by natives. But besides the natives occupying these lands there are many native squatters on Crown lands and many living by regular labour on farms. By Law No. 13 of 1875, the native hut tax was raised from 7*s*. to 1*s*4*s*. Under Law No. 41 of 1884, a rent of 1*l*. per hut was imposed upon natives living on Crown lands. This was raised by Act No. 48 of 1903, to 2*l*. per hut per annum.

The area vested in the Native Trust for occupation by natives is about 2,400,000 acres, the land (127,716 acres) formerly held by certain religious missions in trust for the natives having, by Act No. 49 of 1903, been transferred to the Natal Native Trust.

Five years after the annexation of Zululand, under Act No. 37 of 1897 (Natal), a joint Imperial and Colonial Commission, known as the Zululand Lands Delimitation Commission, was appointed to delimit adequate and permanent reserves for native occupation. In pursuance of the recommendations of this Commission twenty-one reserves, approximately 3,882,000 acres in extent, were set aside for this purpose and vested in the Zululand Native Trust under Deed of Grant dated the 6th April, 1909.

#### Defence.

The South Africa Defence Act, 1912, as amended by the South Africa Defence Act Amendment Act, of 1922, provides for the establishment of Defence Forces, comprising:—

1. *The South African Permanent Force*, which consists of:—

- (i) The South African Staff Corps.
- (ii) The South African Field Artillery.
- (iii) The South African Air Force.
- (iv) The South African Permanent Garrison Artillery.
- (v) The South African Naval Service.
- (vi) The South African Instructional Corps.
- (vii) The South African Engineer Corps.
- (viii) The South African Ordnance Corps.
- (ix) The South African Service Corps.
- (x) The South African Medical Corps.
- (xi) The South African Veterinary Corps.
- (xii) The South African Administrative, Pay, and Clerical Corps.

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service.

2. *The Coast Garrison Force.*
3. *The Citizen Force.*
4. *The Royal Naval Volunteer Reserve.*
5. *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be required to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle. As an alternative, citizens may enter for service in the South African Division of the Royal Naval Volunteer Reserve.

Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

The object of the Amending Act is to provide for a small standing army with an efficient Air Force and the nucleus of a Naval Service for coastal defence.

#### Finances.

Year 1930-31 (to 31st March) Est. :—

Revenue .. ..	£30,388,000
Expenditure .. ..	30,813,216†

† Including Subsidies to Provinces.

The gross Public Debt of the Union at 31st March, 1929, was 244,044,513*l.*

#### Governors-General of the Union.

- 1910 The Rt. Hon. Viscount Gladstone, G.C.B., G.C.M.G., G.B.E.  
 1914 The Rt. Hon. Viscount (now Earl) Buxton, G.C.M.G.  
 1920 H.R.H. Prince Arthur of Connaught, K.G., K.T., G.C.M.G., G.C.V.O., C.B., A.D.C.  
 1924 The Rt. Hon. The Earl of Athlone, K.G., G.C.B., G.C.M.G., G.C.V.O., D.S.O., A.D.C.  
 1931 The Rt. Hon. The Earl of Clarendon, G.C.M.G.

#### Governor-General and Staff (Cape Town and Pretoria).

*Governor-General.* The Rt. Hon. The Earl of Clarendon, G.C.M.G., 10,000*l.* per annum.  
*Secretary.* Captain H. T. Birch Reynardson.  
*Private Secretary and Comptroller of the Household.* Lt.-Colonel E. H. Davidson, C.B.E., M.C.  
*Aides-de-Camp.* Captain A. G. W. Heber Percy; Lieutenant G. C. Colville, R.N.; Captain The Viscount Sudley; Captain L du Toit.  
*Principal Clerk.* J. H. Davis.

#### THE PARLIAMENT OF THE UNION.

##### Members of the Senate, 1931.

*President*—Senator The Hon. C. A. van Niekerk.  
*Deputy President and Chairman of Committees*—Senator Dr. The Hon. T. C. Visser.

*Elected to represent the Cape of Good Hope Province*—Senators Franz Ginalberg, Cornelis Jakob Langenhoven, Francois Stephanus Malan, P.C., Jacobus Petrus Malan, Okkert Almero Oosthuisen, Daniel Retief, George Frederik Zondagh.

*Elected to represent the Natal Province*—Alexander James McGibbon, Pieter Jurie Wessels, Sydney Simon Brisker, Joseph Dyson, Archibald McKenzie, Charles Francis Clarkson, Walter Ernest Thrash and Charles Whytock.

*Elected to represent the Transvaal Province*—Senators James Dominic Francis Briggs, Robert Ashford Kerr, George Glaesser Munnik, Theunis Christoffel Stoffberg, Thomas Christoffel Visser, Jan Adriaan du Plessis, Gustave Hartog and Johannes Adriaan Naser.

*Elected to represent the Orange Free State Province*—Senators William John Cormack Brebner, Daniel Jacobus Johannes Malan, Charles Frederick Hammerley Meintjes, Hendrik Potgieter, Christiaan Andries van Niekerk, Adriaan Hendrikus Marthinus Lamprecht, Erasmus Albertus van der Walt, Marthinus Joachim Vermeulen.

*Nominated Senators.* Senators Thomas Boydell, Pieter Adriaan de Lange, William Angus Hofmeyr, Rev. Cornelis Johannes van Rooyen Smit\*, Andreas Theodorus Spies\*, Francis Charles Thompson\*, Pieter Wynand le Roux van Niekerk\*, Johannes Cornelis van Rooy.

##### Officers of The Senate.

*President.* Senator The Hon. C. A. van Niekerk, 1,200*l.*

*Deputy President and Chairman of Committees.*—Senator Dr. The Hon. T. C. Visser, 300*l.* in addition to allowances as member of Parliament.  
*Clerk of the House and Tazing Officer.* Maurice Green, V.D., 1,350*l.* to 1,500*l.*

*Clerk-Assistant, Accountant and Committee Clerk.* S. F. du Toit, LL.B., 950*l.* to 1,050*l.*  
*Translator and Gentleman Usher of the Black Rod.* I. D. Malan, B.A., 750*l.* to 850*l.*

##### Members of the House of Assembly.

A General Election took place in June, 1929, with the following result:—

	Senta.
South African Party ... ..	61
Labour ... ..	8
Nationalists ... ..	78
Independent ... ..	1

##### CAPE OF GOOD HOPE.

###### Electoral Division.

###### Member.

Albany . . . . .	R. H. Struben, O.B.E.
Albert . . . . .	L. J. Steytler.
Aliwal . . . . .	C. A. A. Sephton.
Beaconsfield . . . . .	W. B. Humphreys.

*Second Grade Superintendent Pietermaritzburg Gaol*, C. S. Jones, 825l.  
*Assistant Superintendent in Charge, Chelsea Convict Prison*, J. J. Nye, 600l.  
*Warden and Head Schoolmaster, Houtpoort Reformatory*, F. M. Weich, 600l.  
*Assistant Warden, Tokai Reformatories*, J. C. M. D. Mitchell, 575l.  
*Assistant Superintendent, Johannesburg Gaol and Outstations and Assistant Warden, Diepkloof Reformatory and Leeuwkop Farm Colony*, T. Miner, 525l.  
*Assistant Superintendent, Central Prison, Pretoria, Pretoria Gaol and Outstations and Assistant Warden, Bariaanspoort Farm Colony and Inebriate Reformatory*, W. F. du Plooy, 500l.  
*Acting Assistant Superintendent in Charge, Bloemfontein Gaol*, T. Kenny, 421l.

#### Senior Magistrates, Cape Province.

St. J. Cole-Bowen, B.A., 1,200l.; W. J. Gill, 1,100l.; A. R. Wilmot, 1,100l.; R. H. Drew, 1,100l.; J. G. Freislich, 1,000l.; T. St. J. Grant, B.A., 900l.; P. L. Lefebvre, 875l.; C. J. Schermbrucker, 875l.; J. G. van Alphen, B.A., F.R.G.S., 875l.; Dr. F. H. van der Willigen, 850l.; P. E. Kuys, 850l.; T. Jooste, 850l.; J. C. Magennis, 825l.

#### Senior Magistrates, Natal Province.

S. M. Page, 1,200l.; B. Hodson, 1,100l.; A. D. Graham, 900l.; P. G. Armstrong, 900l.; D. A. Stewart, 875l.; F. W. Metelerkamp, 850l.; E. C. Middlewick, 850l.; H. H. Hudson, 850l.; T. J. C. Cronin, 850l.; H. B. Wallace, 850l.; C. L. R. Harries, 850l.; G. A. Whitelaw, 850l.

#### Senior Magistrates, Transvaal Province.

H. Britten, 1,300l.; A. B. Herold, 1,200l.; R. Colson, 1,000l.; J. M. Richards, 1,000l.; J. M. Graham, 1,000l.; E. J. Kerswill, 1,000l.; J. W. Robertson, 900l.; C. E. Kidger, 875l.; J. L. Pretorius, 875l.; P. K. A. de Vos, 875l.; F. C. W. Collier, 850l.; J. H. van Rooyen, 850l.; M. J. Stroek, 850l.; A. A. Stanford, 850l.; T. Edwards, 825l.; M. B. Robinson, 800l.; R. W. M. Rushton, 825l.; K. R. Thomas, 750l.

#### Senior Magistrates, Orange Free State.

W. J. Thompson, 1,100l.; W. A. Rowan, 1,000l.; P. G. L. de Beer, 850l.; C. E. Stidolph, 850l.; H. J. Malan, 850l.; G. F. Fleck, 850l.; de V. H. Tanner, 825l.

#### Police.

*Commissioner, South African Police*, I. P. de Villiers, M.C., 1,600l.  
*Deputy Commissioner, South African Police Headquarters*, T. C. R. Whelehan, 1,020l.; and S. J. Lendrum, 860l.  
*Paymaster and Accountant*, E. W. Lydall, M.B.E., 775l.  
*Deputy Commissioner, Witwatersrand*, J. H. Jones, 800l.  
*Deputy Commissioner, Transvaal Division and Chief of the Diamond Detective Department for the Transvaal Province*, W. C. Loftus, 830l.  
*Deputy Commissioner, Kimberley, and Chief of the Diamond Detective Department for the Cape Province*, A. T. Haywood, 920l.  
*Deputy Commissioner, Cape Western Division*, L. Strickland, 830l.  
*Deputy Commissioner, Cape Eastern Division*, M. M. Jackson, 860l.  
*Deputy Commissioner, Orange Free State Division*, A. C. G. Hatchell, 830l.  
*Deputy Commissioner, Natal Division*, J. M. L. Fulford, 860l.

*Deputy Commissioner, Transkei Division*, W. H. C. Taylor, 830l.

*Deputy Commissioner, C. I. Department*, A. A. Celliers, 830l.  
*Financial Adviser, S.A. Police*, E. H. Lewis, O.B.E., 1,200l.

#### DEPARTMENT OF EDUCATION (UNION).

*Secretary for Education*, Dr. S. F. N. Gie, 1,520l.  
*Under-Secretary*, Dr. G. W. Eybers, 1,090l.  
*Organising Inspector*, Dr. L. van Schalkwyk, 900l.  
*Inspector of Continuation Classes*, H. C. Green, M.A., 900l.  
*Inspector of Vocational Training*, A. B. Linscott, A.M.I.C.E., 850l.  
*Chief Clerk*, J. E. S. van Zijl, 850l.  
*Inspector of Agricultural Training*, B. J. de Klerk, M.Sc., 730l.  
*Principal Clerk*, D. G. Roux, B.A., 650l.  
*Examinations Officer*, H. S. le Roux, B.Sc., A.M.I.E.E., 650l.  
*Inspector of Institutions*, C. N. Kempff, 650l.  
*Inspector of Schools*, C. P. de Leeuw Malan, B.A., 760l.  
*Accountant*, J. E. du Plessis, 700l.  
*Industrial Schools, Principals*, W.D. Marais, B.A., 660l.; J. L. Pretorius, B.A., 720l.; J. N. Struwig, B.A., 640l.; P. J. Theron, 680l.; H. J. v. d. Merwe, 720l.; W. A. v. d. Walt, 720l.; S. K. Hauptfleisch, 620l.  
*Officer in Charge, National Bureau of Education*, Dr. E. G. Malherbe, 760l.

#### DEPARTMENT OF FORESTS.

*Chief Conservator of Forests*, Dr. F. E. Geldenhuys, B.A., B.Sc., Ph.D., 1,300l.  
*Chief Clerk*, W. J. Gyde, 850l.  
*Accountant*, T. M. Steele, B.A., 750l.  
*Conservators, Cape, Western Conservancy*, J. J. Boockock, 950l.; *Midland Conservancy*, P. C. Kotze, B.A., 760l.; *Transkeian Conservancy*, B. R. Simmons, 790l.; *Eastern Conservancy*, J. E. Kaufmann, 890l.; *Natal Conservancy*, A. J. O'Connor, 850l.; *Transvaal and Orange Free State Conservancy*, J. D. M. Keet, 950l.  
*Professional Assistant to Chief Conservator*, C. C. Robertson, M. F., 950l.  
*Officer-in-Charge, Timber Seasoning Investigations*, N. B. Eckbo, M.F., 900l.

#### TREASURY.

*Minister of Finance*, Hon. N. C. Havenga, 2,500l.  
*Secretary for Finance*, J. J. I. Middleton, 1,400l.  
*Under Secretary for Finance (vacant)*.  
*Chief Accountant*, H. J. Dewar, 975l.  
*Chief Clerk*, E. Williamson, 800l.  
*Accountant*, E. W. Dodds, 775l.  
*Commissioner of Pensions*, J. Collie, O.B.E., 1,200l.  
*Controller of Supplies*, W. S. Bateman, O.B.E., 1,450l.

#### INLAND REVENUE DEPARTMENT.

*Commissioner for Inland Revenue*, A. F. Corbett, 1480l.  
*Assistant Commissioner*, E. W. Snell, 1,020l.  
*Chief Revenue Officer*, E. Ashburner, 925l.  
*Chief Clerk (Income Tax)*, G. G. Locke, 750l.  
*Surveyors*, A. M. Slade, 650l.; A. E. Hoffe, 650l.; A. Kaye, 650l.; L. G. Richmond, 600l.  
*Principal Clerks*, F. Harvey, 650l.; E. S. Muller, 650l.; S. M. Hill, 650l.; F. J. Wilter, 650l.; T. J. P. Jenkins, 575l.  
*Accountant*, R. Gray, 700l.

*District Offices.*

*Cape Town—Receiver of Revenue, T. J. Kenmuir, 990l.*

*Chief Clerk, F. W. Medway, 750l.*

*Principal Clerks, A. Whiting, 700l.; C. Kaufmann, 600l.*

*Johannesburg—Receiver of Revenue, K. C. Gunn, 990l.*

*Chief Clerk, W. M. Boyes, 750l.*

*Principal Clerks, H. W. Blair, 700l.; W. J. Barnes, 650l.*

*Bloemfontein—Receiver of Revenue, R. W. Wamsley, 775l.*

*Principal Clerk, G. J. D. Liebenberg, 625l.*

*Benoni—Receiver of Revenue, C. J. Nash, 650l.*

*Boksburg—Receiver of Revenue, N. D. Davis, 550l.*

*Brakpan—Receiver of Revenue, R. R. Cumming, 550l.*

*Durban—Receiver of Revenue, S. H. Brocklebank, 875l.*

*Principal Clerks, W. J. R. Ounningham, 650l.; T. V. Davies, 650l.*

*East London—Receiver of Revenue, E. W. Pemberton, 750l.*

*Germiston—Receiver of Revenue, A. M. Slade, 650l. (acting).*

*Kimberley—Receiver of Revenue, A. D. Wiggett, 675l.*

*Krugersdorp—Receiver of Revenue, R. van Renen, 700l.*

*Pietermaritzburg—Receiver of Revenue, A. H. T. Buller, 800l.*

*Principal Clerk, E. G. Davies, 650l.*

*Port Elizabeth—Receiver of Revenue, D. Mc Auliffe, 725l.*

*Principal Clerk, F. W. E. Watts, 600l.*

*Pretoria—Receiver of Revenue, C. W. Marshall, 800l.*

*Principal Clerk, A. Spencer, 650l.*

*Springs—Receiver of Revenue, H. Granger, 550l.*

*Public Debt Office.*

*Board of Commissioners, The Minister of Finance (Chairman); Samuel Evans, LL.D.; A. Kuit. Secretary to the Board, F. W. Meadley, 950l.*

*DEPARTMENT OF LANDS.*

*Minister of Lands, Hon. P. G. W. Grobler, 2,500l.*

*Secretary for Lands, J. Sommerville, O.B.E., 1,600l.*

*Under Secretary, G. Cross, 1,170l.*

*Surveyors-General.*

*Surveyor-General, Cape, A. H. Cornish-Bowden, 1,200l.*

*Surveyor-General, Transvaal, W. M. Edwards, 1,040l.*

*Director of Trigonometrical Survey, Cape, W. C. van der Sterr, 1,100l.*

*Surveyor-General, Orange Free State, F. F. Elliott, 900l.*

*Acting Surveyor-General, Natal, M. L. v. d. Spuy, 850l.*

*IRRIGATION DEPARTMENT.*

*Director of Irrigation, A. D. Lewis, M.A., M.I.M.E., M.I.C.E., 1,700l.*

*Assistant Director, F. T. Patterson, M.I.C.E., 1,300l.*

*Superintending Engineer, C. H. Warren, A.M.I.C.E., M.I.Mech.E., 1,100l.*

*Chief Meteorologist, C. Stewart, B.Sc., 950l.*

*Hydrographic Surveyor, W. van Warmelo, Dipl. C.E., 950l.*

*Boring Engineer, L. D. O'Grady, 890l.*

*DEPARTMENT OF CUSTOMS AND EXCISE.*

*Commissioner of Customs and Excise, J. D. Heddon, B.A., 1,440l.*

*Deputy Commissioner of Customs and Excise, L. A. Marsh, 1,110l.*

*Chief Clerk, J. A. Corduan, 850l.*

*Chief Surveyor of Excise, W. E. T. Walters, 850l.*

*Accountant, C. H. M. Luckman, 700l.*

*Collector of Customs and Excise, Johannesburg, J. W. C. de Smidt, 900l.*

*Collector of Customs and Excise and Registrar of Shipping, Cape Town, W. T. Anthony, 980l.*

*Collector of Customs and Excise and Registrar of Shipping, Port Elizabeth, L. Parker, 925l.*

*Collector of Customs and Excise and Registrar of Shipping, East London, C. B. Morris, 800l.*

*Collector of Customs and Excise, Mossel Bay, H. W. V. Ellis, 650l.*

*Collector of Customs and Excise and Registrar of Shipping, Durban, A. de R. E. Louw, 980l.*

*Collector of Customs for Union of South Africa (Lourenco Marques), J. G. Bam, 750l.*

*Collector of Customs and Excise, Pretoria, J. L. Farrell, 650l.*

*DEPARTMENT OF CONTROLLER AND AUDITOR GENERAL.*

*Controller and Auditor-General, C. F. Schmidt, B.A., 1,800l.*

*Assistant Controller and Auditor-General and Accounting Officer, T. Scott, 1,170l.*

*Chief Inspector of Expenditure Audit, W. H. Calderwood, 1,050l.*

*Chief Inspector of Revenue Audit, T. W. Koller, 725l.*

*Chief Inspector of Railways and Harbours Audit, A. R. Wighton, 1,050l.*

*Senior Inspectors, T. H. Rowell, 800l. (Railways and Harbours); W. M. S. Hope, 750l.; G. H. Miller, 750l.; E. N. Simpson, 650l.; T. J. Lark, 650l.; Chief Clerk, H. E. Rudd, 700l.*

*Principal Clerks, C. E. H. Tripp, 700l.; A. d'A. Dowsley, 650l.; C. E. Gyde, 650l.; R. S. Stokes, 650l.; J. C. Duncan, 650l.; J. B. Short, 650l.; A. E. Hayward, 600l.; W. C. Titterton, 600l.*

*Registrars of Deeds.*

*Registrar of Deeds, Cape, G. Denoon, M.A., LL.B., 1,200l.*

*Registrar of Deeds, Transvaal, R. L. Black, 1,010l.*

*Registrar of Deeds, Orange Free State, H. S. M. Ham, 850l.*

*Registrar of Deeds, Natal, D. Brink, 900l.*

*NATIVE AFFAIRS DEPARTMENT.*

*Minister, The Hon. E. G. Jansen.*

*Secretary for Native Affairs, Major J. F. Herbst, C.B.E., 1,600l.*

*Under Secretary for Native Affairs, J. S. Allison, 990l.*

*Chief Clerk, A. L. Barrett, 775l.*

*Chief Native Commissioner and Chief Magistrate Transkei, W. T. Welsh, 1,400l.*

*Chief Native Commissioner, Natal, J. M. Young, 1,100l.*

*Chief Native Commissioner, Cape, King William's Town, M. G. Apthorp, 1,010l.*

*Chief Native Commissioner, Witwatersrand, and Director of Native Labour, Johannesburg, Major H. S. Cooke, O.B.E., 1,200l.*

*Accountant, W. Pilkington, 750l.*

## PUBLIC WORKS DEPARTMENT.

*Minister of Public Works*, H. W. Sampson, O.B.E.  
*Secretary for Public Works*, J. A. Macphail.  
*Under Secretary for Public Works*, H. F. Pentz,  
*Structural Engineer*, C. van R. Lowe, B.Sc.,  
 A.M.I.C.E.

*Chief Clerk*, C. Christie.

*Architect*, J. S. Cleland, M.B.E., L.R.I.B.A.

*Senior Assistant Architect*, F. D. Strong,  
 L.R.I.B.A.

*Quantity Surveyor*, W. E. Puntis, O.B.E., F.S.I.  
*Senior Assistant Quantity Surveyor*, W. M. Warne,  
 F.S.I.

*Electrical Engineer*, W. B. Cleeves, A.I.E.E., M.I.E.E.  
*Assistant Electrical Engineer*, W. H. Bottomley,  
 A.M.I.E.E.; H. Love, A.M. (S.A.), I.E.E.

*Accountant*, R. J. Bentote.

*District Engineer (Transvaal)*, J. N. Cormack, W. S.  
 Munro.

*Assistant District Engineers (Transvaal)*, W. Mollison,  
 A.R.I.B.A., J. G. H. Holdgate, F.R.A.B.A.

*District Engineers (Cape Province)*, J. C. Edwards,  
 M.I.S.E., and J. Robertson.

*Assistant District Engineers (Cape Province)*, A. D.  
 Mackay, A.M.I.C.E. and S. B. Cunningham.

*District Engineer (Natal)*, W. J. Beall, A.R.I.B.A.

*Assistant District Engineer (Natal)*, E. W. Dohse,  
 B.Sc., A.M.I.C.E.

*District Engineer (Orange Free State)*, W. W. Tonkin,  
 L.R.I.B.A., M.I. Struct. E.

*Assistant District Engineer (Orange Free State)*,  
 N. Harvey, L.R.I.B.A., M.I.S.E.

## DEPARTMENT OF POSTS AND TELEGRAPHS.

*Minister of Posts and Telegraphs*, Hon. H. W.  
 Sampson, O.B.E.

*Postmaster-General and Secretary for Posts and  
 Telegraphs*, H. J. Lenton, 1,600*l*.

*Assistant Postmaster-General*, J. N. Redelinghuys,  
 1,140*l*.

*Assistant Secretary*, M. Buxton Forman, 1,050*l*.  
*Chief Clerk Telegraphs and Telephones*, Major F.  
 Collins, O.B.E., M.C., 825*l*.

*Chief Clerk, Postal*, S. J. Gillmor, 725*l*.

*Accountant*, J. A. F. Rhodes, B.A., M.Econ., 925*l*.

*Superintending Engineer*, J. L. Hill, 1,010*l*.  
*Controller of Stores*, J. Tomlinson, 875*l*.

## UNION REPRESENTATIVES ABROAD.

*High Commissioner in London*, C. te Water.

*Minister at the Hague*, D. de Villiers.

*Minister at Rome*, B. J. Pienaar.

*Minister at Washington*, E. H. Louw.

*Accredited Representative to the League of  
 Nations*, Major F. F. Pienaar.

*Consul-General at Lourenco Marques*, D. Steyn.

REPRESENTATIVES OF OTHER COUNTRIES IN  
THE UNION.

*Italy*, Count Natalo Labia.

*Netherlands*, Dr. Lorentz.

*United States*, Mr. Ralph J. Totten.

*United Kingdom*, *High Commissioner*, Sir  
 Herbert Stanley, G.C.M.G.

*Administrative Assistant*, E. L. A. Robertson-Fuller-  
 ton, 500*l*, and representation allowance 400*l*,  
 and house allowance.

*Private Secretary*, Capt. L. Holbech, D.S.O., M.C.

## CAPE OF GOOD HOPE PROVINCE.

*Extent and Boundaries.*

The Cape of Good Hope, strictly speaking, is a small promontory near the south-west extremity of the continent of Africa. But the extensive Province of the name is bounded by the Atlantic and the Southern or Indian Oceans on the west and south; it is bounded on the north to the west of longitude 22° by the Orange River, and on the north-east by the Orange Free State and Natal Provinces. The Cape Province, with the Transkei, contains an area of 276,966 square miles, being over five times that of England. It extends from 26 to 35 deg. S. lat., and from 17 to 30 deg. E. long.

In 1844 Letters Patent were issued annexing Natal to the Cape, but in 1856 it was constituted a separate Colony.

Twelve islands off Angra Pequena, on the coast of Damaraland (Plum-pudding, Roast-beef, Hol-lam's Bird, Mercury, Ichaboe, Seal, Penguin, Halifax, Long, Possession, Albatross, and Mona), with the adjacent rocks, were annexed in 1867, and added to the Cape Colony in 1874.

In 1876, three large tracts of Kaffraria—namely, Fingoland, Idutywa Reserve, and Noman's Land, were brought under the more direct control of Government, and on the 12th of June, 1876, Letters Patent were issued authorising the Governor to annex these territories to the Cape of Good Hope, on condition of the Cape Parliament passing an Act to provide for their government. Such an Act was passed as No. 38 of 1877, but the territories were not actually incorporated until the 1st of October, 1879.

On the 12th March, 1878, the Port of Wal-fish Bay, situated a few miles north of the tropic of Capricorn, was proclaimed British territory. It was annexed to the Colony by proclamation dated 7th August, 1884.

On the 15th October, 1880, the Province of Griqualand West was incorporated with the Cape Colony.

Under Proclamation No. 13 of the 26th January, 1882, were issued certain laws and regulations for the government of the territories known respectively as Tembuland, Emigrant Tambookieland, Bomvanaland, and Gcalekaland, of which, by Royal Warrant dated the 14th November, 1881, the officer administering the government of the Cape of Good Hope was appointed Governor. By proclamation No. 140 of 26th August, 1885, issued under Act 3 of 1885, these territories were annexed to the Cape Colony. A similar Warrant was passed on the 27th July, 1881, in respect to the St. John's River Territory, which was annexed to the Colony by Proclamation No. 215 of the 15th September, 1884.

The Xesibe country ("Mount Avliff") was annexed to the Colony by Letters Patent of the 23rd August and Proclamation of 25th October, 1886, and the Rode Valley, Pondoland, by Letters Patent of 29th July, 1887, and Proclamation of October, 1887 (Act No. 45 of 1887). Under Act No. 5 of 1894 the whole of Pondoland was annexed. Basutoland, now an independent Colony, formed part of the Cape from 1871 to 1884.

On the 16th of November, 1895, British Bechuanaland was incorporated with the Cape under Law No. 41 of 1895.

*History.*

On 14th September, 1486, Bartholomew de Diaz, a Portuguese commander, landed in Algoa Bay; Vasco de Gama doubled the Cape 11 years later, from which time it appears to have been resorted to by European navigators of all nations, but chiefly by Portuguese, Dutch, and English. British ships visited the Cape in 1591, and about 1602 the Dutch made it a place of call. In 1620 two English East India commanders, by a proclamation dated from Saldanha Bay, took possession of the Cape in the name of Great Britain; but no settlement was formed. In 1648 a Dutch East Indiaman, the *Haarlem*, was wrecked in Table Bay, the crew remaining there some time. In 1652 J. A. Van Riebeck, duly commissioned by the "Chamber of Seventeen" at Amsterdam, landed at Table Bay accompanied by 100 persons, and took possession of what is now the site of Cape Town on behalf of the Dutch East India Company. In 1671 the first formal purchase of land was made from the Hottentots, and another purchase took place the following year. At the time of the revocation of the Edict of Nantes, the European population received a slight addition of French Protestants, but their descendants have not maintained any distinctive position in the country. The rule of the Dutch East India Company proved very distasteful to the burghers, who were continually prompted to move further and further from the seaboard and original seat of colonisation. Following these migratory colonists, a magistracy was established at Swellendam in 1745, and another at Graaff Reinet in 1786, and in 1788 the Great Fish River was proclaimed the boundary of the Colony. In 1795, Holland having yielded to the French Revolutionary Government, an English force proceeded to the Cape of Good Hope to secure it against the French for the Prince of Orange, but the Governor refused to obey the mandate of the Prince, and the British force thereupon proceeded to take possession, upon which a capitulation was arranged, and the administration of the Government was assumed by General Craig. An Act of Parliament (37 Geo. III., c. II.) was passed to regulate the trade with the new possession. By the Peace of Amiens the Cape of Good Hope was restored to the Batavian Republic, and evacuated in 1803, but it was again captured by a British Force in 1806, and at the general Peace of 1814 it was ceded in perpetuity to the British Crown. During the interval between the Peace of Amiens and the recapture by the British in 1806, the Colony had made rapid progress, owing to the abolition of the rule of the Dutch East India Company, and the wise regulations of government which had been substituted. An important event in the history of the Cape was the expulsion in 1809 of the Kaffirs from the Zuurveldt, a district west of the Great Fish River. In 1817 that district was visited by the then Governor, who saw the importance of its colonisation as a barrier against the Kaffir power, and in 1820 Parliament voted a sum of 50,000*l.* to promote emigration to the Cape, and 4,000 British immigrants were brought to the Colony and settled in the eastern districts. In December, 1834, began the first of what are called the Kaffir wars, when the Gaika tribe, 20,000 strong, overran the whole south-eastern portion of the Colony, but were defeated, and their lands up to the Kei River proclaimed British territory, but Lord Glenelg, then Secretary of State, refused to ratify the annexation. In 1846 the second Kaffir war broke out, but was speedily suppressed, and

the colonial border was extended to the Kei River, as proposed by Sir Benjamin D'Urban. On Christmas Day, 1850, began the third Kaffir war, which lasted nearly three years, and in its earlier stages was aggravated by a simultaneous rebellion of the Kat River Hottentots.

In 1836 began what is called the trekking of a part of the Dutch or Boer population. This remarkable movement, which resulted in the colonisation of Natal, the Free State, and the Transvaal, may be ascribed to several causes, of which the chief were : (1.) General dislike of the policy of Great Britain in relation to slavery and the Native question. (2.) Particular resentment against the policy of Lord Glenelg in reversing the policy of Sir Benjamin D'Urban in relation to the first Kaffir war. (3.) Resentment against the mode in which compensation had been made to them for the loss of their slaves under the Imperial Act abolishing slavery, namely, by orders for payment payable in London, which they could only dispose of on the spot at an enormous discount.

The years 1849 and 1850 were years of continued excitement, owing to the proposals of the Government at home to send convicts to the Cape. In view of the agitation, carried almost to the point of active resistance, the project was abandoned. In 1856 the German Legion, which had been formed during the Crimean war, was brought to the Cape, and the men, numbering 2,300, disposed in selected spots on the frontier for defensive purposes. The same year (1856) was remarkable for the prevalence in Native Kaffraria of a cattle-killing delusion, preached by a young prophetess, which resulted in wide-spread starvation.

*Population.*

The preliminary figures for the European Census of 1931 were :—

Colony Proper . . . . .	730,851
East Griqualand . . . . .	7,643
Tembuland . . . . .	5,356
Transkei . . . . .	2,521
Pondoland . . . . .	2,064
<b>Total Province . . . . .</b>	<b>748,455</b>

The total population of the Province in 1921 was 2,782,719, of whom 2,132,110 were coloured (1,019,195 males, 1,112,915 females).

Of the non-European population in 1921, 7,696 were Asiatics, 1,640,162 were Bantus, and 484,252 were of mixed and other races; total, 2,132,110.

Chief towns with European population in 1931 (preliminary figures) :—

Cape Town (incl. Suburbs) . . . . .	149,236
Port Elizabeth . . . . .	43,835
East London . . . . .	27,809
Kimberley . . . . .	18,471
Uitenhage . . . . .	9,347
Grahamstown . . . . .	7,592
Paarl . . . . .	7,783
King William's Town . . . . .	6,542
Queenstown . . . . .	6,605
Oudtshoorn . . . . .	5,805

Of the European population in 1921, 79,333 were engaged in fishing and agriculture, 2,352 mining, 38,370 industrial, 14,366 transport and communication, 45,142 commercial, 11,674 administrative government, 14,816 other professions, 11,308 personal service, 7,991 independent, 412,141

dependent, and 13,116 other and unspecified. Of the non-European population the great majority are engaged in agricultural or domestic employments.

In 1921 there were 1,684,906 Christians—546,065 Dutch Churches, 358,827 Anglican Churches, 105,696 Presbyterians, 115,941 Congregationalists, 394,085 Methodists, 76,421 Lutherans, 47,293 Roman Catholics, 16,102 Baptists, and 24,476 other Christians. Mohammedans, 24,513, Hebrews, 21,244, heathen 1,002,450.

#### *Constitution and Government.*

The Colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Great Britain took possession of it in 1795, but evacuated it in 1803. A British force again took possession in 1806, and the Colony has remained a British Possession since that date. It was formally ceded to Great Britain by the Convention of London, 1814. The original Colony has been extended from time to time. East and West Pondoland were annexed in 1894 and Bechuanaland in 1895. For many years the form of government in the Colony depended on the terms of the Royal Letters Patent and Instructions to Governors. Letters Patent issued in 1850 to Governor Sir Henry Smith declared that in the Colony there should be a Parliament which should consist of the Governor, a Legislative Council, and a House of Assembly.

A Constitution Ordinance was enacted by Order in Council of March 11th, 1853, and took effect on May 1st ensuing. This Order in Council provided that nothing it contained should prevent the Parliament of the Colony from making Acts (subject to the power of Her Majesty in Council either to disallow or assent to such Acts) in amendment of the said Ordinance. This power of amending the Constitution was exercised from time to time as the bounds of the Colony were extended. In 1872 an Act was passed at the Cape and assented to by Order of the Council providing for the system of Executive Administration known as Responsible Government. The Constitution formed under these various Acts vested the Executive in the Governor and an Executive Council, composed of certain office holders appointed by the Crown. On the 31st May, 1910, the Colony was merged in the Union of South Africa, thereafter forming an original Province of the Union. Cape Town is the seat of the Provincial Administration.

A. The Province proper is divided into 97 Magisterial districts and the Transkeian Territories into 27 Magisterial districts. B. A Magistrate is stationed in each district, and in the Province proper there is a Divisional Council in each district except (a) Wellington, which for Divisional Council purposes forms portion of the Paarl Division; (b) Simonstown, which for Divisional Council purposes forms portion of the Cape Division; and (c) Glen Grey and Herschel which, being native areas, are separately administered. Each Divisional Council consists of at least six members (14 in the Cape Division) elected triennially by the owners or occupiers of immovable property. These Councils are charged with the duty of constructing and maintaining roads and bridges, controlling public outpans, trek-paths and public servitudes, and perform other local duties.

There are 128 Municipalities, each governed by a Mayor, or Chairman and Councillors, a certain number of whom are elected annually by the

ratepayers. There are also 86 Village Management Boards, 20 Local Areas, established under the Divisional Councils and Roads Ordinances, No. 13 of 1917, and 20 Local Boards, established under Ordinance No. 11 of 1921.

The educational system (for other than higher education) is maintained by the Provincial Administration under the general control of the Administrator of the Province. It is administered by the Department of Public Education under the direction of the Superintendent-General of Education, financial matters being regulated by the Provincial Secretary in his capacity of Controller of Educational Finance. Practically the whole cost of the maintenance of the schools under the Department's control is borne by the Administration.

The local administration of undenominational public schools is conducted by school boards and school committees, the unit of administration being the school district. There are 111 such districts. Every public school under a board is ordinarily managed by a committee elected by the parents, or, in default, nominated by the board. Members of School Boards are partly elected and partly nominated by the Administration and by Municipal and Divisional councils. School boards have the power, subject to departmental approval, to establish and maintain schools; further, subject to departmental approval, they have the general financial management of schools under their jurisdiction. They also have to power to enforce school attendance.

Denominational Schools are mainly mission schools for coloured or native children and are under the local management of representatives of the various religious denominations at whose instance they were established.

Education is free for all children, whether European coloured or native, in all primary standards and also in secondary standards up to the age of 15 years, except in a limited number of European schools known as *fee-paying schools*. For secondary education (available from Standard VII to Standard X in high schools and from Standard VII to Standard VIII in secondary schools) fees are payable according to approved scales for children over the age of fifteen. All fees received are paid into the Provincial revenue. The Superintendent-General of Education, however, may grant bursaries for the purpose of assisting any European or coloured pupil who has passed Standard VI or a higher standard to take advantage, by means of either conveyance or boarding, of the facilities offered for secondary education at a secondary or high school under the Department. Further school boards, with departmental consent, may to a limited extent grant remission of school fees in whole or in part in suitable cases. The secondary school curriculum is divided into two stages, each covering a period of two years. An examination is held at the conclusion of each two year course of study, Standard VIII pupils taking the Secondary School Junior Certificate Examination, and Standard X pupils the Secondary School Senior Certificate Examination. A pass in the latter examination, provided a certain selection of subjects is taken, constitutes a qualification for admission to any South African University.

School attendance is compulsory throughout the Province for children of European parentage or extraction who have completed their seventh but not their sixteenth year, unless the child has passed the sixth standard and is engaged in a regular occupation or has been otherwise exempted under certain statutory conditions.

A statement showing the classification and number of schools and the enrolment of pupils, at the end of 1930, is given below for general information:—

CLASS OF SCHOOL.	NUMBER OF SCHOOLS.				NUMBER OF PUPILS.

Provincial expenditure on Education (excluding Higher Education, which is under the control of the Central Government): 1928-29, 3,061,619*l.*; 1929-30 (unaudited), 3,394,017*l.*

In the state-aided hospitals in the province 197,327 out-patients, and 34,989 in-patients, were treated during the year 1928.

#### Fisheries.

This subject has been engaging the attention of the Cape Provincial Government since the inception of Union.

Under the Fisheries Ordinance which was passed in 1920, regulations were promulgated providing for the better protection of both sea and fresh-water fish. Fishing boats employed for purposes of profit are now licensed and registered, and a licence is also necessary before trout can be caught in any of the public waters of the Cape Province.

The licence fee to catch trout is £1 during the open season, which is, from the 1st September to the end of May, in each year throughout the Cape Province, including the Transkeian Territories. A recent amendment of the law provides for an alternative licence fee of 10*s.* per month.

Scientific investigations into the habits and spawning seasons of various kinds of fish are also carried on at the Aquarium at St. James under Dr. C. von Bonde, the Director of Fisheries Survey.

#### Provincial Administration.

Administrator, Hon. J. H. Conradie, 2,500*l.*

Provincial Secretary, Chief Local Government

Inspector, Accounting Officer and Controller of

Educational Finance, A. Weisbecker, 1,390*l.*

## PROVINCE OF NATAL.

### *Area and Population.*

Natal\* derives its name from its discovery by Vasco da Gama, the celebrated Portuguese navigator, on Christmas Day, 1497. It lies on the south-east coast of Africa, about 800 miles from Cape Town, and between the 26th and 32nd parallels of S. lat. It is bounded on the north by the Portuguese possessions and the Transvaal, on the west by the Orange Free State and Basutoland, and on the south by the Province of the Cape of Good Hope and Umtamvuna River. It is a well-watered country, no less than 35 distinct rivers running into the Indian Ocean in the 376 miles of coast. Unfortunately none of them are navigable. Pietermaritzburg is the seat of the Provincial Government, and has a population of 36,023. According to the preliminary figures of the 1931 census, the European population was: males 10,393, females 11,173, total 21,566. The largest town and only port is Durban, the European population of which according to the same census was stated to be: males 43,092, females 43,179, total, 86,271.

The Province (including Zululand, 10,472 square miles) has an area of 35,284 square miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to Europeans. The Province is divided into 41 Magisterial Districts.

The European population has more than trebled since 1879. The returns of the total population in 1921 were:—

Europeans . . . . .	136,838
Indians and Asiatics . . . . .	141,649
Natives . . . . .	1,150,911†
Totals . . . . .	1,429,398

† Including 11,107 mixed and other coloured.

The preliminary figures of the European population of Natal in 1931 show: males 90,205, females 87,219, total 177,424.

According to the census of 1921 the population of Durban Borough was 95,541 (Europeans, 47,358; others, 48,183), and of Pietermaritzburg, 35,160 (Europeans, 17,492; others, 17,668).

\* There was formerly another British settlement named Natal, a factory of the East India Company on the west coast of Sumatra, founded 1751, and not finally abandoned until the cession of Sumatra to the Dutch in 1824.

### *History.*

From the discovery of Natal by Vasco da Gama, in 1497, little is to be found respecting it until 1686, when a Dutch vessel was wrecked in the Bay of Natal. The Dutch formed a settlement in 1721, but soon abandoned it.

In 1824 Lieutenant Farewell, of the Royal Navy, having in the previous year visited Natal on an exploring voyage, endeavoured to colonise it. Tshaka, a chief of the greatest talent, who had fused into a nation under his own despotism away the various tribes inhabiting a vast tract of country, sanctioned the formation of a settlement by this small band of white men, which, however, was broken up about four years later.

Towards the close of 1837 a large body of Boers from the Cape Colony, taking offence at what they regarded as the weak and vacillating frontier policy of the British Government which gave them no adequate protection against native marauders, migrated to Natal. Many of them were treacherously murdered by Dingaan, then Zulu chief, the murderer of, and successor to, his brother Tshaka. For two years the Zulus and the Boers waged war with varied success; but in 1839 the Boers obtained a decisive victory, and placed Mpande, an ally of theirs, and brother of Dingaan, on the Zulu throne.

Owing chiefly to these disturbances, the Governor of the Cape decided to take military possession of the district, and sent there a force under Captain Smith (1842). These troops came into collision with the Boers, were defeated by them, forced to entrench themselves, and completely blockaded until the arrival of considerable reinforcements under Colonel Cloete. The Boers submitted, on the 5th July, to Colonel Cloete at Pietermaritzburg.

In consequence of the outbreak of war between the South African Republic (as the Transvaal was at that time called) and Orange Free State on one side and Her Majesty's Government on the other, Natal was invaded by the Boer forces in Oct., 1899. The first important engagement took place at Dundee, the Boers being repulsed by an advanced British force under Sir W. Penn Symons, who was mortally wounded. The British troops, under General Buller, then fell back upon Ladysmith, and rejoined the main army of defence under Sir G. White, who in the meantime had gained a decided victory over a Boer commando at Elands-laagte. Ladysmith was invested by a largely superior Boer army on the 28th October. Ladysmith was relieved by the British forces under Sir R. Buller at the end of February, 1900, and the Boers were cleared out of Natal in the course of the following few months, the British advancing into the Transvaal, where Lord Roberts was already operating with an invading army. It was not, however, until the signature of the terms of surrender by the Boer leaders on the 31st May, 1902, that peace was generally restored throughout South Africa, and that Natal was relieved from all further danger from the Boer forces remaining in the field up to that date.

An Act was passed in 1902, providing for the annexation to Natal of certain territories hitherto forming part of the Transvaal, and a Commission appointed to report as to the new boundaries. The new territory was annexed to Natal in January, 1903, and is divided into the five Magisterial divisions of Vryheid, Utrecht, Paulpietersburg, Ngotshe, and Babanango. The population at the census of April 17th, 1904, was 5,754 Europeans (mostly Dutch), 45 mixed and

others, 5 Indians and Asiatics, 4,104 Natives in service, and 86,911 Natives in native areas: total 96,819. This territory represents an area of 6,970 square miles.

#### *Zululand and Tonguland.*

The Zulus are a warlike tribe who, in the beginning of the century, under Tshaka, pressed southwards and became consolidated into a powerful and well-organised kingdom. Tshaka was murdered and was succeeded by Dingana in 1828, who came into conflict with the emigrant Dutch, by whom he was deposed in 1839, in favour of his brother Mpande. In the latter years of Mpande Zululand was distracted by the rival ambitions of his sons, and the Natal Government in 1861 sent Mr. (the late Sir) Theophilus Shepstone, Secretary for Native Affairs, on a mission to Zululand, to induce the Zulus to recognise some one of Mpande's sons as heir to his throne, and thus restore tranquillity to the country. The son chosen, with the consent of the nation, the king, and the Natal Government, was Cetshwayo, who from that time acted to a great extent as regent for his father until the latter died in 1873. Cetshwayo, at the instance of Mr. Shepstone, proclaimed certain new laws, which in effect came to this, that he was not to kill his subjects without adequate cause and without trial. The relations between Cetshwayo and Natal during the first years of his reign were not unfriendly, though they became occasionally strained through disregard by him of his coronation law. But after the annexation by England of the Transvaal, a material change in the relations of the two Powers took place. Cetshwayo had long hated the Boers, with whom he had a boundary dispute, dating from 1861, and after the annexation his enmity appeared to be transferred to the new Government. The Zulu war party wanted at once to occupy the whole territory in dispute, and a collision between the Zulus and the British Government of the Transvaal appeared imminent, but was averted by the suggestion of Sir Henry Bulwer, Lieutenant-Governor of Natal, to refer the dispute to the arbitration of three Commissioners to be selected by himself. This was accepted, both by Sir T. Shepstone, as Governor of the Transvaal, and by Cetshwayo, and approved by Her Majesty's Government; the final award being, however, by them reserved to Sir B. Frere as Her Majesty's High Commissioner in South Africa. The Natal Commission reported, in June, 1878, in favour of the claims of the Zulu king, and in September Sir B. Frere arrived in Natal and took up the consideration of the boundary dispute, and also of our general relations with the Zulus, which were becoming more and more strained. On the 11th of December his award in the arbitration was delivered to the representatives of the Zulu nation at the Lower Tugela Drift. At the same time Cetshwayo was required to introduce some modification of his administration, especially as regards military service, and to surrender certain refugees from Natal, and pay a fine for harbouring them, and for border outrages by his subjects.

The king not having complied, the further enforcement of the demands was confided to Lieut.-General Lord Chelmsford, whose forces advanced into Zululand in three columns between the 11th and 14th of January, 1879. On the 22nd of January two engagements were fought; one at Isandhlwana, the other at Inyezane; the

former with disastrous, the latter with doubtful, results to the British. On the same night part of the Zulu impi crossed the Buffalo and attacked the commissariat and hospital post of Rorke's Drift, held by one company of the 24th Regiment. The post was without defences; but the officer in command, Lieut. Chard, V.C., R.E., with great rapidity and skill converted the stores themselves into a defence, and throughout the whole night the little garrison, behind a flimsy rampart of rice bags and biscuit boxes, successfully maintained an heroic defence.

In the meantime, the northern column, under Colonel (the late Sir Evelyn) Wood, continued to engage and harass the enemy. Even in this part, British arms were not free from disaster at the Intombi River, and in a reconnaissance at the Hlobane Mountain; but immediately after the whole Zulu army, numbering 24,000 men, having attacked Wood's camp at Kambula Kop, suffered a severe defeat.

At the beginning of April, reinforcements having begun to arrive from England and the neighbouring colonies, Lord Chelmsford advanced across the Lower Tugela to the relief of Colonel Pearson, who was shut up in Eshowe; defeated the enemy at Ginginhlovu on the 2nd of April, and relieved the garrison.

The military power of the Zulu kingdom was finally broken to pieces at the battle of Ulundi on the 4th of July, and Cetshwayo fled to the bush with a few followers. Chief after chief submitted, and Cetshwayo himself was captured. The dynasty of Tshaka was deposed, and the country was divided into thirteen districts, each under an independent chief, holding office by the gift of the Queen of England, subject to certain conditions accepted by him; a British resident was appointed to reside in Zululand, and be the adviser of the chiefs and channel of communication between them and the British Government.

Difficulties were soon experienced in working this arrangement. Some of the chiefs quarrelled and fought with one another and with their subjects, many of whom refused to recognise their authority; while a large and influential party were anxious for the restoration of Cetshwayo. Sir H. Bulwer, who had assumed the government of Natal in the early part of 1882, was specially commissioned to inquire into the whole question of the Zulu settlement. After fully considering his report, Her Majesty's Government decided to replace the ex-king over the whole country north of the Umhlatuze River, with the exception of a small territory in the north-east, which Usibepu, one of the thirteen chiefs appointed by Sir Garnet Wolseley, was allowed to retain. The territory between the Umhlatuze and the Natal frontier was constituted a native reserve, under the supervision of a British commissioner, and it was arranged that locations should be provided in this reserve for any of the Zulus who might be unwilling to again submit to the restored king. Cetshwayo, who had at his own request been allowed to visit England, where the decision of the Government was communicated to him, and by him formally accepted, was reinstalled by Sir Theophilus Shepstone on the 29th January, 1883, in the presence of 5,000 Zulus.

His enemies, headed by Usibepu, proved more formidable than he or others had anticipated, and after a struggle of some months he was overthrown and his kraal destroyed. He took refuge in the Reserve, where he lived practically under the care

of the Resident, until the 8th of February, 1884, when he died. Soon after his death his followers, the Usutus (the name by which the personal adherents of Cetshwayo—as distinct from the Zulus in general—were known), finding themselves no match for Usibepu, called in some Boer adventurers, with whose assistance they inflicted a crushing defeat on Usibepu, who took refuge in the Reserve. And as a reward for this service the Boers received a grant of land, in which they established the “New Republic.”

Finding that the Zulu people were unable to form any orderly administration of the remaining territory, Her Majesty's Government decided, with the general assent of the Zulus, to declare their country to be British territory, which was done in May, 1887. Some disturbances occurred soon after in connection with an attempt to set up Dinuzulu, a son of Cetshwayo, as King; but it was soon checked, with the assistance of the Imperial troops, and Dinuzulu with his uncles Ndabuko and Tshingana were arrested, tried and convicted of high treason, and removed to St. Helena, while other offenders were tried on other charges, and imprisoned or fined. Dinuzulu and his two uncles were permitted to return from exile at the beginning of 1898.

In 1890 Tongaland and the districts of Fokoti, Umjindi, and Manaba, were proclaimed part of Zululand.

In 1895 the territories of the Chiefs Mbikiza and Sambana, in extent 668 square miles, lying between Zululand and Swaziland, the Portuguese territories, and Tongaland, were annexed to Zululand.

By Government Notice, dated 11th June, 1895, a British Protectorate was declared over the territory of Tongaland, also called Maputaland, which is about 1,200 square miles in area, and is bounded on the north by Portuguese possessions, on the west and south by Zululand, and on the east by the Indian Ocean. Under the Anglo-Portuguese Convention, signed at Lisbon on 11th June, 1891, the spheres of influence of Great Britain and Portugal over the country occupied by the Tongas was defined by a line following the parallel of the confluence of the River Pongolo with the River Maputa to the sea coast. The boundary then agreed upon was surveyed in 1896, and laid off by a joint commission appointed by the British and Portuguese Governments.

In November, 1897, a Bill was introduced into the Natal Parliament to provide for the annexation of Zululand to Natal, and became law. A Proclamation was issued by the Governor on the 30th December, giving effect to the annexation from that date. The British Tongaland Protectorate had been previously annexed to the Queen's dominions, and were incorporated with Zululand on the 27th December, 1897.

In 1906 a serious native rebellion broke out in the colony and spread to Zululand. It was suppressed by the Colonial forces, with assistance from detachments of volunteers from the Transvaal and the Cape Colony. A Commission was appointed to enquire into the native question generally, and the Commission's Report has since been published.

In 1907 there was a further recrudescence of unrest amongst the natives in Zululand, which was, however, easily suppressed without actual bloodshed. Dinuzulu, son of Cetshwayo, together with other chiefs and ringleaders, was arrested, and tried on charges of high treason, rebellion, sedition, murder, etc., and found guilty, though

complicity in the murders of several noted loyalist Chiefs was not proved as against Dinuzulu. Dinuzulu was sentenced to four years' imprisonment, whilst other Chiefs were sentenced for longer periods and transported to St. Helena.

#### *Constitution.*

Natal, which had been annexed to Cape Colony in 1844, was placed under separate government in 1845, and under charter of July 15, 1856, was erected into a separate Colony. By this charter partially representative institutions were established, and, under a Natal Act of 1893, assented to by Order in Council June 26, 1893, the Colony obtained responsible government. The province of Zululand was annexed to Natal on December 30th, 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were in January, 1903, annexed to the colony. On May 31, 1910, the Colony was merged in the Union of South Africa, becoming an original province of the Union.

#### *Instruction.*

With the exception of higher and vocational education, which has been placed under the control of the Union Government, education comes under the Provincial Administration.

There are in the Province, 1 Training College for Teachers, 22 secondary and intermediate schools, 2 preparatory schools and 134 primary schools for Europeans; 80 schools for Natives; 13 for Indians, and 10 for Coloured children, all under direct Government administration, and the following numbers of schools which receive Government aid and inspection: 38 for Europeans (of which 6 are secondary schools), 263 farmhouse schools; 616 for Natives, 64 for Indians, and 12 for Coloured children; and about 30 purely private schools for Europeans, which number includes about half a dozen large and successful secondary schools.

The average number of Europeans enrolled in Government and Government-aided schools in 1930 was 26,332 (the average daily attendance being 94 per cent of that figure), and 897 in farmhouse schools. With the large number attending private schools, it is estimated that there are few European children who are receiving no education. Primary education is now free in Government European and Coloured schools, and is compulsory for Europeans between the ages of 7 and 15 (or Standard VI if below 15), who live within three miles of a school. For indigents who live beyond that radius boarding or transport assistance is available.

The average enrolment in non-European schools for 1930 was: Native 48,397, Indian 14,701, Coloured 2,298.

The Government expenditure on education for 1930 was 755,708*l*.

#### *Fishing.*

All fishing in Natal is administered under the Natal Fisheries Ordinance No. 11, 1916, and regulations published thereunder. A Principal Fisheries Officer is in charge of the Department.

The Natal Fisheries Advisory Board, consisting of fourteen members, meets once a month.

The principal classes of edible Natal fish are red and silver breams, bass, rockcod, barracoudas, seventy-fours, and steenbras.

Whaling operations on the Natal coast generally commence in May and end in October of each year. The species of cetacea captured are sperm.

humpback, finner, blue, sei, and occasionally Right whale. Porpoise and dolphin abound all the year round on the coast. A whaling licence, subject to the approval of the Administrator, costs 50*l.* per annum, which fee includes a free Factory Licence. In addition a licence fee of 50*l.* is charged for each vessel and 5*l.* for each harpoon gun. Experimental nettings in enclosed waters are periodically thrown open to public tender during the season when shoal mullet and other fish visit the Natal coast. Shellfish—mussels and oysters—are marketed under licence during the season, which extends from March to October in each year. The local fisheries also provide a limited supply of crustaceans—crabs, crayfish, prawns and shrimps, but the demand largely exceeds the take.

Rod and line salt-water angling on the Natal coast is extremely popular and well organised. Several Angling Clubs are in existence and are controlled by the Natal Coast Anglers' Union.

The cost of a Government Trout Fishing Licence is 1*l.* Licences are issued by the Provincial Secretary, Pietermaritzburg, Principal Fisheries' Officer, Durban, and the Revenue Officer of the division within which the licence is sought.

Active measures are taken to foster and extend the scope of trout fishing, both brown and rainbow, and at the present time there are over twenty rivers with numerous tributaries well stocked and furnishing excellent results. The trout fishing season embraces the period 1st August to 31st May of the following year.

#### Provincial Administration.

*Administrator*, H. Gordon Watson, I.S.O., 2,000*l.*

*Provincial Secretary*, A. E. Charter, 1,210*l.*

*Chief Clerk*, G. F. Lord, 850*l.*

*Provincial Accountant*, F. J. Edmonstone, 786*l.*

*Engineer-Superintendent of Roads*, W. J. Cairns, 848*l.*

*Principal Fisheries Officer*, W. H. Bell-Marley, 500*l.*

*Provincial Auditor*, W. Powell-Morgan, 800*l.*

#### Education Department.

*Superintendent*, F. D. Hugo, B.A., 1,150*l.*-30*l.*-1,300*l.*

*Chief Inspector of Schools*, J. H. Lawlor, B.A., 800*l.*-30*l.*-850*l.*

*Secretary, Education Department*, E. D. Davies, 750*l.*

#### Hospitals.

*Medical Superintendent*, A. G. Stewart, 1,375*l.*

#### Natal Provincial Council.

Election of New Provincial Council took place in 1929.

## PROVINCE OF THE ORANGE FREE STATE.

#### Situation, Area, and Population.

The Province of the Orange Free State lies to the north of the Orange River and the Province of the Cape of Good Hope, and to the south of the Vaal River. On the east it is bounded by Basutoland and the Province of Natal. The country, which lies at an altitude of 4,000 to 5,000 feet above the sea, consists chiefly of grassy plains; but to the east, on the Basutoland border, it is hilly. The rainfall is moderate, and the country is mainly devoted to stock-farming, though grain is raised in parts.

The area of the province is 49,647 square miles; it is divided into 33 districts. The population at the complete census of 1921 was as follows:—

Year.	European.			Non-European.			Total.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	In all.
1921	97,776	90,780	188,556	223,597	216,674	440,271	321,373	307,454	628,827

In 1931 the European population of the Province, according to the preliminary figures of the census of Europeans in that year, was: Males 104,736, females 100,689, total 205,424.

The capital, Bloemfontein, had in 1921, 17,711 European inhabitants (9,041 males and 8,670 females), and 18,780 Non-European (9,729 males and 9,051 females); total 36,491.

According to the figures of the census of Europeans taken in 1931, the European population of Bloemfontein was: males 14,135, females 14,361, total 28,496.

*Religion.*—The principal body, according to the census of 1921, is the Dutch Reformed Church with 207,536 adherents; of Methodists there were 137,778; Anglican Communion 50,807; Presbyterians 13,562; Congregationalists 8,638; Lutherans 7,931; Roman Catholics 9,879; Jews 4,761; Heathen, 174,697.

According to the Census of 1926 the religions of the European population are: Dutch Churches, 163,504; Anglican, 13,235; Presbyterian, 3,945; Methodist, 7,478; Roman Catholic, 2,516; Other Christian, 5,796; Hebrew, 5,753; Other, 759.

### *History.*

The Orange River was first crossed by a European in 1760, but no attempt was made to settle the country for many years after. Emigrants from the great trek established themselves at Winburg and elsewhere, but the Colonial Government for some time made no attempt to establish any administration. In 1848, however, owing to the disputes between the settlers and the natives, Sir Harry Smith issued a Proclamation declaring the whole territory between the Orange River and Vaal River to be under the sovereignty of the Queen, and a British Resident was appointed at Bloemfontein, with Assistant-Commissioners at Winburg and the Caledon River. The discontented farmers under Pretorius took up arms, but were defeated by Sir Harry Smith at Boomplaats. The British Government, however, before long determined to abandon the territory because of the increasing difficulties with the Basutos; and in 1854 Sir George Clerk, the Special Commissioner for "the settling and adjustment of the affairs of the Orange River Sovereignty," signed the Convention of Bloemfontein, by which, much against the will of many of the inhabitants, British sovereignty was withdrawn, and the independence of the country was recognised.

The history of the Orange Free State was in the main peaceable, but a good deal of fighting followed with the Basutos, and in 1866 Moshesh was compelled to cede much of his best cornland. The Basutos appealed to the High Commissioner and were taken under British protection, but by the Treaty of Aliwal North in 1869 the incorporation of the conquered territory into the Orange Free State was recognised.

About the same time the discovery of diamonds at Kimberley and the inrush of diggers led to a dispute between Her Majesty's Government and that of the Orange Free State as to the boundary, which was ultimately settled in 1876 by a Convention signed in London by President Brand providing for a payment by Great Britain of a sum of 90,000*l.* in consideration of the abandonment of the Free State claim.

The Government of the Orange Free State consisted of a President, elected every five years, assisted by an Executive Council and a Volksraad, containing 60 members, half of whom retired every two years. The Orange Free State had since 1889 been a member of the Customs Union, to which the Cape and latterly Natal also belonged. In the same year the railway to the Vaal was completed by the Cape Government, which continued to work the line until after the Jameson raid, when the Free State took it over.

In 1889, not long after the death of President Brand, whose wisdom and moderation had won

general recognition, the Orange Free State entered into an alliance with the South African Republic. This alliance was renewed in 1897, and was appealed to as binding the Free State to assist the South African Republic in her quarrel with Great Britain in 1899. This course was determined on by a resolution of the Volksraad taken on the 27th of September, 1899, and resulted in the annexation of the country to the British dominions by a Proclamation of Lord Roberts issued on the 28th of May, 1900, the new Colony being called the Orange River Colony, and Lord Roberts being appointed Administrator. Sir Alfred Milner succeeded to the Administration on the departure of Lord Roberts from South Africa at the end of the year 1900, and was afterwards selected for appointment as Governor both of the Transvaal and of the Orange River Colony. Major (afterwards Sir) H. J. Goud-Adams was selected for the post of Lieutenant-Governor. Early in 1905 Lord Milner resigned, and in May of that year his successor, Lord Selborne, arrived in South Africa. On the establishment of responsible government, July, 1907, Sir Hamilton Goud-Adams became Governor of the Colony.

On the restoration of peace in 1902 Crown Colony government was established, and continued till 30th June, 1907, when responsible government was granted. The election of the first Legislative Assembly took place in November, 1907.

The Legislature consisted of two Chambers—a Legislative Council and a Legislative Assembly, consisting of 11 and 39 members respectively.

On the 31st May, 1910, the Orange River Colony became, under the name of the Orange Free State, a Province of the Union of South Africa, and is now governed in terms of the South Africa Act which constituted the Union of South Africa. Apart from the general control of the Union Parliament the Act provided that the control of certain specified matters should be vested in an Administrator and Provincial Council.

### *Education.*

Higher and technical education are under the control of the Minister of Education for the Union, while primary (including elementary) and secondary education are controlled by the Administrator of the Province. Under the Educational Ordinance No. 15, of 1930, the Province is divided into 61 School Districts. Each Government School is under the supervision of a School Committee elected by the parents. For each District there is also a School Board, elected by the School Committees which exercises general supervision over all schools within its district. The School Committees have the right of nominating teachers, subject to the approval of the Department. Grants are given conditionally to private schools. At present there are 811 Government and Government-aided European schools in the Province with a total enrolment of 45,099 in 1930. Education is free but fees may be charged under certain circumstances, and attendance is compulsory up to Standard VI. Except where the parent objects, both official languages are taught to all children.

Bloemfontein is the chief educational centre, and contains the following institutions:—

(a) *Primary and Secondary Education.*—Grey College School, a boys' high school; the Eunice High School for Girls; the Orange Meisies (Girls') School (secondary); the Brebner High School

(mixed, secondary); the Central High School (mixed, secondary); the Model School (mixed, primary); the President Brand School (mixed, primary); the Dr. Viljoen School (mixed, primary); the Tempe School (mixed, primary). These are Government schools, Gray College School, the Eunice High School and the Oranje School having large boarding departments. St. Michael's Home and St. Andrew's Schools are Government-aided schools, whilst the Convent School and the Marist Brothers' School are purely private. All these have large boarding establishments.

(b) *Training of Teachers.*—The Normal School, established soon after the Anglo-Boer war, has been replaced by the Normal College, where about 200 students complete the Training Course prescribed by the Education Ordinance of 1930, a limited number receiving a more advanced training. The first years of the Course are taken at secondary schools throughout the country and at the Grey University College, Bloemfontein, the total number of students being about 500.

Secondary schools have been established in all the leading towns of the Province with more advanced departments, preparing pupils up to University Matriculation Standard.

The gross expenditure on education of white and coloured scholars for the year 1929-30 was 896,587*l.*, with an additional 35,998*l.* for Native education. This sum does not include the cost of construction of educational buildings.

## TRANSVAAL PROVINCE.

### Situation Area and Population.

The Transvaal lies to the north of the Orange Free State Province and to the south of Rhodesia, being bounded on the west by the Province of the Cape of Good Hope, and by the Bechuanaland Protectorate, and to the east chiefly by the Portuguese possessions, but touching Natal Province at the south-east corner. Its limits stretch from 28°40' to 22° S. degrees of latitude and between 24°40' and 32°10' E. in longitude. The greater part lies high, seldom less than 4,000 feet above the sea.

The area of the Province is 110,450 square miles, divided into 37 districts. In 1921 the population was as follows:—Europeans 543,485 (284,388 males, 259,097 females); non-European 1,544,151 (875,042 males, 669,109 females); total, 2,087,636 (1,159,430 males, 928,206 females).

According to the preliminary figures of the Census of 1931, the European population of the Province was: males 357,470, females 338,493, total 695,963.

The largest town is Johannesburg, the mining centre of Witwatersrand goldfields, with a population (1921) of 288,131.

The figures of the 1931 Census showed the European population of Pretoria and Johannesburg to be:—

	Males.	Females.	Total.
Pretoria . . . . .	31,406	30,690	62,096
Johannesburg . . . . .	101,344	101,929	203,273

Churches, &c.	European. 1926.	Non-European. 1921.
Dutch Churches . . . . .	322,088	49,578
Anglican . . . . .	103,462	94,543
Presbyterian . . . . .	32,938	12,407
Methodists . . . . .	38,603	143,441
Roman Catholics . . . . .	28,142	14,490
Lutherans . . . . .	6,165	136,335
Other Christians . . . . .	32,557	64,437
Jews . . . . .	38,802	4
Other Non-Christians . . . .	1,500	450,798
Others . . . . .	4,365	14,048

### History.

The first European settlers in the Transvaal Territory were emigrant Cape farmers. The original destination of these emigrants was Natal, but upon the annexation of Natal to the English Crown most of them left the new district, and turning back over the Drakensberg went, some to the Orange River Territory, and others to the country beyond the Vaal. In 1848 British sovereignty was extended over the Orange River Territory, but no attempt was made by the British Government to exercise authority over its unwilling subjects beyond the Vaal, and in January, 1852, a treaty was made with them, containing a promise that they would not be interfered with in the management of their own affairs. This treaty is known as the Sand River Convention. The emigrants at the time formed three independent communities, which did not unite until 1858, when they adopted for themselves the name of the South African Republic. After fifteen years of somewhat

chequered history, the people of the Transvaal elected as President the Rev. Thomas Burgers, a clergyman of the Dutch Reformed Church, from the Cape Colony, and high hopes were entertained by many for the future of the Republic under his guidance. These hopes were not fulfilled. Misfortunes followed one another in rapid succession, and only ended with the collapse of the Government, and the extinction of the Republic.

The President early conceived the project of a railway to be made from Delagoa Bay into the Republic, to carry its produce profitably to the sea; and to promote this project he visited Europe in 1875, concluded a treaty with Portugal, and essayed to launch a loan of 300,000*l.* in Amsterdam, of which, however, only about 74,000*l.* was subscribed. This money he spent in buying plant for the proposed railway. In the meantime the Provisional government of the Republic had drifted into a dispute with the Zulu King, Cetshwayo, touching the boundary of Utrecht Province; and on his return the President himself engaged, first in a dispute with, and then in actual military operations against, Sikukuni, a Bechuana chief, living on the north-east of the Republic, whose country was claimed under an ambiguous and not very intelligible treaty in the Dutch language, to which some Boers had obtained the assent of Sikukuni's father in the year 1857. The operations against Sikukuni, which were upon a large scale, looking to the resources of the Republic, and were directed in person by the President, ended in failure. The Republican field army melted away; a guerilla war, however, was continued by a small mercenary force, until a peace was concluded early in 1877. In the meantime the defeat of the Boers by an insignificant tribe of an unwarlike branch of the native race, and their inability to repair the disaster, were producing alarming excitement in the native mind, and the peace of South Africa being deemed to be in evident danger, Her Majesty's Government despatched Sir Theophilus Shepstone, who happened to be in London at the time, to South Africa, as a Special Commissioner from Her Majesty, to watch events, and take such action as might be necessary to secure the general peace. When Sir Theophilus Shepstone arrived in the Transvaal, he considered on a review of all the circumstances that no other course was open to him than to proclaim the Queen's sovereignty. This he did on the 12th of April by a proclamation which was approved by Her Majesty's Government.

The annexation of the Transvaal was effected without the aid of physical force. Sir T. Shepstone at the time had with him but a few mounted policemen; and Her Majesty's troops did not arrive in the province for some time after the English Government had been set up, with the apparent acquiescence of its people. But subsequently hostile feelings towards the annexation were widely manifested, and two deputations were sent to England after annexation, to represent those who were opposed to that measure and desired a withdrawal of the British Government. In each case the answer of Her late Majesty's Government was a decided refusal.

In December, 1880, a majority of the Boers took up arms against the Government, and hoisted the flag of the South African Republic at Heidelberg. The towns held by Imperial troops were immediately invested, and a detachment of the 94th Regiment, which was being withdrawn from Lydenburg to Pretoria, to strengthen the force at headquarters, was surprised, and after suffering very heavy loss, compelled to surrender.

The towns, however, held out, and Sir G. Pomeroy Colley, without waiting for reinforcements, collected the small force at his disposal and advanced from Pietermaritzburg in Natal to relieve them. A large force of Boers successfully opposed his entry into the Transvaal at Laing's Nek, the path across the Drakensberg mountains and they followed up this advantage by cutting off Sir G. Colley's communications with Newcastle, with a view to preventing the arrival of reinforcements. To re-open his communications he crossed the Ingogo River on the morning of the 8th of February, and was immediately attacked by the Boers. The action continued all day; at nightfall the Boers drew off, and the English forces returned to their camp.

In the meantime strenuous efforts were being made by President Brand, of the Orange Free State, to bring about an understanding, and in reply to the appeal which he made to Her Majesty's Government, they declared that if the Boers would desist from armed opposition to the English troops, a scheme would be framed for the permanent friendly settlement of all difficulties. This message was forwarded to the Boers on the 21st of February in a letter addressed to Mr. Paul Kruger, one of their leaders, by General Colley, and an answer was required within forty-eight hours. Mr. Kruger was away at Rustenburg, and the letter was sent unopened to the headquarters of the Boers at Heidelberg. Dr. Bok, who was acting as State Secretary, sent it on to Mr. Kruger, and replied to General Colley that no definite answer could be given to the message from Her Majesty's Government until Mr. Kruger's views were known. Dr. Bok's message did not reach the camp at Laing's Nek till the 1st of March. On the night of the 26th of February, General Colley, having received no reply to his message, moved out with three hundred and fifty men, and took possession of the summit of the Majuba Mountain, a spur of the Drakensberg, commanding the Boer camp at Laing's Nek. The Boers attacked the mountain next day, and carried it by storm, with little loss, while only about one-fifth of the defenders escaped, the rest being killed, wounded, or taken prisoners. Sir G. Pomeroy Colley himself was killed.

The command now devolved on Sir E. Wood, who was at Pietermaritzburg organising the advance of the reinforcements, and, at the instance of President Brand, an interview took place on the 6th of March between him and General Joubert, who was in command of the Boers at Laing's Nek, which resulted in the conclusion of an armistice, and on the 21st of March a preliminary agreement for peace was signed. The terms of the agreement were that Her Majesty's Government should allow the Transvaal self-government as regards its own interior affairs; that the control and management of the foreign relations of the State should be reserved to Her Majesty as suzerain; and that the Government of the Transvaal should recognise a British Resident. The functions of this officer, and the provisions for the protection of the interests of the native population, were to be determined by Her Majesty's Government on the recommendation of a Royal Commission.

As a result of the Commission's recommendations a Convention was framed embodying the terms of the peace agreement, assigning the boundaries of the State, defining the functions of the Resident as analogous to those of a consul-general and chargé d'affaires, and conferring upon him extensive powers for the protection of the interests of the natives in the Transvaal. He also

formed the medium of communication between the Government of the Transvaal and the native States on its borders. Stipulations were made for the repayment of the sums advanced by Her Majesty's Government in aid of the revenue of the Transvaal during the occupation; and a sub-commission, composed of the two judges of the High Court and Mr. Hudson, the British Resident, was appointed to consider claims for compensation for losses sustained during the hostilities.

The Convention was signed on the 3rd of August, and on the 8th of that month the Government was handed over to the representatives of the Boers. The Convention was finally ratified by a duly-elected Volksraad on the 25th of October.

By a further Convention of 1884, signed at London, fresh articles were substituted for the articles of the Pretoria Convention, a point which, as the reservation of suzerainty and grant of self-government to the Transvaal State both occur in the "preamble," or introduction of the Pretoria Convention, became of importance in the subsequent controversy regarding the status of the South African Republic, as the Transvaal State was now called.

The new Convention provided for the extension of the boundary of the Republic on the south-west, and abolished the British Resident and all direct control over native affairs, the Republic being bound, however, by Articles VIII. and XIX., to abstain from slavery and fulfil certain pledges made to the natives in 1881.

The concession of a larger degree of independence did not, however, prevent further trouble in Bechuanaland, while in Zululand adventurers from the Transvaal succeeded, by interfering in native disputes, in acquiring a large part of the country, where they formed a new State called the New Republic, the incorporation of which in the South African Republic was ultimately allowed by Her Majesty's Government in 1888. A trek to the north into Rhodesia in 1890 was only prevented with difficulty; while the efforts of the Government of the Republic to extend its influence in Swaziland resulted in 1894 in the recognition by Her Majesty's Government of its protectorate over that country.

The Transvaal, which had been bankrupt in 1877, when it was annexed, remained for some years after the retrocession in great financial difficulties. From these, however, it was not only saved, but raised to an unprecedented height of prosperity by the development by immigrants, chiefly British subjects, of the gold industry on the Witwatersrand, which began to grow soon after the signature of the London Convention. The progress achieved is clearly reflected in the fact that the revenue of the Republic, which, in 1885, amounted to 177,877*l.*, had risen in 1890 to 1,229,061*l.*, reaching 3,329,958*l.* in 1898. The Republic, fearing that the newly-acquired independence would be jeopardised by the influx of the newcomers, adopted a repressive policy towards them. From 1890 to 1894 legislation was passed restricting the grant of the franchise, which at the time of the Pretoria Convention had been open to all settlers after a year's residence, and since 1882, after five years' residence, until it became practically unattainable to the ordinary immigrants. At the same time the abuses of the Administration, among which the Uitlander population especially reckoned the grant of concessions and monopolies, and against one of which, the dynamite monopoly, Her Majesty's Government entered in 1899 a

special protest, created much discontent among the new population.

In 1894 the discontent assumed a threatening aspect, owing to the commandeering of British subjects to fight in a native war, but this question was arranged by the High Commissioner, Lord Loch, who visited Pretoria at that time; other questions, however, remained unsettled. In 1895 the action of the Government of the South African Republic in closing the drifts by which trade entered the Transvaal from the Cape, brought the Republic to the verge of war with Great Britain. Towards the end of 1895, a revolutionary movement was set on foot in Johannesburg. On the 29th of December, however, Dr. Jameson crossed the border of the Transvaal on his disastrous raid, and was defeated, and surrendered at Krugersdorp on the 2nd January, 1896. The High Commissioner, Sir Hercules Robinson, hurried to Pretoria, and by his inter-mediation Johannesburg laid down its arms.

President Kruger, at the time of the raid, had issued Proclamations promising to consider the redress of grievances, and laying down the principle, "Forget and Forgive." Little result, however, beyond the erection of an unsatisfactory municipality, followed his promises of reform; while the action of the Government of the Republic in disregarding the London Convention gave rise to questions with Her Majesty's Government. In addition to infringing Art. IV., the Republic passed in 1896 an Aliens' Immigration Restriction Law, which Her Majesty's Government contended was in violation of Art. XIV., and the law was repealed next year.

In 1897 the Government, in consequence of the complaints of the mining industry, appointed a commission of inquiry, whose report showed clearly the existence of very serious maladministration. Little or no reform, however, resulted.

The dissatisfaction which the Uitlanders manifested with the treatment which they received was brought to a high pitch by the shooting of an Englishman by a policeman at Johannesburg on the 18th of December, 1898, and the action of the authorities in the matter, followed by the acquittal of the accused, aroused great excitement on the Rand—and, indeed, throughout the English-speaking part of South Africa. A petition, signed by 21,000 British subjects, calling attention to the grievances of the Uitlanders, and asking for the protection of Her Majesty's Government, was addressed to the Queen in March, 1899. The Government of the South African Republic at this time appeared to recognise the need for reform by proposing some slight alterations in the franchise law, but their negotiations, conducted with some of the leaders of the mining industry, broke down because the latter insisted that the Uitlander population generally must be consulted, and the Government repudiated responsibility for their negotiators. Her Majesty's Government, in a despatch dated 10th May, represented the grievances of the Uitlanders to the Government of the South African Republic, and urged that they should be redressed, proposing a conference between the High Commissioner and the President. Before, however, the despatch was presented, Sir A. Milner, on the invitation of the President of the Orange Free State, met President Kruger at Bloemfontein on the 31st of May, and proposed the grant of the franchise to the Uitlanders to relieve the situation. The proposals of the President were quite inadequate for the purpose of giving any substantial and immediate representation, and the Conference broke up.

After successive proposals, and after Her Majesty's Government had asked that, if these proposals were to form any element in the settlement of differences between the two Governments, full particulars might be furnished, a franchise law, giving a seven years' retrospective franchise, was passed by the Volksraad without reference to Her Majesty's Government, and came into operation on 26th July. This law was an improvement on any previous proposal, but there was good ground for doubting whether it did not contain many provisions which would render it illusory in actual practice, and Her Majesty's Government, therefore, proposed a joint inquiry as to whether it would give "immediate and substantial representation." However, the Government of the Republic were extremely unwilling to accept the joint inquiry, and an alternative proposal for a five years' franchise was made by the State Attorney, Mr. Smuts, to Her Majesty's Agent, on three assumptions. These assumptions were (1) that Her Majesty's Government would not in future interfere in the internal affairs of the Republic; (2) that Her Majesty's Government would not insist further upon the assertion of suzerainty, the controversy being allowed tacitly to drop (this point had acquired special importance since the South African Republic, on the 9th May, had claimed the status of a sovereign international state); (3) that arbitration without a foreign element should be conceded.

The proposal was put forward in writing by the Republic and the three "assumptions" were put forward as express conditions. To these notes Her Majesty's Government replied, that they could not bind themselves never to intervene again, but they expressed the hope that further intervention would be unnecessary if the franchise was granted. As to suzerainty they referred to their despatch in which they had intimated their refusal to continue the discussion; and as to arbitration, they agreed to discuss the form of a tribunal. The South African Republic thereupon withdrew their five years' offer, and officially declared their objections to the joint inquiry, which they represented was an interference with the independence of the country. Her Majesty's Government then (8th September) being convinced by accumulating evidence of the unworkable character of the law which had been passed, while maintaining their position as regards interference and suzerainty, declared that they would be satisfied with a franchise on the five years' basis if shown by an inquiry, either unilateral or joint, not to be encumbered with impossible conditions. If this was accepted they were ready to have a conference about arbitration, etc., but, failing acceptance, they would have to formulate their own proposals for a final settlement. To this the Government of the Republic replied by maintaining their withdrawal of the five years' franchise unless accepted with the conditions above stated, and called on Her Majesty's Government to revert to the proposal for a Joint Commission on the seven years' franchise. On the 22nd of September Her Majesty's Government repeated their views, and stated that their own proposals for a settlement would be formulated later.

After some correspondence between the President of the Orange Free State and the High Commissioner, in which the High Commissioner, as late as the 5th of October, said that any definite proposal would still be considered, the South African Republic, without waiting for Her Majesty's Government to formulate their proposals, handed to the

British Agent an ultimatum, dated 9th October, requiring the instant withdrawal of British troops on the borders of the Republic, and the removal of all reinforcements which had arrived in South Africa since the 1st of June, and demanding an answer by five o'clock on the 11th of October. It was deemed impossible by Her Majesty's Government to discuss such a demand, and war broke out accordingly. The Orange Free State, in pursuance of a resolution passed on the 27th of September, threw in its lot with the Transvaal.

On the outbreak of war, the Boers immediately invaded British territory to the south-east and west of the Republics. The operations on the western side were chiefly concerned with the investment of Mafeking and Kimberley. Meantime the main body of the Boers invaded Natal under General Joubert. The first considerable engagement of the war occurred at Dundee on the 20th of October, where General Symons attacked and repulsed a Boer commando. On the 21st of October the British army at Ladysmith attacked a Boer commando at Elandslaagte, and inflicted a severe defeat. On the 30th Sir G. White made a reconnaissance from Ladysmith, and during the engagement which then took place two battalions and a mountain battery were cut off and captured by the Boers. Ladysmith was then surrounded by the Boers and communication cut. On the 3rd of November Colenso was evacuated, and the garrison there fell back on Estcourt.

Meanwhile troops were on the way from England. The Governments of Canada and of all the Australian Colonies offered the services of contingents, and the offer was gratefully accepted; the despatch of troops from the different colonies was rapidly organised, and they left amidst enthusiastic demonstrations of loyalty. Offers of troops were also made by several of the Crown Colonies, and by the Federated Malay States, and contingents of mounted Volunteers were accepted from India and Ceylon.

As the troops from England arrived, a move forward was made in two directions. A Natal relief column prepared for an advance to the relief of Ladysmith. Sir Redvers Buller, who was in chief command of the British forces, left Capetown for Natal to direct the general plan of advance, and by the end of November the British forces had arrived near Colenso. On December 15th, Sir R. Buller made an attack on the enemy and attempted to cross the Tugela at Colenso, but he had to retire to his camp at Chieveley after suffering severely in casualties and abandoning a large number of guns. On the western side a force under Lord Methuen pushed up along the railway to the relief of Kimberley. On the 23rd of November he attacked the Boers at Belmont and dispersed them. Two days later he pushed aside a further force at Enslin, and on the 28th November he forced a large body of the enemy to evacuate a strong position at the Modder River. On December 11th he attacked the enemy at Magersfontein, but was unsuccessful in carrying the position, and fell back on the Modder River.

The northern borders of Cape Colony, where there were a few British garrisons, were invaded by parties of Orange Free State Boers, with the apparent object of gaining recruits from the Dutch residents in the Colony, in which they were partially successful. General Gatacre, on his arrival, took command of the British troops in these districts. His first important action took place on the 10th of December, when he was unsuccessful in a night attack on Stormberg.

On the receipt of news of the capture of the battalions at Ladysmith orders were at once given for the despatch of further reinforcements from England. The repulses experienced early in December made it necessary to take further measures. On the 7th of the month it was announced that Field-Marshal Lord Roberts would go out to take supreme command at the Cape, leaving Sir R. Buller to confine his attention to the operations in Natal; Lord Kitchener was appointed Chief of the Staff to Lord Roberts. Large reinforcements were ordered out from England, and further help offered by Australia and Canada was gladly accepted.

Lord Roberts reached Modder River on 9th February, 1900, and General French relieved Kimberley on the 16th. General Cronjé was caught up and surrendered with all his force on the 27th. Ladysmith, after two unsuccessful attempts, was relieved by General Buller on the 28th of the same month. Lord Roberts reached Bloemfontein on the 13th of March, and Pretoria on the 5th of June.

The Transvaal was annexed to Her Majesty's dominions Lord Roberts becoming Administrator, in which office he was succeeded on his departure from South Africa at the end of the year by Sir Alfred Milner. Sir A. Milner (afterwards Lord Milner) was selected for the post of Governor of the Transvaal and of the Orange River Colony, an office which he combined with that of High Commissioner for South Africa.

The Transvaal Colony remained the scene of military operations till May, 1902, when on the last day of that month Articles of Peace were signed at Pretoria.

Prior to this, the Civil Administration was partly organised on a provisional basis, resident magistrates and district Commissioners having been appointed in many districts. Numerous proclamations were issued to provide for administrative requirements, and amongst those issued in 1902 may be mentioned those making provision for the acquisition of lands for public purposes (Proclamation 7), placing subsidised schools under the control of the Director of Education (9), amending the law relating to the registration of deeds (10), levying a tax of 10 per cent. on the annual net produce of gold-bearing produce (34), regulating the registration of mining rights (36, amended by Ordinance 6 of 1902), and several relating to the administration of justice. On the 21st of June, 1902, Letters Patent were published constituting the Government of the Transvaal, and providing for an Executive and a Legislative Council, the members of which are to be appointed by the Crown; the subsequent legislation being accordingly by Ordinance.

On the 31st March, 1906, Letters Patent were passed providing for the constitution of a Legislative Assembly to consist of the Lieut.-Governor and not less than six or more than nine official members, and (provisionally) not less than thirty or more than thirty-five elected members. But in December, 1906, this Constitution was revoked and a new one substituted.

On 6th December, 1906, Letters Patent were issued conferring full responsible government upon the Transvaal. The legislature consisted of two chambers, the Legislative Council and the Legislative Assembly, the former containing fifteen members and the latter sixty-nine.

The Transvaal was included as an original Province of the Union of South Africa in terms of the South Africa Act, 1909, which came into operation on the 31st May, 1910, and is now

governed under that Act. Apart from the general control of the Parliament of the Union, the control of certain matters specified in the South Africa Act is vested in an Administrator and Provincial Council.

### *Municipal Government.*

Municipal Government was established in the principal towns of the Province by Ordinances enacted in 1903. These Ordinances were subsequently extended and amended, and were during the 1926, 1927, 1928 and 1930 sessions of the Provincial Council consolidated and further amended so as to give local authorities more extensive powers, principally in regard to matters affecting the public health, although other important amendments, e.g., the basis of the municipal franchise, and the principle of councillors contracting with Councils, were incorporated in the consolidating and amending Ordinances. Three Ordinances were enacted dealing with:

- (a) the constitution of Local Authorities, i.e., Town and Village Councils and Health Committees, and the powers and duties of such bodies (Ordinance No. 11 of 1926);
- (b) the election of councillors (Ordinance No. 4 of 1927), and
- (c) the levying of assessment rates (Ordinance No. 13 of 1928).

Under these Ordinances, as under previous legislation, the Provincial Administration retains some measures of control over the government of Municipalities, limited, however, to powers of audit and surcharge, the approval of loan proposals, local improvement schemes, the approval of by-laws and the alienation of Municipal property. There are now 57 Municipalities (25 Town Councils and 32 Village Councils) in the Province and considerable progress in the improvement of the towns has been made since the inauguration of local self-government.

In areas under the jurisdiction of Town Councils the Municipal franchise under the Ordinance is extended to all white persons, males or females of the age of 21 years and upwards being British subjects who have resided within the Municipality for a period of six months immediately preceding the compilation of the voters' roll, or who are the owners of rateable property in the municipality.

Any person, male or female, qualified to be registered as a voter is eligible to be elected a Councillor.

In areas under the jurisdiction of village Councils the qualification of voters and Councillors is the same as that for Town Councils. There are 32 such bodies in the province.

In all municipal areas elections are by ballot, a more simple form of procedure being followed in the case of Village Councils than with Town Councils.

Provision is made in the Local Government Ordinance of 1926 for the constitution of Health Committees, of which there are 30 in the province. These are minor local authorities constituted for townships or areas where the density of population makes it necessary for sanitary measures to be enforced. They have rating powers under Ordinance No. 13 of 1928 and regulations conferring other powers are made by the Administrator.

*Education (December, 1930).*

	Schools.	Final Enrol-ment.	Average Enrol-ment.	Average Attendance.
High Schools and Secondary Dept. of Primary Schools ...	41	11,880	12,214	11,567
Town and Village Schools ...	233	73,356	71,330	65,961
Country Schools and Farm Aided Schools ...	965	50,096	48,971	45,897
<b>Total ...</b>	<b>1,239</b>	<b>135,332</b>	<b>132,515</b>	<b>123,425</b>
Schools for Coloured Children ...	46	7,328	7,140	6,269
<b>Total ...</b>	<b>1,285</b>	<b>142,760</b>	<b>139,655</b>	<b>130,694</b>

In November, 1930, the 4 Normal Colleges had 865 students. There were 594 state-aided native schools, with 72,801 scholars.

Education in Government Schools, both primary and secondary, is free.

*Provincial Administration.*

Administrator, Hon. J. S. Smit, 2,600l.

Provincial Secretary, C. E. Viljoen, B.A., LL., 1,330l.

Assistant Provincial Secretary, C. H. Sheard, B.A., 930l.

Provincial Accountant, S. C. A. Coosser, M.M., 960l.

Clerk to the Provincial Council, G. H. C. Hannan, 800l.

Provincial Auditor and Local Government Inspector, A. Tilley, 950l.

*Education Department.*

Director of Education, N. M. Hoogenhout, M.A., Ph.D. (Strassburg), 1,440l.

Secretary, Education Department, F. S. Malan, B.A., 1,050l.

Examiner, Education Department, A. J. de Vos, B.A., 1,000l.

Registrar, Education Department, R. H. Perks, 650l.

## SOUTH WEST AFRICA AND WALVIS BAY.

*Area and Boundaries.*

The Territory of South West Africa embraces an area of 835,000 sq. kilometres (322,393 sq. miles) and the Territory of Walvis Bay, 969 sq. kilometres (374 sq. miles). Walvis Bay has been transferred for administrative purposes to the Administration of South West Africa.

The boundaries are as follows:—

**SOUTH WEST AFRICA.**

North. Angola and Northern Rhodesia.

East. Bechuanaland and Union of South Africa.

South. Union of South Africa.

West. Atlantic Ocean and Walvis Bay.

**WALVIS BAY.**

North } South West Africa.

East }

South }

West. Atlantic Ocean.

*Formation.*

South West Africa forms a portion of the main South African Plateau with its great interior basin the Kalahari. The Territory has a mean average height of approximately 3,600 feet above sea level, sloping gradually, especially on the eastern portion, from 2,500 feet in the south to 4,800 feet in the north interspersed with small mountain ranges, of which the Moltkeblick rises as high as 7,886 feet

above sea level. The Brandberg, which is near the coast, and is the highest of these, has an elevation of 8,277 feet. The plateau, or interior upland is separated from the sea by a practically rainless desert, commonly called the Namib, which rises rapidly, but evenly, from the sea to the plateau, the average width being 100 kilometres (62 miles), attaining its greatest width towards the south, and its narrowest towards the north, the annual rainfall there being less than one inch. A good deal of the plateau in the south may be classed as semi-desert as the average annual rainfall is less than 10 inches, but in the north there is a marked improvement, the average rainfall in parts being over 20 inches. The edge of the South African Plateau is well defined in the north and south of South West Africa by broken ranges of mountains like the Kaokoveld, and Aus-Kubub Mountains (Huib Hochebene), but in the centre there is no defined escarpment. The plateau attains its greatest average elevation around Windhoek, which lies between the Khomas Hochlands and the Aus Mountains. From there isolated eminences and ranges super-imposed on the main plateau extend in a northerly direction to the Kaokoveld Mountains. To the south the Highlands are succeeded at some little distance by the plateau and the table-topped mountains of Great Namaqualand, eastward and north-east of these elevated tracts the upland assumes a very level character composed mostly of sand dune formation merging eventually into the sand-veld of the Kalahari.

#### Mountains.

The most mountainous section is the Windhoek district in which are the Khomas Hochland, a very rugged lofty tableland with a mean altitude of 6,000 feet rising in places to 6,700 feet above sea level; rugged ranges north-east of Windhoek of which the principal are the Onjati Mountains (7,198 feet); and to the south and south-east the Aus Mountains having a mean average elevation of approximately 6,700 feet, attaining their greatest altitude in the Molkebliek peak (7,886 feet). In this section, which may be termed the watershed of South West Africa, the Kuiseb, the Fish, the Elephant, the Nosob, the Swakop, and the Auob rivers have their source.

With the exception of the Kaokoveld mountains, which form the edge of the plateau, the rest of the mountains are broken ranges and isolated eminences rising out of the Great Plateau. Among these are the Omatako (7,270 feet), Brandberg (8,277 feet), Erongo (7,044 feet), Chuos (5,081 feet), Naukluit (6,266 feet), Weissrand (3,770 feet), Tuaris (5,749 feet), Schwarzrand (4,399 feet), Tiras (5,930 feet), Huib Hochebene (Aus Kubub), Klein Karas (4,729 feet), and Gross Karas (6,168 feet).

#### Rivers.

With the exception of the boundary rivers, the Kunene, Okavango Zambezi and Orange Rivers and the Kwando (or Mashi) in the Caprivi Zipfel, there are no perennial streams. There are, however, dry sandy river beds, which flow after heavy rains, but except in very wet seasons few of these flow for any considerable distance. The Swakop, the Kuiseb and the Omaruru reach the sea perhaps once in five years or at even longer intervals. These river beds have the appearance of having been blocked up by loose sand under which the water percolates and eventually reaches the sea. By sinking shallow wells in them plentiful supplies of fresh water are obtained, a good illustration of this is at Rooibank

(o)

near the mouth of the Kuiseb and at Goanikontes near the mouth of the Swakop. The principal of these intermittent rivers are:—The White Nosob, the Black Nosob, the Vereinigte Nosob, the Auob, the Elephant, flowing east and south-east, the Fish, flowing south, and the Kuiseb, the Swakop, the Omaruru, the Ugab, flowing west.

#### Ocean Currents.

The coast is swept by the cold Benguella current, which originates in the Antarctic Ocean and flows along the western coast of South Africa as far as the mouth of the Congo. There can be no doubt that the arid character of the Namib is due primarily to the influence of this current.

#### Pans.

Very characteristic of the northern and eastern section of the Territory are the peculiar shallow depressions without any outlet, commonly known as pans, which range in diameter up to a couple of miles. They can, according to the water contained in them, be classified as fresh pans, brack pans and salt pans. The surface of the salt pans, such as the salt pans at Aminuis, and west of the Etosha pan, during the dry season become covered with a dazzling white crust composed chiefly of common salt. The Etosha pan can hardly be classified amongst these pans as it covers an area of approximately 3,517 sq. kilometres (1,356 sq. miles). In the winter it is dry, but during the summer months it is covered by a shallow sheet of water, which varies according to the rainfall and the amount of water flowing into it.

#### Vegetation.

*Namib.* Along the sea coast there is no vegetation whatsoever; from about 25 miles inland the landscape is characterized by such plants as the milk bush (*Euphorbia*) and *Cacti*; towards the east, in years of abundant rainfall, it is fairly well grassed. In the river beds trees and rich verdure are found, such as various *acacias*, etc., the principal of which are the Kameeldoorn (*Acacia Giraffae*) and the Ana (*Acacia Albida*).

*South.* In the extreme south for a considerable distance semi-desert conditions prevail, consisting of an arid stony plateau and plains supporting edible shrubs and a sparse growth of grass. In heavy rainy seasons, however, nutritious grasses and flowers spring up everywhere. The river courses as in the Namib are clothed with trees. The most widely distributed plants are the milk bush, the Ganna bush (*Salsola Aphylla*), the three thorn bush (*Rhigozum Trichotumum*) and the Noonie bush (*Boscia Foetida*). The principal trees are the Camel-thorn (*Acacia Giraffae*) and the Koker-boom (*Aloe Dichotoma*).

*Centre.* From the southern portion northwards, the veld assumes the characteristics of the Karroo until Rehoboth is reached, when it changes into a park-like grass country studded with large thorn trees, and is especially well timbered along the water courses. From the mountainous portion of the Windhoek district northwards towards Omaruru, the country is covered with level bush with an undergrowth of very nutritious grass, the valleys and water courses being well timbered with mostly *acacia* trees especially the Kameeldoorn (*Acacia Giraffae*).

*North.* Towards the north the bush becomes denser. It is traversed in its most northern section by belts of open Mopane forests and towards the Okavango it is covered by fertile tropical vegetation.

*East.* In the southern portion of the eastern section the vegetation is karroo bush, intermixed with grass, the valleys being covered with thorn bush. Towards the centre trees become more numerous and the dunes themselves are covered with thorn bush, large acacia trees, and good grass. From Rehoboth northwards the whole is well timbered and merges into thick tropical vegetation.

#### *Government and Administration.*

Early in the late war the country was invaded by the Military Forces of the Union, and on the 9th July, 1915, was surrendered to them at Khorab. It is now administered by the Union under a Mandate from the League of Nations dated 17th December, 1920.

In terms of the Mandate, military training of the natives, except for police or defence purposes, is forbidden, and no naval or military fortifications may be established.

The supply of intoxicating liquor to the natives is prohibited, as also is any system of forced labour.

The administration of the country is conducted from central offices situated at Windhoek, and the country is divided into 17 districts, controlled by magistrates. This excludes Ovamboland in the extreme north which contains the bulk of the native population and is administered by Native Affairs officials.

There is also a Native Affairs official stationed at Kuring Kuru who controls the native tribes on the Okavango River.

Windhoek, the Capital, is pleasantly situated at an altitude of 5,600 ft., in the centre of the Territory. The town, with its surrounding district, contains a population of over 4,500 Europeans and 13,000 Natives.

Previous to 1920 German Imperial and Local Laws were in force. On the 1st January, 1920, however, the Roman Dutch Law became the Common Law of the country.

By Act No. 42 of 1925, the Union Parliament made provision for the grant of representative institutions to the European inhabitants of the Mandated Territory. Under this Act, an Executive Committee, Advisory Council, and Legislative Assembly are constituted: the Assembly to consist of 18 members, of whom 6 are to be appointed by the Administrator and the remainder to be directly elected. Every male European is qualified to be registered as a voter provided that he is not less than 21 years of age, is a British subject, and has been resident in the Territory for 12 months. In terms of Act No. 38 of 1931, which amends Act No. 42 of 1925 in certain respects, general elections are to be held at intervals not longer than every five years. The Advisory Council is to consist of 8 members, viz.: the Administrator as Chairman, the other members of the Executive Committee, and 3 members nominated by the Administrator, one of whom shall be selected mainly on the ground of his knowledge of the wishes of the non-European races in the Territory. The Executive Committee is to consist of the Administrator and four persons chosen by the Assembly from among its own members or otherwise.

The Assembly is vested with the power to make Ordinances for the Territory except on certain subjects which are reserved: the latter include native affairs, immigration, customs tariffs, currency and banking, and other subjects, though they may by resolution recommend that legislation be enacted on any of such matters. The function of the Advisory Council includes advising the

Administrator in regard to the reserved subjects, and in regard to assenting to the Ordinances which the Assembly has passed.

The present Administrator is Mr. A. J. Werth, who was the Member for Kroonstad in the Union House of Assembly from 1920 to 1926, and succeeded Mr. Gysbert Reits Hofmeyr, C.M.G., as Administrator in April, 1926.

The chief executive officer for the country is the Secretary for South-West Africa, Mr. H. P. Smit. The official languages of the Territory are English and Afrikaans. For the convenience of the older section of the population the German language is recognised for purposes of official correspondence.

#### *Population.*

The European population, according to the figures of the 1921 census, was 19,432, and the native population about 218,000. As large areas of the country, particularly along the coast and in the North, are uncivilised, it has been impossible to procure precise figures. In particular it has been difficult to estimate the numbers of the Bushmen, who still exist in considerable tribes in the North-Eastern portion of the country.

It is estimated that of the 19,432 European inhabitants in 1921 some 7,850 were Germans. The remainder were almost all South Africans, and farmers by occupation.

The estimated European population of the Territory in 1930 was males, 17,671; females, 13,915; total, 31,586.

The principal native races of South-West Africa are the Ovambos, Hereros, Bergdamas or Klipkaffirs, Hottentots, and Bushmen.

The Ovambos are a Bantu race, and follow agriculture as a pursuit. They still possess to its full extent tribal organisation, and are fairly well armed, but have given no trouble since the British occupation of the country. The Germans in pre-war times exercised no authority whatever over them, and never entered their territory.

The Hereros are a pastoral people who formerly owned enormous herds of cattle. The Germans in dealing with these people pursued a policy of oppression, with the result that in 1904 they rebelled, and 75 per cent. of them were destroyed. Their tribal organisation has completely disappeared, and they are now scattered throughout the country on farms and in the different towns, where they form the ordinary source of labour.

Owing to the fact that formerly tribal organisation was based on the ownership of cattle, and that they have consequently for generations been familiar with cattle and their ways, the Herero makes an excellent herd. It is not an unusual thing for a member of this race to have charge of, say, 3,000 head, and to know each one individually.

Since the British occupation of the country reserves have been set aside for the Hereros, who have increased considerably in numbers and in animal wealth.

The Bergdamas are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Hottentot race, whose language they now speak. They are an inferior tribe, and were alternatively the slaves of the Hereros and the Hottentots in pre-European days, as the former or the latter prevailed in the constant struggles that were going on between them.

The Hottentots, so called, consist of two distinct sections, one of which, whose remnants are found in the central portions of the country, is of pure native extraction, the source of which is but little

understood, while the other is composed of tribes which have resulted from an admixture of European blood in the Cape with the Hottentot races residing there a couple of centuries ago, and which after conflict with their European neighbours sought refuge across the Orange river in this country.

The Bushmen are the oldest inhabitants of South West Africa, and are to be found in considerable numbers in its eastern portion from Lat. 26° right away to the Northern boundary. There are also remnants of a bushmen tribe in the desert wastes just north of the Orange River and in the Kaokoveld, in the North North-Western portion of the country. These may be of the "Strandlooper" type.

Situated in the centre of the country just South of the Windhoek District is the Bastard Gebiet, occupied by a semi-independent race known as the Bastards, whose origin is much the same as the second class of Hottentots mentioned above, with the difference that the admixture of European blood is much greater, and that their ordinary language is Cape Dutch. According to the census taken in 1921, they number about 5,720. These people used to control their own affairs to a very large extent, and were governed by a Raad (Council) which is partly hereditary and partly elected. The Administration is represented by a magistrate, who assists them with advice, and takes cognisance of serious crimes. But in 1924 owing to political dissension a deadlock was reached. The Administration, therefore, by Proclamation declared that the Raad ceased to function and vested all its powers and duties in the Magistrate.

#### Education.

(European.) There are 69 schools under the Administration with an enrolment of 4,505 pupils. In addition there are 57 registered private schools with an enrolment of 1,103 pupils. Hostels are conducted by the Administration in conjunction with 21 of the government schools. In view of the scattered nature of the population it is difficult and expensive to bring a sufficient number of children together to establish a Government school. The Administration therefore encourages the establishment of smaller schools by paying capitation grants for pupils attending approved private schools.

(Native.) The education of the natives is under the direct supervision of the various Missions. In Ovamboland it is mainly in the hands of the Finnish Mission, whilst the Rhenish and Catholic Missions operate in Namaland and Damaraland. The Wesleyan and the Anglican Churches are also taking an active interest in this work. There are 67 government-aided mission schools with an enrolment of 4,776 pupils. In addition there are mission schools in different parts of the country that have not yet qualified for government aid. There are two training schools for native teachers. Both are subsidized by the Administration. The one at Okahandja is under the aegis of the Rhenish Mission, and the one at Döbra under the Catholic Mission.

#### Religious Organizations.

Mission and other religious activities are being carried on within the Territory by various organizations, such as the Dutch Reformed Church, Church of England, Wesleyan Methodist Church, Finnish Mission, Roman Catholic Church, German Lutheran Church, Rhenish Mission, etc.

#### Finance.

For the financial year 1930-31 the revenue amounted to 617,614*l.* and the expenditure to 1,271,281*l.*, of which 367,411*l.* is loan expenditure and 68,289*l.* is met from funds provided by the Union Government for Settlement of Angola farmers in South-West Africa. The estimates for the year 1931-32 were Revenue 755,900*l.*, and Expenditure 1,448,328*l.*

#### Customs.

For the purposes of customs and excise revenue this territory is included in the customs union. All customs and excise collections are paid over to the Union consolidated revenue fund and a lump sum based on the customs and excise duties on goods consumed in this territory after deducting a sum equivalent to the said duties in goods removed from this territory for consumption in the Union, is paid over to this Administration. The total annual revenue is approximately 250,000*l.*

#### Trade.

The figures of Imports and Exports (including specie) for the five years ending 1930, are as follows:—

Year.	Imports.	Exports.
	£	£
1926	2,507,625	3,292,986
1927	2,505,016	3,589,561
1928	2,881,562	2,355,937
1929	3,061,848	3,595,313
1930	2,120,282	2,617,127

#### Mineral Production.

The development of the mineral industry has come about largely within the past 20 years, and the territory may be said to be well mineralised, but up to the present sufficient useful exploratory work has not been done in many parts to permit of any definite assessment of future production. Minerals constitute 70-80% of the total value of exports from the Territory.

Diamonds, which constitute the principal mineral product, are recovered from alluvial sources on a 275 mile stretch along the coast line from the Orange River northward. The industry has been placed on a sound footing and large sums have been invested in up-to-date plant, etc. Production and export have, to some extent, of necessity, varied with the requirements of the market.

Export of diamonds in 1930:—415,047 carats, valued at 1,184,217*l.*

Next in importance are Copper, Lead, Vanadium and Tin, at present being worked in the north of the Territory. Output and export have in like manner varied with market conditions.

Value of export of Copper, Vanadium, and Tin in 1930:—Copper lead ore, copper lead matte, and pig lead, 462,000*l.*; Vanadium (as concentrates), 150,700*l.*; Tin (as concentrates), 20,200*l.*

#### Stock and Agriculture.

Rainfall varies from 25 inches in the north to three inches in the south, and it is, therefore, only in the former area that agriculture is practised to any extent. Here crops are grown, the chief of which is maize.

As regards stock farming, speaking generally the southern portion of the Territory is suitable for small stock farming, the middle and southern north for large and small stock, and the north for large stock and dairying.

As regards large stock, the "semi-ranching" or as it is also known "dairy ranching" system would

appear to be the most suitable outside of the northern area. The principle of this system is the taking of a limited quantity of milk from the cow with the idea of getting a certain amount of revenue for current expenses, but leaving at the same time a supply sufficient to ensure the development of the calf into a good slaughter animal.

As regards small stock, sheep are bred for the production of mutton (Blackhead Persian and Afrikaner), wool (Merinos), and pelts (Karakuls). All these breeds do well in this Territory, whilst as regards the Karakul a pelt is produced which gives a high-class "astrakan."

The 1930 census return shows the following numbers of live stock :—

Karakul Sheep . . . . .	289,821
Woolled Sheep . . . . .	252,791
Blackhead Persian . . . . .	113,963
Crossbred and others . . . . .	944,416
Angora Goats . . . . .	31,921
Other Goats . . . . .	828,749
Cattle . . . . .	655,280
Horses . . . . .	19,376
Donkeys . . . . .	60,976
Mules . . . . .	1,832
Pigs . . . . .	8,239

A Land Board has been established, and Government ground is being rapidly allotted to suitable applicants on 5 years' leases, with the option of purchase on very easy terms as to instalments. Personal occupation is essential.

Applications, which come mainly from the Union, are far in excess of the existing provision.

#### Harbours.

**Walvis Bay.**—In pre-war times the Germans used Swakopmund and Luderitz as ports of entry to their territory (now South West Africa Mandated Territory). With the occupation, however, Swakopmund was abandoned in favour of Walvis Bay, which is a sheltered port, affording safe anchorage, and is connected by rail via Swakopmund with South West Africa and Union Stations. A new wharf and basin, together with a channel leading thereto, have recently been constructed. The wharf is 1,500 feet long with a depth alongside of 33 feet L.W.O.S.T., which depth extends for 100 feet into the basin. Electric cranes have been installed on the wharf, also an adequate fresh water service. The basin is 2,150 feet long by 700 feet wide, with a depth of 30 feet L.W.O.S.T. This depth is maintained throughout the channel, which is 3,000 feet wide at the entrance, narrowing to 440 feet, and again widening as it approaches the basin to 1,200 feet. The South West Imperial Cold Storage Company, Ltd., has erected cold storage works and abattoirs, with a transporter to convey meat direct from cold storage to ship.

**Luderitz.**—At Luderitz a new jetty, 500 feet long, was erected to replace the jetty erected during the German regime, and which is fast becoming useless due to the ravages of the torredo and natural depreciation.

**Swakopmund,** which possesses a climate equal to that of any watering place in South Africa although it lies within the tropics, is now developing as a seaside resort, and is very popular with the European inhabitants of the country during the summer months.

#### Railways.

The Mandated Territory is served by a main line connecting with the Union system at De Aar, a branch line extending from the main route at

Seeheim Junction to Luderitz, and a narrow gauge system extending from Usakos to Trumbek, Grootfontein and Outjo, the total mileage within the Territory being 1,482 (1,128 standard gauge and 354 narrow gauge).

There are also several small narrow gauge private lines. The whole of the railway system from De Aar in the Union to the border and within the border is controlled by the System Manager of Railways with headquarters at Windhoek.

A comfortable mail train service, with sleeping accommodation and dining-car service, is run twice a week between the Union and Swakopmund with connection to Luderitz, Tsumeb and Grootfontein. The duration of the through journey to and from the places enumerated being :—

From WINDHOEK to—	Hours.
Johannesburg . . . . .	71
Pretoria . . . . .	73½
East London . . . . .	82
Port Elizabeth . . . . .	72
Cape Town . . . . .	71½
Durban . . . . .	95½
To WINDHOEK from—	
Johannesburg . . . . .	71½
Pretoria . . . . .	73½
East London . . . . .	77
Port Elizabeth . . . . .	73
Cape Town . . . . .	72½
Durban . . . . .	96

**Cattle Industry.**—The territory is essentially a stock-raising country, and to assist farmers to compete in the Union markets, livestock trains are run through from Windhoek to Upington (623 miles) where the stock is detained, fed, watered, and rested, and thereafter trucked to destination which is generally to Maitland for Cape Town or Newtown for Johannesburg.

**Posts, Telegraphs and Telephones.**—Excellent postal, telegraph and telephone services exist. Telegraphic communication beyond the borders of South West Africa is maintained via the Union of South Africa. The wireless telegraph station at Walvis Bay is equipped with the latest short and long wave transmission and receiving gear, capable of maintaining two-way communication between South African and European ports and ship stations en route.

The number of Post Offices is 109 and of Telegraph Offices 85. The number and value of money orders and postal orders issued and paid during 1930-31 was respectively :—

Money Orders issued 51,728	value 227,892.
" " paid 20,696	" 134,044.
Postal " issued 77,172	" 37,608.
" " paid 30,742	" 16,012.

Savings Bank Accounts open at 31/3/31, numbered 5,918 and the balance due to depositors was 170,377. The postal, telegraph, and telephone revenue amounted to 91,864. and expenditure to 62,186.

#### Legislative Assembly.

The first sitting of the first session of the second Legislative Assembly took place at Windhoek on the 19th July, 1929. The names of the persons who were declared duly elected as members of this body, together with the names of the electoral divisions which they represent, are given hereunder :—

Electoral Division.	Name of Member.
Gibeon . . . . .	L. C. F. Taljaard, Esq.
Gobabis . . . . .	I. J. Minnaar, Esq.
Grootfontein . . . . .	F. W. Kegel, Esq.
Keetmanshoop . . . . .	Lieut. Col. G. Curtis, D.S.O.

<i>Electoral Division.</i>	<i>Name of Member.</i>
Kolmanuskuppe . . .	W. H. Fischer, Esq.
Luderitz . . .	Dr. H. B. K. Hirsckorn.
Okahandja . . .	J. P. Niehaus, Esq.
Omaruru . . .	Odt. L. J. F. von Maltitz, M.C.
Swakopmund . . .	J. D. Lardner Burke, Esq.
Warmbad . . .	C. H. B. Oberholzer, Esq.
Windhoek Central . . .	P. Muller, Esq.
Windhoek District . . .	D. W. F. E. Ballot, Esq.

The following persons have been appointed to be the nominated members of the Legislative Assembly:—

C. P. Bond, Esq., B.A., LL.B.; W. G. P. Kirsten, Esq., B.A., LL.B.; A. Voigts, Esq.; A. Stauch, Esq.; G. Rösemann, Esq.; Lieut.-Col. J. L. Hamman, D.S.O.

Clerk of the Assembly, H. Bense, Esq.

#### *Government Staff.*

The following is a list of the principal Officers of the Administration:—

*Administrator*, The Hon. A. J. Werth, B.A.  
*Secretary for South West Africa*, H. P. Smit.  
*Assistant Secretary for South West Africa*, F. P. Courtney Clarke, B.A., LL.B.  
*System Manager, South African Railways and Harbours*, B. X. Brain.  
*Accountant*, W. A. Rennie.  
*Revenue Officer and Tax Assessor*, R. Lefebvre.  
*Medical Officer to the Administration*, F. C. S. Hinsbeek, B.A., M.B., Ch.B., D.P.H.  
*Surveyor-General*, A. G. Landsberg.  
*Inspector of Mines*, L. G. Ray, A.R.S.M.  
*Director of Posts and Telegraphs*, Lt.-Col. J. A. Venning, D.S.O., V.D., M.(S.A.), I.R.E.  
*Director of Works*, D. Holtshausen, B.A., B.Sc., A.M.I.C.E.  
*Director of Education*, H. H. G. Krefz, B.A.  
*Registrar of Deeds*, R. M. Ueckermann.  
*Senior Veterinary Surgeon*, A. McNae, M.R.C.V.S.  
*Manager of the Land and Agricultural Bank of South West Africa*, J. T. Taylor.

#### *Judicial and Police Officers.*

*Judge of the High Court of South West Africa*, Dr. W. E. Bok, LL.D. (Leyden).  
*Registrar of the High Court, Taxing Officer, Sheriff, and Master of the High Court*, J. P. le R. Esterhuysen.  
*Attorney-General*, L. C. Steyn, B.A., LL.D.  
*Commandant South West Africa Police*, Lieut.-Col. C. A. B. van Collier, M.B.E.

now represents the Crown in all matters occurring in South Africa beyond the limits of the Union and Southern and Northern Rhodesia. He was, till 1899, charged with the conduct of British relations with the South African Republic (Transvaal) and the Orange Free State, as well as those with native states and tribes outside the Colonies of the Cape and Natal, including Swaziland, which was administered by the Government of the South African Republic under the Convention of 1894.

The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland.

Prior to the 1st October, 1923, Southern Rhodesia was administered by the British South Africa Company, and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council 1898. Upon the establishment of responsible government the Order in Council of 1898 lapsed, but under the Southern Rhodesia Constitution Letters Patent certain of the High Commissioner's previous powers and functions in regard to native administration were reserved to him and the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect.

The office of High Commissioner, which was formerly held by the Governor of Cape Colony, was, by a Commission dated the 6th Oct., 1900, vested in Lord Milner, and by a similar Commission, dated the 15th March, 1905, in Lord Selborne. From 1910 to 1930 the office was vested, by separate Commission, in the successive Governors-General of the Union of South Africa; in 1930 H.M.G. in the U.K. decided to establish the post of High Commissioner for the U.K. in the Union of South Africa and to combine this post with that of High Commissioner for South Africa.

#### *High Commissioner and Staff.*

(Salaries paid from Imperial Funds.)

*High Commissioner*, Sir Herbert Stanley, G.C.M.G., 2,500*l.* plus 2,500*l.* allowance (see also under "Union").  
*Imperial Secretary and Accountant*, (vacant), Shirley Eales (acting).  
*Assistant Imperial Secretary*, Shirley Eales, C.B.E., 1,100*l.*, and house allowance, 90*l.*  
*Chief Clerk*, H. L. Smith.

### BASUTOLAND.

#### *Situation and Description.*

Basutoland forms an irregular oval within the Union of South Africa; the main axis, about 150 miles in length, lying in a north-easterly direction. The Orange Free State Province, Natal, and the Cape Province form its boundaries. Its area is 11,716 square miles, or nearly as large as Belgium.

It lies between 29 and 30 degrees south lat., and between 27 and 28 degrees east long.

A portion of the great Drakensberg range of mountains forms the eastern boundary of Basutoland. Peaks in this range rise to heights of eleven and twelve thousand feet. Westward the country is occupied by the Malutia, mountains inferior in height to the Drakensberg. They form a jumbled mass so closely packed that the valleys are of the narrowest, and there is little ground which can be cultivated. It is only

## SOUTH AFRICAN HIGH COMMISSION.

### THE OFFICE OF HIGH COMMISSIONER.

The office of High Commissioner in and for South Africa was created by Letters Patent in 1878. In 1879 a second High Commissioner was appointed, to whom was assigned South-Eastern Africa, including Zululand and Amatongaland; but this arrangement ceased in 1881, when a Special Commissioner for Zulu affairs was appointed, who was also Governor of Natal (which now includes Zululand and Amatongaland). The High Commissioner for South Africa, who, under the Commission of 1889, was the officer for the time being administering the Government of the Cape,

along the Western border that mountains give place to hills and the cultivation of larger portions of land becomes possible.

In favourable seasons the territory produces large crops of wheat, mealies, and Kafir corn. It also produces large numbers of cattle, horses, and sheep. The range of temperature is approximately from a maximum of 93° F. to a minimum of 11° F. The average rainfall is 30 inches.

The climate is good for Europeans and natives alike. Its high altitude and pure atmosphere prove most invigorating. *Phthisis pulmonalis* is little known except among Europeans who have come to the country on account of their disease. The latter in early stages of the disease improves at once. Persons suffering from malarial fever or its results are benefited greatly by a short residence in Basutoland. Leprosy imported from the Orange River Colony and Cape Colony has now a firm hold in the country, the proportion being about '91 per 1,000. As yet it has been possible to do little to check the spread of the disease. With the authority of the High Commissioner, a Leper Settlement was formed in 1912, about 4 miles from Maseru for the segregation and care of all lepers within the Territory.

#### Population and Industry.

In 1875 when Basutoland formed part of the Cape Colony, at the general census of the Colony taken in that year, the European population of Basutoland was 499, and the native 127,707.

The following were the census figures for 1921:—

Natives	...	...	495,937
Whites	...	...	1,603
Indians	...	...	172
Mixed and Coloured	...	...	1,069
Total	...	...	498,781

Maseru, the capital, and largest town, has a population of 1,890 natives and 400 Europeans.

The productions are wool, wheat, mealies, and Kafir corn. There are indications of iron, and coal has been found and used in some parts by natives in small quantities.

#### History.

The Basutos appear to have been composed of the remnants of several tribes which were broken up in the wars waged by Moselikatze, the king of the Matabele, in the early years of the last century. These remnants were united in about 1818 under Moshesh, a chief of great ability, who ruled for many years.

In 1852 war broke out between Moshesh and the British Government; the Basuto were defeated by Sir G. Cathcart at the battle of the Bera Mountain, and Moshesh sent in his submission, and made peace.

A few years later, in 1856, disputes arose between Moshesh and the Orange Free State respecting boundary questions, and hostilities resulted which lasted from 1856 to 1858, with indecisive results, and were concluded by the Treaty of Aliwal, 1858, but collisions frequently occurred.

In 1865 the war broke out afresh, and Moshesh again claimed the protection of the Governor, Sir Philip Wodehouse. He declined to interpose actively, but despatched a British Commissioner to Thaba Bosigo, the capital of Basutoland, to settle the difficulties. This measure met with little success, and in the end the Boers were successful, and Moshesh sued for peace. At the treaty of Thaba Bosigo, April, 1866, he recognised the

permanent cession of a portion of his district and acknowledged himself a subject of the Orange Free State.

The peace was of short duration, the war was renewed, and the Basuto, pressed by the Boers, were on the brink of destruction, when they again appealed to be taken under the authority of the Queen, and in 1868, Sir Philip Wodehouse received authority to recognise Moshesh and his tribe as British subjects, and for the incorporation of their territory. This was carried into effect by a proclamation dated March 12th, 1868.

The country remained in a very unsettled condition, until it was annexed to the Cape, by an Act of the Cape Legislature, No. 12 of 1871. The Act expressly declared that Basutoland was not to be subject to the general law of the Colony, and gave the Governor power to legislate for it by proclamation, and to extend to it by proclamation any Cape Act not otherwise in force therein.

The subsequent history of Basutoland was one of much trouble and disturbance.

In March, 1879, Moiroi, the chief of the Quithing district, in the south-east of Basutoland, rescued from justice his son Doda, who had been arrested for horse-stealing; and, on the Colonial authorities demanding his surrender, broke out into open defiance of its authority. Owing to the great natural strength of his country and stronghold, considerable difficulty was experienced in subduing him; but in December of that year his stronghold was carried by storm, and he himself fell in the assault. The proposals of the Colonial Government to divide the territory occupied by the adherents of this chief into lots for occupation by European settlers gave rise to great discontent among the Basuto who had remained loyal. This discontent was further increased by the extension of the Cape Peace Preservation Act of 1878, providing for a general disarmament, to Basutoland by proclamation in April, 1880, and culminated in the revolt of almost the whole tribe when an attempt was made to put the Act in force. The rebellion spread to the native territories east and south of Basutoland, East Griqualand, Tambookieland, and the Pondomisi, where the rising was signalled by the treacherous murder of Mr. Hope, the magistrate, and other Europeans.

Strenuous efforts were made by the Colony to reduce the Basuto to submission by force of arms, but without decisive success, though the loss of their cattle, and the interruption of cultivation, caused great distress amongst them. Early in 1881 overtures for an arrangement were made by the leading chiefs, and, at the instance of Her Majesty's Government, the High Commissioner acted as arbiter between the Colonial Government and the Basuto.

The terms of his award were, the registration of arms, the payment of compensation to those natives who had remained loyal by the tribe, and also the payment of a fine of 5,000 head of cattle. The award, was accepted by the Basuto and the fine paid, but little was done towards fulfilling the other conditions. The Colonial Ministry, with a view to facilitate a settlement, cancelled the award and induced the Cape Parliament to assume the burden of compensating the loyalists. The Disarmament Proclamation was also repealed, and at a Pitso held on the 24th of April, 1883, a very liberal constitution was offered to the Basuto. Masapha, however, the chief of the Bera district, with several other chiefs of influence, held aloof, and practically declared their intention to have no further connection with the Colonial

Government, and the tribe generally were understood to wish to be under the direct authority of the Imperial Government. In the meantime a strong feeling in favour of the entire abandonment of Basutoland had grown up in the Colony, and on the request of the Colonial Ministry the Imperial Government decided to undertake for a time the administration of the country on condition that satisfactory evidence was given by the Basuto of their desire to remain under the British Crown, that the Orange Free State should undertake to cause the frontier to be respected by its subjects, and that the Colony should pay over towards the cost of administration the Customs duties received on goods imported into Basutoland. This offer was accepted by the Colony, and provision was made in the Basutoland Disannexation Act of 1883 for the payment of 20,000*l.* a year, and the Free State also intimated its willingness to comply with the conditions so far as it was concerned.

A great national Pitsso of the Basuto was held on the 29th of November, 1883, attended by the representatives of more than two-thirds of the whole tribe, who unanimously expressed their willingness to comply with the conditions on which the Imperial Government was prepared to assume the responsibility of the administration of the country. Several important chiefs who were not at the Pitsso subsequently expressed their concurrence in this resolution, Masupha alone refusing to accept the offers of the Government, and desiring to remain independent. Her Majesty's Government upon this decided that their conditions were sufficiently complied with, advised the Queen to sanction the Disannexation Act, and immediately took steps for carrying on the government under the immediate authority of the Crown, from the 13th March, 1884. Masupha tendered his submission in 1886, and asked for a magistrate to be resident in his district.

#### *Constitution.*

The territory is now governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority, which is exercised by proclamation.

The chiefs adjudicate on cases between natives, with a right of appeal to the Courts of Assistant Commissioners where all cases between the natives and Europeans are brought. There is a Court of the Resident Commissioner, presided over by the Resident Commissioner in person or by a Judicial Commissioner appointed by the High Commissioner by notice in the *Gazette*, which has jurisdiction in all cases, civil and criminal, subject to a right of appeal in certain civil cases to the Privy Council.

For fiscal and other purposes the country is divided into 7 districts namely, Maseru, Leribe, Mohale's Hoek, Bera, Mateteng, Quthing, and Qacha's Nek. Each of the districts is subdivided into wards, presided over by hereditary chiefs allied to the Moshesh family. The revenue arises from the post office, native tax, the sale of licences, customs, and income tax.

#### *Education.*

Excellent work is being carried on in the country by missionaries, in whose hands the labour of education is almost exclusively vested. In 1929, however, two Government Schools were opened at Maseru and Mafeteng to provide for day scholars from Standards IV.—VI. and in 1931 a further school was opened in Matsieng, the

Paramount Chief's village. The total number of Government and Government-aided schools is 597, of which 9 are institutions (Normal, Industrial, and Agricultural), 28 Intermediate Schools and 560 Elementary Vernacular Schools. The average attendance during 1930 was 37,150. There are nine European schools with a little over 100 scholars. There is also a Government Industrial School for natives at Maseru, with 63 pupils on the roll.

The Education vote for 1931-32 is 48,995*l.*, and a separate vote of 5,758*l.* for the Leretholi Technical School.

#### *Means of Communication.*

There are no navigable waterways, the rivers being low in winter and flooded generally in summer. The usual mode of conveyance is by motor car, ox-waggon, or light cart, and by pony riding off the roads and in the mountain areas.

The roads in the country are now in good condition for any kind of transport, but the periodical rains draining down from the high watersheds seriously damage them. Bridges have been constructed across the Hlotse river, the Khomokhoana river, the Caledon river at Ficksburg and Peka and the Little Caledon river near Maseru, across the Phuthiatsana river near Teyateyaneng and the Mekhaleng river near Mohale's Hoek, and over the Tsoseng and Tlametlu streams in Maseru district, and a bridge is in course of construction across the Telle River in the Quthing district. There are no railways through the country, but in December, 1905, the Central South African Railways opened a branch line running from Marseilles station on their Bloemfontein - Modderpoort line to a point just within the Basutoland border, and close to Maseru. A road and railway bridge has been built across the Caledon river at Maseru.

The line of postal communication is through the Cape Province and Orange Free State Province. Letters to and from Europe take about 20 days, to Cape Town 3 days. Postal rates are similar to those of the Union Post Office. Savings bank facilities and a money order system have been extended to Basutoland. The telegraph stations are Butha Buthe, Leribe, Teyateyaneng, Maseru, Morija, Mafeteng, Mohale's Hoek, Quthing, and Qacha's Nek; while a Government telephone line runs throughout the country to all Government stations, except Qacha's Nek. There is telephonic communication with the Orange Free State and Matatiele in the Cape Province.

#### *Trade.*

The imports consist chiefly of blankets, ploughs, saddlery, clothing, iron and tin ware, and groceries.

The exports consist chiefly of grain, cattle, wool, and hides. The commercial intercourse is almost exclusively with the Cape Province and the Orange Free State Province.

	<i>Exports.</i>	<i>Imports.</i>
	<i>£</i>	<i>£</i>
1927 ...	839,095	842,893
1928 ...	1,013,392	921,574
1929 ...	694,794	706,416
1930 ...	317,626	477,949

Basutoland was admitted in 1891 into a Customs Union with the Cape Province and the Orange Free State, by which arrangement a share of Customs duties collected at the ports of the Cape Province was credited to

Basutoland, but retained by the Cape Government on account of the annual contribution of 18,000*l.* Basutoland now receives, by arrangement, a proportion of Customs Revenue collected by the Union Government (*see* under South Africa, "Customs").

#### Currency and Banking.

The Standard Bank has opened a branch in Maseru, and there are branches of Post Office Savings Bank at most of the Government Stations. The Bloemfontein Board of Executors has also opened a branch in Maseru, with a Savings Bank Department. The currency is exclusively British, but exchange, and occasionally the payment of taxes, is still largely conducted by barter.

	Revenue.	Expenditure.
	£	£
1926-27	274,332	272,413
1927-28	305,931	283,602
1928-29	324,789	316,677
1929-30	326,540	332,949
1930-31	281,801	322,418

The financial year ends on the 31st March.

#### Establishment.

##### Resident Commissioner:—

*Resident Commissioner*, J. C. R. Sturrock, C.M.G., M.A., 1,650*l.*

*Government Secretary and Deputy Resident Commissioner*, F. L. Foord, 950*l.*

*Chief Clerk, Master of Court and Registrar*, H. J. Godden, M.B.E., 650*l.*

*Clerks to the Resident Commissioner*, D. M. Wilson, 290*l.*; A. G. T. Chaplin, 260*l.*; and W. G. S. Driver, 215*l.*

##### Treasury and Stores:—

*Financial Secretary*, L. G. Luscombe, 900*l.*

*Accountant*, G. M. Petrie, 570*l.*

*Clerks in Treasury*, A. W. Walters, 460*l.*; E. P. Perkins, 275*l.*; Miss K. M. K. Edwards, 200*l.*

*Comptroller of Stores*, S. B. Dutton, 650*l.*

*Clerks in Stores Department*, E. Heering, 550*l.*; H. L. Acutt, 260*l.*

*Storeman*, D. Joplin, 300*l.*

##### District Administration:—

*Assistant Commissioners*, F. Jenner, 850*l.*; J. H. Sims, 850*l.*; E. G. Dutton, 850*l.*; H. Ashton, 840*l.*; D. W. How, 750*l.*; T. B. Kennan, M.C., 670*l.*; L. Clementi, 690*l.*

*Deputy Assistant Commissioner*, R. S. Balfe, 600*l.*

*Clerks to Assistant Commissioners*, I. R. Russell, 550*l.*; G. B. Robertson, 520*l.*; H. J. D. Elliot, 290*l.*; J. H. Gage, 260*l.*; G. Phoenix, 315*l.*; K. J. Wilson, 245*l.*; R. F. Thompson, 230*l.*; R. C. Bigg, 245*l.*

##### Judicial:—

*Judicial Commissioner*, The Hon. Patrick Duncan, C.M.G., K.C., 1,000*l.* (of which Basutoland pays 500*l.*).

*Crown Prosecutor*, C. T. Blakeway, K.C., B.C.L., Advocate.

##### Police and Prisons:—

*Staff Officer*, Capt. R. W. Booth, 600*l.*

*Inspectors, Basutoland Mounted Police*, Capt. R. Collier, 600*l.*; Capt. J. Smith, 600*l.*; Capt. F. A. Piers, 550*l.*; Capt. E. E. Strong, 600*l.*; Capt. H. A. Smith, 550*l.*

*Sub-Inspectors*, G. T. Stanley-Clarke, 550*l.*; F. D. Warren, 550*l.*; M. Kennan, 550*l.*; E. C. Butler, 480*l.*; G. J. Armstrong, 480*l.*; R. E. K. Murray, 420*l.*

*Chief Constable*, G. H. Cockrell, 360*l.*, plus 60*l.* Finger Print Allowance.

*Gaolers*, E. G. Ford, 360*l.*; R. Hunter, 300*l.*; W. B. S. Wells, 300*l.*; C. King, 300*l.*

##### Medical:—

*Principal Medical Officer*, H. R. F. Nattle, 975*l.*

*Clerk to Principal Medical Officer*, Miss M. Cumberidge, 250*l.*

*Medical Officers*, J. W. Stirling, 850*l.*; K. H. Dyke, 690*l.*; A. E. Young, 690*l.*; C. H. de la Harpe, 690*l.*; D. H. R. Vollet, 630*l.*; R. C. Ogg, 630*l.*; J. A. Gill, 610*l.*; R. G. de Kock, 590*l.*

*Sanitary Inspector*, J. W. Jarvis, 350*l.*

*Matrons*, A. I. Brizzell, M.B.E., 220*l.*; L. A. Pears, 190*l.*; C. J. Adehade, 190*l.*; E. Wilson, 180*l.*

##### Leper Settlement:—

*Superintendent*, P. D. Strachan, 850*l.*

*Medical Officer*, E. Slack, 900*l.*

*Chief Clerk*, P. W. S. B. Doyle, 460*l.*

*Matron*, M. I. Willdon, M.B.E., 300*l.*

*Staff Nurses*, M. Martin, 190*l.*; S. M. van Hollick, 190*l.*; G. E. Mills, 180*l.*;

##### Public Works Department:—

*Director*, H. W. Gibson, 800*l.*

*1st Asst. Engineer*, J. K. Gerrand, B.A., B.Sc., A.M.Inst.C.E.

*Mechanic*, J. J. Pollock, 420*l.*

*Inspector of Roads*, Capt. H. J. Hall, M.C., 405*l.* W. K. Hudson, 420*l.*

##### Education:—

*Director*, F. H. Dutton, O.B.E., M.A.

*Senior Inspector of Schools*, F. M. Reid, 650*l.*

*Inspectors of Schools*, F. H. Pickett, B.A., 420*l.*; H. de C. Stevens-Guille, B.A., 420*l.*; (Vacant).

##### Leretholi Technical School:—

*Director*, O. B. Bull, M.A., 450*l.*

##### Veterinary and Agriculture:—

*Principal Veterinary Officer*, F. A. Verney, O.B.E., F.R.C.V.S.

*Senior Sheep Inspector*, S. J. Steenekamp, 440*l.*

*Stock Inspector*, F. J. Willis, 420*l.*

*Agricultural Officer*, L. F. Wachter, 700*l.*

*Assistant Agricultural Officer*, H. C. Mundell, 330*l.*

##### Poets and Telegraphs:—

*Postmasters*, F. Hodgson, 490*l.*; J. P. Jones, 430*l.*

B. H. van der Merwe, 420*l.*; B. L. Austin, 390*l.*

*Postmistress*, Morija, Mrs. M. Barclay, 380*l.*

##### Officers attached to High Commissioner's Office:—

*Assistant Imperial Secretary*, S. Eales, C.B.E., 1,100*l.* and house allowance 90*l.*

*Clerk*, H. E. Houghton, 360*l.*

## BECHUANALAND PROTECTORATE.

#### Situation and Area.

The territory of the Bechuanaland Protectorate is bounded on the South and East by the Union of South Africa, on the North by Southern Rhodesia and the Zambesi and Chobe Rivers, and on the West by South-West Africa. Its area is estimated at about 275,000 square miles, and the population, according to the census taken in 1921 was 158,152, of whom 1,743 were Europeans or white.

The Caprivi Zipfel, which has, since 1921, been administered as if it were a portion of the Bechuanaland Protectorate, was re-transferred to the South West Africa Administration with effect from the 1st September, 1929.

#### *History.*

During the year 1885, Sir Charles Warren, who was in command of an expedition despatched from England to pacify Southern Bechuanaland, where for some time previously hostilities had been proceeding between the Bechuanas and Boers from the South African Republic, visited the principal chiefs in Northern Bechuanaland (known as the Bechuanaland Protectorate), Khama, Gaseitsiwe, and Sebele, and as a result a British Protectorate was proclaimed over their territories. No further steps were taken until the year 1891, when, by an Order in Council dated 9th May, the limits of the Bechuanaland Protectorate were more clearly defined, and the High Commissioner was authorised to appoint such officers as might appear to him to be necessary to provide for the administration of justice, the raising of revenue, and generally for the peace, order, and good government of all persons within the limits of the Order. Sir Sidney Shippard, the Administrator of Bechuanaland, was appointed Resident Commissioner, and an Assistant Commissioner was appointed for the Northern Protectorate, and another for the Southern Protectorate.

For fiscal and several other purposes the Protectorate was treated as a portion of the Crown Colony of British Bechuanaland, until the latter was annexed to the Cape Colony on the 15th November, 1895. In the autumn of that year arrangements were made for the transfer of the administration of the Bechuanaland Protectorate, with the exception of certain reserves for native chiefs, to the British South Africa Company, but was never administered by that Company. Since the annexation of British Bechuanaland to the Cape the Protectorate has been governed as a separate territory under the name of the Bechuanaland Protectorate, and the form of government is very similar to that which obtains in Basutoland. There is a Resident Commissioner, who is under the direction of the High Commissioner. There are Magistrates at Gaborones, Maufi, Ghanzi, Serowe, Kanye, Lehututu (Tshane), Lobatse, Molepolole, Kasane, Francistown, and Selika. For the maintenance of law and order there is a force of police known as the Bechuanaland Protectorate Police, numbering 300. This force is under the direct control of the Resident Commissioner. There are 7 officers, 2 warrant officers, 25 European sergeants and 51 Basuto non-commissioned officers and men (mounted), and 215 Bechuana dismounted constables. The police are stationed in small detachments at various places in the Protectorate. The head quarters of the Administration is at Mafeking, in the Cape Province.

#### *Climate and Industries.*

The climate is delightful during the winter and fairly healthy during seven months of the year. During the summer months malarial fever is generally prevalent.

The Protectorate is essentially a pastoral country, and although mealies and Kaffir corn are reaped by the natives in large quantities when the season is favourable, the rainfall is insufficient, or perhaps too uneven and uncertain

in its distribution, to render agriculture anything but a hazardous pursuit. The staple product consists of horned cattle, of which, according to the census in 1921, the natives owned 436,344. They also owned 357,926 sheep and goats. A large quantity of fire-wood is exported by rail from the Southern Protectorate, chiefly to Kimberley, and a considerable quantity of timber suitable for mining props is also sent out of the country. Precautions are taken to see that none other than dead wood is exported for fuel, and that in felling trees for mining purposes only those of a certain size are used and only a certain limited number cut down in each locality. In the North, in the Tati district, gold mining has been carried on, on a small scale, for years. During the year 1930-31, 1,997ozs. gold and 360 ozs. silver, of a total value of 8,414s. were produced.

#### *Native Chiefs.*

The principal chiefs are:—

Tshekedi, Chief of the Bamangwato, whose chief town is Serowe (acting during minority of Chief Seretse).

Kgari Sechele, Chief of the Bakwena, who lives at Molepolole.

Bathoen, Chief of the Bangwaketsi, who lives at Kanye.

Kgafela Molefi Pilane, Chief of the Bakgatla, who lives at Mochudi.

Mathibe, Chief of the Batawana, who lives at Lake Ngami, near which at Maufi there is a Resident Magistrate and a small detachment of police under a sub-inspector.

Sebokgo Mokgosi, Chief of the Bamalets, who lives at Ramoutsa.

#### *Means of Communication.*

The main trunk railway to the North, which connects Rhodesia with Cape Town and which has now been extended beyond the Victoria Falls, runs through the Protectorate. The line north of Vryburg in the Cape Province is the property of the Rhodesia Railways, Limited, to whom, under an agreement made in 1894, the Protectorate Government was to pay a subsidy of 20,000s. a year for ten years, which has now lapsed.

A Commission was appointed in 1927 under Proclamation No. 8 of 1927, in conjunction with Statutory enactments in Southern and Northern Rhodesia, to fix railway charges in the three territories. The commission consists of a chairman and three members, one in respect of each territory, viz.: Mr. Roger Gibb (chairman), Mr. J. Fulton (Southern Rhodesia), Sir Richard Goode, C.M.G., C.B.E. (Northern Rhodesia), and Mr. Alexander Warren (Bechuanaland Protectorate).

#### *Finances.*

	REVENUE.	EXPENDITURE.
	£	£
1927-28	147,911	119,904
1928-29	142,246	143,346
1929-30	146,384	155,822
1930-31	148,511	154,923

The estimated expenditure for the year ending the 31st March, 1931, was 154,566s., and the estimated revenue was 154,420s. The revenue is derived principally from Customs and Hut Tax, and the chief item of expenditure is police. Except as

stated below, no customs duty is collected in the Protectorate, but under an Agreement with the Government of the Union of South Africa, Customs revenue, calculated on the average receipts for three completed years prior to Union, is received from the Union Treasury. The Territory collects its own customs duties on spirits and beer manufactured in the Union of South Africa, or in any British Protectorate or possession in South Africa, the Government of which has entered into a customs agreement with the Union.

#### *Establishment.*

*Resident Commissioner*, Lt.-Col. O. F. Rey, O.M.G., 1,350*l.*, and 450*l.* travelling allowance.  
*Assistant Resident Commissioner*, Capt. R. O. M. Reilly, 1,000*l.*, allowance, 150*l.*  
*Government Secretary and Director of Customs*, C. L. O'Brien Dutton, 850*l.* by 25*l.* to 1,000*l.*  
*Financial Secretary, Master and Registrar of Deeds*, R. E. Goodman, 600*l.* by 25*l.* to 800*l.*  
*Chief Clerk and Registrar*, H. H. Price, 400*l.* by 25*l.* to 650*l.*  
*Principal Clerk*, Mrs. E. Harris, B.A., 400*l.* by 20*l.* to 550*l.*, plus house allowance.  
*Accountant*, M. C. Jones, 400*l.* by 20*l.* to 550*l.*  
*Resident Magistrate, Francistown*, Capt. G. E. Nettelton, 600*l.* by 25*l.* to 800*l.*  
*Clerk and Acting Assistant Resident Magistrate*, W. B. Mangan, 400*l.* by 20*l.* to 550*l.*  
*Resident Magistrate, Gaborones*, C. M. Ledebor, 600*l.* by 25*l.* to 800*l.*  
*Acting Resident Magistrate, N'Gamiland*, V. F. Ellenberger, 400*l.* by 20*l.* to 550*l.*, special local allowance, 100*l.*  
*Resident Magistrate, Ghanzi*, W. H. Ellam, (acting), 400*l.* by 20*l.* to 550*l.*. Draws allowance, 50*l.* p.a.  
*Resident Magistrate, Ngwato (Serowe)*, Capt. T. W. Potts, 550*l.* by 25*l.* to 700*l.*, entertainment allowance, 50*l.*  
*Clerk and Acting Assistant Resident Magistrate*, S. L. F. Towne, 400*l.* by 20*l.* to 550*l.*  
*Resident Magistrate, Ngwaketsi (Kanye) and Kgagaladi Districts*, A. L. Ouzen, 550*l.* by 25*l.* to 800*l.*, entertainment allowance, 30*l.*  
*Additional Resident Magistrate, Kgagaladi (Lehututu)*, Sub-Insp. B. K. F. Hurdall (acting), 3*s.* p.d. allowance, in addition to salary as Sub-Insp.  
*Resident Magistrate, Lobatsi*, C. M. Ledebor, 500*l.* by 25*l.* to 800*l.*  
*Resident Magistrate, Kweneng (Molepolole)*, Capt. H. B. Neale, 600*l.* by 25*l.* to 800*l.*, entertainment allowance, 30*l.*  
*Resident Magistrate, Chobe (Kasane)*, Capt. H. Beeching (acting), 400*l.* by 20*l.* to 550*l.*. Additional to Police duties special local allowance, 50*l.*  
*Inspector*, V. G. Gash, 500*l.* by 25*l.* to 600*l.*  
*Sub-Inspectors*, H. Beeching (Hon. Inspector), B. Cronen, J. Hope, O. K. Moseley, R. K. F. Hurdall, S. V. Lawrenson, 400*l.* by 20*l.* to 550*l.*  
*Principal Medical Officer*, Hamilton William Dyke, M.D., Ch.B., 800*l.* by 25*l.* to 900*l.*  
*Medical Officer, Francistown*, D. Drew, B.A., M.B., Ch.B., 550*l.* by 25*l.* to 750*l.*  
*Medical Officer, Serowe*, A. Austin Morgan, B.A., M.B., B.Ch., B.A.O., 550*l.* by 25*l.* to 750*l.*  
*Medical Officer, Gaborones*, M. Gerber, B.A., M.B., B.Ch., B.A.O., 500*l.* by 25*l.* to 750*l.*

*Medical Officer, N'gamiland*, A. Skinner, M.B., Ch. B. (Aber.), 550*l.* by 25*l.* to 750*l.*, special local allowance, 50*l.*  
*Medical Officer, Lobatsi*, D. J. D. Henderson, M.B., Ch.B. (Edin.), F.R.C.S. (Edin.), 500*l.* by 25*l.* to 750*l.*  
*Hospital Assistant and Dispenser, Gaborones*, T. E. Booker, 300*l.* by 15*l.* to 360*l.*  
*Hospital Assistant and Dispenser (Francistown)*, H. Bennett, 300*l.* by 15*l.* to 360*l.*  
*Chief Veterinary Officer*, W. H. Chase, O.B.E., F.R.C.V.S., 700*l.* by 25*l.* to 900*l.* and 100*l.* travelling allowance.  
*Veterinary Surgeon*, B. Holmes, M.R.C.V.S., 500*l.* by 20*l.* to 700*l.*, travelling allowance, 100*l.*  
*Veterinary Surgeon*, W. Hay, M.R.C.V.S., 500*l.* by 20*l.* to 700*l.*, travelling allowance, 100*l.*  
*Veterinary Surgeon*, H. M. Webb, M.R.C.V.S. (temporary), 550*l.*, travelling allowance 100*l.*, N'gamiland allowance, 36*l.*  
*Dairy Experts and Inspectors*, R. England, 500*l.* by 20*l.* to 600*l.*, travelling allowance, 100*l.*, C. A. Challis, 300*l.* by 20*l.* to 450*l.*, travelling allowance, 100*l.*  
*Stock Inspectors*, A. Rutherford, 300*l.* by 15*l.* to 360*l.*, personal allowance, 50*l.*, K. A. Berrell, 300*l.* by 15*l.* to 360*l.*, G. Smith, W. Reid, F. Wright, P. A. Johnstone, R. Hoyle, 300*l.*, 36*l.* special local allowance.  
*Scab Inspectors*, C. J. Nelson, 350*l.*, 50*l.* travelling allowance; A. A. Pedlar, 300*l.* (temporary appointment), N. F. Wright, 300*l.* by 15*l.* to 360*l.*  
*Cattle Export Inspectors*, R. J. Davys, M. D. Maytham, 300*l.* by 15*l.* to 360*l.*, and 100*l.* travelling allowance.  
*Controller of Stores*, A. E. Foadike, 400*l.* by 20*l.* to 550*l.*, and house allowance.  
*Engineer of Public Works*, W. G. Brind, 550*l.* by 25*l.* to 750*l.*  
*Clerk of Works*, J. L. Robertson (500*l.*) temporary.  
*Technical Clerk*, G. Wallington, 400*l.* by 20*l.* to 550*l.*  
*Sub-Postmasters*, J. G. Risch, 336*l.*, R. Crichton, 324*l.*, J. Coutts, 300*l.*, G. Munro, 220*l.*  
*Crown Prosecutor*, Spencer Minchin, LL.B., allowance 250*l.*  
*Clerk attached to High Commissioner's Office*, E. Cohen, M.B.E. (720*l.*)  
*Local Auditor*, T. A. Williams.  
*Inspector of Education*, H. J. E. Dumbrell, 600*l.* by 25*l.* to 700*l.*, 130*l.* house allowance, 180*l.* travelling allowance.  
*President of the Special Court*, The Hon. P. Duncan, C.M.G., K.C., M.P.

#### SWAZILAND.

##### *Situation and Area.*

Swaziland is bounded on the North, West, and South by the Transvaal, and on the East by Portuguese territory and Tongaland, now part of the Natal Province.

Its area is 6,704·6 square miles.

##### *Description and Climate.*

The territory is divided geographically into three longitudinal regions.

The mountainous region on the West approximates an altitude of over 4,000 feet.

What is known as the Middle Veld is some 2,000 feet lower, while the Low Veld, bounded on the East by the Ubombo Mountains, attains an average altitude of not more than 1,000 feet. The

first two regions are remarkably well watered. Innumerable small streams unite with the large rivers which traverse the country from West to East; except for these the Low Veld is not very well watered, though bore holes put down by private enterprise have revealed the existence of underground supplies of water at several places.

Swaziland is on the whole very healthy, but in common with other parts of similar country in South Africa, malaria is prevalent in the Low Veld during some of the summer months.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet, and Bremersdorp, the old capital, is on the Middle Veld. Other European centres are the Government Stations at Hlatikulu, Mankaiana, Stegi, Pigg's Peak and Goedgegun.

#### *Native History.*

The Swazis are an allied race to the Zulus and speak the same language, with minor modifications. According to themselves the tribe lived originally in Southern Tongaland, from whence they migrated about 300 years ago to the Tshiselweni country, that is the country to the West of the Ubombo Range, between the Pongolo and the Great Usutu Rivers. Here they remained until 1815 when being attacked by Zwide, Chief of the Ndwande, the major portion of the tribe under their chief Sobhuza, better known as Somhlolo, fled north and settled near the present site of Bremersdorp. The petty tribes or clans of Baroswi, Bavenda or Bapedi origin then in occupation of Swaziland North of the Great Usutu, were conquered and absorbed. Under Sobhuza and his successor Mawazi, they occupied territory up to Barberton in the North and extending towards Carolina and Ermelo on the West, while the tribes occupying what is now the Lydenburg District also paid tribute to the Swazi King.

The Swazis are known to themselves and other native tribes as the Ama-Ngwane, that is, the people of Nkwane, one of their early Chiefs, and the country as Kwa-Ngwane, the land of Nkwane. After their flight to the North they were never seriously disturbed, though they were occasionally raided by Zulu tribes from the South, especially after the death of Dingana, who was killed by a Swazi Impi on the Southern border, after his defeat by the Boers and his brother Mpande. Subsequently through the good offices of Sir Theophilus Shepstone (Somtseu) amicable relations subsisted with Mpande, the Zulu King and his successor Cetyswayo. In 1879 the Swazis lent assistance to the British in the war against Sikukuku (Sikukuni), but took no part in the Zulu War. Through the possession of secret medicines, used in the propitiation of the spirits of ancestral Chiefs, the Swazi Chiefs hold a pre-eminent position as rain makers. The native Government consisted of the King and his Council, made up of the *Malangeni*, the Chiefs of royal blood, and the Chief indunas of the tribe. The assistance of the witchdoctors was called in whenever necessary, to communicate with the spirits of departed Chiefs and to clean the country of sorcerers and other doers of evil. A military system of trained regiments on the lines formulated by Dingiswayo and Tshaka was adopted, mainly no doubt as a defence against the Zulus.

In the year 1846 Mawazi ceded whatever rights he had in the Lydenburg District to the Lydenburg Republic. Subsequently he, and later,

Mbandini, entered into agreements purporting to cede the whole of the territory to that Republic and to its successor the late South African Republic. These later cessions were in fact nullified by the Conventions of 1881 and 1884 entered into between Great Britain and the Republic though the boundaries of the Transvaal laid down in the 1881 Convention constituted a considerable encroachment on what was claimed to be Swazi Territory.

In 1921 the Chief Regent Labotsibeni handed over her duties to her grandson Sobhuza, who was duly installed as Paramount Chief. The Chief Regent had a long term of office after the death of her husband, Mbandeni, in 1889 and, later, of her son Bhunu. She was a wise chief and did valuable work for her people and country. Her relations with the Administration were always of a friendly nature; she died in 1925. The Paramount Chief is 30 years of age. He was educated at Zombode and Lovedale.

#### *European Settlement.*

During the eighties the King Mbandini in return for money and other payments granted concessions for various periods. Every conceivable right was granted away, not only for land, minerals, grazing, and timber, but also for all imaginable purposes, including exemption from taxes, for railways, telegraphs, mining patents, collection of the King's revenue, trading, etc., All unallotted land and minerals also formed the subject of concessions.

In 1888 a charter of self-government was granted to the whites in the country. Later, in 1890, under a Convention between the British Government and the South African Republic, a provisional Government was, with the consent of the Swazis, set up, consisting of a Government Committee composed of representatives of those two Powers, and a representative of the Swazis, a Government Secretary, Attorney General and other officials and of a Chief Court. This Court adjudicated on the initial validity of all concessions granted by the King, and, with a few exceptions, confirmed the grants in respect of such initial validity.

In accordance with pledges given to the Government of the South African Republic the provisional Administration came to an end three years later, when the British Government signed a fresh Convention, which permitted the South African Republic to acquire from the Regent and her Council an Organic Proclamation conferring on the South African Republic rights of jurisdiction, legislation and administration without incorporation in the South African Republic. The Swazis refused to sign the Organic Proclamation which had been drafted for them, and accordingly its provisions, with some of those in the 1893 Convention, were embodied in the final Convention of 1894, under which the South African Republic exercised powers of protection, legislation, jurisdiction and administration in Swaziland, subject to the limitations of the Convention.

On the conquest of the Transvaal, all the rights and powers of the late South African Republic passed to His Majesty, but since the other party to the Convention of 1894 had disappeared without the limitations therein, an Order in Council under the Foreign Jurisdiction Act was issued in June, 1903, providing that the Governor of the Transvaal should administer Swaziland, and conferring on him the right to legislate by Proclamation.

On the cessation of hostilities a British Special Commissioner, with a small force of South African Constabulary, was sent into the country, and a provisional Administration was established.

In accordance with the powers granted to him, the Governor issued a Proclamation in 1904 providing for administration and for dealing with the concessions question. The Laws of the Transvaal in force at the date of the Proclamation were applied to Swaziland, *mutatis mutandis*. Courts were established with the rights of appeal to the Supreme Court of the Transvaal, and an appeal was permitted from the decisions of the chiefs in civil matters to the Court of the Resident Magistrate. The chiefs were otherwise confirmed in their civil jurisdiction over natives, subject to the exclusion of usages incompatible with the due exercise of His Majesty's power and jurisdiction, or clearly injurious to the welfare of the natives.

The Commission constituted under the Proclamation of 1904 to deal with the concessions examined the concessions granting the exclusive rights, except exclusive rights to land and minerals, with a view to their expropriation at their value prior to the commencement of hostilities. The Commission reported in 1906, and the concessions, the subject of its report, were, with few exceptions, expropriated. The Commission subsequently dealt with the question of boundaries of land, mineral and grazing concessions. The general survey of these concessions, necessary to determine the conflicting rights, was also completed. Under the Concessions Partition Proclamation issued in 1907 land and grazing concessions were subjected to a deduction of one-third of their area for the sole and exclusive use and occupation of the natives of Swaziland and the remaining two-thirds were freed from such occupation subject to the provision that for five years from July 1st, 1909, no natives actually resident on such land could be compelled to move therefrom but after that period they could only continue to occupy such land on terms to be agreed upon between themselves and the concessionaires. These Agreements are subject to confirmation by the Resident Commissioner. Proclamation No. 24 of 1913 provided simple and effective machinery for the removal of natives from concessions after the period of five years had elapsed. This took place in 1914 and there was no large movement of natives from concessions. Those who desired to move did so voluntarily and the remainder made terms with the concessionaires and remained on the farms.

Of the total area of Swaziland, 4,290,661 acres, 1,638,093 acres have been set aside for the exclusive use of the Swazis and they have, in addition, acquired by purchase, 77,076 acres.

By an Order in Council, dated 1st December, 1906, the control of Swaziland was transferred from the Governor of the Transvaal to the High Commissioner for South Africa. Under the Order in Council the High Commissioner issued a Proclamation in March, 1907, providing for the appointment of a Resident Commissioner, a Government Secretary, Assistant Commissioners, and the establishment of a Police Force. The Laws of the Transvaal were re-enacted, *mutatis mutandis*, and, except where modified by Statute, the Roman-Dutch Common Law was put in force by the Proclamation. A special Court, having the full jurisdiction of a Superior Court, was established together with Courts of Assistant Commissioners with a limited jurisdiction.

The paramount chief and other chiefs were confirmed in their Civil Jurisdiction over natives subject to appeal to the Resident Commissioner. Provision was made for the Swaziland Deeds Office and Surveyor-General's Office to remain at Pretoria under control of the officers responsible prior to the date of the Proclamation.

An elected Advisory Council, representative of the Europeans, was established in 1921, to advise the Administration on purely European affairs.

#### Population.

The population of Swaziland, according to the census of 1921, was 2,203 whites, 463 coloured, 111,106 Natives—Bantu.

#### Religion and Education.

The Anglican Church, the Roman Catholic Church, The South Africa General Mission, the Scandinavian Alliance Mission, the African Methodist Episcopal Mission, the Wesleyan Methodist Mission, the Independent Methodist Mission, the Pentecostal Church of the Nazarene, the American Pilgrims' Holiness Union, the Berlin Lutheran Mission, the Full Gospel Mission of Norway, the African Congregational Church, the Lebombo Pentecostal Mission, the Norway Free Evangelical Mission to the Heathen, the Christian Apostolic Church of Zion, the Zion Apostolic Church of South Africa, and the Swedish Alliance Mission have representatives in the country.

The Administration has established a native school at Zombodze, at which the paramount chief was educated. The principal European School is St. Marks, Mbabane, with a roll of 96, drawn from Swaziland, the Eastern Transvaal, and Portuguese East Africa. The Government also maintains 12 schools for European children at various centres, and makes annual grants to the various native missions which undertake native education.

#### Industries, Agriculture and Trade.

Mining in Swaziland is carried out under the authority of Concessions granted by the late King Mbandini. Tin is found in payable quantities in the vicinity of Mbabane. Gold mining was carried on for some years at the Pigg's Peak and other mines, but, owing to the increased cost of this class of mining all work has ceased for the present. The Crown owns a few mineral areas, and legal provision has been made for the exploitation of these by the public in the event of payable minerals being discovered.

#### Output of Tin.

1928	-	186 tons	valued at £39,706
1929	-	185 "	" " 38,692
1930	-	161 "	" " 23,414

#### Gold.

1928	-	347 ozs.	valued at £1,475
1929	-	90 "	" " 382
1930	-	Nil "	" " —

There are approximately 340,000 head of horned stock, and 161,000 native sheep and goats in the territory. Cattle ranching on a large scale has been in operation for some years.

The Coal Mines Ranch has about 7,800 head of cattle. Several other farmers have herds of cattle ranging from 1,000 to 3,000 head. The young stock from the imported bulls on the ranches show a very marked improvement on the local cattle.

The stock is fat all the year round and fat oxen can be put on the market in the winter and spring without any artificial feeding.

Dipping of all cattle is consistently carried out and diseases of stock are not more virulent here than elsewhere in South Africa. The East Coast fever disease has now almost been eradicated.

Approximately 350,000 sheep (Merinos) are brought in from the Transvaal high veld for winter grazing but this class of sheep has not so far been farmed in the Territory otherwise.

From an agricultural point of view farming is assuming some importance owing mainly to the grant on easy terms of allotments of Crown Land to European settlers.

Maize is the staple product. The growing of cotton in suitable localities has proved successful and in 1930, 9,000 acres were under cultivation. Tobacco is also a paying crop, about 590,000 lbs. being grown in 1930, and many portions of the Territory have been favourably reported on for citrus and sub-tropical fruits. There are no railways. In January, 1928, the Railways and Harbours Administration of the Union of South Africa established Road Motor Services on the main routes in Swaziland. In February, 1930, the Portuguese East African Administration opened a daily motor service between Goba railroad and Stegi in Swaziland the latter village being the eastern terminus of the South African Railways Motor Service. The Swazis grow the usual native crops but in insufficient quantity to feed themselves. Efforts are however being made to improve their methods.

No statistics of the imports into and the exports from Swaziland are now kept. By an agreement with the Government of the Union of South Africa, Swaziland is dealt with, for Customs purposes, as a part of the Union. Payments due to Swaziland are assessed on the proportions which the average of the collections for the three years ended March 31st, 1910, bears to the total customs collections of the Union in each year. The imports consist principally of maize, flour, groceries, wearing apparel, hardware, spirits, tobacco, and kaffir truck; while the principal exports are cassiterite tin, cotton, tobacco, hides, and slaughter oxen.

There are branches of Barclay's Bank (Dominion, Colonial and Overseas) at Mbabane, Hlatikulu, Bremersdorp, and Stegi, and branches of the Standard Bank of South Africa, Ltd. at Bremersdorp and Stegi, and Post Office Savings Banks at Mbabane, Bremersdorp, Hlatikulu, Stegi, and Pigg's Peak. The currency is British.

Stores exist where necessary to serve the needs of the population, but the volume of trade is small.

#### Revenue and Expenditure.

The revenue and expenditure for the two years ended March 31st, 1931, were:—

1929-30 Revenue ...	£111,091
Expenditure ...	£119,223
1930-31 Revenue ...	£89,604
Expenditure ...	£116,603

The public debt on March 31st, 1931, was 35,000*l.* for the repayment of which provision has been made through the medium of a sinking fund.

#### Establishment.

*Resident Commissioner*, T. Ainsworth Dickson, C.M.G., M.C., 1,350*l.*, and 380*l.* travelling and subsistence allowance.

*Deputy Resident Commissioner and Government Secretary*, B. Nicholson, C.B.E., D.S.O., M.C., 1,100*l.* personal salary (850*l.* by 50*l.* to 1,000*l.*).

*Assistant Government Secretary*, L. J. Puttick, 700*l.* (600*l.* by 25*l.* to 800*l.*).

*Financial Secretary*, J. R. Armstrong, 800*l.* (600*l.* by 25*l.* to 800*l.*).

*Accountant*, W. H. Russell, 550*l.* (400*l.* by 20*l.* to 550*l.*).

*Assistant Commissioner, Hlatikulu*, A. G. Marwick, O.B.E., 1000*l.* personal salary (600*l.* by 30*l.* to 850*l.*), 75*l.* subsistence allowance, motor allowance.

*Deputy Assistant Commissioner, Hlatikulu*, W. W. Usher, 650*l.* (550*l.* by 25*l.* to 650*l.*), 40*l.* subsistence allowance, motor allowance.

*Assistant Commissioner, Mbabane, at Bremersdorp*, S. B. Williams, 625*l.* (600*l.* by 25*l.* to 800*l.*), 111*l.* subsistence and horse allowance, motor allowance.

*Deputy Assistant Commissioner, Mbabane, at Pigg's Peak*, H. W. Boast, 600*l.* (400*l.* by 20*l.* to 550*l.*), 40*l.* subsistence allowance.

*Deputy Assistant Commissioner, Mbabane (Acting)*, R. Armstrong, 400*l.*, motor allowance.

*Assistant Commissioner, Mankaisana*, D. H. Harvey, 800*l.* (600*l.* by 25*l.* to 800*l.*), 111*l.* subsistence and horse allowance, motor allowance.

*Assistant Commissioner, Umombo*, H. B. A. McCarter, 725*l.* (600*l.* by 25*l.* to 800*l.*), 75*l.* subsistence allowance, motor allowance.

*Auditor*, T. A. Williams.

*Chief Clerk, High Commissioner's Office*, H. L. Smith, 750*l.*

#### Judicial.

*Special Court of Swaziland: President*, The Hon. P. Duncan, K.C., C.M.G., M.P. *Members*, The Resident Commissioner, the Deputy Resident Commissioner, and four Assistant Commissioners. *Master, Registrar and Sheriff (Acting)*, A. E. Pasea, 360*l.* (200*l.* by 15*l.* to 360*l.*), special allowance 75*l.* *Crown Prosecutor*, C. T. Blakeway, B.C.L.

#### Medical.

*Principal Medical Officer*, R. Jamison, M.B., B.Ch., B.A.O. (Irl.), F.R.C.S. (Eng.), D.T.M. & H., 875*l.* (800*l.* by 25*l.* to 900*l.*), 75*l.* subsistence allowance, motor allowance.

*Medical Officer, Hlatikulu (Temporary)*, H. Heydenreich, M.B., B.Ch. (Witwatersrand), 600*l.*, 111*l.* subsistence and horse allowance, motor allowance.

*Hospital Assistants and Dispensers*, 300*l.* by 15*l.* to 360*l.*; *Hlatikulu*, H. R. Barnard, 400*l.* personal salary; *Mbabane*, J. O'N. Anderson, 360*l.*; *Mankaisana*, A. G. Lunnis, 345*l.*

#### Veterinary and Agriculture.

*Principal Veterinary and Agricultural Officer*, W. A. Elder, O.B.E., F.R.C.V.S., 875*l.* (700*l.* by 25*l.* to 900*l.*), 111*l.* subsistence and horse allowance, motor allowance.

*Assistant Agricultural Officer*, E. E. S. Thomas, 300*l.*, 40*l.* subsistence allowance, motor allowance.

#### Education.

*Inspector of Education*, H. J. E. Dumbrell, B.A., 675*l.* (600*l.* by 25*l.* to 700*l.*), 130*l.* house allowance, 180*l.* subsistence allowance, motor allowance. Services shared with Bechuanaland Protectorate.

#### Police.

*Inspector*, E. D. Fenn, 480*l.* (400*l.* by 20*l.* to 550*l.*), 111*l.* subsistence and horse allowance.

#### Public Works.

*Government Engineer*, J. H. Gardner, B.Sc., A.M.I.C.E., 700*l.* (500*l.* by 20*l.* to 700*l.*), 75*l.* subsistence allowance, motor allowance.

*Inspector of Roads and Works*, G. F. Parrooks, 360*l.*

## SOUTHERN RHODESIA.

The limits of Southern Rhodesia, as defined by the Southern Rhodesia Order in Council, dated 20th October, 1898, are the parts of South Africa bounded by the Portuguese Possessions, by the Transvaal Colony to a point opposite the mouth of the River Shaashi, by the River Shaashi to its junction with the Tati and Ramaquaban rivers, thence by the Ramaquaban river to its source, thence by the watershed to the Rivers Shaashi and Ramaquaban until such watershed strikes the Hunter's Road (called the Pandamatenga Road), thence by that road to the River Zambesi, and by that river to the Portuguese boundary. The said limits include an area of ten miles' radius round Fort Tuli, but exclude the area of the district known as the Tati district as defined by the Charter.

### *History.*

On the 29th October, 1889, a Royal Charter was granted to the British South Africa Company, conferring upon it large powers of administration to carry out the objects for which it was formed, the principal being to extend northwards the railway and telegraph systems of the Cape Colony and Bechuanaland, to encourage emigration and colonisation, to promote trade and commerce, and to develop and work mineral and other concessions.

Early in 1890 a police force of Europeans was raised and equipped, and in June of that year, after obtaining permission from King Lobengula, a pioneer expedition on a large scale was organised to cut a road from a point on the Macoutais River, a tributary of the Limpopo, through the south-eastern part of Matabeleland into Mashonaland, the objective point of the expedition being Mount Hampden, near which large belts of gold-bearing quartz were known to exist. This point was duly reached, and Fort Salisbury, 12 miles South-east of Mount Hampden, having been founded (12th September, 1890) the pioneers were disbanded, and, in accordance with the agreement made with them, were allowed to peg off auriferous claims and farms.

In July, 1893, the Matabele made a raid into Mashonaland, and killed a number of natives living under the Company's protection, near Victoria, when they were attacked and driven back by the Company's police. After an unsuccessful attempt to arrange matters, preparations were made for the invasion of Matabeleland, to anticipate an expected attack on the Bechuanaland Protectorate and Mashonaland. The Company's police and a small force of volunteers and native allies advanced on Bulawayo from the east, while the Bechuanaland Police, which had been largely reinforced, advanced with Khama and some 2,000 of his men by way of Tati from the south. Two successful engagements were fought by the Company's forces near Bulawayo, in which the Matabele suffered very severely. The Bechuanaland police were also attacked by a strong force of Matabele, which they repulsed with great loss. Lobengula fled, and Bulawayo was occupied, and a force sent in pursuit of the king.

This force was unfortunately divided by the sudden rising of the River Shangani, and Major Wilson and a small party of men were, after a heroic resistance, killed to a man. Arrangements for the future administration of the country were completed by the High Commissioner and

Mr. Rhodes on behalf of the Company. Lobengula, who was said to be endeavouring to escape across the Zambesi, is reported to have died from small-pox or fever.

In 1896, owing to a variety of causes, the Matabele broke out in rebellion, and shortly after the Mashonas followed suit. After a prolonged struggle the rebellion was subdued in September, 1897.

From 1897 to 1899 the development of the country advanced rapidly, but the outbreak of the war with the Republic, in October, 1899, practically put a stop to progressive work of every kind and the investment of Mafeking and the occupation by the Boers of a section of the railway in Bechuanaland cut the Territory completely off from communication with the South. During the operations that followed, a conspicuous part was played by the British South African Police and by Volunteers from the civilian population of Rhodesia, many of whom continued, after the relief of Mafeking, to serve until peace was declared in other parts of the theatre of War. It was estimated that the number of men contributed by Rhodesia, was approximately 1,500, being at least 12½ per cent. of the European population. Their good work earned frequent mentions in despatches and secured the special approbation of the Commander-in-Chief.

The period between 1902 and the outbreak of the Great War of 1914-18 was one of, for the most part, uneventful but useful progress and consolidation. In October, 1902, the railway linking up Salisbury and Bulawayo was completed, while by 1904, the railway had been pushed on to the Victoria Falls, thus linking Northern Rhodesia to the Cape, and forming a further step towards the fulfilment of Rhodes' great dream of a railway from the Cape to Cairo.

During this period also there was considerable political activity, and the desire of the settlers for increased political representation was met by the Southern Rhodesia Order in Council, 1903, which increased the numbers of the Legislative Council to 14 (7 elected and 7 nominated members) exclusive of the Administration and Resident Commissioner. In 1907 the number of nominated members was reduced to 5.

There was also considerable agitation concerning the ownership of unalienated land in the Colony which was finally settled by the decision of the Privy Council in 1918 that the land was the property of the Crown.

A brief account of the operations against the German territory in East and South-west Africa, and of the part played in the Great War by Southern and Northern Rhodesia, appears under the section Northern Rhodesia.

Towards the end of 1918, the British South Africa Company put forward their claim for the sum of £7,500,000 (later amended to £7,800,000) in respect of deficits in administrative expenditure paid by the Company. Early in 1919, the Legislative Council asked H.M. Government what proof of financial or other fitness was required from the people of Southern Rhodesia before Responsible Government would be granted. In July of that year, the Cave Commission was appointed to examine the Company's claim mentioned above. In January, 1920, the Commission awarded the Company some £4,400,000, subject to certain adjustments. The way was now clear for some change in the system of Government in the Colony and this is dealt with at some length under the section devoted to the

y owns the  
odesia and

Rhodesia. In March, 1921, the Secretary for the Colonies appointed a committee, Earl Buxton was chairman, to consider questions relating to Southern and Northern

resistance, killed to a man. Arrangements for the future administration of the country are completed by the High Commissioner and now clear for the future Government in the Colony and this is dealt with at some length under the section devoted to the

"Constitution." Finally, Responsible Government was granted in September, 1923.

The first election under Responsible Government took place in April, 1924, and resulted in the return of the Responsible Government Party under the leadership of Sir Charles Coghlan, the first Premier of Southern Rhodesia, by a substantial majority. Sir Charles Coghlan died in 1927, and was succeeded as Premier by the Hon. H. U. Moffat, C.M.G.

In accordance with the terms of Article 18 (2) of the Constitution a general election took place in 1928, which again resulted in the return of the Government Party. Mr. H. U. Moffat again accepted the Premiership.

Between the grant of Responsible Government and the end of 1929, the Colony has made great progress. Considerable expansion has taken place in agricultural and mining production, a large volume of immigration has been absorbed, the railway system has been extended and road motor services inaugurated.

The principal legislative measures passed during the period 1924-29 include the Cold Storage Act (1924); the establishment of the Land and Agricultural Bank (1925); the Defence Act instituting compulsory military training for young Rhodesians (1928); the Railway Act to control railway rates on the lines of the English Railway Acts 1926).

The Motor Vehicles Act (1927) providing for the registration of motor vehicles, etc.; the Medical, Dental and Pharmacy Act (1927) making provision for the registration of medical practitioners, dentists, chemists and druggists, midwives and nurses, and other matters.

In 1928 the principal measures passed included Act No. 7 (Electoral Districts Delimitation and Voters Lists) Act No. 10 (To amend the law as to the property of married persons) and Act No. 22 (To provide for the taxation of certain land).

In 1929 Act No. 5 establishing a Department of Native Development, Act No. 9 to enable effect to be given to the International Convention for Regulating Air Navigation, and The "Land Apportionment Act, 1930" provides for the apportionment and conditions of tenure of certain lands in the Colony. The Royal Assent to this Act was signified on 28th July, 1930. The Act will come into force on a date to be fixed by Proclamation.

The principal measures passed in 1929-30 included Act No. 7 (Compulsory Education); Act No. 17 (Workmen's Compensation); Act No. 9 (To Regulate Money-Lending); Act No. 33 (To regulate the Sale and Export of Tobacco); Act No. 36 (Municipal Act, consolidating and amending the Legislation relating to Municipalities). In 1930-31 several Acts were passed providing for the control of agricultural products. These included Act No. 23 (Dairy Industry Control Act); and Act No. 33 (Maize Control Act). Among other measures may be mentioned Act No. 14 (To regulate Appeals from the High Court); Act No. 28 (To make provision for the issue of Bank Notes); and Act No. 29 (Public Services Act), consolidating the law relating to the conditions of service in the Civil Service of the Colony.

#### *Constitution.*

In 1888 that portion of Rhodesia now known as Southern Rhodesia was declared to be within the British sphere of influence, and on the 29th October, 1889, a Royal Charter was granted to the British South Africa Company, conferring upon it large powers of administration to carry out the objects for which it was formed.

At an Extraordinary General Meeting of the shareholders of the British South Africa Company, held on the 14th of December, 1889, a resolution was passed agreeing to accept the amendments proposed by Her Majesty's Government to be made in the original Charter of the Company by a Supplemental Charter, and a further resolution was passed approving certain alterations in the original Deed of Settlement of the Company.

The Constitution of Southern Rhodesia, originally laid down by the Charter, was subsequently amended by the Orders in Council of the 9th May, 1891; 30th July, 1891; and 18th July, 1894, the latter being known as the "Matabeleland Order in Council." This Order was revoked by the Southern Rhodesia Order in Council of 1898, which provides for the Administration of the Territory, Legislation, the Preservation of Peace and Order, the Constitution of Courts of Justice, and Native Administration. This Order was amended by several Orders in Council.

By a Proclamation, dated 10th June, 1891, the laws of the Cape Colony in force on that date were adopted for and are administered in Southern Rhodesia as far as the circumstances of the country will permit, unless amended or repealed by the Legislative Council. The laws of the Cape Colony passed subsequent to the 10th June, 1891, do not apply to Rhodesia.

For the administration of justice there is a High Court with civil and criminal jurisdiction, the judges being appointed by the Governor. In the districts there are Magistrates' Courts. Appeals from the High Court lie to the Supreme Court of the Cape of Good Hope, and thence to the Privy Council.

Clause 33 of the Company's Charter reserved to the Crown the power at the end of twenty-five years from the date of the Charter, and at the end of every succeeding period of ten years, to add to or repeal any of the provisions of the Charter or to enact other provisions in substitution for or in addition to any of its existing provisions. It was further provided that this power should only be exercised in relation to so much of the Charter as related to administrative and public matters, and failing the exercise of this power the Charter was automatically extended for another ten years.

At the expiration of the first period of twenty-five years, viz., in October, 1914, His Majesty's Government, after ascertaining the views of the Company and of the Legislative Council of Southern Rhodesia, decided to advise the issue of a Supplemental Charter containing a proviso that if during the ensuing ten years the Legislative Council should, by an absolute majority, pass a resolution praying the Crown to establish a responsible government, and should support it by evidence showing that the condition of the Territory, financially and in other respects, was such as to justify this course, it should be lawful for the Crown to make such alterations in the Charter as might be necessary for the purpose.

A Supplemental Charter, giving effect to this arrangement, was issued on 13th March, 1915.

In May, 1920, the Legislative Council passed a resolution praying that responsible government should be established forthwith in Southern Rhodesia. In March, 1921, the Secretary of State for the Colonies appointed a committee, of which Earl Buxton was chairman, to consider certain questions relating to Southern and Northern

Rhodesia. The first report of the committee, dealing with Southern Rhodesia, recommended that the question whether that territory was or was not prepared to adopt responsible government should be decided at the earliest possible moment, and that a scheme for responsible government should be drawn up in detail and placed before the electors for their acceptance or rejection, by referendum rather than a general election.

In accordance with the recommendations of the report, the Secretary of State invited a deputation of the elected members of the Legislative Council to discuss with him the drafting of a provisional scheme of responsible government for Southern Rhodesia. The deputation came to London, and after confidential discussions returned to Southern Rhodesia in December, taking with it draft Letters Patent providing for the constitution of responsible government in that territory. These were shortly afterwards made public by the Secretary of State, who at the same time stipulated that the Government of the Union of South Africa should be approached with the object of ascertaining the terms upon which Southern Rhodesia could be admitted to the Union, and that the alternative policies should in due course be submitted to the people of Southern Rhodesia in the form of a Referendum.

The delegation proceeded to Cape Town, and as a result of conferences held by them with General Smuts and his ministers an official memorandum was published on the 31st July, giving the terms which the Government of the Union was prepared to recommend to Parliament for the admission of Southern Rhodesia. The draft Letters Patent for responsible government and the terms of admission to the Union were placed before the electors at a Referendum on the 27th October, 1922, with the result that 8,774 voted for responsible government and 5,989 for joining the Union—a majority of 2,785 in favour of the former.

On the 12th September, 1923, the 23rd anniversary of the occupation of Mashonaland, the territory was formally annexed to the British Dominions with the title of "Colony of Southern Rhodesia," and on the 1st October following, the Colony was granted by Letters Patent responsible government under a constitution which provides for a legislature consisting of a Legislative Council and a Legislative Assembly of thirty members. Pending the election of the first Legislative Assembly, the constitution provided for the temporary continuance of the existing Legislative Council. Subject to reservations as to the alteration of the constitution, legislation in relation to native affairs and certain other matters, the Legislature may make all laws required for the peace, order and good government of the Colony.

The Governor is empowered to assent to a law passed by the legislature, withhold his assent or reserve the law for signification of the King's pleasure.

Appointments to the office of Minister are made by the Governor. They shall not exceed six in number, one of whom shall be the head of the ministry and is styled the Premier.

The Governor and Commander-in-Chief of the Colony is assisted by an Executive Council. A session of the legislature is to be held once at least in every year. The duration of each house will be five years. Women are entitled to vote at elections and to sit in the Legislative Assembly.

Formerly the Colony was divided for Electoral purposes into 15 two-member Constituencies, but under the Electoral Districts Delimitation and Voters' Lists Act of 1928, the Colony is divided into four two-member Constituencies, and 22 single-member Constituencies. This re-arrangement came into operation for the first time at the General Election in September, 1928.

Under the new Electoral Law promulgated on 27th July, 1928, the franchise is extended to all British subjects by birth or naturalisation, not under 21 years of age, who have resided in the Colony for at least six months, subject to certain other qualifications respecting the occupancy of houses and other buildings, ownership of a mining location, the receipt of income, wages, or salary at the rate of not less than 100*l.* p.a. Subject to the six months residential qualification, a married woman is deemed to possess the same qualification as her husband in cases where she does not possess the said qualifications in her own right. Natives can acquire the franchise on the same conditions as Europeans.

Sir Drummond Chaplin retired from the post of Administrator of Southern Rhodesia on the grant of responsible government, and on the 1st October, 1923, Lieut.-Col. Sir John Robert Chanceller, G.C.M.G., D.S.O., assumed office as Governor and Commander-in-Chief. The latter's period of Office expired on 30th September, 1928, and he was succeeded in the Office of Governor by Sir Cecil Hunter Rodwell, K.C.M.G.

#### *Local Government.*

Salisbury and Bulawayo were constituted municipalities in October, 1897, Gwelo and Umtali in August, 1914, and Gatooma in August, 1917. Town Management Boards have been appointed at Que Que, Victoria, Umvuma, Enkeldoorn, Shabani, and Bindura. Village Management Boards are appointed for fourteen other principal places. In certain districts, Road Councils have been established for the improvement of roads in their area.

#### *Chief Towns.*

The six chief towns of Southern Rhodesia are Salisbury (the seat of the Government), Gatooma, and Umtali in Mashonaland; and Bulawayo, Gwelo, and Que Que in Matabeleland.

#### *Railways.*

The Bechuanaland Railways (now Rhodesia Railways, Limited) reached Bulawayo on the 19th October, 1897, and the line to that town was formally opened on the 4th November. An extension of the Beira Railway from Umtali reached Salisbury on the 1st May, 1899, and was opened on the 22nd May. On the 1st August, 1900, the widening of the gauge of the Beira Railway to 3 feet 6 inches, the standard gauge of South Africa, was completed. On the 6th October, 1902, the line was completed between Salisbury and Bulawayo, a distance of 299 miles, thus establishing through communication between Cape Town and Beira (2,033 miles). The line passes through the mining districts of Hartley, Queque, Gwelo, Bembesi, etc. The railway from Bulawayo to the Victoria Falls (280 miles) on the River Zambesi was completed in June, 1904, and the further extension northward into Northern Rhodesia, *via* Kalomo, to the Broken Hill Mine, 375 miles from the Falls, was opened for

traffic on 1st September, 1906. A further section of the line from Broken Hill to the Congo Border (132 miles) was completed in December, 1909, by the Rhodesia-Katanga Junction Railway and Mineral Company, Limited. There is, therefore, through communication between Cape Town and the northern border of Northern Rhodesia, a total distance of 2,165 miles and thence to Bukama in the Belgian Congo, a total of 2,610 miles. The distance from Cape Town to Beira is 2,033 miles. The Zambesi river is crossed by a bridge 650 feet long, 30 feet wide, and about 420 feet above the level of the water. The structure was formally opened by the late Sir G. H. Darwin, K.C.B., President of the British Association, on the 12th September, 1906.

During 1928, a new branch railway extending from Somabula to Shabani, a distance of 62 miles, was opened, tapping an important mineral area yielding asbestos, chrome, etc.

A branch line from N'dola to Roan Antelope (Northern Rhodesia), 23½ miles in length was opened for traffic in 1929. Branch lines in course of construction at 30th Sept. 1929 included (a) the N'kana Branch in Northern Rhodesia and (b) the Lomagundi Branch Extension and the Umyukwes Branch in Southern Rhodesia.

The total mileage of the Rhodesian Railway Systems (including the Beira Railways) on 30th Sept. 1930 was 2,628 miles, of which 1,348 miles was situated in the Colony.

The Trans-Zambesia Railway was officially opened in 1922. The railway is 157 miles in length from its junction at Dondo with the Beira and Mashonaland trunk line, and the total distance from Beira to the Zambesi is 175 miles. The gauge of the line is the same as that in Rhodesia and Nyasaland.

#### *Settlements with British South Africa Company.*

In 1923 a settlement of the various outstanding questions relating to the Company's position in Southern and Northern Rhodesia was arrived at with His Majesty's Government. The effect of the settlement, which was conditional upon its acceptance by the shareholders and the approval of Parliament, was that the Company surrendered its rights and claims under the judgment of the Judicial Committee of the Privy Council relating to Southern Rhodesia, and under the award of Lord Cave's Commission; that it surrendered its buildings and assets used for administrative purposes, and its land and monopoly rights other than mineral rights under its concessions in Northern Rhodesia; that on the other hand the Company would receive on 1st October a cash payment of 3,750,000l. from His Majesty's Government, and would retain a half interest for 40 years in the net proceeds of the disposal of land in North-Western Rhodesia, such disposal to be in the hands of the administration of the territory; that it would receive the Crown's recognition of its mineral rights throughout Rhodesia, Southern and Northern, and a considerable measure of protection for its railway interests; and that the Crown would waive its whole claim against the Company in respect of extraordinary military expenditure incurred in the course of the Great War. Subject to the foregoing, the Company would retain the whole of its commercial rights and assets; no further question would be raised as to any liability of the Company in respect of land appropriated for the purpose of its own commercial undertakings or

granted to other parties; and the Company would be relieved of the duty of carrying on the administration of Northern as well as of Southern Rhodesia. Consequently no further litigation or proceedings before the Judicial Committee of the Privy Council would be required. At an Extraordinary General Meeting held on the 24th July, 1923, the shareholders unanimously approved the provisional arrangement made with His Majesty's Government, and on the 25th July it was approved by the House of Commons. On the 1st October the Company received a cash payment from His Majesty's Government of 3,750,000l.

#### *The Board of the Company is at present constituted as follows:*

Sir Henry Birchenough, Bart., K.C.M.G., (President).  
Baron Emile Beaumont d'Erlanger.  
Dougal O. Malcolm, Esq.  
His Grace The Duke of Abercorn, K.G., K.P.  
Sir F. Drummond Chaplin, G.B.E., K.C.M.G.  
Sir William Edgar Nicholls.  
Sir Edmund Davis, J.P.  
C. Hely-Hutchinson, Esq.  
A. E. Hadley, Esq.  
Secretary and Chief Accountant, P. J. Baird, Esq., O.B.E., A.C.A.  
Registrar, F. C. Appleton, Esq.  
General Manager in South Africa, Lieut.-Col. T. E. Robins, D.S.O.  
Consulting Mining Engineer, E. H. Clifford, Esq.  
Consulting Engineers for Northern Rhodesia, Rhodesian Anglo-American Limited.

#### *Climate.*

The Rhodesian plateau lies at an altitude of from 3,000 to 6,000 feet above sea level. Broadly speaking, the year has two divisions, the wet and the dry season. The early rains of the wet season (which is the summer) gradually appear towards the end of October, increase in frequency and force until January, and disappear about the end of April. From May to September there is practically no rain. Taking into consideration the vast extent of the territory the climate naturally varies. In the highlands it is very healthy and bracing. Formerly, in the low-lying districts, malarial fever was very prevalent, but with the opening up of the country, better housing and food, it is rapidly disappearing. The summer is not oppressively hot, nor is the winter very cold. The average temperature shown by the maximum and minimum thermometers in the shade at the principal towns, is as follows:—

	Mean for 24 years. °F.			
	max.	min.	mean	
Salisbury	77.7	53.0	65.4	..
Bulawayo	78.4	54.5	66.5	..
Gwelo	78.8	51.8	65.3	..
Umtali	78.9	56.2	67.6	..

#### *The mean annual rainfall is 28.8 inches distributed as under:—*

	Normal annual rainfall.
Western Matabeleland	26.0 ins.
South-Eastern Matabeleland	21.4 "
Western Mashonaland	31.6 "
North-Eastern Mashonaland	33.7 "
South-Eastern Mashonaland	31.6 "
Eastern Border	52.9 "

*Public Health Services.*

**GOVERNMENT MEDICAL OFFICERS, &c.**—The Establishment of Medical Officers in the Public Health Department consists of the following:—1 Medical Director, 2 School Doctors, 2 Schools Dental Surgeons, 2 Bacteriologists (1 part time), 1 Medical Superintendent of the Leper Hospital, 24 Government Medical Officers, who, with the exception of two (at Salisbury and Bulawayo), are allowed private practice, and 6 Aided Medical Officers. There is a considerable number of Private Practitioners in the Colony.

**GOVERNMENT NURSING SERVICE.**—The Government Nursing Service consists of 1 Matron-in-Chief, 10 Hospital Matrons, 1 Sister Tutor and 19 Sisters, 64 qualified Nurses, and 78 Probationers, 8 men and 5 women Mental Hospital Nurses. Though the Nursing Service was formerly entirely recruited from England, many nurses are now drawn from Southern Rhodesia and South Africa generally.

**HOSPITALS.**—There are 7 General and 3 Cottage Hospitals, and one Mental Hospital in the Colony, situated at Salisbury, Bulawayo, Umtali, Gwelo, Fort Victoria, Enkeldoorn, Gwanda, Gatooma, Shamva, Sinola and Ingutsheni (Mental), each supplied with a complete staff of Doctors and Nurses.

The number of admissions to hospitals (excluding the Mental Hospital), the number of patient units maintained and the cost thereof, etc., for 1929 and 1930 is contained in the following table:—

	1929.	1930.
<b>PATIENTS ADMITTED:—</b>		
White .. .. .	5,041	5,272
Native and Coloured ..	7,146	8,180
<b>TOTAL.. .. .</b>	<b>12,187</b>	<b>13,452</b>
<b>PATIENT-DAYS:—</b>		
White .. .. .	72,246	74,820
Native and Coloured ..	142,508	184,090
<b>TOTAL.. .. .</b>	<b>214,754</b>	<b>258,910</b>
<b>Cost per patient-day ..</b>	<b>s. d. 7 0</b>	<b>s. d. 6 6</b>

**MENTAL HOSPITAL.**—During 1930 the number of patients maintained at the Mental Hospital at Ingutsheni, near Bulawayo, was 359 (Europeans 76, Native and Coloured 283).

**MATERNITY HOMES** or Government-aided District Nurses are maintained in 11 towns, which in 2 cases are not provided with Government Hospitals. They are under private control, but receive Government aid. At Salisbury the "Lady Chancellor Nursing Home," a large well-equipped modern building, has replaced the old and inconvenient hostel which served the town up till 1928.

**MEDICAL COUNCIL.**—This Council consists of 13 members, viz.:—5 medical practitioners, 2 dentists, 3 chemists and druggists, 1 legal member and 2 nurse representatives.

**MEDICAL, ETC., REGISTER.**—The numbers of persons registered as at 31st Dec., 1930, were:—medical practitioners, 125; dentists, 29; chemists and druggists, 55; trained nurses, 26; midwives, 3; mental nurses, 1. The registration of nurses and midwives is very incomplete at present.

**DEATHS FROM DISEASE (EUROPEAN).**—The number of deaths and the corresponding death rates from the

principal diseases during 1929 and 1930 are as stated below:—

Diseases.	Number of Deaths.		Death Rate per 1,000.	
	1929.	1930.	1929.	1930.
Malaria .. .. .	30	14	0.65	0.29
Blackwater Fever ..	13	14	0.26	0.29
Tuberculosis of the lungs	12	15	0.26	0.31
Diseases of the heart..	43	39	0.93	0.81
Broncho-Pneumonia ..	6	11	0.13	0.23
Pneumonia .. .. .	22	29	0.47	0.60
Bronchitis .. .. .	8	10	0.17	0.21
Cancer .. .. .	32	52	0.69	1.07

**GOVERNMENT QUININE.**—In connection with the campaign against Malaria and Blackwater Fever, Quinine is bought wholesale by the Government and sold to the public through the medium of the Post Offices, etc., at (little more than) cost price. Sales during 1930 amounted to 10,968 bottles of 100 tablets of 5 grains each.

**RESEARCH.**—By arrangement with the London School of Tropical Medicine and Hygiene a Research Fellow is stationed in Salisbury who is largely engaged in research into the causation of Blackwater Fever, also a Research Entomologist who is investigating the distribution habits, etc., of the local strains of mosquito and their relation to Malaria and Blackwater Fever.

**LEPROSY.**—A whole time Medical Superintendent has been appointed at the Leper Settlement at Gomohuru, and in addition to this Settlement there are now two stations for the treatment of selected cases of leprosy voluntarily presenting themselves for treatment, the one being at Mtoko, and the other at Mnene, in the Belingwe District, both are under the care of a Medical Missionary but supported by Government Funds. At Gomohuru there were 369 cases under treatment during the year 1930, with 49 admissions and 14 deaths. The number of these persons under various forms of intensive treatment is increasing. During 1930 some 281 cases were treated at Mtoko and 66 cases at Mnene.

*Population.*

At the Census for Southern Rhodesia which was taken in 1926, the European population was found to number 39,174 persons, and the coloured and Asiatic inhabitants 2,168 and 1,454 respectively.

The aggregate population at the census taken on May 5th, 1931, was as follows (preliminary figures):—

	No.
Europeans .. .. .	49,904
Asiatic .. .. .	1,711
Coloured .. .. .	2,334
<b>TOTAL .. .. .</b>	<b>53,949</b>
<b>Natives (including non-indigenous natives) .. .. .</b>	<b>1,055,000</b>
<b>TOTAL .. .. .</b>	<b>1,108,949</b>

The principal towns and their European inhabitants at the time of the Census were:—Salisbury (Capital), 9,711; Bulawayo, 11,727; Umtali, 2,096; Gwelo, 1,170; Gatooma, 583; and Que Que, 596.

**MARRIAGES (EUROPEAN).**—The number of marriages registered in 1930 was 553 compared with 551 in 1929. Marriage Rate (persons married per 1,000 of population): 22.9 per mille in 1930 and 23.8 per mille in 1929.

*European Vital Statistics.*

The births, deaths and marriages among Europeans :—

*Births.*

Year.	Legitimate.	Illegitimate	Total Births.	Deaths.

*Government Agent at Cape Town.*

F. B. Philip, M.B.E.

*Natives Administration.*

The Letters Patent provide that there shall be a Native Department of Southern Rhodesia, the permanent head of which shall be appointed by the Governor-in-Council with the approval of the High Commissioner. The Department is administered by the Minister of Native Affairs. The duties of the Chief Native Commissioner are defined by High Commissioner's Proclamation No. 32 of 1913.

The Colony is divided into 32 native districts, each in charge of a Native Commissioner, who is appointed by the Governor, with the approval of the High Commissioner, as laid down in the Southern Rhodesia Order in Council, 1898, and whose duties are defined by the High Commissioner's Proclamation, No. 55 of 1910.

The estimated population of indigenous Natives was, at the end of 1930, 966,015, who are distributed as under :—

On reserves .. .. .	621,275
On unalienated land .. .. .	146,392
On alienated land .. .. .	185,312
On mines, townships, etc. .. .. .	11,318
On Fingo location .. .. .	1,718
	<b>966,015</b>

On the recommendations of the special commission (The Native Reserves Commission) appointed by the Imperial authorities, which recommendations His

Majesty's Government decided to accept, a total area of 19,428,691 acres was set apart as native reserves for the sole and exclusive use of the native population. This has now been increased to 21,594,957 acres.

The Order in Council giving effect to the recommendations of this Commission, subject to certain minor adjustments, was issued on 10th November, 1920.

The only tax imposed upon the natives is an annual poll tax of 1l. on each adult male native, and should such native have more than one wife a further tax of 10s. for each additional wife is payable.

The wages paid to unskilled native labourers vary from 15s. to 3s. per month, with board and lodging.

There is also an increasing number of skilled native artisans, who command a much higher rate of pay.

At the end of the year 1930 it was estimated that the Natives owned 1,558,075 head of cattle, 268,880 sheep, 752,295 goats, 40,946 pigs and 40,134 donkeys. Efforts to persuade the Natives to breed a better class of cattle are meeting with success.

In the same year 50,189 ploughs were in use by Natives. The estimated total acreage under cultivation by Natives was 1,377,913 acres, while the yield of grain therefrom was estimated at 3,034,692 bags (of 203 lbs.).

The native agriculturist too is entering into competition with the European. Sales of grain by natives to Europeans are put at 254,357 bags (of 203 lbs.). A brisk business was done in hides and there has been an improvement in the marketing of hides. It is estimated that in the Bulalima Mangwe district in 1928 sales of hides amounted to upwards of 20,000.

It is estimated that natives sold or traded 79,248 head of cattle in 1930.

During 1927 a whole time European Agriculturist was appointed for the instruction of natives in agriculture, and one Native Agriculturist in 1929.

Considerable progress was reported during 1930 in the interest taken by the natives in the experimental plots established on many of the Reserves. Twenty-seven trained native demonstrators are now employed on various native Reserves and twelve others are in training.

There is an increasing tendency among the natives to adopt co-operatively methods of European farming.

#### Education.

The number of public and aided schools for European children open in December, 1930, was 163, with 8,586 pupils. The public expenditure on education during the year 1930 was 288,386*l.*, and the receipts from fees were 97,447*l.*

Owing to the munificent bequests of the late Cecil Rhodes and Alfred Beit, largely increased educational facilities are now afforded. Scholarships and Bursaries are granted to pupils in the country itself, and to matriculated Rhodesian students who continue their education at the various institutions of university standing in South Africa. In addition, there are nine "Rhodes Scholarships" (three per annum), which enable Rhodesian boys to take a three years' course at the University of Oxford.

There were also open at the end of 1930, seven public and aided schools for Eurafrian and Asiatic children. At the end of December these had a total enrolment of 612 pupils. The expenditure on these schools, also included in the total expenditure of the department, was 5,825*l.*, and a revenue of 232*l.* was received from school fees.

At the beginning of 1928 a Native Education Department, now known as the Native Development Department, was formed which is entirely separate from the European Education Department. Facilities are now available for stricter supervision and correlation of curricula which are necessary if progress is to be made. All of the Native Schools are run by Missionary Societies with the exception of two Government Schools. All schools receive Government grants on a capitation basis. The number of grant-earning Native Schools at the beginning of 1930 was 1,448, and the number of pupils was 108,752. The expenditure of the Government on Native Education amounted to 76,708*l.* in 1930-31, including Grants-in-aid of 49,511*l.* During 1930, 36 new schools were opened.

#### Minerals.

**GOLD.**—That gold was obtained from Rhodesia in prehistoric times is evidenced from the innumerable "ancient workings," the ruins of temples and forts supposed to date from the time of the Himyarites and Phœnicians, and the discovery of gold beads, gold plates, fine chains, wire, nails, etc. From the occupation of the country in 1890 by the British South Africa Company when the European population amounted to about 500 persons, consisting of the pioneers and a few officials, up to September, 1898, the gold produced only amounted to 6,470 ounces. Since that date the mining industry has been greatly developed, and numerous mines are producing gold. Large beds of coal of excellent quality are worked at Wankie, about 212 miles from Bulawayo, and 70 miles from the Victoria Falls on the River Zambesi, and the production of chrome iron ore and of asbestos is of importance in the markets of the world. The following shows the mineral output from Southern Rhodesia during 1930 :—

Mineral.	Amount.	Value.
		£
Gold, ounces .. ..	547,630	2,316,649
Silver, ounces .. ..	72,720	4,895
Coal (raised tons) .. ..	1,034,785	476,773
Chrome Ore, tons .. ..	226,671	519,581
Asbestos, tons .. ..	37,766	1,070,847
Mica, tons .. ..	181	52,196
Arsenic, tons .. ..	55	935
Diamonds, carats .. ..	19	58
Other Minerals .. ..	—	76,264
<b>Total .. ..</b>	<b>—</b>	<b>4,518,198</b>

In addition to the above, copper, lead, tungsten ores, tin, corundum, and barytes have been produced.

The total value of the mineral production from the commencement to 31st December, 1930, amounted to £100,447,610 of which gold accounted for £75,098,144.

#### Mortality and Labour on Mines (Native Labourers).

The daily average numbers of Natives employed and the mortality rates from Disease, Accident and All Causes in 1930 are shown below :—

Number and Causes of Death.		1930.
		No.
Average number employed .. ..		45,342
Deaths :—		
Disease .. ..		687
Accident .. ..		98
All causes .. ..		785
Death Rate per annum—		Per 1000.
Disease .. ..		15.15
Accident .. ..		2.16
All causes .. ..		17.31

#### Land and Agriculture.

Southern Rhodesia as a whole is a well watered country suitable in most parts for mixed farming. In some areas the rainfall is less generous, but here the excellence of the natural pasturage renders the conditions particularly favourable for ranching. European breeds of cattle do well, and in the experience of many breeders improved stock under proper management are as hardy as the native stock of the country. Prime slaughter bullocks command a ready sale and the dairy industry, though as yet in its infancy, is ever assuming increasing importance. Pigs thrive exceptionally well, the only limiting factor in pig raising being the markets. There are, however, at present two bacon factories in Southern Rhodesia, and many in the adjoining Territory of the Union. Under the influence of cattle farming, the long grass is being eaten down and made finer. Experiments in sheep-farming are being made. The poultry industry is well established and the monthly cheque from this source figures prominently on many farms.

Under agreement with the Government, The Imperial Cold Storage and Supply Company has erected a modern up-to-date freezing establishment in the Colony. The Company's Works at Bulawayo are capable of killing and freezing from 120 head of cattle upwards per day. There is one beef chilling room of 12,670 cu. ft., refrigerated by air circulation, and 10 freezing and storage rooms, totalling 108,000 cu. ft., refrigerated on the Ammonia Direct Expansion System. The machinery consists of 2 steam-driven refrigerating machines of the Ammonia Compression System. Each machine is of

70 tons refrigerated capacity. There is an ice-making plant capable of producing 10 tons of ice daily. There are also the usual by-product plants for producing edible and industrial fats, bone-, meat- and blood-meal, a curing house for hides, and general store sheds. The provision of these facilities has proved of material advantage to the farming and livestock industry.

Several successful shipments of live cattle to the United Kingdom have been made and experiments in the shipment of eggs and chilled beef are in progress. Exports of chilled beef to the Belgian Congo have been quite successful.

Maize is the staple grain crop, and the Colony has specialised in the production of the flat whites used overseas chiefly for manufacturing purposes. The quality of Rhodesian maize is second to none, and in the season 1929-30 some 1,917,000 bags (203 lbs. weight) of this grain were grown by the European farmers. For 1930-31 the European maize crop is estimated at 1,300,000 bags.

The climate of the greater part of the Colony is sub-tropical, and while maize remains the principal grain crop, European cereals are also grown together with potatoes, beans, buckwheat, linseed, and oil yielding crops such as ground nuts and sunflower, the two latter being sold to the local mills for oil extraction and the manufacture of oil seed cake, any surplus being exported.

During the season 1927-28 the total tobacco crop harvested amounted to nearly 25,000,000 lbs. Owing to this rapid increase in production considerable difficulty has been experienced in the disposal of the crop and consequently the acreage planted in 1928-29 and in 1929-30 was greatly reduced. The crop totalled only 7,042,464 lbs. in 1928-29 and 5,844,203 lbs. in 1929-30.

The excess stock of old crop tobacco formerly held in London had, by the middle of 1931, been practically all disposed of and as a result there is a distinct tendency to increase the area planted to tobacco with a consequent increase in the crop. For 1930-31 the crop is estimated at 8,522,000 lbs. from 16,181 acres, while the forecast for 1931-32 is 14,126,000 lbs. from 26,102 acres.

Southern Rhodesia is capable of producing a high grade type of leaf, the lighter soils producing a particularly bright virginian variety. In certain districts, however, greater attention is now (1931) being given to "fire-cured" tobacco on account of its heavier yielding character.

Attention is now being directed to the establishing of markets on which the future development of this crop depends.

There are very good indications that parts of Southern Rhodesia will eventually become cotton producing areas. The country is equipped with first class facilities for ginning the cotton crop, and turning out high-density bales suitable for export to Liverpool and the Continent. The question of finding out the most suitable variety of cotton has been receiving the attention of the Government, who have established a cotton breeding and Experiment Station at Gatooma, which is considered as being representative of some of the best, middle-valley, cotton growing areas in the Colony. The Empire Cotton Growing Corporation are collaborating with the Government of Southern Rhodesia in their endeavour to establish the industry on a sound basis, and have sent out one of their staff of specialists, assisted by two plant breeders, to advise and help forward what promises to be a flourishing industry.

These efforts have been so successful that the area planted to cotton in 1929-30 rose to about 8,000 acres planted with the new jassid resistant variety known as U.4.

The principal particulars relating to the agricultural, livestock and allied industries are as follows:—

	1928-29.	1929-30.
<b>A.—Area under principal crops:—</b>	<b>Acres.</b>	<b>Acres.</b>
Maize (grain) ..	325,329	317,688
Cotton ..	1,837	6,179
Tobacco ..	17,784	10,468
Ground Nuts ..	9,674	7,451
Other Crops ..	55,409	76,196

	1928-29.	1929-30.
<b>B.—Yield of principal crops:—</b>	<b>Acres.</b>	<b>Acres.</b>
Maize (bags) (a) ..	1,828,345	1,917,252
Cotton (lbs.) ..	339,009	1,801,508
Tobacco (lbs.) ..	7,042,464	5,844,203
Ground Nuts (bags) (b) ..	69,926	68,294

(a) Bags of 203 lbs.

(b) Bags of 78 lbs.

#### C.—Livestock Owned.

Description.	1929.	1930.
<b>Cattle:—</b>	<b>1,000.</b>	<b>1,000.</b>
European owned ..	902.2	910.3

<b>TOTAL BUTTER ..</b>	<b>1,000 lbs.</b>	<b>1,447</b>	<b>1,769</b>
Eggs (sold) ..	1,000 doz.	513	726

The citrus fruit industry is expanding: export in 1926 was 34,945 standard boxes of fruit, and in 1930, 184,901 boxes.

Southern Rhodesia offers many advantages to those seeking an opportunity for the investment of capital, to those looking for a country in which to settle and make homes and also to the tourist and big game hunter. Full information for prospective settlers can be obtained from the Director, Department of Lands, Salisbury. On the arrival of settlers in the country, this Department will also render assistance and advice towards their acquiring the necessary knowledge of local farming conditions, for obtaining training with well known and successful

farmers and eventually, if desired, for the purchasing of land. No charge is made for these services, nor for similar assistance obtainable from the staff of the Department of Agriculture amongst whose members there are specialists dealing with each of the more important branches of the agricultural industry. Special efforts are made to safeguard the interests of new settlers in the matter of the purchase of land.

Crown Land in Southern Rhodesia may be acquired from the Department of Lands of the Government, subject to reasonable occupation conditions; the purchase price with interest at the rate of 5 per cent. per annum, being payable in forty half-yearly instalments, the first instalment being payable on taking up the land. A provisional deed of title is issued on payment of the first instalment, and a final deed of title on full payment of purchase price, provided the terms of the provisional deed have been fulfilled, and occupation and development effected for a period of ten years.

The title deed gives the purchaser the freehold of the land subject to an annual payment of quit rent amounting approximately to one shilling for every fifty acres held.

Owing to the depressed state of the world's markets (1931) for the Colony's chief agricultural products land settlement schemes are temporarily in abeyance.

Further information can be obtained from the High Commissioner for Southern Rhodesia, Crown House, Aldwych, London, and also from the Director, Department of Lands, Salisbury, Southern Rhodesia.

#### London Office.

Full details as to the administration of Rhodesia, and as to climate and products, with routes to and from Rhodesia, can be obtained at the office of the High Commissioner of Southern Rhodesia, Crown House, Aldwych, W.C.2.

High Commissioner, Hon. J. W. Downie, C.M.G.  
Official Secretary, B. F. Wright.

#### Customs and Excise.

Customs duties were first imposed in this Colony in 1899, and agreements were then entered into with the Cape Government and the Bechuanaland Protectorate Administration for a payment of the share of the duties collected upon goods removed from one territory to the other. These arrangements terminated in 1901, and until 1903 this Government collected the whole of its own duties.

Excise duties were imposed in 1901.

In 1903 this Colony joined the South African Customs Union, which terminated in 1910, owing to the Union of the Southern Colonies, and has been replaced by Customs agreements between this Colony and the Union, Northern Rhodesia, and the Territories of the South Africa High Commission.

At a conference of these Colonies held at Pretoria in 1929, it was mutually decided to terminate the agreement between this Colony and the Union of South Africa as from 31st December, 1929.

As the result of a further conference held early in 1930, a new Customs Agreement was concluded between the Union of South Africa and Southern Rhodesia.

The embargo upon the removal of cattle under a certain weight still continues and the free importation of leaf tobacco into the Union is restricted to 2,400,000 lbs. per annum. Apart from these and certain other specified articles the Agreement allows for a free interchange of the products of the contracting territories.

Later in the year fresh agreements were also entered into with Northern Rhodesia and Bechuanaland Protectorate similar to those formerly in force but somewhat wider in scope.

The rates of Customs duties levied in Southern Rhodesia on food, drink, and tobacco are mainly specific, whereas those levied on other classes of commodities are mainly *ad valorem*.

There is, however, a large range of commodities e.g., railway and mining material and many others, which are free of duty when imported from the United Kingdom or reciprocating British Dominions or Colonies, and these countries supply the bulk of the imports in these lines.

In the case of a large number of dutiable goods imported from the United Kingdom or reciprocating British Dominions it is provided under the "Rhodes Clause" that the duties thereon shall not exceed 9 per cent. *ad valorem*. The duties levied on the same classes of goods when imported from Foreign Countries range from 15 per cent. to 25 per cent. *ad valorem*.

For financial reasons many items previously tariffed at 3 per cent. *ad valorem*, when imported from foreign countries have since March, 1931, paid a duty of 5 per cent. *ad valorem*. Such goods when imported from the United Kingdom or reciprocating British countries are usually free of duty.

Customs Houses are established at the following ports of entry, viz.:—

Beira, Bulawayo, Gwelo, Plumtree, Salisbury, Umtali, and Beitbridge.

The net amount of Customs and Excise Revenue collected amounted to 715,171*l.* in 1928, 726,472*l.* in 1929 and 652,576*l.* in 1930.

#### British Preference.

The amount of preferential rebate granted to United Kingdom and British Empire goods reached the following amount in 1928, viz.:—

	Amount.	Per cent.
	£	
Duty at full tariff rates ..	428,000	—
Duty at preferential rates ..	185,000	45.6
Preference granted ..	233,000	54.4

The foregoing calculation excludes imports from the Union of South Africa, Northern Rhodesia, and the Native Territories which are governed by other conditions.

#### Imports and Exports.

The aggregate value of the trade of the Colony, including Government Stores, Bullion and Coin, and Parcel-Post, during the last five years has been as follows:—

Year.	Total Imports.	Re-Exports.	Net Imports.
Old Method—	£	£	£
1926	1,000	1,000	1,000
1926	6,350	1,090	5,260
1927	7,574	1,195	6,379
1928	8,435	1,495	6,940
1929	8,864	1,990	6,874
New Method—			
1929	8,234,000	1,360,000	6,874,000
1930	7,529,000	1,863,000	5,666,000

Year.	Total Exports.	Re-Exports.	Domestic Exports.
Old Method—	£	£	£
1926	1,000	1,000	1,000
1926	6,535	1,090	5,445
1927	7,444	1,195	6,249
1928	8,004	1,495	6,509
1929	8,637	1,990	6,647

Year.	Total Exports.	Re-Exports.	Domestic Exports.
New Method—	£	£	£
1929	8,007,000	1,360,000	6,647,000
1930	7,497,000	1,863,000	5,634,000

The values of the principal commodities imported into the Colony during the year 1930 were as follows. The corresponding figures for 1929 are in brackets:—

*Principal Imports, 1930 (1929 in brackets):—*

Living Animals, 71,500*l.* (94,600*l.*); Foodstuffs, 668,900*l.* (784,800*l.*); Potable Liquors, 147,300*l.* (171,500*l.*); Cigarettes, 16,400*l.* (178,200*l.*); Outer Garments, 321,200*l.* (349,900*l.*); Underclothing, 99,100*l.* (104,800*l.*); Bags, for Grain, Coal, etc., 95,800*l.* (148,000*l.*); Blankets, Rugs and Sheets, 87,400*l.* (101,900*l.*); Cotton Manufactures, not Apparel, 320,100*l.* (405,400*l.*); Haberdashery, 76,400*l.* (124,200*l.*); Machinery (Agricultural), 102,700*l.* (174,800*l.*); (Electrical), 95,600*l.* (162,900*l.*); (Mining), 70,900*l.* (217,400*l.*); Iron and Steel, (Bar, Pipe, Plate, Sheet, etc.), 196,900*l.* (316,000*l.*); (Railway Material), 1,313,000*l.* (686,600*l.*); (Wire), 31,900*l.* (55,400*l.*); (Other Iron and Steel), 306,500*l.* (419,100*l.*); Motor Vehicles and Parts, 515,200*l.* (607,200*l.*); Minerals, Earthenware, Glassware, etc., 110,800*l.* (132,600*l.*); Oil, Lubricating and Burning, Motor Spirit, etc., 281,900*l.* (281,100*l.*); Chemicals, 109,900*l.* (146,400*l.*); Fertilisers, 69,500*l.* (84,600*l.*); Footwear, 112,000*l.* (139,600*l.*); Pneumatic Tyres and Tubes, 119,700*l.* (198,900*l.*); Wood (Unmanufactured and partly Manufactured), 96,000*l.* (140,200*l.*); (Furniture), 89,500*l.* (110,200*l.*); Manufactured Wood, Cane and Wicker, 121,200*l.* (161,500*l.*); Books, Paper, and Stationery, 188,100*l.* (196,500*l.*); Phonographs, Gramophones and Records, 23,000*l.* (25,700*l.*); Blasting Compounds, 72,300*l.* (170,100*l.*); Other Explosives and Ammunition, 60,200*l.* (75,800*l.*); Films, 106,600*l.* (106,000*l.*).

The more important articles of domestic production exported during 1930 and 1929 were as follows:—

Cattle for Slaughter, 340,600*l.* (376,500*l.*); Hides and Skins, 89,600*l.* (154,300*l.*); Foodstuffs (Maize in the Grain), 253,500*l.* (351,400*l.*); (Citrus Fruit), 82,400*l.* (79,400*l.*); Other Foodstuffs, 321,900*l.* (232,600*l.*); Unmanufactured Tobacco, 305,800*l.* (469,600*l.*); Chrome Ore, 441,400*l.* (638,800*l.*); Gold Bar, 2,156,200*l.* (2,320,700*l.*); Asbestos, 620,400*l.* (890,700*l.*); Coal, 265,800*l.* (256,200*l.*); Coke, 105,400*l.* (146,700*l.*).

*Direction of Trade in 1930.*

The principal sources of supply in respect of Imports in 1930 are indicated below:—

(These figures are exclusive of Specie).

Country of Origin.	Amount.	Proportion of Total.
	£1,000	Per cent.
United Kingdom .. ..	£3,945	52.8
Union of South Africa ..	1,136	15.2
Rest of Empire .. ..	530	7.1
United States .. ..	771	10.3
Other Foreign Countries ..	1,090	14.6
<b>TOTALS .. ..</b>	<b>7,472</b>	<b>100.0</b>

All Imports are valued for Statistical purposes on the prices stated by the consignors in the country of

origin. The retail or consumption value will be in excess of the above figures.

The principal destinations of domestic exports in 1930 are as follows:—

Destination.	Amount.	Proportion of Total.
	£1,000	Per cent.
United Kingdom .. ..	2,108	37.8
Union of South Africa ..	1,509	27.1
Rest of Empire .. ..	673	12.1
United States .. ..	369	6.6
Portuguese East Africa ..	227	4.1
Belgian Congo .. ..	477	8.5
Other Foreign Countries ..	212	3.8
<b>TOTALS .. ..</b>	<b>5,575</b>	<b>100.0</b>

Exports are valued by the exporter and the above values are those given for shipping document requirements.

*Trade with United Kingdom, 1926-30.*

The value of goods Imported from and Exported to the United Kingdom for five years are given below:—

Year.	IMPORTS.		DOMESTIC EXPORTS.	
	Amount.	Proportion of Total.	Amount.	Proportion of Total.
	£1,000	Per cent.	£1,000	Per cent.
1926	3,133	49.3	2,689	49.4
1927	3,608	47.6	2,597	41.6
1928	4,022	48.3	2,721	41.8
1929	4,019	46.0	2,571	39.4
1930	3,945	52.8	2,108	37.8

*Posts and Telegraphs.*

The mails to and from the United Kingdom and Southern Rhodesia are conveyed by the mail steamers of the Union-Castle Company between Southampton and Cape Town. From Cape Town they are conveyed by rail to Bulawayo in 2 days 7½ hours, and to Salisbury in 2 days 23½ hours.

On the 31st of December, 1930, 212 post offices were open in Southern Rhodesia, at 47 of which Money Order and Savings Bank business was transacted. Telegraph Money Orders are also exchanged with Northern Rhodesia, Mozambique, the Union of South Africa, the United Kingdom, and Nyasaland.

The rate for inland letters is 1*d.* per oz. The rate for letters to the Union of South Africa, Northern Rhodesia, and Mozambique is 1*d.* per oz. For letters to Belgian Congo and all foreign countries the rate is 3*d.* for the first oz. and 1½*d.* for each additional oz.; to the United Kingdom and all British possessions, except those mentioned above, the rate is 2*d.* per oz.

The Southern Rhodesia Telegraph and Telephone system extends from Ramathlabama, on the northern border of the Cape Province, to Zinto in Portuguese East Africa. The magnitude of the combined Telegraph and Telephone systems at the end of 1930 was as follows:—

*Telegraphs*—Length of line 6,976 miles; length of wire, 31,488 miles.

*Telephones*—Length of line, 4,575 miles; length of wire, 25,921 miles.

At the 31st December, 1930, there were 137 telegraph offices open. The rate for Inland telegrams is 1*s.* for 12 words and 1*d.* for each additional word;

between Southern Rhodesia and the Union of South Africa and Portuguese East Africa (Lourenço Marques), 2s. for every 12 words and 2d. per word thereafter; for Belgian Congo the rate is 5s. for 12 words and 5d. for each additional word. To places served by the Beira Railway Telegraph Offices in Moombique and Northern Rhodesia the rate is 1s. 6d. for every 12 words and 1½d. for each additional word; whilst to places in the Moombique territory served by the Trans-Zambia Railway the rate is 4s. for 12 words and 4d. for each additional word. To places on the African Trans-Continental Telegraph Line and Shire Highland Railway Telegraph Offices the rate is 5s. for the first 12 words and 5d. for each additional word. To Tanganyika 7s. 6d. and 7½d.; Kenya Colony and Uganda, 11s. 6d. and 11½d. for the first 12 words and each additional word respectively.

Telegrams and cablegrams from South Africa and Europe for the Provinces of Manica and Sofala, including Chinde and Quelimane (Portuguese East Africa), Nyasaland Protectorate, etc., pass over Southern Rhodesian lines.

The rate for telegrams to the United Kingdom, including Northern Ireland is via "Overseas" 1s. 5d. per word ordinary, 8½d. deferred per word. Letter telegrams (D.L.T.) twenty words 8s. 4d., each additional word 5d. (W.L.T.) twenty words 7s. 6d., each additional word 4½d. Urgent 4s. 3d. per word. Preferred Ordinary 1s. 11d. per word.

The Post Office Savings Bank was established in 1905. Up to the 31st December, 1930, the amount deposited, including accrued interest, was 2,666,631l., and the amount withdrawn was 2,439,937l. 238,967l. was invested in Trustee Securities at the latter date.

#### Revenue and Expenditure.

For the whole Colony taxation is light, the rate of Income Tax is low, Customs Duties in general are moderate, while the existence of the "Rhodes Clause" in the Tariff not only concedes a valuable preference to goods imported from the United Kingdom and British Possessions, but incidentally reduces the ultimate cost of many imported goods to the consumer.

In these circumstances, the total yield of Revenue has shown great elasticity; the figures for the last five years are given below:—

Year.	Tax Revenue.	Non-Tax Revenue.	Total Revenue.
	£1,000	£1,000	£1,000
1926-7 ..	1,419-4	590-2	2,009-6
1927-8 ..	1,598-0	589-2	2,185-2
1928-9 ..	1,747-9	585-3	2,333-2
1929-30 ..	1,792-0	695-2	2,487-2
1930-31 ..	1,824-9	624-3	2,449-2

The main sources of Revenue in the year 1930-31 were as follows, the yield under each head being given to the nearest one hundred pounds sterling:—

Customs (739,600l.); Native Tax (346,100l.); Income Tax (492,900l.); Stamps and Licences (143,300l.); Lands Department (89,100l.); Posts and Telegraphs (247,300l.).

EXPENDITURE (including Expenditure out of Loan Funds):—

The expenditure of the Colony since the grant of Responsible Government in September, 1923, has been conducted on economical lines, without in any way hindering necessary development. Ordinary expenditure has been met out of Revenue, but deficiencies in respect of Schools, Post Offices, Roads, Public Buildings, etc., which had accumulated during

the few years prior to Responsible Government have had to be met out of Loans. The expenditure under these two heads for the past five years is as follows:—

Year.	Expenditure from Revenue.	Expenditure from Loans.	Total.
	£1,000	£1,000	£1,000
1926-7 ..	2,007-0	626-1	2,633-1
1927-8 ..	2,169-0	600-6	2,769-5
1928-9 ..	2,273-8	656-8	2,930-6
1929-30 ..	2,470-5	497-4	2,967-9
1930-31 ..	2,587-5	407-5	2,995-0

The main avenues of expenditure (including loan expenditure) in 1930-31 were:—Education, 358,800l.; Debt Services, 366,700l.; Police and Defence, 331,800l.; Public Health and Hospitals, 181,100l.; Posts, Telegraph and Telephones, 273,900l.; Agriculture, 245,100l.; Lands, 52,000l.; Veterinary and Veterinary Research, 68,800l.; Native Affairs, 156,600l.; Land Bank, 20,000l.; Mines, 32,100l.; Public Works, 118,600l.; Roads, 137,400l.

#### The Budget for 1931-32.

For the financial year ended 31st March, 1932, the Treasurer's estimate of ordinary Revenue was 2,344,000l. Tax Revenue was estimated to yield 1,715,500l. and Non-Tax Revenue 628,500l.

Expenditure out of Revenue was put at 2,339,200l. and estimates of extraordinary Expenditure to be defrayed from the Consolidated Revenue Fund (accumulated surplus) was put at 115,000l. A total estimated expenditure from Revenue Funds of 2,454,200l.

The accumulated surplus of Revenue over Expenditure at 31st March, 1931, was 200,451l.

#### Criminal Statistics.

There are High Courts at Salisbury and Bulawayo, while the High Court Judges hold Circuit Courts as required at Umtali, Gwelo, Umvuma, Selukwe and Fort Victoria. In addition there are 38 Magistrates' and Native Commissioners' Courts.

In the High Courts during 1930 the number of persons tried was 284 (including 20 Europeans), compared with 370 in 1929.

The total number of criminal prosecutions dealt with in Magistrate's Courts during 1930 was 49,281, including 3,660 Europeans. The offences for which these prosecutions were undertaken comprised offences against:—

	No.
(a) The Administration of Justice ..	496
(b) The Person .. ..	3,064
(c) The Public Peace .. ..	34,347
(d) The Revenue Laws .. ..	7,453
(e) Property .. ..	3,921
TOTAL .. ..	49,281

These cases resulted in 45,604 convictions, while in 3,677 cases the defendant was acquitted, discharged, dismissed or otherwise dealt with. The majority of these convictions were for minor offences, as follows:—Pass Laws, 13,585; Native Tax, 4,408; Masters and Servants, 4,875; Dog Tax, 2,272; Theft (petty), 2,218; Local Bye-Laws, 3,995; Assault (Common), 1,883; Roads Act, 1,032.

#### SOUTHERN RHODESIA GOVERNMENT.

Governor, Sir Cecil Rodwell, K.C.M.G., 4,000l., 1,000l. personal allowance and 1,000l. entertainment allowance.

*Private Secretary*, William Rodwell.  
A.D.C., Captain B. V. Cherry, M.C., late King's  
Royal Rifle Corps.

#### *Executive Council.*

*The Governor and Members of the Ministry.*  
*Clerk of Council*, W. C. Robertson.

*Superintendent*, (vacant).

*Assistant Superintendents*, Hon. Lieut. H. W. Clemow,

Hon. Lieut. T. H. Bryant, Lieut. F. W. Harrison.

## NAURU.

Nauru (0° 26' S., 166° 66' E.), an uplifted atoll, about 12 miles in circumference, was discovered by Captain Fearn in 1798, and was annexed by Germany in 1888. It has an area of nearly 8½ square miles. There is a ring of fertile land between the sea and a plateau about 40 to 60 feet above sea level. The plateau contains extensive deposits of phosphate bearing rock.

Nauru was surrendered to H.M.A.S. "Melbourne" in November, 1914, and, at the request of the Commonwealth Government, was administered under the High Commissioner for the Western Pacific until June 10th, 1921. A mandate conferred by the Principal Allied and Associated Powers on the British Empire to administer Nauru was approved by the Council of the League of Nations in December, 1920.

By an agreement dated 2nd July, 1919, confirmed by the Nauru Island Agreement Act, 1920, and by the Parliaments of the Commonwealth of Australia and New Zealand, the British Government and the Governments of the Commonwealth and New Zealand agreed that the island should be governed by an Administrator, the first to be appointed for a term of 5 years by the Commonwealth Government, thereafter the Administrator to be appointed in such manner as the three Governments should decide. The first Administrator, Brigadier-General T. Griffiths, C.M.G., C.B.E., D.S.O., assumed office in June, 1921, and his term of appointment was extended until June, 1927, when he was succeeded by Mr. W. A. Newman, M.B.E., of the Australian Public Service, who was appointed by the Commonwealth Government, in terms of an agreement between the three Governments concerned, for a period not exceeding five years.

The Administrator has power to make Ordinances for the peace, order, and good government of the Island, to provide for the education of the children on the Island, to establish and maintain the necessary Police Force, and to establish and appoint Courts and Magistrates with civil and criminal jurisdiction.

The agreement dated 2nd July, 1919, also provided for the working of the phosphate deposits. The exclusive right to work these deposits was granted by the German Government to a German company, which transferred it in 1905 to the Pacific Phosphate Company, a company registered in Great Britain, which commenced to work the deposits in 1906. In 1920 the interests of the Company in Nauru and in the phosphate deposits of Ocean Island were purchased by the British, Commonwealth, and New Zealand Governments. By the agreement between the three Governments, the deposits in Nauru were vested in, and the working and sale of the phosphate entrusted to, a Board of three Commissioners, one appointed by each Government. The functions of the British Phosphate Commissioners, so far as Nauru is concerned, are limited strictly to the business connected with the working of the phosphate deposits. The Administrator is responsible for all matters relating to the Government, the moral and social welfare, the labour conditions and health of all the people on the Island. The British Phosphate Commission is treated in the same manner as if it were a private company. Nauru has an independent customs tariff which provides duties at specific rates on alcoholic liquors and narcotics and at

*ad valorem* rates on all other goods with the exception of provisions, building materials, machinery and certain other miscellaneous items, all of which are specifically exempted from customs duty.

The *ad valorem* rate is 10 per cent., with the one exception of perfumed spirits which is subject to 15 per cent.

The British phosphate Commission enjoys freedom from customs duty on all goods imported specifically for purposes directly associated with phosphate works.

In 1930, 271,255 tons of phosphate were exported, of this quantity 217,945 tons were exported to Australia and 53,310 tons to New Zealand.

The population figures taken on the occasion of the annual census (1st April, 1931) are:—

Natives of Nauru .. ..	1,426
Natives of China .. ..	1,105
Europeans .. ..	147
Other Pacific Islanders .. ..	14

2,692

Administrator, W. A. Newman.

# Statistics.

Year.	REVENUE. £	EXPENDITURE. £	IMPORTS. £	EXPORTS. £
1926	16,424	13,963	104,117	412,402
1927	17,041	17,243	82,650	438,149
1928	19,903	18,267	240,229*	362,112
1929	19,936	17,859	101,691	348,052
1930	18,992	15,532	143,416	270,091

Of the imports in 1930 130,778*l.* came from the British Empire, viz:—

Australia .. ..	80,609
Canada .. ..	13
New Zealand .. ..	2,369
Straits Settlements .. ..	26
United Kingdom .. ..	47,761

£130,778

Of the exports all were to Australia (217,302*l.*) and New Zealand (52,789*l.*).

\* Includes material for construction of new cantilever loading cranes.

## PART II.—C. HISTORICAL AND STATISTICAL ACCOUNT, WITH PUBLIC ESTABLISHMENTS, OF THE COLONIES AND OTHER TERRITORIES WITH WHICH THE COLONIAL OFFICE IS CONCERNED.

### BAHAMAS.

#### *Situation and Area.*

The Bahamas, the most northerly of the British West Indian Colonies, are a chain of coral islands lying between 21° 42' and 27° 34' N. lat., and 72° 40' and 79° 5' W. long., composed of about 20 inhabited islands, and an immense number of islets and rocks. The principal islands are New Providence (containing the capital, Nassau), Abaco, Harbour Island, Eleuthera, Inagua, Cat Island, Ragged Island, Rum Cay, Exuma, Long Island, Long Cay, the Biminis, and Watling's Island (or San Salvador), all of which are ports of entry; and Great Bahama, Crooked Island, Acklin Island, Mayaguana, the Berry Islands, and Andros Island (containing the only river). The total area is 4,403½ square miles, or about half the size of Wales.

#### *History.*

San Salvador, so called by Columbus, the native name being Guanahani, one of the islands composing this chain, and identical with Watling's Island, was the first land discovered by him on his voyage in 1492. A few years later all the Carib inhabitants were transported to work in the Cuba mines. It does not appear that the Spaniards had any settlements on any of the islands of this group at any time. Early in the 17th century the islands were well known to the settlers of Bermuda and the Carolinas. They were included in the Royal Grant of Sir Robert Heath, the Attorney-General of England, of the 30th of October, 1629. By 1640 the islands had become a well-known place of resort by the inhabitants of Bermuda, and on the 9th of July, 1647, The Company of Eleutherian Adventurers was formed in London for the purpose of making an organised attempt at a systematic colonization and development of the islands. William Sayle, a former Governor of Bermuda, was the moving spirit of this venture, and associated with him were a number of influential city merchants and Members of Parliament. On the 31st of August, 1649, Parliament, on the petition of Sayle and others, passed "An Act for the Adventurers for the Eleutherian Islands," which constituted Sayle and his associates the Proprietors of the Islands. Notwithstanding the Royal Grant to Heath in 1629 and the Cromwellian Act of 1649, Charles the Second, on the 1st of November, 1670, granted the Islands to Six of the Lords Proprietors of Carolina, namely, the Duke of Albemarle, the Earl of Craven, Lord Berkley, Lord Ashley, Sir George Carteret and Sir Peter Colleton. Before the Royal Grant of 1670 the inhabitants of the islands had organised the Settlement and instituted a form of Government which included an elective House of Assembly, and had selected Captain John Wentworth as their Governor. Wentworth applied to and received Commissions from the Governors of Jamaica. The Lords Proprietors appointed Hugh Wentworth as their first Governor on 24th April, 1671, but he did not take up the appointment.

They then confirmed in office John Wentworth, the popularly elected Governor, on the 26th of December, 1671. A regular system of government was established including a Parliament, the Lower House of which was elective, and this was continued with several breaks until the Civil and Military Government of the Islands was resumed by the Crown on the surrender of their rights by the Lords Proprietors on the 28th October, 1717. Thirteen Proprietary Governors were appointed between 1671 and 1715. The Settlement on New Providence was sacked by the Spaniards on several occasions between 1680 and 1684. In 1684 nearly all the inhabitants were driven away, and it was not until 1688 that the Settlement was re-formed by their return, principally from Jamaica, under the leadership of Thomas Bridges. Bridges was recognised as Governor by the Lords Proprietors on the 12th July, 1688, and the Settlement had reached some importance when it was practically annihilated by the French and Spaniards in 1703. However, a year or so after this the dispersed inhabitants returned to New Providence and another Proprietary Governor was appointed in 1707. But the Islands became a regular rendezvous for pirates, and this finally determined the Crown to resume the Civil and Military Government of the place, and thus accede to the numerous petitions which the inhabitants had been making for several years and also carry out the express wishes of Parliament. Since 1717 there has been a continuous line of Royal Governors. The Islands were surrendered to a Fleet of the American rebels in 1776, and again to the Spaniards in 1781, but they had been re-taken by a British force under Colonel Deveaux before the conclusion of the war, which was brought to an end by the Peace of Versailles, 1783, when the British possession was confirmed. After the American Revolution a number of Loyalists settled throughout the Bahamas Group and received substantial assistance from England, and on the 19th of March, 1787, the Lords Proprietors surrendered all their proprietary rights to the King for the sum of 12,000*l.*, which was provided by Parliament.

The Turks and Caicos Islands, which geographically form part of the Bahamas chain, and which had often in their early history been claimed both by Bermuda and the Bahamas, were separated from the other Bahamas in 1848, and formed into a distinct Presidency, under the government-in-chief of the Governor of Jamaica.

#### *Climate and Inhabitants.*

The climate is salubrious and very pleasant in the winter season, and the Colony has in recent years been much frequented by visitors from the United States and Canada, there being excellent hotels and other accommodation for tourists. The cost of living is very high; houses are difficult to obtain and rentals are high. The average annual rainfall is about 46 inches, the rainy season extending from June

to October. From November to May the temperature averages 70° Fahrenheit, there is little rain, and cool breezes prevail. The lowest recorded temperature (in January, 1905) is 51.5°. In the summer month temperatures as high as 92° have been recorded. Three severe hurricanes passed over the Bahamas in 1926, on 26th July, 17th September and 20th October, causing loss of life and great destruction to property and shipping.

The Colony was visited by two hurricanes in 1928, one in August, which only affected the Southern part of Andros, and the other in September, which severely affected New Providence, Bimini, Cat Island, Eleuthera and Harbour Island.

In 1929 the Colony experienced a hurricane of exceptional severity which lasted from 25th to 27th September, causing great destruction to property and shipping in New Providence and Andros.

The majority of the inhabitants are of the negro race. About one-sixth are of European descent. English is universally spoken.

#### *Trade and Industry.*

The commercial relations of the Colony are mainly with the United States. Considerable quantities of pine-apples (canned), sponges, sisal and tomatoes are exported. In 1930 the principal exports were:—Sisal, 273 tons, valued at 4,693*l.*; sponges, 5,401 cwt., valued at 75,351*l.*; lumber, 272,000 feet, value 5,206*l.*; shell, value 7,402*l.*; tomatoes, 172,000 bushels, value 89,336*l.*; bark, value 3,538*l.*; salt, 88,000 bushels, value 876*l.*

The cultivation and preparation of the sisal fibre plant is an important industry. The estimated area planted at the end of 1929 was over 5,880 acres.

Fishing is extensively carried on for the Nassau market, about 82 native-built boats, with 460 men, being employed. Turtle-shell, shells and pearls are largely exported. Sponge-fishing employs a large fleet. The approximate number of vessels engaged in the industry is 476—aggregate tonnage 4,515—with 2,760 open boats, and a large number of long shore open boats; men and boys employed, 4,500.

Nassau is a port of registry, and had, on the 31st December, 1930, 156 vessels of 6,163 tons.

Principal imports during 1930; foodstuffs, value 296,822*l.*; malt, value 26,523*l.*; spirits and wines, value 727,289*l.*; tobaccos, cigars and cigarettes, value 19,184*l.*

Lighthouses on several of the islands have been established, and are maintained by the Imperial Government. Several lights are also maintained by the local government.

#### *Currency and Banking.*

The legal tender currency is British sterling, although United States currency is also generally accepted in the Colony. Accounts are kept in sterling. There is a branch bank of the Royal Bank of Canada with deposits amounting to 588,388*l.* A Post Office Savings Bank was established in January, 1886, and had, on 30th June, 1931, 55,874*l.* deposited.

#### *Means of Communication.*

There are no railways or telegraphs in the Colony, and but few good roads except in New Providence and Eleuthera.

There are no direct passenger steamers between England and the Bahamas. The cheapest route is via Jamaica, by Elder and Fyffes line from Avonmouth to Kingston (14 days) and by

the steamers of the Canadian National Steamships from Kingston to Nassau (3 days). The quickest route is via New York, the journey from New York to Nassau taking only three days by the steamers of the Munson Line, which leave New York weekly in winter and fortnightly in summer.

The cargo steamers of the Frederick Leyland Co. (Liverpool) and Thomas and James Harrison Co. (Liverpool) lines leave every four weeks from Liverpool and Glasgow, proceeding to Bahamas via Bermuda. The cargo steamers of the Royal Mail Steam Packet Company sail for the Bahamas from London every three weeks.

There is also a regular contract Mail, Passenger and Freight Service during the winter months, from January to April, between Nassau and Miami, Florida. These vessels make two voyages a week in January and April, and three voyages a week in February and March. A weekly summer service is usually maintained between Nassau and Miami by a vessel under contract with the Government.

Besides this Service there are motor boats plying almost daily between the ports of Miami and Nassau. During the past year an air mail and passenger service has been operated by The Pan American Airways Inc., on a daily schedule in the winter months between Nassau and Miami.

Till February, 1892, the nearest point in telegraphic communication with Europe was Key West, but in that month a cable from Nassau to Florida was completed. The cable is not however at present in working order. Wireless stations have been installed at Nassau (New Providence), Harbour Island, Governor's Harbour (Eleuthera), Grand Bahama, Millville, Abaco and Hope Town (Abaco), Inagua, Bimini and Long Island, Marsh Harbour (Abaco), San Salvador or Watlings, The Bight (Cat Island), Fresh Creek (Andros), George Town (Exuma), Long Cay (Fortune Island), Ragged Island and Rum Cay, Spanish Walla, Eleu.

Postal rates are as follows:—

	<i>Letters.</i>	<i>Newspapers.</i>
	1d. per 2 oz.	Free.
Internal		
U.K., Br. Empire & United States	1d. per oz.	½d. per 2 oz.
Canada	1d. per 2 oz.	—
Other Foreign	2½d. per oz. & 1½d. for each successive unit	½d. per 2 oz.
Postal Union Countries		

A parcel post with the United Kingdom (1*s.* 6*d.*, 4*s.*, 6*s.*, 7*s.* 6*d.*) the United States (6*d.* per lb.), Canada (6*d.* per lb.), Bermuda (6*d.* per lb.) and Jamaica (6*d.* per lb.) has been established, and money order agreements have been made with the United States, Canada and Jamaica.

#### *Constitution.*

The Executive Government is conducted, under Letters Patent, by the Governor, aided by an Executive Council not exceeding 9 members. The Legislative authority resides in the Governor, a Legislative Council, nominated by the Crown, and a Representative Assembly of 29 members, elected for 15 districts. An elector must be of full age, and either the owner for 12 months of land of the value of £5 or a householder of premises value 2*s.* in New Providence, or 1*l.* 4*s.* elsewhere, for six months. The qualification of Members is possession of an estate of real or personal property of the value of 200*l.* The Executive Council is composed partly of official and partly of unofficial Members who have a seat

in one of the branches of the Legislature. In the absence of the Governor the Senior Member of the Executive Council administers the Government.

### Education.

There is a Government system of elementary education, established in 1847, and modified by laws of 1864, 1875, 1885, and Consolidating Act of 1908. Attendance is compulsory from 6 to 14 years of age. The central control is in a Board of Education nominated by the Governor. Local Committees, partly elected, exercise local supervision only.

There are 55 unsectarian Government schools, and 52 aided schools, with 13,760 scholars; 8 Church of England schools, with 245 scholars; 5 private schools, with 159 scholars; 11 Roman Catholic schools, with 1,130 scholars; 1 Seventh Day Adventist school, with 29 scholars; 1 Government Industrial school, with 36 scholars; 5 Secondary schools, with 420 scholars. The Government Elementary schools were made free in 1885. Higher education is provided at Queen's College, St. Hilda's School, St. Francis Xavier's Academy, St. Cyprian's College, and the Government High School, all in Nassau.

*Mexico*, Honorary Consul, E. V. Solomon.

**BARBADOS.\***

**Situation and Area.**

Barbados is situated in latitude 13° 4' North and  
 longitude 59° 37' West, and is the most easterly  
 of the Caribbee Islands. It is nearly 21 miles  
 long by 14 in breadth, and contains an area of  
 106,470 acres, or about 166 square miles, some-  
 what larger than the Isle of Wight.

**History.**

The exact date of the discovery of Barbados is  
 not known. It is said to have been first visited by  
 the Portuguese, who, finding it uninhabited and  
 rude in appearance, named the isle *Los Barbados*,  
 from the number of bearded fig-trees which they  
 found. It was nominally taken possession of by the  
 English ship *Olive Blossom* in 1606, when it was  
 almost uninhabited. In 1626 Sir William Courteen,  
 a London merchant, under the protection of the  
 Earl of Marlborough, who held a grant of the island  
 from James I., fitted out two large ships, only one  
 of which arrived at Barbados, and the party, which  
 consisted of some thirty persons, landed in February,  
 1627, on the leeward side of the island, formed a  
 town called James' (or Hole) Town, and appointed  
 Captain William Deane their Governor. In 1627 the  
 Earl of Carlisle obtained a grant from Charles I. of all  
 the Caribbee Islands. This grant was opposed by  
 the former patentee, Lord Marlborough, but the  
 matter was compromised on the Earl of Carlisle  
 agreeing to settle on the Earl of Marlborough an  
 annuity of 300*l.* Soon after this the Earl of Carlisle  
 being employed on a diplomatic mission, the Earl  
 of Pembroke, then Lord Chamberlain, obtained a  
 revocation of the former nobleman's patent in his  
 favour and supported Sir W. Courteen; but on  
 the Earl of Carlisle's return from his embassy, he  
 remonstrated with the king, who reinstated him in  
 possession of the territory. Wolferstone, a native  
 of Bermuda, was then commissioned by the Earl of  
 Carlisle as Governor, and in 1628 sixty-four settlers  
 arrived in Carlisle Bay, commenced the erection  
 of wooden houses, threw a bridge across the river  
 which intersected the ground, and laid the founda-  
 tion of Bridgetown, the present capital. The Lee-  
 ward and Windward men opposed each other, the

\* See under Windward Islands for general map of  
 the West Indies.

latter ultimately triumphing. The civil war which raged in England contributed to people and enrich the island; and on the downfall of Charles, many families attached to the Royal cause found shelter in Barbados. The island was afterwards governed by Lord Willoughby, a Royalist, to whom it was conveyed by Lord Carlisle (son of the first patentee); but when the island was subdued by the Commonwealth he was banished. In 1662, after the Restoration, Lord Willoughby renewed his claim, and the kinsmen and heirs of the two earls brought forward demands on the settlers. To satisfy these claims, a duty of  $\frac{4}{3}$  per cent. on all exports was imposed; and under certain conditions the proprietary government was dissolved and the sovereignty of Barbados annexed to the British Crown. The inhabitants long protested against the imposition of the  $\frac{4}{3}$  per cent. duties, but without success; and it was not till 1838, four years after the abolition of slavery, that the tax was abolished by an Act of Parliament.

Barbados has not, like most of the neighbouring islands, changed owners; it has always remained in possession of Great Britain.

#### General Description.

Bridgetown, the chief town and port, is situated in the parish of St. Michael, in latitude  $13^{\circ} 5' 42''$  North, and longitude  $58^{\circ} 29' 29''$  West. This town contains, according to the census of 1921, 13,486 inhabitants. Speightstown, the only other town, has about 1,500 inhabitants.

Carlisle Bay, the harbour of Barbados, is an open roadstead, much exposed to the wind from the south and south-west. There is an inner harbour or carenage, protected by a structure called the Mole Head. It is a port of registry, and had registered, on 31st December, 1929, 33 vessels, of a total net tonnage of 7,184 tons.

The island is almost encircled by coral reefs, which in some parts, as off the parish of St. Phillip, extend nearly 3 miles to seaward, and prove very dangerous to navigation.

The area of the island called the Scotland district, which is the part enclosed by a semi-circular sweep of the ridge in the north-east, is composed of sandstones, clays, and infusorial earths.

Asphaltum has been mined on a small scale since 1896, and in 1929 the total amount of manjak exported from the island was about 52 tons, of the value of 1,712 $\frac{1}{2}$ ., prices averaging about 33 $\frac{1}{2}$  a ton.

Traces of oil have been discovered in certain districts and experimental borings are being carried out by the British Union Oil Company, Ltd., which has also established an oil depot and bunkering station for ships in Carlisle Bay.

A water supply is provided for all the parishes of the island by the Colonial Government, which bought up and extended the waterworks formerly operated by two companies, the Bridgetown Water Works Company and the Barbados Water Supply Company.

Owing to the steady Easterly Trade winds, which blow almost continuously from December to June, the climate is bracing and the heat is never oppressive. During the remainder of the year, the wet season of the Island, the heat is seldom excessive, although the absence of the Trade Winds renders the climate less invigorating. The average temperature is  $79^{\circ}$  F., and rainfall 61 inches.

The Island is largely visited as a Health resort by residents of neighbouring West Indian Colonies and British Guiana. It is, to a considerable extent

also utilised as a winter resort by visitors from temperate climates.

#### Industry, Trade and Customs.

The chief articles planted for exportation for some years after the settlement of the island were indigo, cotton-wool, ginger, and aloes, besides several kinds of woods; and the manufacture of sugar does not appear to have been practised with much success till about the middle of the 17th century, when the cultivation of the sugar-cane increased rapidly, and the plant became, in commercial importance, the island's most valuable production. At that period, too, the introduction of African labour was commenced. The produce exported during the last three years has been as follows:—

	Sugar. Hogsheads.	Molasses. Gallons.
1928 ...	54,824	7,229,181
1929 ...	65,516	8,035,779
1930 ...	50,455	9,085,307

The area under sugar cultivation is estimated at 35,000 acres. In September, 1898, the island, in common with St. Lucia and St. Vincent, suffered severely from the effects of a disastrous hurricane. In 1902-3 there was an epidemic of small-pox, which caused a prolonged quarantine and seriously affected trade. Cotton-growing was revived with help from the Colonial Treasury and the British Cotton Growing Association but has, owing to market and other conditions, almost entirely ceased. In 1930 the amount of cotton exported was 25,426 lbs., valued at £3,019. Efforts are being made to revive the industry.

The distribution of the Colony's import trade in 1930 was:—

	%	Value.
United Kingdom ...	33·8	£582,244
Canada ...	15·5	286,583
Other parts of the British Empire ...	19·3	313,843
United States of America ...	19·7	340,908
Other Foreign Countries ...	11·7	203,208

The Imports are classified as follows:—

Food, drink, etc....	£664,159
Raw materials ...	265,172
Manufactured articles ...	745,597
Miscellaneous ...	61,858
	£1,726,786
Specie ...	5,000

£1,731,786

The customs revenue is based on a tariff, of which two-thirds of the duties are collected on a specific basis and the remaining one-third on an ad valorem basis.

#### Population.

The population of the island in 1851 amounted to 135,939. By the census of 1891 the population was returned at 182,306. By the census of April, 1921, the population was 156,312, the decrease, as compared with the figures for 1891, being attributed to the large numbers of the labouring classes which have from time to time emigrated to Panama in connection with the Canal Works, while many others have gone to Para, Brazil, Cuba, the United States of America and Canada in search of more remunerative employment than what can be obtained locally. The population at the end of 1930 was 171,182. English is universally spoken. Labour is cheap, and the soil is well cultivated, the island having the appearance of a well-kept garden.

*Currency and Banking.*

Government accounts are kept in sterling; commercial accounts in dollars. British coin is legal tender and the chief medium of circulation. There is no limit to the legal tender of British silver, and there is no gold in circulation. There are three banks doing business in Barbados, Barclays Bank (Dominion, Colonial and Overseas), capital paid up 4,975,600*l.* sterling, and the Royal Bank of Canada, with a paid up capital of 6,932,745*l.*, and the Canadian Bank of Commerce with a paid up capital of 4,166,666*l.* There is a Government savings bank, which had, on 31st December, 1930, 10,634 depositors. The total amount at credit of depositors on 31st December, 1930, was 537,445*l.*

*Internal Communication.*

A railway from Bridgetown to the parish of St. Andrew (24 miles as surveyed) was commenced in 1880, and completed in September, 1882.

In 1916 the Railway was bought by the Government from the Company which operated it for the sum of 20,000*l.*, the cost of construction in 1882 being 195,234*l.* and considerable sums having been spent on reconstruction between 1898 and 1904.

An elaborate road system exists throughout the Island, 474 miles of road being suitable for use by motor vehicles.

The Barbados Telephone Co., Limited, a private company, maintains a total of 1,980 services, with a total length of line in use of about 5,400 miles. There is also a railway telephone line connecting all stations from Bridgetown to St. Andrews, about 24 miles.

*Steamer Communications, Postage, &c.*

Steamers of the Leyland and Harrison Lines from Liverpool, and the Harrison Line from Glasgow and London run direct to Barbados at irregular periods. Length of passage between 15 and 17 days.

The Royal Dutch West India Line runs a regular fortnightly service, touching at Dover on the outward journey and at Plymouth on the return journey. Length of passage 12 days.

The Elders and Fyffes Line of steamers run fortnightly.

The Furness Withy Line of steamers from the United States via the West Indian Islands, and the Canadian National Steamships from Canada, via Bermuda and the West Indian Islands, arrive fortnightly.

The cargo steamers of the Canadian Government Merchant Marine and the Canadian Pacific Line arrive frequently from Montreal direct.

There are many irregular arrivals of the Booth and Lloyd Brasileiro Lines from New York direct.

Besides these an occasional Italian Steamer from Mediterranean Ports, and many tramp steamers from South American Ports call at Barbados.

Telegraphic communication up to 1924 was mainly carried on by the West India and Panama Company via Cuba. The contract with this Company has now terminated and a new system of cable and wireless telegraph stations has been erected by the Imperial, Canadian, and West Indian Governments under the management of the Pacific Cable Board. Cables have been laid from Turks Islands (where connection is made with the Direct West India Company), Trinidad, and British Guiana to Barbados, which is the headquarters of the system. Other Colonies are being served by wireless telegraph stations communicating with Barbados. The principal tariffs per word are :—

	s.	d.
To the United Kingdom	1	10½
To Eastern Canada ...	1	0½
To Western Canada ...	1	3

There are also half-rates (Deferred) and cheaper rates for letter telegrams.

The Western Telegraph Company was granted permission to land their cable from Brasil in 1920, and the cable is working.

The Western Union Telegraph Company was also granted permission to land their cable, the other end of which was landed at Miami, Florida, in 1922, and the cable was opened for traffic on 29th August, 1922.

*Rates of Postage.*

Within the Island: Letters, 1*d.* per 1 oz.

Postcards, ½*d.* each.

Newspapers, ½*d.* per 4 oz.

Parcels, 2*d.* per ½ lb. up to 5 lbs.

U.K., India, and British Colonies and dependencies: Letters per 1 oz. 1*d.*, and for every additional oz. 1*d.*

United States of America and Porto Rico and The American Virgin Islands: Letters per 1 oz. 1*d.*, and for every additional oz. 1*d.*

Elsewhere: Letters per 1 oz. 2½*d.*, and for every additional oz. 1½*d.*

Postcards 1*d.* each.

Printed Papers and Books ½*d.* for 2 ozs. and for every additional 2 ozs. ½*d.*

Parcels to United Kingdom, 2*s.* per 3 lbs.; 3*s.* 6*d.* 7 lbs.; 4*s.* 6*d.* 11 lbs. not exceeding 22lb. 7*s.*

Do. West Indies, 1*s.* per 3 lbs.; 2*s.* 7 lbs.; 3*s.* 11 lbs.; 5*s.* 22 lbs.

Do. United States, 6*d.* per lb. limit 22 lbs.

Do. Canada, 6*d.* per lb. up to 30 lbs.

Do. Bermuda, 6*d.* per lb. up to 11 lbs.

Through United Kingdom in addition to postage charged in Great Britain: 3 lbs. 1*s.* 2*d.*; 7 lbs. 2*s.* 2*d.*; 11 lbs. 2*s.* 9*d.*; 22 lbs. 4*s.* 6*d.*

*Education.*

A Government system of elementary education was established by Act No. 41 of the 9th December, 1878, which authorised a total expenditure not exceeding 15,000*l.* annually on all grades of education. This section of the Act of 1878 was repealed, and Section 9 (d) of the Education (Amendment) Act, 1897, authorised an annual expenditure of a sum not exceeding 11,000*l.* on elementary education. This section has now been repealed by the Education (Amendment) Act, 1910, which authorised the amount to be spent on elementary education at 14,200*l.* In 1930 the sum of 41,037*l.* was voted by the Legislature for Elementary Education, and the total vote for all grades of education amounted to 53,541*l.*

The central administration is vested in a Board appointed by the Governor, and the local control of elementary schools is in the hands of the clergymen of the various districts assisted by committees of management. There are 128 elementary schools with 16,330 scholars (average attendance), and 23,281 on the rolls. At these elementary schools free education is now provided. Secondary schools are managed by Governing Bodies working under schemes formulated by the central Board of Education and approved by the Legislature.

Barbados possesses a college founded by General Sir Christopher Codrington, a native of the island, who died in 1710, and whose name it bears. It

was affiliated to Durham University in 1875. It is under the administration of the S.P.G., who are the Trustees of General Codrington's will. There are several theological scholarships of the value of 30*l.* per annum from the College funds, and six Island Scholarships at 40*l.* per annum paid from the Colonial Treasury. The latter are competitive, and are confined to natives or sons of natives, or of persons domiciled in the island who have resided therein for at least ten years.

There is a good grammar school, called Harrison College, in Bridgetown, established on an old foundation, which has been liberally supported by the Legislature. It has a staff of ten university men as Masters, two Preparatory Mistresses and two Lecturers in Natural and Agricultural Sciences. The number of pupils at the close of 1930 was 239. Another First Grade School, "The Lodge," situated in St. John's parish, to the N.E. of the island, was re-opened in 1882, after having been closed for several years. The number of pupils at the close of 1930 was 104. There are three Barbados English Scholarships, established by the Education Board, and endowed by the Colony, each of the annual value of 250*l.*, tenable at an English University, or at an Agricultural or Technical College in Europe or America, for three years.

The number of years for which these scholarships are tenable may be varied to four or five, but the total value of each scholarship cannot be more than 750*l.*

A first-grade school for girls was opened in 1883, called the Queen's College. It has a staff of twelve mistresses. The number of pupils at the close of 1930 was 156.

There are five second-grade schools for boys and three for girls. These first and second-grade schools cost the Government, including grants for scholarships, 10,015*l.* during 1930. They also receive annual grants for scholarships from the Vestries of the various parishes in which they are situated.

#### Police, &c.

A police force was established in Barbados in 1835 by an Act of the Legislature, and is stated to have been the first attempt in the British West India Colonies to establish a force of that description upon a similar footing. The Force consists of 4 officers and 408 non-commissioned officers and men. In 1882 the Harbour Police (established in 1867) were combined with the Land Police. A Juvenile Reformatory for boys was opened in April, 1883, and one for girls in April, 1911.

There is a lunatic asylum, a lazaretto and a general hospital in Bridgetown, to the latter of which the Colony contributed 18,000*l.* in 1929.

#### Constitution.

The Colony possesses representative institutions, but not responsible Government. The Crown has only a veto on legislation, but the Home Government retains the appointment and control of public officers, except the Treasurer, who is an officer of the House of Assembly. The Legislature consists of a Governor, a Legislative Council, consisting of nine members appointed by the King, and a House of Assembly, having twenty-four members elected annually on the basis of a moderate franchise. The qualifications of members and electors are regulated by a Franchise Act, which became law in April, 1884, and which repeals all previous legislation on the subject. By this Act an extension of

the franchise was granted, and 2,004 electors were registered under its provisions, the number previous to its enactment being only 1,641. This and other Acts relating to the franchise was consolidated by the Representation of the People Act, 1901. The only change made was the extension of the franchise to persons enjoying a pension of 50*l.* a year or more. The number of registered electors for the year 1929 was 5,148. The executive part of the Government is vested in the Executive Council appointed by the Crown and consists of the Governor, the Colonial Secretary, the Attorney-General *ex officio*, Sir F. J. Clarke, K.C.M.G., Speaker of the House of Assembly, and Sir W. K. Chandler, K.C.M.G., LL.D., and such other persons as may be nominated by the King, and the Executive Committee consist of the members of the Executive Council *ex officio*, one member from the Legislative Council, and four members of the House of Assembly nominated annually by the Governor. This body introduces all money votes, prepares the estimates, and initiates all Government measures. The Governor of Barbados was for many years the Governor-in-Chief of the Windward Islands, consisting of Barbados, St. Lucia, St. Vincent, Grenada, and Tobago, but in 1885, by Royal Letters Patent, Barbados was separated from the other Windward Islands and made a distinct Government.

#### Local Government.

The island is divided into eleven parishes, each of which has its local affairs administered by a Vestry which is elected annually, the Rector of the Parish being the Chairman. The functions of the Vestry include sanitation, the care of the sick and poor, and the upkeep of roads. The latter is carried out by Highway Commissioners appointed by each Vestry from its members. The Vestries levy rates on lands and houses, and taxes on trade vehicles, draught animals, &c.

The total revenue collected by the Vestries in 1930-31 amounted to 136,064*l.*

**3rd Grade Clerk**, C. A. Durant.

**4th Grade Clerks**, E. A. Newsam, A. R. Foster, A. G. Smith, A. W. Harper, J. N. Smith.

#### Public Works.

**Superintendent**, L. C. G. Taggart, 500*l*.

**Draughtsman**, H. G. Murray, 200*l*. to 300*l*.

**Overseer**, A. C. Weatherhead, 225*l*. to 250*l*.

**4th Grade Clerk**, F. A. Bishop, 150*l*-200*l*.

#### Harbour Master's Department.

**Harbour and Shipping Master**, Commander W. R. M. Wynne, R.N. ret*d*., 500*l*.

**Engineer in Charge of Government Craft**, A. C. Weatherhead, 150*l*.

**3rd Grade Clerk**, A. H. Johnson.

**Captain of Steam Launches**, J. E. Griffith, 150*l*. to 200*l*.

#### Savings Bank.

**Manager**, J. B. Howell, O.B.E., V.D., 500*l*.

**2nd Grade Clerk**, J. A. Roberts.

**3rd Grade Clerks**, F. Gooding and R. A. Dear.

**4th Grade Clerk**, S. B. Inniss.

#### Public Library.

**Librarian**, Mrs. G. B. R. Burton, 200*l*.

#### Public Market.

**Clerk and Inspector of Weights and Measures**, A. L. S. Pontifex, 200*l*., and fees.

**Inspector of Meat** (vacant).

**Medical Surveyor**, R. M. Johnson, L.R.C.S., L.R.C.P. (Edin.), fees.

#### Judicial Establishment.

**Chief Justice**, Sir R. H. Furness, Kt., 1,200*l*.

**Attorney-General**, E. A. Collymore, 750*l*., and 250*l*. per annum for conducting Government business in the House of Assembly.

**Clerk**, C. V. H. Archer, 250*l*.

**Solicitor-General**, E. K. Walcott, M.C.P., 250*l*., private practice.

**King's Solicitor and Proctor**, H. Graham Yearwood, fees (private practice).

**Registrar**, C. W. Reece, 550*l*.

**Deputy Registrar**, H. Williams, 300*l*. to 400*l*.

**4th Grade Clerk**, G. C. Williams.

**Provost-Marshal**, E. B. Bynoe, 400*l*.

**4th Grade Clerk**, V. H. B. Roehford.

**Registrar in Admiralty**, C. W. Reece.

**Commissioners for taking the Probates of Deeds, etc.**, C. W. Flemming, J. S. Sainsbury, J. B. Howell, C. L. Elder and E. C. Dear, fees.

**Judges of the Assistant Court of Appeal**, G. Clyde Williams and E. C. Dear\*, 600*l*. each.

**Clerk to ditto and Chief Clerk of the Petty Debt Court of Bridgetown**, 2nd Grade Clerk, O. L. Abrams.

**Police Magistrates of District "A"**, H. M. Seon, and O. L. Bancroft, 500*l*. each.

**4th Grade Clerk**, F. A. C. Clairmonte.

**Police Magistrates of Rural Districts**, A. K. Bynoe, W. G. Mahon, and T. F. Goodman, 500*l*. each.

† **Clerks to the above**, 3rd Grade Clerk, E. L. Walcott, D. D. Morris, S. H. Nurse.

**4th Grade Clerks**, E. F. L. Morris, L. D. Bannister.

**Coroners**, O. L. Bancroft, H. M. Seon, T. F. Goodman, A. K. Bynoe and W. G. Mahon.

#### Medical.

**Chief Medical Officer** (vacant).

**Bacteriologist**, R. M. Johnson, L.R.C.S., L.R.C.P., Edin., 500*l*.

**Health Officer**, J. D. Alleyne, M.D., 600*l*. and fees.

**Assistant Health Officer**, A. G. Bancroft, M.D., C.M. (McGill), 200*l*. (and private practice).

**Clerk, Board of Health**, 3rd Grade Clerk, A. De V. Chase.

**Visiting Surgeon, General Hospital**, G. Manning, M.D., C.M., 100*l*.

**Visiting Surgeon, General Hospital**, Mortimer Johnson, L.R.C.S., L.R.C.P., Edin., 100*l*.

**Visiting Surgeon, General Hospital**, H. G. Massiah, M.D., C.M., 100*l*.

**Ophthalmic Surgeon**, C. H. St. John, M.B.B.S. (London), M.R.C.S., L.R.C.P., D.A.M.S., 100*l*.

**Radiologist**, H. E. Skeete, M.D., C.M., 50*l*.

**Assistant Ophthalmic Surgeon**, E. W. Roberts, M.D., 50*l*.

**Dental Surgeon**, F. Manning, D.D.S., 50*l*.

**Assistant Surgeons**, A. G. Bancroft, M.D., C.M.; H. E. Skeete, M.D., C.M.; L. C. Hutson, M.B., C.M.

**Senior Resident Surgeon, General Hospital**, A. C. Kirtan, M.B., Ch.B. (Edin.), 450*l*., and quarters.

\* This office is combined with that of Registrar of Friendly Societies.

† The Police Magistrate's Clerk of District "F" is also Revenue Officer of that District, and receives an extra 90*l*. a year. The Clerks of the Rural Districts receive 40*l*. a year for house and travelling allowance extra.

*Resident Surgeon*, R. H. King, M.D., C.M., (McGill) P.M.B., (Nova Scotia), 325*l.*, and quarters.

*Resident Surgeon*, 325*l.* and quarters. Karl Wilson-James, L.R.C.P. (London), L.R.C.S. (Eng.)

*Matron*, Miss A. Veacock, 250*l.*, and quarters.

*Assistant to Matron*, Miss E. Hudson, 200*l.*

*Pay Wards Sister*, Miss H. Fletcher, 175*l.*

*Theatre Sister*, Miss W. Heath, 175*l.*

*Manager and Secretary and Assistant to Radiologist*, Jabez Ward, 450*l.*

*Medical Superintendent, Lunatic Asylum*, W. S. Birch, M.R.C.S. (Eng.), L.R.C.P. (London), 600*l.*, and quarters.

*Assistant Medical Superintendent*, A. J. McKinlay, M.B., Ch.B., 500*l.*-25*l.*-600*l.* and quarters.

*Resident Steward*, L. A. Fields, 250*l.* to 350*l.*

*Visiting Physician, Lazaretto*, A. L. Goddard, M.D., C.M., 300*l.* (and private practice).

*Superintendent and Steward*, J. H. O. Goddard, 200*l.*, and quarters.

*Assistant Steward and Head Male Attendant*, C. F. A. Taylor, 150*l.*

#### *Educational.*

*President of the Education Board*, H. B. G. Austin, M.C.P., O.B.E.

*Principal of Codrington College*, The Rev. J. C. Wippell, M.A., B.D.

*Lecturer*, W. W. C. Dunlop, M.A.

*Medical Lecturer, etc., of Codrington College*, F. W. Greaves, M.B., Ch.B., 40*l.*

*Lecturer in Agricultural Science*, W. A. McD. Paterson.

*Head Master of Harrison College*, H. N. Haskell, M.A., 750*l.*, and quarters.

*Assistant Masters*, H. B. Gooding, M.A., B.D. (Oxon), 490*l.*; E. B. Knapp, 375*l.*; L. A. Walcott, M.A. (Durham), 375*l.*; J. A. Ewart, B.A. (Cantab), 325*l.*; A. H. S. Cocks, B.A. (Cantab), 325*l.*; L. T. Evans, M.A., 415*l.*; R. B. Moulder, B.A., 325*l.*; C. W. Hutchinson, B.A., 325*l.*; D. De C. Marshall, B.A. (Durham), 250*l.*; Miss C. Gardner, 150*l.*; and Miss M. E. Phillips, 112*l.*

*Spanish Master*, V. A. Southwell, 125*l.*

All unmarried Masters have quarters.

*Science Master*, W. A. McD. Paterson.

*Assistant Science Master*, T. A. E. Barker, B.Sc. (Lond.).

*Head Master of the Lodge School*, O. de C. Emtage, M.A., 750*l.*, and house. *Assistant Masters*, W. A. Farmer, 400*l.*, and A. R. V. Newsam, B.A., 300*l.*; J. B. Emtage, B.A. (Oxon), 300*l.*-400*l.*; A. B. Hodgson, B.A., 300*l.*-400*l.*, Miss E. Kirby 100*l.*; Miss H. Bynoe, 75*l.*

*Science Master*, A. B. Hodgson, B.A.

*Music Mistress*, Miss W. Stukes.

*Inspector of Schools*, Rev. J. R. Nichols, M.B.E., 300*l.*, and 150*l.* travelling allowance. Personal allowance 100*l.*

*Assistant Inspector of Schools*, N. Greenhalgh, B.Sc., 250*l.*, and 150*l.* travelling allowance. Personal allowance 100*l.*

*Secretary of Education Board*, M. T. G. Mahon, B.A., 250*l.* Personal allowance 100*l.*

*Assistant Secretary*, Miss M. Layne, 125*l.*

#### *Poor Law Board.*

*President*, Sir F. J. Clarke, K.C.M.G.

*Members*, Dr. John Hutton, M.B.E., E. A. Collymore, H. W. Reece and G. D. L. Pile.

*Secretary*, A. De V. Chase, 3rd Grade Clerk, and 25*l.* per annum extra as Vaccination Officer.

#### *Water Works Department.*

##### *Officers:—*

*Engineer and Manager*, Major G. E. Peek, M.C., A.M.I.C.E., 1,000*l.*

*Assistant Manager*, J. R. M. Cave, M.S.E., 500*l.*

*Superintendent*, E. A. Chase, A.M.S.E., M.I.J.E., 300*l.* to 400*l.*

*Resident Mechanical Engineer*, J. T. Lynch, 300*l.* to 400*l.*

*Two Inspectors*, S. I. Foster and T. E. Went, 200*l.* to 300*l.*

*4th Grade Clerks*, C. W. Rudder, A. G. Kineh, and E. D. Connor.

#### *Department of Science and Agriculture.*

*Director of Science and Agriculture*, R. W. R. Miller, B.A., A.I.C., Dip. Agric. (Cantab), 1,000*l.* and travelling allowance.

*Assistant Director*, C. C. Skeete, B.A., 500*l.* to 600*l.*, travelling allowance.

*Geneticist*, A. E. S. McIntosh, B.Sc., Ph.D. (Edin.), 500*l.* to 600*l.*, travelling allowance.

*Assistant Agricultural Chemist*, S. J. Saint, B.Sc. (Lond.), A.I.C., 500*l.* to 600*l.*, personal allowance 200*l.* and travelling allowance.

*Entomologist*, R. W. R. Tucker, M.A. (Cantab), B.Ed. (Cape Town), 1,000*l.*, travelling allowance.

*Veterinary Officer* (vacant), 500*l.* to 600*l.*

*Assistant to Professor of Chemistry*, T. A. E. Barker, B.Sc. (Lond.) 400*l.* to 500*l.*

*Lecturer in Natural and Agricultural Sciences*, W. A. McD. Paterson, 400*l.* to 500*l.*

*Chief Analytical Assistant*, C. A. Coppin, B.A.Sc. (Toronto), 300*l.* to 400*l.*

*Plant Diseases Inspector*, D. R. D. Wiles, D.I.C.T.A., 250*l.* to 300*l.* and travelling allowance.

*Chief Clerk and Clerk to Board of Agriculture*, H. O. Ramsey, 300*l.* to 400*l.*

*Second Clerk*, G. D. Ramsey, 250*l.* to 300*l.*

*Third Clerk*, C. G. Humphrey, 200*l.* to 250*l.*

*Fourth Clerk*, B. G. Barrow, 120*l.*

*First Field Assistant*, C. B. Foster, 300*l.* to 400*l.*, travelling allowance (vacant).

*Second Field Assistant*, H. E. Ward, 250*l.* to 300*l.*, travelling allowance.

*Third Field Assistant*, C. C. Corbin, 200*l.* to 250*l.*, travelling allowance.

*Fourth Field Assistant*, F. E. Bynoe, 150*l.* to 200*l.*, travelling allowance.

*Analytical Assistant*, H. A. Jones, 200*l.* to 250*l.*

*Analytical Assistant*, C. St. A. Alleyne, 150*l.* to 200*l.*

*Analytical Assistant*, L. A. Hall, 100*l.* to 150*l.*

*Botanical Assistant*, L. H. Atkinson, 100*l.* to 150*l.*

#### *Ecclesiastical.*

*Bishop*, Rt. Rev. David Bentley, D.D., 1,000*l.*

*Chancellor of the Diocese*, (vacant).

*Archdeacon*, Rev. R. Skeete, M.A.

*Registrar of Diocese*, G. B. Evelyn, fees.

\* Also Consulting Engineer to the Government.

*Dean and Rector of St. Michael, Very Rev.*  
A. Shankland, 400*l*.  
*Christ Church, Rev. P. A. Farrar, 330*l*.*  
*St. Philip, Rev. F. G. Stanton, 330*l*.*  
*St. George, Rev. J. A. Partridge, 330*l*.*  
*St. John, Rev. C. Culpian, 330*l*.*

*Lt.-Col. Commanding the Barbados Volunteers,*

Lt.-Col. Sir F. J. Clarke, K.C.M.G.

*Staff Officer, Capt. H. J. R. Brierly, M.C.*

## BERMUDA.

### Situation and Area.

The "Bermudas" or "Somers' Islands" form a group or cluster of about 300 small islands, situated in the Western Atlantic Ocean, in lat. 32° 15' N., and long. 64° 51' W., about 580 miles to the eastward of Cape Hatteras in North Carolina, the nearest point of the neighbouring American Continent. The distance from Liverpool is about 2,900 miles, from Halifax in Nova Scotia 730, from New York 677, and from the nearest of the West Indian Islands about 800 miles. The total area is estimated at 19 square miles (less than one-eighth of Rutland).

### History.

These islands were discovered in the year 1515, by a Spanish mariner, Juan Bermudez, after whom they were called The Bermudas. The Spaniards, however, took no steps to form a settlement on the islands, and they were still entirely uninhabited when, in 1609, Admiral Sir George Somers' ship, *The Sea Venture*, while on a voyage with a fleet of eight other vessels, conveying a party of colonists to the new plantations then being formed in Virginia, was wrecked upon one of the numerous sunken reefs which surround the islands on every side. The reef is still called after the name of the Admiral's ship, *The Sea Venture* Flat.

Sir George Somers died in Bermuda the following year, and his companions, ignorant possibly of the prior claims of Juan Bermudez, called the group after him, "The Somers' Islands." The reports of the beauty and fertility of the land, taken home by Somers' nephew, Captain Mathew Somers, induced the Virginia Company to seek an extension of their Charter, so as to include the islands within their dominion, and this extension was readily granted by King James I., but shortly afterwards the Virginia Company sold the islands for the sum of 2,000*l*. to a new body of adventurers, called "The Governor and Company of the City of London for the Plantation of the Somers Islands," and thenceforward, for a considerable time, the islands bore the name of the Admiral who had led thither the first body of settlers.

### General Description.

The Bermudas, of which a good account will be found in the narrative of the voyage of the *Challenger*, may be described as a singular agglomeration of small islands and submarine sand-hills and coral reefs, forming together an irregular oval ring, measuring about 22 miles in length from N.E. to S.W., and about 3 miles in width from N.W. to S.E. The external ring—whether composed of islands or of sunken banks or reefs—is seldom more than a mile in width, and generally considerably less.

At present the southern portion only of the encircling ring is formed of islands, the northern, eastern, and western sides being composed of almost continuous reefs of coral. The largest island, generally known as The Main Island, is about 14 miles in length, and about a mile in average width; it contains about 9,000 acres of land, the highest point being only 240 feet above the sea. All the other islands taken together measure about 3,000 acres. The city of Hamilton, now the seat of Government, is situated about the centre of the main island, where a deep inlet running up for two or three miles into the land

from the sheltered waters, enclosed between the encircling reef, forms a safe and convenient harbour for the vessels which carry on the island trade.

Next in importance to the main island is the island of St. George, on which stands the town of St. George, so named after Admiral Sir George Somers, whose heart is buried there. This town was formerly the capital of the Colony, and though now shorn of much of its importance by the transfer of the seat of Government to Hamilton, is still a town of considerable trade, and its harbour is much frequented as a harbour of refuge.

The other principal islands of the group are—Ireland Island, entirely given up for the accommodation of His Majesty's Dockyard and a number of other naval establishments; Boaz and Watford Islands, intervening between Ireland Island and the rest of the group, and now exclusively occupied by military depôts and garrisons; Somerset, Smith's, St. David's, Cooper's, Nonsuch, Rivers, Ports, and Godets—all inhabited by a civil population. The islands form an almost continuous chain, and there is uninterrupted communication by roads and bridges and causeways from St. George over the main island and Somerset, and over Watford and Boaz to Ireland Island—a distance of about 22 miles.

About one-half of the inhabitants are of English descent, the remainder belonging for the most part to the negro race. English is universally spoken.

The climate has been long celebrated for its mildness and salubrity. The rainfall in 1930 was 60·27 inches, as against 59·57 in 1929, 73·72 in 1928, 50·12 in 1927, 70·30 in 1926, and 66·26 in 1925. There is no winter, the thermometer never falling below 40 deg. of Fahr., and the summers are never very hot, the thermometer rarely rising above 86 deg. The summer heat, too, is generally tempered by a pleasant sea breeze.

In 1914 the Legislature voted the sum of 51,750*l.*, payable in fifteen yearly instalments, as a contribution to the Imperial Treasury in aid of the war fund.

The state of the Colony's finances did not admit of an immediate cash contribution and these annual payments represent a lump sum of the present value of 40,000*l.*

In 1927 the Legislature voted a contribution to His Majesty's Government of 2/6 per capita of the local population, payable after the 1st January, 1930, towards the cost of the military Garrison in the Colony, and a further contribution payable after the 1st January, 1928, of a sum computed in respect of all ranks of the Military Garrison serving in the Colony.

#### *Industry, Trade and Customs.*

In former days the inhabitants of Bermuda gave themselves up almost entirely to maritime pursuits. Numerous small vessels, of from 200 to 300 tons burthen, built by the islanders themselves, of their native cedar, traded between the West Indies and Demerara, and the United States, and the British colonies of North America. Later they extended their voyages, carrying the salt fish of Newfoundland to Italy and Portugal, and taking back the Port wine for which Newfoundland became celebrated, or running down to Madeira or Ascension to meet the homeward-bound Indian fleet, and taking back cargoes of tea or other Indian and Chinese products to be distributed along the American seaboard.

The repeal of the British navigation laws, the introduction of steam, and the very general substitution of iron for wooden ships, gradually destroyed the carrying trade which had been so profitable to Bermuda, and now the maritime fleet may be said to have ceased to exist, and the industry of the islanders is entirely confined to mercantile pursuits and to turning to account the small quantity of agricultural land which they possess.

The soil of Bermuda is naturally calcareous, free-draining, and poor in humus. A fair state of fertility is, however, readily maintained by the regular use of manures and fertilisers. Not more than one-fourth of the total area of the colony can be cultivated, but the climate, combined with the geographical position of these islands, compensates for the small extent of arable land. There is never any danger of frost, and seeds may be sown and plants put out at any time. The main crops, potatoes, onions and green vegetables, are planted from August to March, and are reaped and shipped from December to June when the New York market is comparatively bare of early potatoes and fresh vegetables.

Practically the whole of the exports go to the United States, and two-thirds of the imports come from that country, the remainder coming from the United Kingdom and Canada. There is a small trade with the West Indies.

The Islands of Bermuda have become a favourite winter resort for Americans and Canadians seeking to escape the rigours of the climate of the continent. Large hotels have sprung up, and a considerable amount of money is expended by the visitors.

The total number of tourists to Bermuda during 1930 was 43,094, of whom 42,226 came from the United States of America and Canada, and 366 from the United Kingdom.

The quantity of shipping is remarkable for so small a place. During 1930, as will be seen from the tables, 5,739,748 tonnage entered and cleared, of which 3,862,478 was British.

About two-thirds of the Government revenue is obtained from Customs Duties on imports. The greater part of these receipts is from *ad valorem* duties at the rate of 10 per cent., with a surtax of 25 per cent. of the duty on all goods of non-British origin. Wines, spirits, and tobacco of British origin are subject to a 22½ per cent. surtax.

#### *Currency and Banking.*

The coins in circulation are British currency, which is legal tender. There is no limit to the legal tender of British silver. Bermuda Government £1 and 10*s.* Currency Notes to the value of £131,223 have been placed in circulation since 1915. There are two incorporated banks, the Bank of Bermuda, Limited, and the Bank of N. T. Butterfield & Son, Limited, and several of the leading merchants do a considerable amount of business as private bankers and agents. A Government savings bank was established in 1871, and there are branches at Hamilton, St. George's, and Sandy's Parish. The number of depositors at the end of 1930 was 4,868, the total amount of deposits 132,703*l.*

On the 1st of January, 1922, the Savings Bank was transferred from the Treasury to the Post Office Department.

### Education.

In 1839 the Colonial Legislature first granted a sum of money to aid elementary schools.

The central control is vested in a Board of Education, consisting of ten members appointed by the Governor under the provisions of the Schools Act, 1922.

All the schools are private schools, charging fees. Attendance is compulsory, and there were, in 1930, 32 aided schools with about 3,782 scholars.

There are, in addition, about 12 schools which receive no State aid.

In August, 1905, the Legislature established an annual scholarship of 150*l.*, tenable by youths, natives of Bermuda, for two years at some educational institution abroad to be approved by the Governor, with a view to assisting youths to prepare to compete for the Rhodes' Scholarship awarded to Bermuda. The amount was increased to 200*l.* p.a. in 1920, and the tenure of the scholarship to three years in 1927.

At the end of the year 1924, the Bermuda (Technical Education) Scholarship Act was passed establishing four new scholarships each of the value of 125*l.*, subsequently increased to 150*l.*, and tenable for four years at some educational institution out of the Colony.

### Means of Communication.

Telegraphic communication with the United Kingdom is carried on by the cable between the Islands and Halifax, Nova Scotia.

Rates to Halifax, 1*s.* 4*d.* per word.

„ England, 2*s.* 6*d.* „

This cable has also been carried on to Turks Island and Jamaica, thus giving direct telegraphic communication with the West Indies.

Communication between Bermuda and England is maintained by steamers of Messrs. Elders and Fyffes, Ltd., and of the Pacific Steam Navigation Co., Ltd., which make regular calls at Bermuda every month outward and homeward, Bermuda being a port of call in both directions. The ships of the former line sail from Avonmouth and of the latter from Liverpool.

Permits to land in Bermuda are required by other than first class passengers.

Communication between Bermuda and New York is maintained by steamers of the Furness-Bermuda Line, with bi-weekly sailings and by the Munson Line.

The R.M.S.P. also maintain a weekly service with New York from December to April.

The Canadian National Steamships maintain a passenger and freight service between Montreal, Bermuda, Nassau, Kingston, Belize and British Honduras, sailing every two weeks from Montreal in summer and from Halifax in winter, and the Canadian Pacific Railway Company a freight service from Montreal to Bermuda, Barbados, Trinidad and Demerara, sailings about twice a month.

Letters from England usually take from nine to twelve days. Postage rates are:—

	Letters.	Newspapers.
Within the Colony, per 1 oz. 1 <i>d.</i>		1 <i>d.</i> per 2 oz.
To U.K., India and	<div style="display: inline-block; vertical-align: middle;"> <div style="display: inline-block; vertical-align: middle;">Books</div> <div style="display: inline-block; vertical-align: middle;">per 2 oz.</div> </div>	<div style="display: inline-block; vertical-align: middle;"> <div style="display: inline-block; vertical-align: middle;">Papers</div> <div style="display: inline-block; vertical-align: middle;">per 2 oz.</div> </div>
British Colonies, per ½ oz. 1 <i>d.</i>		
To all other		
countries		

Parcels to England, 1*s.* for 3 lbs.; 2*s.* for 7 lbs.; 3*s.* for 11 lbs.

### Internal Communications.

A light railway is under construction in the Colony. There are approximately 105 miles of colonial and 15 miles of military roads. There is a private telephone company, which has about 1,300 subscribers and about 1,600 miles of wire in line.

### Government and Constitution.

Representative government was introduced into the Colony in 1620, but the charter of the Bermuda Company of London was annulled in 1684, and since then the Governors have always been appointed by the Crown, and the laws of the Colony have been enacted by a local legislature consisting of the Governor, the Legislative Council, and the House of Assembly. The session lasts usually from November to June.

The Governor is assisted by an Executive Council, consisting at present of four official and three unofficial members. The Legislative Council consists of nine members, three of whom are official and six unofficial. The House of Assembly consists of thirty-six members, four of whom are elected by each of the nine parishes. The members of Executive Council and of the Legislature are paid 8*s.* a day for each day's attendance. There are 1,807 electors, the electoral qualifications being the possession of freehold property of not less than 60*l.* value. The qualification for a member of the House of Assembly is the possession of freehold property rated at 240*l.*

On the 1st August, 1920, the 300th anniversary of the first meeting of the General Assembly was celebrated by a joint session of all branches of the legislature held at St. Georges in the "Old State House," in which the early assemblies sat.

### Local Government.

Hamilton and St. George have been incorporated since 1793 and 1797 respectively, and there are nine parish vestries, all the members of which, as well as of the two municipal corporations, are elected annually.

## BRITISH GUIANA.

*Situation, Area and Population.*

British Guiana is the only British Colony on the Mainland of the South American Continent. It lies on the north-eastern coast of the continent between parallels 1° and 8° North and meridians 57° and 61° West. It has a coastline of about 270 miles extending almost from the eastern mouth of the river Orinoco to the river Courantyne, and is bounded on the north by the Atlantic Ocean, on the south and south-west by Brazil, on the east by Dutch Guiana, and on the north-west by Venezuela. It varies in depth from 540 miles on the western to 300 miles on the eastern side.

The area of the Colony is approximately 89,480 square miles, a little larger than the combined areas of England, Scotland and Wales.

The capital is Georgetown, situated in latitude 6° 49' 30" North and longitude 58° 11' 30" West, and possessing population of 61,870 (Census 1931). The next town of importance is New Amsterdam about 60 miles east of the capital with a population of 7,904.

The estimated population of the Colony on the 31st December, 1930, was 312,489 made up as follows:—

Aboriginals .. .. .	8,614
East Indians .. .. .	130,075
Chinese .. .. .	2,695
Europeans (Portuguese) .. .	8,131
Europeans (other than Portuguese) .. .	2,927
Blacks, mixed, etc. .. .	312,489

Of the estimated total there were 157,303 males and 155,186 females.

A preliminary report of the Census taken in April, 1931, gives the total population of the Colony, exclusive of Aboriginal Indians living in remote parts, as 310,571.

*Physiography.*

The Colony may be divided into three zones, the northern one is a low-lying flat swampy strip of marine alluvium known as the coastal region. This rises gradually from the seaboard and extends inland for a distance varying from 10 to 40 miles. It is succeeded by a broader and slightly elevated belt consisting of sands and clays which is mainly undulating and in places is covered by sand-dunes rising from 50 to 180 feet above sea level. The southern zone is more elevated. It rises gradually to the south-west between the river valleys, which are in many parts swampy, and contains three principal mountain ranges, several irregularly distributed smaller ranges, and in the southern and eastern parts many isolated hills and mountains. The eastern portion is almost entirely forest-clad, but on the south-western side there is an extensive area of flat grass-clad savannah elevated about 400 to 700 feet above sea level.

The country is traversed by many large rivers, which, with their numerous tributaries and branch streams, form a vast network of waterways. All the larger rivers of the Colony are impeded above the tide-way by numerous rapids, cataracts and falls, which render the navigation of the upper reaches difficult.

In its scenery British Guiana affords very great contrasts. The tourist who visits the colony and confines himself to the flat and settled coast-lands receives with the impression that British Guiana is merely a mud-flat not entirely above sea-level; but the traveller who penetrates any considerable

distance into the vast interior must be greatly impressed by the tropical vegetation of lofty trees, tangled lianas and graceful palms, the hilly nature of the country, the many great ranges and curiously-shaped mountains, the elevated undulating plateaus, the extensive savannahs, and the multitude of cataracts and waterfalls of surpassing beauty, which occur on the upper parts of the large rivers and their tributaries.

Situated on the Potaro River is Kaieteur—one of the recognised largest single-drop waterfalls of the world. It is nearly five times the height of Niagara, having a vertical drop of 741 feet, with a series of rapids and falls immediately below the pool, giving a further fall of 80 feet. Its width varies from 350 to 400 feet, and the depth of water passing over from a few feet to 20 feet according to the season of the year. These Falls, which are situated amidst grand and remarkable river and hill scenery, are a source of attraction to tourists. The journey from Georgetown to Kaieteur and back now takes 10 days or less—for the most part by boat—but proposals for road construction in the Interior, which are now contemplated, will, in the near future, permit of the journey being performed in a few days for the greater part of the way by road.

*Climate.*

A.—*Coastal Belt.*—The climate compares favourably with that of other countries and islands similarly situated, and resembles rather that of a sub-tropical country. The mean temperature throughout the year is 80.4° F.

For most months of the year the maximum shade temperature is about 85° F., and even in the hottest months (August, September, and October) a temperature of 89° F. is rarely recorded.

At night the temperature falls about 12° to 14° F. The night temperature averages 73° or 74° F., and in the coolest months of the year (January, February and March) it may reach as low as 70° F.

The heat of the sun is tempered by fresh breezes from off the sea which blow steadily and without intermission during the daytime for the greater part of the year, and, during the months of January, February and March, continue both day and night.

The general direction of the wind is North-east to East, and it varies from gentle to fresh with occasional squalls; but hurricanes are unknown. The nights throughout the year are cool and conducive to sleep.

The seasons of the year for the coastal areas are as follows:—

The long wet season—Mid-April to Mid-August.

The long dry season—Mid-August to Mid-November.

The short wet season—Mid-November to end of January.

The short dry season—Beginning of February to Mid-April.

The average rainfall for Georgetown in the county of Demerara is about 88.64 inches annually, that for the County of Berbice being about eight inches lower, and that for the County of Essequibo fourteen inches higher. The most humid month of the year is May, and the atmosphere is driest during September and October. The mean average humidity for Georgetown for the past 83 years is 78 per cent.

B.—*Middle Interior and Upper River Areas.*—Generally speaking, the climate is hotter and more humid in the interior and river areas away from the coastal belt, the most noticeable change being the absence of the fresh sea breezes which make living

so congenial on the seaboard. In forest areas and on rivers surrounded by forests the day temperature is distinctly hot and trying. On the other hand the nights are noticeably cooler than on the coastal belt. The rainfall is heavier.

C.—*For Interior and Savannas.*—Climate, temperature and humidity are modified by the varying physical conformations of the territory in the far south, and depend especially on the altitude and the presence or absence of forest belts. As the name implies, the savannas, in the upper Berbice river districts and in the south-west of the colony, are free from dense forest and are more in the nature of park country, and here the temperature is slightly higher than in forest regions, and the rainfall markedly less.

#### *History and Constitution.*

The coast line of the country between the Rivers Amazon and Orinoco was first traced by Spanish sailors in 1499 and 1500; and, during the 16th and early 17th centuries, the search for the fabulous city of Eldorado stimulated exploration of this region. The territory was first partially settled in 1616 by Dutch merchants, who erected a fort and depot at Fort Kykoveral in the present county of Essequibo. This colony subsequently came under the control of the Dutch West India Company, which was formed in 1621. In 1624 a settlement was founded on the Berbice by Van Peere, a Flushing merchant, and held by him under a license from the Company. The first English attempt at settlement was made by Captain Charles Leigh on the O'apock river (now French Guiana) in 1604. The effort, though followed up by Robert Harcourt in 1613 and 1627, failed to establish a permanent settlement. Lord Willoughby, famous in the early history of Barbadoes, also turned his attention to Guiana, and founded a settlement in Surinam in 1650, which was captured by the Dutch in 1667, and ceded to them at the peace of Breda in exchange for New York. The Dutch retained their hold on the three colonies with more or less firmness, now yielding to England, now to France or Portugal, till 1796, when during the war of the French Revolution they were captured by a British Fleet from Barbadoes. The territory was restored to the Dutch in 1802, but in the following year retaken by Great Britain, and finally ceded to that Power in 1814.

In 1745 colonists from Essequibo settled on the Demerara River, and in 1773 Demerara was constituted a separate colony, but in 1784 it was reunited under one government with Essequibo, Berbice being under a separate government, an arrangement which continued in force under the British Administration down to the year 1831.

The constitution of the Colony of Berbice dates from the year 1732. Under it the Governor was nominated by the Directors of the Mercantile Body called the Berbice Association, and was assisted by a council of six. In 1826 an order of the King in Council was issued, dissolving the then Council of Government, appointing another, and thenceforward vesting the right of appointing to vacancies in the Governor as representing the Crown.

The Court of Policy for Essequibo appears to have been established very early in the history of the Colony. Until 1773, Demerara was represented on it. In 1773 a separate Court of Policy was set up for the latter, but provision was made for representatives of the two Courts of Policy to form a Combined Council, and the two bodies were merged in 1789, when the two Colonies of Essequibo and Demerara were united. Disputes having arisen between the Colonists the local Government

and the West India Company as to the right of appointing the colonial members of the Court of Policy, in the year 1787, a provisional "Plan of Redress," as it was termed (being in fact the draft of a new constitution) was framed by a Committee of the States-General, to whom had been referred sundry petitions of the Colonists. This being approved, a commission was despatched by the States-General to the Colony, who on their arrival in 1789 dissolved the then existing Government and established a new one for the conjoined Colonies upon the basis of the scheme in question, which continued in operation notwithstanding the capture of the Colony by the British in 1796 and 1803, the Articles of Capitulation having stipulated that the laws, usages, and institutions of the Colony should be maintained as before.

The Council or Court of Policy consisted of 1st, The Director-General; 2, The Commander of Essequibo; 3, The Fiscal of Essequibo; 4, The Fiscal of Demerara; 5 and 6, two Colonists from Essequibo; 7 and 8, two Colonists from Demerara.

In the first instance, the unofficial portion of the Council was to be chosen from a double nomination by the Colleges of Kiezers or Electors, of which there were two, one for each County,\* each consisting of seven Members elected by a majority of the votes of the inhabitants possessing not fewer than twenty-five slaves, such votes to be in writing and signed by the voter. The tenure of the office of Kiezer, as subsequently defined by Proclamation of Sir Benjamin d'Urban in 1831, was to be for life, unless the party resigned or ceased to be an inhabitant.

In 1795 it was deemed necessary, during a period of some confusion, to introduce four members "commissioned" by the Colleges of Electors of both Colonies to have, jointly with the Court of Policy, the administration of the public funds. In the following year, however, Governor Beaujon annulled this arrangement, and to secure to the inhabitants more ample control of taxation enacted that in lieu of the four above mentioned, there should be six inhabitants adjoined to the Governor and Court of Policy, three from each Colony, to be elected by the inhabitants qualified as in the case of Kiezers, and to serve for two years, but with powers strictly limited to raising Colony taxes, and assisting in the audit of the public accounts.

Beaujon's proclamation was materially modified, though without affecting the definition of the duties of the financial representatives, by a proclamation of Acting Governor Carmichael in 1812, consolidating the two Colleges of Kiezers and Financial Representatives. This proclamation remained operative, though unconfirmed by the Crown, until, in 1831, when the three provinces were united, it was annulled by a Royal Instruction restoring the pre-existing arrangement, and extending the right of suffrage to the inhabitants of Berbice.

In the year 1855 under the administration of Sir Philip Wodehouse, an Ordinance was passed to alter and amend the Political Institutions of the Colony, but it was not approved by Her Majesty, and from that date till 1891 the only constitutional legislation was the passing of Ordinance No. 1 of 1864, a declaratory Act, defining the meaning of the term "Colonist," as employed in the "Plan of Redress" above noticed; and Ordinance No. 16 of 1864, to remove some difficulties in the exercise of the functions of the College of Electors.

The Constitution, as it existed up to 1891, may be summed up very briefly. It consisted of a Governor, Court of Policy, and a Combined Court.

\* Demerara and Essequibo only are here alluded to.

The unofficial members of the Combined Court and Court of Policy were chosen by a College of Electors. The functions of an Executive and Legislative Council and House of Assembly were performed by the Governor and Court of Policy, except as regards taxation and finance, which were dealt with by the Combined Court, composed of the Governor and Members of the Court of Policy, combined with the six Financial Representatives. The Court of Policy passed all laws and ordinances, except the Annual Tax Ordinance, which was passed by the Combined Court.

During 1891 an Act was passed, which came into force in 1892, effecting a considerable change in the constitution. By this Act the administrative functions of the Court of Policy were transferred to an executive council, and the duties of the former became purely legislative.

The College of Electors was abolished, and the unofficial members have since been elected by the direct vote of the whole body of electors.

The Combined Court had the power of (1) imposing the Colonial taxes and auditing the public accounts; and (2) discussing freely and without reserve the items on the annual estimates prepared by the Governor in Executive Council; it could reduce or reject, but not increase, any item. The first of these powers was bestowed in 1796, when Governor Beaulieu called the financial representatives into being, "with a right of voting only for the raising of colonial taxes and not further"; while the second was conferred periodically by His Majesty's Order in Council after each renewal of the Civil List and was co-existent with the Civil List.

The Court of Policy consisted of the Governor, seven official members, and eight elected members. It could be prorogued or dissolved at any time by the Governor and in any case was dissolved at the end of five years, and a general election had to be held within two months of the date of dissolution. The number of financial representatives, who with the Court of Policy formed the Combined Court, was 6.

In 1926, at the request of the Secretary of State, a commission consisting of Sir Roy Wilson and Mr. H. Snell, M.P., was sent to British Guiana to report on the economic conditions. In its report (Cmd. 2841) the commission stated that one of the greatest impediments to development was the financial situation, and that it was essential that the Government should have power in the last resort to carry into effect measures which it considered essential, and that for this purpose an alteration in the constitution would be necessary. A local commission was appointed in 1927 to consider the steps to be taken to confer the necessary powers on the Governor and reported in favour of a change in the constitution.

In 1923, by an Act of Parliament, it was enacted that it should be lawful for His Majesty in Council to create and constitute, in substitution for the existing Legislature, a Legislature for the Colony of British Guiana in such form and with such powers as His Majesty in Council might determine, and from time to time to alter and amend the constitution of the Legislature and any powers thereof; and that any such Order in Council might provide that, notwithstanding the powers conferred on the Legislature thereby, there should be reserved to or conferred on His Majesty full power by Order in Council from time to time to make laws for the peace, order and good government of the Colony of British Guiana.

Pursuant to this Act, an Order of the King in Council providing for the Government of the Colony and for the constitution of a Legislature

Council, was brought into operation on 18th July, 1923. The Court of Policy and Combined Court were thereby abolished and their powers were given to the new Legislative Council. The new Council consists of the Governor as President, of ten Official Members and of nineteen Unofficial Members. The Colonial Secretary and Attorney-General are ex-officio members, and of the nineteen unofficial members, fourteen are elected and the remainder nominated by the Governor. The persons who were elected members of the Combined Court became under the Order in Council the first Elected Members of the Legislative Council. It was also provided that any matter requiring a vote of enactment of the Council might be decided by the Governor in Executive Council notwithstanding that such decision might be contrary to the vote of a majority of the Legislative Council; but in such a case effect cannot be given to the decision until the facts have been reported to the Secretary of State and his approval obtained. The first General Election under the new Constitution was held in 1930.

#### *Law.*

The Roman-Dutch law was in force in the Colony until 1st January, 1917, at which date the Civil Law of British Guiana Ordinance came into force. This enactment, along with two others, was the outcome of a Common Law Commission and Statute Law Committee. The Criminal Law is based upon that of Great Britain, and is administered in the same manner, except that indictments are preferred by the Attorney-General and there is no Grand Jury.

#### *Local Government.*

In 1837 the first municipal body was incorporated. The principle has now been materially extended in its application.

The existing municipal authorities are: mayor and town council, Georgetown; and mayor and town council, New Amsterdam. Their revenue in 1928 was respectively 175,230*l.* and 19,391*l.*, and their expenditure 171,070*l.* and 19,838*l.* There are also 24 Village Districts and 99 Country Districts, whose revenue and expenditure in 1930 were respectively 30,860*l.* and 31,097*l.*; in 1929 the figures were 34,942*l.* and 35,647*l.*

#### *Communications—Internal and External.*

The three rivers, Demerara, Essequibo, and Berbice, are navigable for 90, 35, and 150 miles respectively. Beyond these distances, owing to the nature of the country, they abound in cataracts and waterfalls. There is a good network of roads, and there are small canals in connection with the Demerara River. There is a railway from Georgetown to Rosignol on the Berbice River, 60½ miles in length, and one from Vreed-en-Hoop on the Demerara River to Parika on the Essequibo River, 18½ miles in length, both lines having been constructed by the Demerara Railway Company at a total cost of 694,821*l.* 8*s.* 1*d.* The Railways were acquired by the Colony from the Company in 1921 as from the 1st January, 1919, and are now operated by Government in conjunction with certain steamer services under the control of the Transport and Harbours Department. The steamers operate ferries across the Demerara, Berbice and Essequibo Rivers and services from Georgetown to Adventure on the Essequibo Coast to Bartica at the junction of the Mazaruni and Essequibo Rivers, to Morawhanna in the North-West District and to Pinkersgill on the

Pomeroon River and also from New Amsterdam to Paradise on the Berbice River. Launch services are also run by the Department on the Canje, and Pomeroon-Moruka Rivers.

A steamer service is also operated from Georgetown to Wismar on the Demerara River by Messrs. Sproston Limited.

Roads have been opened by the Government between the Barima and Barama rivers, between the Potaro and Konawaruk rivers, from Bartica towards the Kaburi creek between the Essequibo and Mazaruni; and a road has been constructed by private enterprise between Cartobo point on the Mazaruni river to the Puruni river. The Bartica-Kaburi road has been reconstructed as a motor road and is now being extended to the Potaro district and eventually to the Kaieteur Falls. A cattle trail 182 miles long extends from Takama on the Berbice river, picking up a branch from Arakwa Creek on the Demerara river, to Annai on the Rupununi river, whence the open savannah extends for a further 129 miles to Dadanawa.

The postal telegraph system comprises 390 miles of line, with 8 submarine cables, having a total length of 23 miles. The Colony is in telegraph communication with Barbados, and through Barbados with the United Kingdom, Canada, North America and other parts of the world over cables maintained by the Pacific Cable Board (All Red Route). Communication with the British West Indies generally is maintained by the Pacific Cable Board's cable to Barbados and thence by wireless.

The principal tariffs are:—

To the United Kingdom ..	2s. 4d.	per word.
To Eastern Canada ..	1s. 6d.	" "
To Western Canada ..	1s. 8½d.	" "

There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

The wireless station in Georgetown is in communication with five stations in the interior, and also with ships and points outside the Colony.

There is a Direction Finding Station at Georgetown.

There is an up-to-date Postal Telephone Service in the Colony, with Exchanges in Georgetown, Queenstown, New Amsterdam and nine of the larger villages, including three semi-automatic exchanges.

Two separate police exchanges are maintained in Georgetown and one in New Amsterdam.

A full automatic exchange was opened at Queenstown on 29th June, 1928.

Length of telephone trunk lines 728 miles. Telephone lines in Exchange areas 3,941 miles. Aerial cables 13 miles. Submarine cables 23 miles.

A well-organised postal service extends throughout the colony, letters reaching Pomeroon in 10 hours from Georgetown, and the North-Western District in 24 hours. Georgetown and New Amsterdam are lighted by electricity.

The mail communication between the Colony and the United Kingdom is somewhat irregular, but nevertheless there are many opportunities.

The steamers of the Harrison and Bookers Lines are used, also via Trinidad:—

English—Elder and Fyffes Ltd. Line.

French—Plymouth and St. Nazaire Line.

Dutch—Colon Line

via Havre-Dutch-Surinam Line.

Mails for North America are received and despatched fairly regularly by the following steamers:—Canadian National Steamships, Trinidad Shipping Company and via Trinidad by Lampot and Holt Line, and by the aeroplanes of the Pan American Airways, Incorporated.

### Rates of Postage.

	Letters. 4 cents. per 10s. 3 cents. each addtl. for 10s. 6 and 3 cents. for every succeeding 10s. or part of 10s.	Newspapers. For every 2 os. 1 cent.
To the British Empire and United States of America		
To other postal union countries		For every 2 os. 1 cent.
Within Colony ...	each letter not exceeding 1 os. 2 cents; over 1 os. not over 2 os. 8 cents; over 2 os. not over 4 os. 4 cents; each additional 2 os. 1 cent.	3 cents.

### Parcels Post.

To the United Kingdom	up to 3 lbs.	54 cents.
	up to 7 lbs.	88 "
	up to 11 lbs.	\$1'20 "
	from 11 lbs. to 22 lbs.	\$1'90 "

	" 22 lbs.	\$1'30 "
To Canada ...	up to 15 lbs.	12 cents.
	over 15 lbs. up to 22 lbs.	\$2.00 "

### Industry and Trade.

The staple products of British Guiana are sugar, rum, molasses, molascuit, concentrated lime juice, rice, coconuts, coconut-oil, copra, coffee, balata and rubber. Sugar and rice are the chief industries of the Colony. Sugar and its by-products furnish 55 per cent. in value of the total exports. Timber—including the famous Demerara Greenheart, which is unrivalled for underwater structures, piling, etc., and Mora, which is becoming increasingly known and valued for railway sleepers—charcoal and hides are also exported. There are 28 sugar estates in active operation, with a total area of 149,953 acres, of which 57,244 are under sugar, 9,447 under rice, and 6,437 under other cultivation, and the remainder used as pasture lands or uncultivated.

The forests, with which the interior of the colony is covered, abound in woods of rare beauty and value. Some of the hard woods are, from their remarkable durability, peculiarly suitable for house and shipbuilding purposes, and for railway sleepers, while others are equally prized for the manufacture of household furniture.

During 1930, 127,784 tons of sugar, and 1,571,371 pf. gallons of rum, were produced. The bulk of the production is high-class vacuum pan sugar for refining purposes, while certain quantities of the far-famed "Demerara Crystals" are still exported.

Coconuts, coffee and cocoa are grown on the alluvial soils on the banks of the rivers. Rice is now grown to a considerable extent, chiefly by East Indians, on the low lands within the empoldered areas. Rice exported, 1930, 22,480 tons, valued at 227,164l.

Gold and diamond working is carried on by about 4,400 diggers. The diamonds exported during 1930 amounted to 102,051 carats, valued at 298,201l.

The values of the principal exports besides sugar (114,542 tons valued at 1,128,934l.) and rice are:—Bauxite, 124,600l.; gold, 18,663l.; timber, 29,093l.; balata, 81,311l.; charcoal, 10,335l.; firewood, 6,640l.; coconuts, 1,634l.; lumber, 3,705l.

The chief imports are beef, pork, cheese, butter, cornmeal, flour, machinery, dried fish, manure, tobacco, oils, earthenware, glass and hardware, cutlery, textiles, spirits, wines and malt liquors.

Forty-three per cent. of the trade is with the United Kingdom, 28 per cent. with Canada, and 9 per cent. with the United States; other important customers being British West Indies, Holland and Dutch Guiana.

#### Medical Institutions.

There are six Government public (general) hospitals providing beds for approximately 869 patients. The accommodation varies from 8 beds in smaller out-stations to 564 beds in the Public Hospital, Georgetown (Demerara).

There are also a Mental Hospital in Berbice and a Leprosy Hospital at Mahaica (Demerara) providing accommodation for 769 and 446 patients respectively.

There are in addition to the dispensaries attached to the general hospitals 12 Government dispensaries in outlying parts of the Colony.

Twenty-five hospitals, with dispensaries, with 1,689 beds are maintained by proprietors of sugar estates.

Attached to the Public Hospital, Georgetown, (Demerara) are X-Ray and Electrical-treatment, Ophthalmic, Dental and Bacteriological Departments, and Venereal Diseases and Tuberculosis sections. Infirmarys are attached to the Prisons (2), Almshouse (1) and Industrial School.

The Public Health Department consists of 1 Medical Officer of Health and 2 Assistant Medical Officers of Health and 29 Sanitary Inspectors.

There are two institutions where nurses are trained by qualified medical and nursing staffs.

There is a Surgeon Specialist attached to the Public Hospital, Georgetown, and the European nursing staff consists of 1 Nurse Superintendent and 4 Divisional Sisters.

#### Education.

A State-aided system of elementary education was established by Law No. 3 of 1876.

The elementary schools are denominational. The central administration is vested in a Director and Education Committee, and the local control in managers, who are usually ministers of religion.

The number of schools receiving aid in 1930 was 238, with 42,634 scholars, and the aid granted amounted to 66,478*l*.

Provision is made for the higher education of boys by a Government college in Georgetown, in which the course of instruction is similar to that of a public school or first grade grammar school in England. Three secondary schools for girls, one for boys and one for boys and girls receive grants in-aid from the Government and there is awarded annually one public scholarship of the value of 900*l*., open to boys and girls and tenable at a University or College in the British Empire. Twelve Scholarships, entitling the holders to free education at the Government College or at other approved schools, are granted to scholars of the elementary schools. In 1924-25 the whole system of education in the Colony was investigated by a Commission. Important changes were recommended, and are being made as opportunity arises.

A Teachers' Training Centre was established in September, 1928.

#### Currency and Banking.

Accounts are kept in dollars and cents. British sterling and United States gold coin is current and legal tender.

On the 16th August, 1915, the Combined Court approved of the issue of Government Currency Notes of the face value of \$1  $\frac{1}{4}$  *s.* 2*d.*, and \$2  $\frac{1}{4}$  *s.* 4*d.* The first notes were issued in January, 1917; and on the

31st December, 1930, there were Notes in circulation to the face value of 104,166*l*.

Barclays Bank (Dominion, Colonial and Overseas) Ltd., and Royal Bank of Canada have establishments at Georgetown, with branches at New Amsterdam, Berbice. The former, on the 31st December, 1930, had a note circulation in British Guiana of 100,973*l*., and the Royal Bank of Canada 74,956*l*. The total note circulation in the Colony on the 31st December, 1930, was 280,095*l*.

The first Government savings banks were established at Georgetown and New Amsterdam in the year 1836. There are 42 Post Office Savings Banks. At the end of 1930 these banks had 34,471 depositors, with 233,422*l*. to their credit.

The Combined Court in November, 1910, passed a resolution approving of the amalgamation of the two Banks, and authorising the transfer of the Government Savings Bank to the Post Office on the 1st July, 1911.

The British Guiana Bank, now the Royal Bank of Canada, opened a Savings Bank Department when this amalgamation took place, and a considerable amount of business went into their hands. The Colonial Bank has also since opened a Savings Bank department.

## \*BRITISH HONDURAS.

### *Situation and Area.*

British Honduras is a Colony on the east coast of Central America, bounded on the north by Yucatan, on the west by a straight line drawn from the Falls of Gracias a Dios on the River Sarstoon, to Garbutt's Falls on the River Belize, and thence due north to the Mexican frontier, on the south of Guatemala, and on the east by the Bay of Honduras. It lies between 18° 29' and 15° 54' N. latitude and 89° 15' and 87° 50' W. longitude.

The area of the Colony is 8,598 square miles, about the size of Wales, including Albion Island in the River Hondo (about 26 square miles), and Ambergris, St. George's, English, Turneffe and other Cays (Islands), 212 square miles, a large portion of the latter being mangrove swamps without any soil. It is estimated that about 155 square miles are under cultivation.

### *History.*

The coast was discovered in 1502 by Columbus, and its early settlement is supposed to have been effected from Jamaica, about 1638, by adventurers, who were attracted by the logwood which grew on the banks of the Hondo and other rivers. Their headquarters were long at St. George's Cay. The name of the present chief town and of the River Belize is alleged to be a corruption of the name of the buccaneer Wallis, who was driven from Hispaniola in that year, and who is said to have been the leader of the settlers. The Spaniards frequently endeavoured to expel the logcutters; but, though they succeeded in driving them from the northern coast of Yucatan about 1717, they failed to dislodge them from the eastern coast.

An earlier settlement had been made by a chartered company, of which the Earl of Warwick was chairman and John Pym treasurer, on two small islands off the Mosquito coast, in 1630. The Mosquito natives were very friendly to the English settlers, and their king, shortly after the conquest of Jamaica, placed himself under English protection, and the Governors of Jamaica exercised a sort of supervision over the affairs of the settlement. In 1739 the native king made a treaty resigning his country to Great Britain, and forts were built in 1742 at the Island of Rustan, and at Black River on the mainland. Rustan was abandoned in 1749, but at the same time an officer was formally appointed by the Government of Jamaica to superintend the settlements on the Mosquito Coast. As a result of the treaty of Paris in 1763, the forts were dismantled and the garrisons withdrawn. The settlers remained, however, and from that date until 1798, when the last attempt to establish the sovereignty of Spain over the territory was defeated by the inhabitants in the "Battle of St. George's Cay," the Spaniards made frequent but ineffectual attempts to expel the woodcutters by force of arms. By the Treaty of Versailles of 1763 Spain recognised a district (within what is now British Honduras) within which the British logcutters might work without interference; and by the Convention of London signed in 1786, it was agreed that the British Colonists should evacuate the Mosquito Coast and the adjacent islands. In spite of these treaties, many of the settlers remained outside the agreed limits; and it was not until the treaties of

1869 with the Republic of Honduras and 1860 with Nicaragua that the Bay Islands and the Mosquito Coast were finally recognised as belonging to those states, Nicaragua agreeing to allow the Mosquito Indians autonomy in the Reserve which was assigned to them.

On the 10th of September, 1931, Belize was visited by a hurricane and tidal wave which caused great damage and loss of life.

#### *Constitution.*

The first settlers from 1638 to 1786 managed their own affairs. Persons were annually elected to act as Magistrates at public meetings held for the purpose. These Magistrates discharged all executive and judicial functions. Resolutions were passed at public meetings, and they formed the laws binding on the community. In 1765 these customs were formally recognised by the King's Government, after the visit of Admiral Sir William Burnaby to the settlement in that year. The customs of the settlers were codified and published, and became known as "Burnaby's Laws."

In 1786 a Superintendent was appointed by the Home Government, but during the years 1790-1797 elected Magistrates again ruled the settlements. From this latter date Superintendents were regularly appointed until 1862. An Executive Council was established in 1840 to assist the Superintendent, and in 1863 a Legislative Assembly was formally constituted, consisting of 18 elected and 3 nominated members. The settlement was declared a Colony on the 12th May, 1862, and a Lieutenant-Governor was appointed subordinate to the Governor of Jamaica. In 1870 the Legislative Assembly was abolished by a local enactment, and a Legislative Council substituted therefor, consisting of five official, and not less than four unofficial, members, with the Lieutenant-Governor as President. The constitution of the Council was altered in 1892, after a dispute with the Governor, and became three ex-officio official members and not less than five (nominated) unofficial members with the Governor as President. Since 1913 the Council contains six official and seven unofficial members. On the 31st October, 1884, Letters Patent were proclaimed constituting the office of Governor and Commander-in-Chief, which rendered the Colony independent of Jamaica. These were renewed by Letters Patent proclaimed on the 10th September, 1909.

The English Common Law and all statutes of the Imperial Parliament "in abrogation or derogation or in any way declaratory of the Common Law passed before 1899 extend to the Colony as far as local circumstances render such extension suitable, and subject to modification by Colonial ordinances. Pursuant to Ordinance No. 31 of 1923, a new and revised edition of the Laws of this Colony has been published in two volumes. This edition, referred to as "The Consolidated Laws, 1924," came into force on the 4th February, 1925, and supersedes the revised edition published in 1915 and all ordinances passed before July, 1924. Appeals to His Majesty in Council are regulated by Chapter 165 of the Consolidated Laws, 1924.

The Executive Council consists of the Governor, and seven members, three of whom are *ex officio*, the other four being appointed members.

For administrative purposes the Colony is divided into six districts—Belize, which includes the capital at the mouth of the river of the same name; the Corozal district; the Orange Walk district; the Cayo district; the Stann Creek

district; and the Toledo district, the main station of which is Punta Gorda.

#### *General Description.*

In its physical outlines the Colony resembles other parts of Central America, the land being flat and swampy throughout the greater portion of the coast line, and gradually rising as the interior is approached. The characteristic soils of the Colony are known as Cohune ridge (the vegetable alluvium along the river valleys), the Pine ridge (sandy tracts covered with pines, scrub, and wiry grass), and Broken ridge (intermediate between these two). Besides these there are swamp, savannah, and mountain.

The chief rivers are in the north of the Colony, and run in a north-easterly direction, the Belize reaching the sea on the east, and the Hondo and the New River on the north.

The northern district, of which the Hondo forms the natural boundary, is but little raised above the sea; but towards the south the character of the country becomes more elevated, until in the Cookscomb Mountains a height of some 3,700 feet is attained. That district of the Colony remained until 1879 wholly unexplored, when it was traversed by the then Colonial Secretary, Mr. Fowler, from Garbutt's Falls on the Belize River, at the western frontier, to the sea coast south of Deep River. The country proved to be a succession of valleys and hills, from 1,200 to 3,000 feet above sea level. The westerly portion was an open undulating grassy country, forming magnificent pasture lands. Towards the coast it was all forest, full of valuable timber. No inhabitants were seen, but ancient Indian ruins, consisting of large stone buildings, were discovered. The soil generally was rich, and indications of minerals were noticed.

#### *Industry.*

For more than 200 years the Colony has subsisted mainly on the natural resources of its forests. In 1930, the percentage values of exports of domestic produce were forest produce 84.58, agricultural produce 14.53, and marine produce .86. A Forest Department has been in existence since 1922, and its finance is administered by a Forest Trust established for that purpose.

The chief items of export in 1930 were as follows:—Mahogany, 10,829,331 superficial feet; cedar, 382,198 superficial feet; rosewood 12 tons; chicle, 4,094,415 lbs.; logwood, 225 tons; coconuts, 4,760,135; copra, 1,653,296 lbs.; bananas, 89,924 bunches; plantains, 3,000; grape fruit, 4,267 cases.

Belize is a port of registry, and there were registered on 31st December, 1930, 214 vessels aggregating 2,137 tons net.

The imports consist mainly of mahogany and chicle in transit, cotton goods, petroleum oils, hardware, haberdashery and millinery, boots and shoes, spirits, tobacco and provisions. The commercial intercourse is mainly with the United States the United Kingdom and Canada.

#### *Communications.*

The easiest communication is by water along the coast. There is regular communication once a week alternately with New Orleans and Mobile, weekly with Puerto Barrios and Puerto Cortes, monthly with New York and (approximately) with Liverpool and Colon. There is also a fortnightly mail and passenger service by the Canadian National Steamships Company with Jamaica, and

thence to Canada *via* the Bahamas and Bermuda. The usual length of the journey between England and British Honduras is 16 days, *via* the United States and about 21 days *via* Jamaica. Telegraphic communication with Europe is maintained by a land line to Consejo on the Hondo River, which connects, by a cable across the Hondo, with the Mexican Telegraph System through Payo Obispo in Yucatan (1911); and by radio-telegraphic communication with New Orleans (1915) and Jamaica (1928).

A telegraph and telephone line has also been constructed from Belize to the most southerly town of Punta Gorda, and another from Belize to the Cayo. A Radio-telegraph Station is situated in Belize.

Belize is a stopping place of the planes of the Pan American Airway, Inc., on the Company's air mail and passenger service between Miami, Florida, and the Canal Zone, Panama.

A short railway leads from the town of Stann Creek, 25 miles inland, the first section of which was opened towards the end of 1908, and the second section in March, 1909. The line was practically completed in 1910, but extraordinary floods in 1911 carried away a couple of bridges, and did other damage, which have been replaced.

#### *Rates of Postage.*

	<i>Letters.</i>	<i>Newspapers.</i>
Within the Colony	per 2 ozs. 2 cents, and 1 cent. for each subsequent oz. or fraction of an oz.	1 cent per 4 oz.
To Canada and the B. W. I. generally	per oz. or frac- tion, 2 cents.	1 cent. per 2 oz.
To the United Kingdom, British Possessions (except as above), Egypt and United States	per oz. 4 cents, and for every subsequent oz. or fraction of an oz., 2 cents.	1 cent. per 2 oz.
Elsewhere . . .	5 cents for first oz. and 3 cents for each subse- quent oz. or fraction of an oz.	1 cent per 2 oz.

#### *Air Mail.*

To U.S.A. (via Miami, Fla.), Honduras (via Tela), Nicaragua (via Managua), 15 cents for each fractional half-ounce, Costa Rica and Panama (including Canal Zone), 20 cents for each fractional half-ounce or less (in addition to the ordinary postage).

#### *Climate.*

Though situated within the tropics, the climate is sub-tropical in character. The maximum shade temperature is 90°, the minimum 62°. The dew point in Belize, a seaport, is relatively high. Sea breezes prevail for the greater part of the year. The average rainfall during the past twenty years has been 81.48 inches per annum. From the middle of February to the middle of May is the dry season. For the rest of the year there is rain to some extent during every month, the heaviest rainfall being in the months of September, October and November, during which months about one-third of the total rain occurs.

#### *Currency and Banking.*

By Ordinance No. 31 of 1894, the currency was established on a gold basis, the United States gold dollar being adopted as the standard coin.

Gold coins of the United States Mint are legal tender for the amounts of their respective denominations in standard dollars; also the British sovereign and half-sovereign for the amounts of \$4.867 and \$2.433 respectively. There is a local subsidiary currency of 50 cent, 25 cent, 10 cent, and 5 cent silver pieces, and a Government note issue of the following denominations: 1, 2, 5 and 10 dollars; a nickel bronze 5 cent piece and a bronze cent piece are also current. The legal tender in silver is unlimited, and in nickel or bronze, 50 cents. The Government Savings Bank, established in 1846 at Belize (with branches at Corozal, Orange Walk, Stann Creek, Punta Gorda and the Cayo), had, on 31st March, 1931, \$235,235.

On the 14th October, 1912, The Bank of British Honduras, Ltd., was bought over as a going concern by the Royal Bank of Canada. Banking business of every character is conducted.

#### *Education.*

The schools, both Secondary and Primary, are, with one or two exceptions, denominational. With few exceptions, all Primary schools are inspected and aided by the Colonial Government. Seventy-five received aid in 1930, to the extent of \$71,864, with 7,754 scholars on the roll, and 6,118 average attendance. The total cost of Primary education for the year was \$77,796.

The total number of pupils on the roll in all the schools was about 8,701, with an average attendance of 6,975.

A Law "To provide for Compulsory Education in certain cases," was passed in January, 1916. This Law was replaced by Law No. 14 of 1926, which applies generally to all school areas where it is practicable to enforce it.

#### *Population.*

The population of the several Districts of the Colony, based on the census taken on the 24th April, 1921, was:

Belize District	17,398
Corozal District	6,756
Orange Walk District	5,607
Stann Creek District	4,850
Toledo District	5,242
Cayo District	5,464

Total . . . 45,317

Of the total population 39,734 were, at the date of the 1921 census, British subjects. Of this number, 279 were born in the United Kingdom. There were 167 Americans, of whom 155 were born in the United States, and 1,348 Mexicans who were all born in Mexico.

Population of towns at census of 1921: Belize, 12,661; Corozal, 2,079; Orange Walk, 1,175; Stann Creek, 2,577; Mullins River, 348; Punta Gorda, 926; Monkey River, 424; El Cayo, 1,237; Benque Viejo, 1,097.

#### Governors.\*

1899 Colonel Sir David Wilson, K.C.M.G.  
 1904 Sir E. B. Sweet-Escott, K.C.M.G.  
 1906 Col. Sir E. J. E. Swayne, K.C.M.G., C.B.  
 1913 Sir Wilfred Collet, K.C.M.G.  
 1918 W. Hart Bennett, C.M.G.  
 1919 Sir Eyre Hutson, K.C.M.G.  
 1925 Major Sir J. A. Burdon, K.B.E., C.M.G.

#### Executive Council.

The Governor.  
 The Colonial Secretary.  
 The Attorney-General.  
 The Treasurer.  
 Lt.-Col. J. Cran, O.B.E., V.D., M.D.  
 S. Outhbert, O.B.E.  
 H. I. Melhado.  
 V. L. Bryant.  
 Clerk, E. O. B. Barrow.

#### Legislative Council.

President, The Governor.  
 Official Members—The Colonial Secretary; The Attorney-General; The Treasurer; H. C. Carter, M.C.; F. W. Brunton.  
 Unofficial Members—V. L. Bryant; Rev. R. Oglehorn; H. Melhado; E. J. Hofius; Lt.-Col. J. Cran, O.B.E., V.D., M.D.; B. A. Stuart.  
 Clerk, E. O. B. Barrow.

#### Civil Establishment.

Governor and Commander-in-Chief (vacant), \$9,720 and \$600 duty allowance.  
 Private Secretary (vacant), \$1,230.

#### Colonial Secretary's Department.

Colonial Secretary, H. G. Pilling, C.M.G., \$4,374 and house.

\* For Governors previous to 1899, see Edition for 1904.

Senior Clerk and Clerk of Councils, E. O. B. Barrow, \$1,700. Duty Allowance, \$100.  
 1st Class Clerk, R. E. Gabourel, \$850 to \$1,230. Personal Allowance, \$150.  
 2nd Class Clerk, W. Harrison Courtenay, \$690 to \$906. Personal Allowance, \$150.  
 Govt. Printer, E. A. Baber (acting), \$2,400.

#### Treasury and Savings Bank Department. Treasury.

Treasurer, H. A. W. Moulder, \$3,402.  
 Cashier, W. M. McField, \$1,230 to \$1,590, personal \$300.  
 Accountant, H. E. Westby, \$1,230 to \$1,590.  
 1st Class Clerks, M. M. Mitchell, W. S. Leslie, \$850 to \$1,230.  
 2nd Class Clerk, R. A. Pitts, \$650 to \$950.

#### Internal Revenue Office.

Internal Revenue Officer, M. S. Metzgen, \$1,900 to \$2,400.  
 Assistant Internal Revenue Officer, L. J. Marchand, \$1,230 to \$1,590.  
 2nd Class Clerk, B. S. Theus, \$690 to \$906.

#### Customs and Excise Department.

Collector of Customs and Harbour Master, V. Grey-Wilson, \$2,430, personal \$700.  
 First Customs and Excise Officer, R. K. Maason, \$1,500 to \$1,800.  
 Customs and Excise Officers, Senior: L. C. Sowers, R. J. Gabourel, E. Yasaguirre, \$1,230 to \$1,590 each; 1st grade: E. L. McG. Arthur, E. P. Bradley, \$942 to \$1,230 each; 2nd grade: T. J. Hudson, S. E. Hulsa, P. M. Ewing, S. R. Vasquez, D. R. Bradley, \$690 to \$906 each.

#### Post Office Department.

Colonial Postmaster, H. W. Beaumont, \$1,800 to \$2,400.  
 1st Class Clerk, A. T. Smith, \$850 to \$1,230.  
 2nd Class Clerk, A. P. Bowen, \$690 to \$906.

#### Telephone and Telegraph Department.

Electrical Engineer and Superintendent, M. Outhbert, \$2,000 to \$2,400, personal \$300.  
 Foreman, C. Anderson, \$1,000 to \$1,300.  
 Wireman and Storekeeper, H. Smith, \$950.  
 Inspectors, J. Gabourel, J. Scott, R. Westby, \$702 each. W. Flowers, \$650.  
 Operators, 1st Grade, Mrs. D. Wolffsohn, Miss D. Cervantes, \$652.

#### Radio Telegraph Department.

Superintendent (vacant), \$1,500 to \$1,800, and quarters.  
 Wireless Operators, R. A. Gill, \$1,230, personal \$300; D. A. Fairweather, \$1,230; W. Elliot, \$906.  
 Engineer, D. Naverette, \$690 to \$906.

#### Supreme Court and Registrar-General.

Chief Justice (vacant), \$6,000.  
 Registrar-General, F. C. P. Bowen, \$1,900 to \$2,400.  
 Clerk (vacant), \$850 to \$1,230.  
 2nd Class Clerk, J. N. Meighan, \$690 to \$906.

*Legal Department.*

*Attorney-General*, F. P. Genève, K.C., \$3,402, without private practice.

*1st Class Clerk*, A. O. Longworth, \$850 to \$1,230.

*District Commissioners.*

*Belize*, S. A. McKinstry, \$2,916 (*Official Administrator and Official Receiver of Debtors' Estates.*)

*2nd Class Clerk*, A. E. Cattouse, \$690 to \$906.

*Bailiff and Interpreter District Court (vacant)*, \$1,000 to \$1,200.

*Corozal*, T. V. Maccall, \$1,600 to \$2,000, free, partly furnished, quarters, and duty allowance, \$300.

*Clerk and Interpreter*, F. A. Ramirez, \$942 to \$1,230.

*Orange Walk*, E. A. Grant, \$1,600 to \$2,000, free, partly furnished, quarters, and duty allowance \$200.

*Clerk and Interpreter*, R. M. Bautista, \$690 to \$906.

*Stann Creek District*, R. Wyatt, \$1,600 to \$2,000, free, partly furnished, quarters, and duty allowance \$300.

*2nd Class Clerk*, E. N. Trapp, \$690 to \$906.

*Toledo District*, A. Alcoer, \$1,600 to \$2,000, free, partly furnished, quarters, and duty allowance, \$200.

*Clerk and Interpreter*, C. J. Benguche, \$650 to \$950.

*Cayo District*, T. C. Manders, \$1,600 to \$2,000, free, partly furnished, quarters, duty allowance, \$400.

*Clerk*, R. Patten, \$504 to \$666, duty allowance, \$150.

*Audit.*

*Auditor*, E. M. Tibbitt, \$2,041.20 to \$2,430.

*1st Class Clerks*, N. M. Tennyson, J. Pepitune, \$350 to \$1,230.

*2nd Class Clerks*, S. E. Tenoh and J. H. Locke, \$690 to \$906.

*Education.*

*Inspector of Schools*, A. B. Dillon, \$1,600 to \$2,000; personal \$400.

*Assistant Inspector (vacant)*, \$1,230 to \$1,590.

*Lands.*

*Surveyor-General*, F. W. Brunton, \$3,888.

*Surveyors*, L. E. Williams, \$2,680, A. N. Wolffsohn, G. S. Busby, and J. A. Waight, \$2,100 to \$2,430.

*Draughtsman and Computer*, G. A. Elliott, \$2,100 to \$2,430.

*Inspector of Crown Lands*, S. P. Arnold, \$1,050.

*1st Class Clerks*, A. B. Tingling and A. E. Vello, \$942 to \$1,230.

*Tracer*, I. Hulse, \$650 to \$950.

*Forest Trust.*

*Chairman*, His Excellency the Governor.

*Official Members*, Colonial Secretary; Conservator of Forests; F. W. Brunton.

*Unofficial Members*, Hon. E. J. Hofus; Hon. V. L. Bryant.

*Secretary*, R. C. Gallego, \$120.

*Forest Department.*

*Conservator of Forests*, N. S. Stevenson, B.Sc., 500*l.* by 20*l.* to 590*l.*, 625*l.* by 25*l.* to 750*l.*, 780*l.* by 30*l.* to 900*l.*, house allowance \$360.

*Assistant Conservator of Forests*, J. B. Kinloch, 500*l.* by 20*l.* to 580*l.*, 625*l.* by 25*l.* to 750*l.*, 780*l.* by 30*l.* to 900*l.*

*Chief Clerk*, R. C. Gallego, \$1,230.

*Stann Creek Railway.*

*Superintendent*, G. W. E. Francis, \$1,800 to \$2,000, personal \$300.

*Clerk*, C. G. Meza, \$940.

*Public Works.*

*Director of Public Works*, H. C. Carter, M.C., M.E.I. (Can.), \$3,402.

*Chief Clerk and Accountant*, H. E. C. Cain, \$1,230 to \$1,590.

*2nd Class Clerk*, I. Russell, \$650 to \$950.

*Medical.*

*Principal Medical Officer*, W. E. Burton, M.D., O.M. (McGill), \$4,008 to \$4,128, and quarters.

† *Assistant Medical Officers*, T. Patterson, W.A.S. George, V. F. Anderson, K. C. Savona, A. W. Dunn, W. F. McDonald and one vacant, \$2,430 to \$3,150, and quarters.

*Radiologist*, Dr. S. Kent Smith, \$500, and fees.

*Dental Surgeon*, H. B. Lind, \$250.

*Chief Clerk and Accountant*, J. F. Romero, \$1,230 to \$1,290.

*2nd Class Clerk*, E. Trapp, \$650 to \$950.

*Matron*, Miss L. M. Roberts, M.B.E., \$1,000 to \$1,200, quarters, uniform, and free board and lodging.

*Dispenser and Storekeeper*, P. A. Hyde, \$850 to \$1,230, and quarters.

*Central Board of Health.*

*Chief Sanitary Inspector and Clerk to Board*, J. H. Peach, \$2,400, and house allowance \$360.

*Prisons.*

*Superintendent of Prisons, Belize*, Capt. J. A. Nisbet, V.D., \$1,200 to \$1,600, and quarters, personal \$400.

*2nd Class Clerk*, H. K. Smith, \$650 to \$950.

*Police.*

*Superintendent (vacant)*, \$2,916, and \$360 in lieu of quarters.

*Assistant Superintendent*, B. Parkinson, \$1,600, and \$360 in lieu of quarters.

*Inspector*, Capt. F. R. G. Milton, M.C., \$1,500, and quarters.

*Harbour Board.*

*Chairman*, The Colonial Secretary.

*Assistant Harbour Master and Secretary, Harbour Board*, R. K. Maason, \$480.

*Fire Brigade.*

*Superintendent*, R. K. Maason, \$600 to \$720.

*Assistant Superintendent*, R. J. Gabourel, \$300.

*British Honduras Defence Force.*

*Officer Commanding*, Capt. P. E. Matthews, M.B.E.

*Adjutant*, Capt. P. E. Matthews, M.B.E., \$2,000, and Allowances \$1,000.

*Agricultural Department.*

*Agricultural Officer*, H. P. Smart, £500 by £20 to £580; £625 by £25 to £750; £750 by £30 to £900.

## CEYLON.

#### *Situation and Area.*

Ceylon, the ancient Taprobane, is an island in the Indian Ocean, off the southern extremity of Hindustan, lying between 5° 55' and 9° 50' N. lat. and 79° 42' and 81° 53' E. long.; its extreme length from north to south, i.e., from Point Palmyra to Dondra Head, is 270 miles; its greatest width 140 miles, from Colombo on the west coast to Sangamankanda on the east. Its area is 25,332 square miles, or about equal to Holland and Belgium.

The Maldive Archipelago, 400 miles south-west of Ceylon, made up of 18 groups—known as atolls—or islets, but for centuries past arranged for administrative purposes in 13 groups, which are sparsely inhabited by a mixed race of probably Aryan original stock, speaking a dialect akin to Elu, or old Sinhalese, is tributary to Ceylon, to which the Sultan sends an embassy annually. The inhabitants of the Archipelago have for nearly eight centuries professed the Mohammedan religion. The islands are covered

with coconut palms and yield millet, fruit, and coconut produce. Communication is mainly by native craft with India and Ceylon. The population enumerated at the census 1921 was 70,413, including 137 Indian Borahs, 22 Malabars, and 58 Ceylon Moors who were at Malé Island for purposes of trade; the principal occupations are fishing (14,760 males), coir and lace making (10,799 females and 13 males), toddy drawing (1,273 males), carpentry (1,133 males), and cultivation (853 males and 572 females). Malé, the residence of the Sultan and the capital of the Islands, is a little over 3 miles in circumference.

The Laccadive Islands are under the administration of the Government of India.

#### *Climate.*

The climate of Ceylon for a tropical country is comparatively healthy; the heat in the plains, which is nearly the same throughout the year, being much less oppressive than in India.

Along the coast the annual mean temperature is about 80° F., and a noteworthy feature is the smallness of the variation both between day and night in the same twenty-four hours, and between the different parts of the year. At Kandy, 1,654 feet above sea level, the mean temperature is 76° F., and the rule of 1° F. drop in temperature for each 300 feet rise in altitude holds fairly well throughout the island.

At Colombo and Galle the mean monthly temperature in the coldest months (December and January) is less than four degrees below those in the warmest months (April and May), while the mean daily ranges for the year are 12.3° and 7.4° respectively.

At Trincomalee, on the other side of the island, conditions are only slightly more varied. The mean monthly temperature in May (86° F.) is seven degrees above that in December (79° F.), while the mean daily range for the year is 13.7° F.

It must be remembered, however, that the change in the capacity of the air for moisture for each degree of change of temperature in the Ceylon low country is far greater than the corresponding change per degree at the mean temperature of London.

The highest temperatures are experienced in the district to the north of the hills, and to the north-east, but it is only in a very few days in the year that a temperature of 100° Fahr. or over is experienced. Trincomalee holds the record with 103.7° Fahr. In the hills there is of course a great variety of climate, and at Nuwara Eliya, over 6,000 feet above mean sea level, frost is occasionally recorded in the early part of the year.

The annual average rainfall varies from below 40 inches in the dry zones to the north-west and south-east of the island to above 150 inches at certain places on the south-west slopes of the hills. The chief rainy seasons extend from April to June and from October to January, but as there is a sharp antithesis between the windward and lee side during both monsoons (particularly the S.W.), it is hard to summarise the island as a whole in one sentence. It may fairly be said that there is not a month without some rain, and the result is the luxuriant vegetation for which the island is famous.

#### *History.*

The authentic history of the island begins at the sixth century B.C., when an Aryan invasion from the north of India established the Sinhalese dynasty. Buddhism was introduced in the third century B.C., and from that time this faith has been preserved in comparative purity. The island abounds

in interesting relics of antiquity, and in rock inscriptions, which, with the written annals left by the Sinhalese kings, are of peculiar value in revising Indian chronology.

In the sixteenth century the Portuguese formed settlements on the west and south of the island; in the next century they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements in the island, which were then annexed to the Presidency of Madras, but five years later, in 1802, Ceylon was constituted a separate Colony. In 1815 war was declared against the Sinhalese Government of the interior; the last Kandyan King was taken prisoner, and the whole island came under the rule of the British.

#### *Constitution.*

The Government is administered by a Governor, aided by a State Council consisting of 146\* members elected for territorial constituencies, 3 ex-officio members (the Chief Secretary, Legal Secretary, and Financial Secretary) called Officers of State, and 8 members nominated by the Governor. The State Council concerns itself with administration as well as with legislation.

The Departments of Government are divided into ten groups. Three of these groups are in charge of the Chief Secretary, the Legal Secretary, and the Financial Secretary. The remaining seven groups are in charge of Members of the State Council who are elected as Chairmen of the various Executive Committees, and who are styled Ministers. The Ministers with the Officers of State form the Board of Ministers.

All Ceylonese, both male and female, of a minimum age of 21, are included in the franchise. British subjects not domiciled in Ceylon [are allowed to qualify for the franchise in accordance with the hitherto existing Constitution, or on their furnishing satisfactory evidence of five years' residence and a declaration of permanent settlement in the Island.

#### *Population, Area, and Statistics.*

According to the decennial census taken in 1921 the population was 5,312,548 an increase of 17.94 per cent. on the population enumerated in 1921. The details of the population were as follows (including the military, shipping, estates, and miscellaneous†):—

Western Province .. ..	1,448,648
Central ditto .. ..	953,395
Southern ditto .. ..	771,283
Northern ditto .. ..	399,094
Eastern ditto .. ..	213,980
North-Western Province ..	546,988
North-Central ditto .. ..	97,365
Province of Uva .. ..	303,419
Provinces of Sabaragamuwa ..	578,368
Miscellaneous .. ..	8
<b>Total .. ..</b>	<b>5,312,548</b>

The population of the principal towns, exclusive of the Military and the Shipping, was as follows:—Colombo, 284,155; Dehiwala-Mount Lavinia, 34,288; Negombo, 25,291; Moratuwa, 32,409; Kalutara, 14,280; Kandy, 37,147; Jaffna, 45,708; Galle,

38,424; Matara, 18,693; Batticaloa, 11,565; Trincomalee, 10,160; Kurunegala, 10,467; Badulla, 9,849.

The number of Indian coolies on the tea estates, etc., was about 700,000. They are under no indentures, and are free to quit on giving a month's notice.

The entire area of the Island is 25,332 square miles. About one quarter of this area, after deducting backwaters, etc., is under cultivation. Some 4,000 square miles in the centre form the mountain zone with an altitude of from 1,500 to 8,262 feet above sea level. The approximate acreages under the most important products are:—

	Acres.
Coconuts .. ..	1,100,000
Rice .. ..	800,000
Tea .. ..	457,000
Grain (other than Rice) ..	105,000
Rubber .. ..	534,000
Cinnamon .. ..	26,000
Cacao .. ..	34,000
Tobacco .. ..	14,000

At the end of 1930, the number of plumbago mines reported to be working was 52. The amount of plumbago exported during the year was 174,478 cwt., valued at rs. 1,775,317.

The minimum upset price of Crown land is rs. 16 to 20 per acre. 12,818 acres were granted and sold by the Revenue officers in 1930.

The revenue is principally derived from Customs Duties, Land Sales, Licences (under which head is entered the amount realised by the sale of Arrack and Toddy Rents), Salt (which is a Government monopoly), Stamps, and Railway Receipts. The revenue from the sale of salt for the financial year 1929-30 was rs. 1,961,875. This is local salt worked by the Government, but the importation of foreign salt is allowed on an import duty of rs. 4 per cwt.

The local revenues raised by the Municipalities of Colombo, Kandy and Galle, by the Provincial and District Road Committees, by the Local Boards of Health and Improvement and Urban District Councils which have been established in the towns of Kalutara, Panadura, Negombo, Minuwangoda, Dehiwala-Mount Lavinia, Gampola, Nuwara Eliya, Matale, Nawalapitiya, Hatton-Dickoya, Matara, Batticaloa, Trincomalee, Kurunegala, Puttalam, Chilaw, Anuradapura, Badulla, Bandarawela, Ratnapura, Kegalle, Moratuwa, and Jaffna, and by Village Committees amounted in 1930 to rs. 14,567,207.37. The revenue collected by the Sanitary Boards amounted to rs. 1,014,493.34.

The municipal debt outstanding on 31st Dec., 1930, was rs. 13,524,672.10. Of this amount rs. 9,833,562.10 is the balance of the loan borrowed from the Government for the Colombo Drainage Works, and rs. 2,664,204.83 for Water Works. Rs. 426,521.85 is the balance of loans obtained by the municipality of Galle for the construction of waterworks, sanitary improvements and electric lighting, and rs. 600,383.32 is the balance of the loans due from the municipality of Kandy for water-works, drainage, housing and electric lighting.

The development of the tea industry is shown by the following statistics:—Export, 1884, 2,392,963 lbs.; 1900, 149,264,602 lbs.; 1930, 243,107,474 lbs.

There has been a remarkable development in rubber cultivation in recent years. Rubber was first brought to Ceylon in 1876, and its growth proved successful. In 1898, 750 acres were estimated to be planted with rubber, in 1906, 100,000 acres, and in 1930 about 534,000 acres.

† By "Miscellaneous" are meant persons enumerated in the Great and Little Passes.

\* Out of the 50 electoral districts no candidates for election came forward in 1931 for the four in the Revenue District of Jaffna.

The value of the products of the coconut palm exported in 1930 was rs. 48,779,594. During the past few years greater attention has been given to the cultivation of coconuts, and large areas of land formerly occupied with cinnamon are now planted in this crop. The value of cacao exported in 1930 was rs. 2,936,789 and of cinnamon rs. 1,779,983.

The chief imports are rice from British India (including Burma), valued at rs. 70,819,724, and from other countries valued at rs. 4,744,978, and coal and textiles chiefly from the United Kingdom.

#### *Law and Justice.*

The basis of the law is the Roman-Dutch law, much modified by the introduction of English law and by Colonial ordinances. Kandyan law and Muslim law also prevail among Kandyans and Muslims respectively. The criminal law has been codified on the model of the Indian Penal Code, and the codification of the law of Criminal and Civil procedure respectively has been completed.

Justice is administered by the Supreme Court, which has an original criminal jurisdiction and decides appeals from the inferior Courts both in civil and criminal cases; by the Police Courts and Courts of Requests, which dispose, respectively, of minor criminal and civil suits; and by the District Courts, which have a criminal jurisdiction intermediate between that of the Supreme Court and the Police Courts, and a civil jurisdiction in all cases. In addition to these there are the Gansabawas, Village Councils, and Village Tribunals, instituted under the Ordinance No. 9 of 1924, with powers to deal with petty offences and trifling claims. They have worked well and are thoroughly adapted to the genius of the people. Besides settling a considerable amount of litigation, they have provided a valuable machinery for carrying out local improvements. They are empowered to make rules, subject to the approval of the Governor in Council, relating to their village economy, and it is noticeable that in many instances they have not only voluntarily provided school buildings and undertaken the cost of the current expenses and repairs, but have made elementary education compulsory.

#### *Education.*

Satisfactory progress is being made in education. The number of scholars in Government schools at the end of 1930 was 220,431, in assisted schools 321,176, and in unaided schools 30,638.

The total expenditure on account of the Education Department in 1929-30 was rs. 12,050,689-40. In 1868, the number of scholars was only 6,897, and the expenditure rs. 161,660. The improvement is due to the institution of a Department of Education and the adoption of a system under which the educational wants of the Island are met partly by Government, partly by schools receiving grants in aid from Government. The Government schools are all unsectarian, and no fee is charged for vernacular education; fees are charged for English teaching.

The only Secondary School entirely supported by Government is the Royal College, but there are numerous and excellent Grant-in-aid Secondary Schools. Seven Government scholarships, each of 300*l.* per annum, five for two years and two for three years, with outfit allowances of rs. 750 each and free passages, are awarded annually, on the results of the B.A. and B.Sc. Examinations of the University of London, to enable the best seven students of the year to complete their education at English universities.

Industrial education is provided in 75 Government and Grant-in-aid Schools and in a number of Orphanages. A central Technical College was founded in Colombo in 1893; its title has since been changed to "Government Technical Schools."

A University College opened in Colombo in 1921, offers instruction in the following subjects:—English Language and Literature, Classics and Philosophy, Modern History and Economics, Physics, Chemistry, Mathematics, Sanskrit and Pali, Tamil, Sinhalese, Modern Languages, Botany, Zoology, Geography. Students are presented for the External Examinations, Pass and Honours, of the University of London.

A Government Training College for Masters and Mistresses in English Schools and Government Vernacular Schools was opened in 1903.

#### *Medical Institutions.*

*Medical College.*—The Ceylon Medical College was founded in 1870 to provide a course of Medical training for the Ceylonese. The curriculum is a full five years' course, and since 1887 the Licence of the College has been recognised by the General Medical Council as a registrable Colonial qualification. The courses of instruction and examinations are also recognised by many of the British Examining Boards. The licence has been conferred upon 498 candidates since the College was opened; of recent years about 18 qualify annually.

There is a Junior or Apothecary Department in which students go through a two years' course, and after passing the prescribed examinations are qualified to serve as Apothecaries and Estate Dispensers.

The College has a staff of over 30 lecturers and is managed by a Council incorporated by law.

There are at present about 200 students.

Owing to changes introduced by the Medical Council of Great Britain, the preliminary subjects, Physics, Chemistry and Biology, are now pre-medical subjects, and arrangements have been made for these to be studied at the University College. Students must pass an examination in these subjects before they can be admitted to the Medical College for their purely medical studies.

The Medical College fees amounted to rs. 60,343-60 in 1930-31.

There are 93 Government general hospitals providing 7,603 beds, with varying accommodation from 8 beds in smaller outstations to 912 beds in the General Hospital, Colombo.

There are in addition a number of special hospitals, viz., a lying-in-home with 83 beds, an eye hospital (with 56 beds) with an ear, nose and throat clinic attached, a women's hospital with 45 beds, a children's hospital with 82 beds, a women's venereal hospital with 29 beds, a police hospital with 32 beds, a tuberculosis hospital for chronic cases with 349 beds, a tuberculosis sanatorium with 72 beds, an infectious diseases hospital with 168 beds, a lunatic asylum and House of Observation with 1,830 beds, a prison hospital, Colombo, with 192 beds, and 8 other prison hospitals providing 149 beds, two leper asylums, one with 508 beds at Hendala (near Colombo), and the other with 176 beds at Mantivu, Eastern Province.

Eighty-eight estate hospitals and 715 estate dispensaries are maintained by proprietors of estates.

There were 595 Government dispensaries in different parts of the Island in 1930, and 3,810,010 patients who paid 5,815,125 visits were treated at these dispensaries.

There are a bacteriological, a pasteur, a dental, and an anti-tuberculosis Institute, and a vaccine establishment. A division of sanitary engineering

and a division of health education are recent developments. Campaigns are carried on against malaria, ankylostomiasis and parangi. Estate sanitation is looked after by six inspecting medical officers. Seven health units have been established since 1926 and health work on intensive lines is carried on at those centres. School hygiene work is carried out throughout the Island by five school medical officers.

In the Department of Medical and Sanitary Services are 321 medical officers, of whom 200 possess British qualifications, 29 medical officers of health, 394 apothecaries, and 254 sanitary inspectors. There are three institutions where nurses are trained. The nursing staff of the Department consists of 39 European qualified matrons and sisters, 116 European Roman Catholic mothers and sisters, 398 matrons and nurses trained locally, and pupils in training.

The cost of working the department amounted in 1929-30 to rs. 10,669,279-01. The receipts, which included the cost of maintenance of paying patients, sale of medicines, etc., amounted to rs. 848,412-36 for 1929-30. The expenditure on account of estate medical aid was rs. 1,236,111-27 for 1929-30. The export duty levied for the purpose of meeting the expense of providing Medical aid to estates under the Medical Wanta Ordinance No. 9 of 1912 amounted to rs. 1,715,756-19 for 1929-30.

#### *Currency and Banking.*

The weights and measures in common use are British.

Accounts are kept in rupees, and the money in circulation is Indian and Ceylon rupee currency, sovereigns having ceased to be legal tender in the Colony in 1920. Ceylon cents take the place of the Indian annas and pice. The notes of the Chartered Mercantile Bank remained in circulation to some extent until 1888, when its charter expired, but since the failure of the Oriental Banking Corporation in 1884, the Government has instituted a note-issue of which the amount in circulation on the 31st December, 1930, was rs. 57,209,324. These notes are legal tender except at the Colombo Issue Office.

The following banks have establishments in the Colony: Mercantile Bank of India, Limited; Chartered Bank of India, Australia, and China; Hong Kong and Shanghai Banking Corporation; Imperial Bank of India; National Bank of India, Limited; Eastern Bank, Limited; P. & O. Banking Corporation, Ltd. None of these issue notes in Ceylon.

The Ceylon Savings Bank was established in 1832, and Post Office savings banks were opened in 1885. On 31st December, 1930, the deposits were: Ceylon Savings Bank, rs. 7,872,555; Post Office Savings Bank, rs. 12,262,136.

#### *The Colombo Harbour.*

The Colombo Port Commission was established in 1913 to administer the affairs of the Port of Colombo. The Commission is responsible for the efficient working of the Port, and has powers of executive action and initiative. It is composed of seven official members, seven unofficial members, and a secretary. The official members are the Principal Collector of Customs (Chairman), the Director of Medical and Sanitary Services, the General Manager of the Railway, the Chairman, Municipal Council, and Mayor of Colombo, the Deputy Collector of Customs, Colombo, the Master Attendant, Colombo and Galle, and the Harbour Engineer. Six of the unofficial members are nominated by the Ceylon Chamber of Commerce, and the seventh (representative of the Ceylonese and Indian interests of the Port) by the Governor.

The Harbour Works consist of three breakwaters. The South-West, completed in 1885 at a cost of 558,409*l.* is 4,212 feet long, and runs from the shore in a direction North by East. It is built of concrete blocks weighing from 18 to 30 tons, set in what is known as the sloping bond system.

The North-East and North-West breakwaters were completed in 1906, at a total cost of 531,657*l.* The North-East breakwater is a rubble embankment 1,100 feet long, tipped from a staging.

The North-West breakwater is an island work, 2,670 feet in length, running between the two shore breakwaters, leaving a western entrance of 750 feet, and a northern entrance of 700 feet. This breakwater is of similar construction to the South-West arm.

These three breakwaters enclose an area of 643 acres, or one square mile.

An extension of the S.W. breakwater, starting from a point 3,150 feet from the shore end, was commenced in December, 1907, and completed in April, 1912. The arm is 1,800 feet long, and runs in a direction almost due north, protecting the present main entrance from the S.W. Monsoon seas. The cost of this additional arm was 338,931*l.*

The Graving Dock. A Graving Dock was completed in 1906. It is 723 feet long, 85 feet wide at the entrance, and has a depth over the sill of 30 feet at low water. Its cost was 485,755*l.* There is also a guide pier, 800 feet long, to assist vessels entering the dock. The dock has its own electric light installation. The docking of ships can be carried out by day or night.

The Patent Slip was opened in 1903, the cost being 42,300*l.* It is 800 feet long, the cradle being 220 feet, and is capable of dealing with vessels up to 1,200 tons dead weight.

Oil Facilities. The Oil Installations Depot, which is about 92 acres in extent, lies 3½ miles inland from the harbour front. The Oil Companies' storage tanks are situated within this area, with pipe line connection from the harbour for fuel oil, kerosene, and benzine imported in bulk. There is also a Measuring Tanks Depot (about 19 acres in extent) at Bloemondahl, about three-quarters of a mile from the Harbour. Three reinforced concrete jetties, two for bunkering purposes and one for the discharge of oil tankers, have been provided. The Outer Bunkering Jetty can accommodate vessels of 500 feet in length with a draught of 27 feet; the Inner Bunkering Jetty is available for barges. The Discharge Jetty can accommodate vessels 500 feet in length with a draught of 27 feet. The expenditure on the oil scheme up to 30th September, 1930, was rs. 5,028,906.

The Coaling Depot consists of 25 acres of land, reclaimed from the sea, with a frontage of 2,200 feet, from which 17 jetties project into the harbour for the landing, stacking, and shipping of coal. The total cost of this depot was 158,433*l.*

The total cost of the Reclamation and Jetties amounts to 214,227*l.*

The Fishery Harbour is to the northward of Colombo harbour for the use of the fishermen as a beaching ground. The fishery harbour consists of a rubble breakwater running out from the shore in a curve for 800 feet, the sheltered part forming a natural beaching ground for fishing canoes. The cost was 11,607*l.*

The total expenditure on the Colombo harbour from 1873, when work in connection with the first breakwater was commenced, to 1913, when the Colombo Port Commission assumed control of the harbour, was rs. 44,790,267, or 2,986,018*l.*, taking the value of the rupee at 1*s.* 4*d.*

In the period 1913 to 1930 a sum of rs. 39,474,251 or 2,631,617*l.*, has been spent on various development and maintenance works by the Colombo Port Commission and a sum of rs. 2,603,045 or 173,536*l.* by

the Public Works Department, making a total of rs. 42,077,296 or 2,805,153<sup>1</sup>. In addition to the above expenditure a sum of rs. 680,062 or 44,004<sup>4</sup> was charged to Loan Funds during the period 1922-1926, in connection with the dredging of the Colombo Harbour (including rock excavation). Prior to 1st October, 1922, this expenditure was met from Revenue, and is included in the sum of rs. 42,077,296 or 2,805,153<sup>1</sup> mentioned above.

Since the Colombo Port Commission assumed control of the Port, many improvements have been carried out, and shore facilities much increased. The warehouse accommodation in 1913 was 291,600 sq. ft., and this has been increased to 592,476 sq. ft.; similarly the quayage for lighters has been increased from 4,645 lineal ft. to 14,043 lineal feet, including 1,278 lineal feet at the Lake to Harbour Canal Quay.

Dredging for deepening the harbour has been steadily carried out, and, of the 643 acres low water area of the harbour, 186 acres are now dredged to 36 feet and over, 102 acres to between 36 and 33 feet, 147 acres to between 33 and 30 feet, and 208 acres have a depth of less than 30 feet; berthing accommodation exclusive of the Graving Dock Guide Pier and Oil Jetties being available for 36 vessels in the north-east monsoon and for 23, or, if packed berths are used, 40, vessels in the south-west monsoon, six of which berths in either monsoon are available for vessels of draughts up to 33 feet.

A scheme for the development of the Colombo Lake and its connection to the Harbour was completed in 1925 at a total cost of rs. 9,206,480. The total capital expenditure on the Lake Scheme up to September, 1930, was rs. 10,048,032. The connection to the Harbour was taken over by the Colombo Port Commission in 1922, and the areas on both sides developed for the landing of import cargoes.

The maintenance of the waterways and quay walls of the Colombo Lake up to and including the operation of the San Sebastian Canal Locks and pumping plant has now been taken over, and it is hoped that this will lead to further development of its resources.

#### Colombo Water Supply.

The Colombo Water supply is obtained from Labugama Reservoir which is situated in the Western Province, at a distance of 28½ miles from the City.

The Reservoir was formed by impounding the water of the Wak-Oya, a tributary of the Kelani Ganga.

The Catchment area, which is 2,500 acres in extent, is free from any habitation or cultivation, all the land to the summit of the water shed having been reserved together with a strip two chains in depth along the adjacent water sheds.

The area of the reservoir at present top water level is 206 acres. This lake, the scenery of which is very charming, is 373 feet above sea level and has a maximum depth of 70 feet.

The storage capacity of the reservoir is 1,900 million gallons.

Filtration works of the "Jewell Gravity" type are situated immediately below the Reservoir Dam.

The water has a very low alkalinity and is remarkably pure. It is conveyed to the two service Reservoirs in Colombo through three separate pipe lines; two of these are of cast iron each 20 inches in diameter, and the other of steel 30 inches in diameter.

The 20-inch supply main was duplicated between Wellampitiya and Elie House Reservoir (a distance of 4 miles) during the latter part of 1930.

There are some 250 miles of supply and distribution mains, varying in size from 30 to 3 inches in diameter. Water service is available to all premises within the City and also to shipping in Colombo Harbour.

(c)

68 Deacon metres for the detection of waste have been fixed throughout the City.

The average daily consumption is 11 million gallons, or 36 gallons per head of population.

#### Railways.

The lines of railway, all of which are owned and worked by the Government, are distributed thus:—*Broad Gauge* (5ft. 6 in.), Colombo to Badulla (181½ miles), Polgahawela to Kankesanurai (212½ miles), Peradeniya Junction to Kandy and Matale (21½ miles), Ragama Junction to Mahara Quarry (1½ miles), Colombo to Matara (88½ miles), Ragama to Puttalam (74½ miles), Maho to Batticaloa (132 miles), Galoya Junction to Trincomalee (43½ miles), Madawachi to Talaimannar Pier (66 miles), Kolonnawa Oil Line and Harbour Branch (¾ miles). *Narrow Gauge* (2ft. 6 in.), Colombo Fort to Yatiyantota (49½ miles), Avissawella to Opanaki (48½ miles), Nannu Oya to Ragalla (19½ miles). *Total Mileage* 951 miles. The total cost of construction up to 30th September, 1930, charged in account was rs. 220,522,956. The receipts for the 12 months ended 30th September, 1930, were rs. 29,650,683, and expenditure rs. 25,085,120.

By the completion of the Talaimannar extension the railway systems of India and Ceylon were brought within 20 miles of one another, the intervening distance being covered by steamers of the South Indian Railway Co., which ply between Dharmakodi (the Indian Port) and Talaimannar (the Ceylon Port). The other extensions are for the better transport of planting produce (tea, rubber, coconuts, etc.).

#### Roads.

Of metalled roads there are 4,130 miles; gravelled and natural roads, 503 and 132 miles respectively. The maintenance of 4,765 miles of road cost, in 1930, rs. 7,287,350 or an average rate of rs. 1,529 per mile. This is exclusive of roads within municipal limits, and of minor roads which are not in the charge of the Department of Public Works.

#### Telephones.

The Government Telephone System comprises two exchanges at Colombo, viz., Central Exchange (2,848 subscribers) and Havelock Town Exchange (384 subscribers) in trunk communication with exchanges at Kandy (195 subscribers), Nuwara Eliya (146 subscribers), Galle (106 subscribers) and 179 smaller exchanges and call offices. There are, in addition, 73 licensed private systems of various sizes, several of which are connected by means of junction lines and subsidiary trunks with one another and the main trunk lines. The mileage of telephone wire in the Government system at the end of 1930 was estimated at 12,220\* (aerial) and 31,532 (underground).

#### Telegraphs.

Nearly all parts of the island are served by the Government telegraph system, which has 296 offices working, inclusive of Railway offices open for postal telegrams. The system comprises 3,472 miles of line and 9,186½ miles of wire. Ceylon is in direct telegraphic communication with India by a cable which starts from Talaimannar and crosses the Pamban Channel. It is also connected with Europe by direct cables from Colombo to Aden and with the Far East and Australia by direct cables to Penang.

There is a Government Radio Station in Colombo equipped for Continuous Wave and Interrupted Continuous Wave telegraphic services, and also for telephony.

\* Mileage of Trunk and Junction lines is included in this figure.

† Mileage of Trunk and Junction lines is included under telephone wire (aerial).

The Continuous Wave service is conducted on a wave length of 2,300 metres with a normal daylight range of 1,000 miles.

The Interrupted Continuous Wave Service is conducted on the 600 metre wave length, and has a normal daylight range of 500 miles.

The telephonic equipment is for providing a broadcasting service on a wavelength of 428.5 metres. The rating of the set for telephony is 2 kilowatts. The number of licence holders at the end of August, 1931, was 1,258.

#### *Postal and Shipping Communications.*

1. There is a regular fortnightly mail service between London and Colombo by the P. & O. steamers continuing to Australia. There is also a regular fortnightly mail service by the Orient line steamers continuing to Australia, except from April to September, when it is monthly. The Aberdeen and Dominion line provides a monthly service from Colombo to Australia.

2. There are also fortnightly services by the P. & O. line between London and Japan, and London and Australia, *via* Colombo. There is also a fortnightly service by the Orient line between London and Australia, *via* Colombo, except from April to September, when it is monthly.

A direct weekly mail service from London to Australia, and *vice versa*, from April to September has been made possible by the P. & O. branch line of steamers being utilized during this period.

The regular weekly mails despatched by the P. & O. and Orient Line mail steamers connect with the Australian Air Mail Services.

3. The M.M. Co. runs a fortnightly mail service between Marseilles and the Straits and Japan, *via* Colombo.

4. The Nippon Yusen Kaisha line of steamers maintains a fortnightly service between Liverpool and Marseilles and the Straits, China and Japan, *via* Colombo, and the Bibby line between Liverpool and Marseilles, Port Said and Rangoon, *via* Colombo.

5. The Natal Direct line and the Indian and African line maintain a somewhat irregular monthly service between Calcutta and Durban, Delagoa Bay and Cape Town, *via* Colombo, while a monthly service by the steamers of the Ossen Shosen Kaisha exists between Japan and Argentine and Brazil, *via* Colombo, Durban and Cape Town. There is also a monthly service by steamers of Ossen Shosen Kaisha (African Line) between Japan and Dar-es-Salaam *via* Colombo.

6. The steamers of the Rotterdam Lloyd and Stoomvaart-Maatschappij Nederland provide a fortnightly service between Holland and Java, *via* Colombo. The steamers of the Rotterdam Lloyd also provide a fortnightly service from Java to Holland, *via* Colombo.

7. The British Indian Steam Navigation Company maintains an irregular monthly service between Calcutta (or Rangoon) and Mauritius, *via* Colombo, and a regular bi-weekly service between Tuticorin and Colombo.

8. There is an irregular mail service between Ceylon and the Maldiv Islands by buggalows.

9. The mail service between England and Colombo takes from 16 days to 18 days in transit at present

#### *Rates of Postage.*

	Letters.	Post Cards.	Printed Matter.	Registered Newspapers.	Samples.	Registration Fee.
Within the Colony and to India	Per 2 oz. 6 cents	Each 3 cents	Per 2 oz. 3 cents	3 cents. for every copy not exceeding 8 ozs., 2 cents. for every additional 8 ozs.	—	15 cents
To the United Kingdom and British Dominions	9 cents for each oz. or part of that weight.	6 cents	3 cents for every 2 oz or part thereof.	Same as printed matter.	First 4 oz. or part thereof 8 cents and every additional 2 oz. 4 cents.	20 cents
To Foreign Countries	First oz. 20 cents, and 10 cents each additional oz. or part thereof	12 cents	4 cents for every 2 oz. or part thereof.	ditto	First 4 oz. or part thereof 8 cents, and every additional 2 oz. 4 cents.	ditto

The rate of postage on periodicals registered as Colony other than Ceylon, when posted in Ceylon for 6 oz., with 3 cents for each additional 6 oz.,

newspapers in the United Kingdom or a British for transmission by inland post, shall be 6 cents up to a maximum of 2 lb.

#### *Air Mails.*

10. A regular weekly air mail service operates between Karachi and London, and air mails from Ceylon are despatched by this route to the United Kingdom, Continent of Europe, Egypt, Palestine, Iraq, and Persia; the gain in time by the use of the air service to these countries over ordinary means of transport is 7 days in the case of correspondence addressed to the United Kingdom and 3 to 5 days in regard to other countries. Air mails are sent to the United States, Australia, and Dutch East Indies by the

regular weekly mail steamers to the ports of call of these countries for despatch onwards by their internal air routes; the gain in time obtained by the use of these air routes varies from 3 to 7 days. Air mail correspondence to countries in South America can also be forwarded by the regular weekly despatches to Marseilles and secure an earlier delivery up to 12 to 13 days at destination. A fortnightly air despatch is made to Kenya, Uganda, and Tanganyika by the Karachi-Mwanza air route; this despatch provides with the ordinary fortnightly mail a weekly despatch to these countries.

Particulars of air routes available, countries served, and fees payable are shown below :—

Country of Destination.	Air Route Available.	Air Fee (additional to Ordinary Postage, Express, Late, or Registration Fee).
United Kingdom .. .. .	Karachi- London .. .. .	40 cents per ½ oz.
United Kingdom .. .. .	Marseilles-London .. .. .	20 cents per ½ oz.
Egypt or Palestine .. .. .	Karachi- London .. .. .	25 cents per ½ oz.
Iraq .. .. .	Karachi- London .. .. .	20 cents per ½ oz.
Baluchistan .. .. .	Karachi- London .. .. .	6 cents per ½ oz.
Persia (Gulf Ports, Jask, Lingah, Bushire)	Karachi- London .. .. .	15 cents per ½ oz.
Persia (Interior of) .. .. .	Karachi-London and Persian Internal Service .. .. .	25 cents per ½ oz.
Persia (Interior of) .. .. .	Persian Internal Service .. .. .	12 cents per ½ oz.
United States .. .. .	New York-Dallas .. .. .	25 cents per ½ oz.
United States .. .. .	New York-San Francisco .. .. .	25 cents per ½ oz.
Australia-West .. .. .	Perth-Derby .. .. .	20 cents per ½ oz.
Australia-South .. .. .	Perth-Adelaide .. .. .	20 cents per ½ oz.
Australia-East .. .. .	Charleville-Camowool .. .. .	20 cents per ½ oz.
New Zealand .. .. .	Perth-Adelaide .. .. .	20 cents per ½ oz.
Fiji .. .. .	Perth-Adelaide .. .. .	20 cents per ½ oz.
Brazil .. .. .	Marseilles-Buenos Aires .. .. .	Rs. 3.30 per ½ oz. for letters and post cards, Rs. 2.85 per 2 oz. for other articles.
Paraguay, Uruguay, Argentine Republic	Marseilles-Buenos Aires .. .. .	Rs. 3.90 per ½ oz. for letters and post cards, Rs. 3.30 per 2 oz. for other articles.
France, Belgium, Holland, Germany, Switzerland, Austria, Hungary, Czechoslovakia and other countries in Europe	Karachi-London .. .. .	40 cents per ½ oz.

The total customs revenue in 1929-30 was Rs. 51,497,504.

*List of Governors.‡*

- 1850 Sir George William Anderson, K.C.B.
- 1855 Sir Henry George Ward, K.C.M.G.
- 1860 Sir C. J. MacCarthy, Kt.
- 1863 Major-Gen. Terence O'Brien (acting).
- 1865 Sir Hercules G. R. Robinson, K.C.M.G.
- 1872 The Rt. Hon. Sir W. H. Gregory, K.C.M.G.
- 1877 Sir James R. Longden, K.C.M.G.
- 1883 The Hon. Sir Arthur H. Gordon, G.C.M.G. (afterwards Lord Stanmore).
- 1890 Sir Arthur E. Havelock, G.C.M.G.
- 1896 Right Hon. Sir J. West Ridgeway, G.C.M.G., K.C.B., K.C.S.I.
- 1903 Sir Henry A. Blake, G.C.M.G.
- 1907 Col. Sir H. E. McCallum, G.C.M.G., R.E.
- 1913 Sir Robert Chalmers, G.C.B. (now Lord Chalmers).
- 1916 Sir John Anderson, G.C.M.G., K.C.B., LL.D.
- 1918 Brig.-General Sir William H. Manning, G.C.M.G., K.B.E., C.B.
- 1925 Sir Hugh C. Clifford, G.C.M.G., G.B.E.
- 1927 Sir Herbert J. Stanley, K.C.M.G.
- 1931 Sir Graeme Thomson, G.C.M.G., K.C.B.

No Church is established, nor are any grants made.

## CEYLON.

#### *Situation and Area.*

Ceylon, the ancient Taprobane, is an island in the Indian Ocean, off the southern extremity of Hindustan, lying between 5° 55' and 9° 50' N. lat. and 76° 42' and 81° 53' E. long.; its extreme length from north to south, i.e., from Point Palmyra to Dondra Head, is 270 miles; its greatest width 140 miles, from Colombo on the west coast to Sangamankanda on the east. Its area is 25,332 square miles, or about equal to Holland and Belgium.

The Maldivé Archipelago, 400 miles south-west of Ceylon, made up of 18 groups—known as atolls—or islets, but for centuries past arranged for administrative purposes in 13 groups, which are sparsely inhabited by a mixed race of probably Aryan original stock, speaking a dialect akin to Eln, or old Sinhalese, is tributary to Ceylon, to which the Sultan sends an embassy annually. The inhabitants of the Archipelago have for nearly eight centuries professed the Mohammedan religion. The islands are covered

with coconut palms and yield millet, fruit, and coconut produce. Communication is mainly by native craft with India and Ceylon. The population enumerated at the census 1921 was 70,413, including 137 Indian Borahs, 22 Malabars, and 58 Ceylon Moors who were at Malé Island for purposes of trade; the principal occupations are fishing (14,760 males), coir and lace making (10,799 females and 13 males), toddy drawing (1,273 males), carpentry (1,133 males), and cultivation (853 males and 572 females). Malé, the residence of the Sultan and the capital of the Islands, is a little over 3 miles in circumference.

The Laccadive Islands are under the administration of the Government of India.

#### *Climate.*

The climate of Ceylon for a tropical country is comparatively healthy; the heat in the plains, which is nearly the same throughout the year, being much less oppressive than in India.

Along the coast the annual mean temperature is about 80° F., and a noteworthy feature is the smallness of the variation both between day and night in the same twenty-four hours, and between the different parts of the year. At Kandy, 1,654 feet above sea level, the mean temperature is 76° F., and the rule of 1° F. drop in temperature for each 300 feet rise in altitude holds fairly well throughout the island.

At Colombo and Galle the mean monthly temperature in the coldest months (December and January) is less than four degrees below those in the warmest months (April and May), while the mean daily ranges for the year are 12·3° and 7·4° respectively.

At Trincomalee, on the other side of the island, conditions are only slightly more varied. The mean monthly temperature in May (86° F.) is seven degrees above that in December (79° F.), while the mean daily range for the year is 13·7° F.

It must be remembered, however, that the change in the capacity of the air for moisture for each degree of change of temperature in the Ceylon low country is far greater than the corresponding change per degree at the mean temperature of London.

The highest temperatures are experienced in the district to the north of the hills, and to the north-east, but it is only in a very few days in the year that a temperature of 100° Fahr. or over is experienced. Trincomalee holds the record with 103·7° Fahr. In the hills there is of course a great variety of climate, and at Nuwara Eliya, over 6,000 feet above mean sea level, frost is occasionally recorded in the early part of the year.

The annual average rainfall varies from below 40 inches in the dry zones to the north-west and south-east of the Island to above 150 inches at certain places on the south-west slopes of the hills. The chief rainy seasons extend from April to June and from October to January, but as there is a sharp antithesis between the windward and lee side during both monsoons (particularly the S.W.), it is hard to summarise the island as a whole in one sentence. It may fairly be said that there is not a month without some rain, and the result is the luxuriant vegetation for which the island is famous.

#### *History.*

The authentic history of the island begins at the sixth century B.C., when an Aryan invasion from the north of India established the Sinhalese dynasty. Buddhism was introduced in the third century B.C., and from that time this faith has been preserved in comparative purity. The island abounds

in interesting relics of antiquity, and in rock inscriptions, which, with the written annals left by the Sinhalese kings, are of peculiar value in revising Indian chronology.

In the sixteenth century the Portuguese formed settlements on the west and south of the island; in the next century they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements in the island, which were then annexed to the Presidency of Madras, but five years later, in 1802, Ceylon was constituted a separate Colony. In 1815 war was declared against the Sinhalese Government of the interior; the last Kandyan King was taken prisoner, and the whole island came under the rule of the British.

#### Constitution.

The Government is administered by a Governor, aided by a State Council consisting of 146\* members elected for territorial constituencies, 3 ex-officio members (the Chief Secretary, Legal Secretary, and Financial Secretary) called Officers of State, and 8 members nominated by the Governor. The State Council concerns itself with administration as well as with legislation.

The Departments of Government are divided into ten groups. Three of these groups are in charge of the Chief Secretary, the Legal Secretary, and the Financial Secretary. The remaining seven groups are in charge of Members of the State Council who are elected as Chairmen of the various Executive Committees, and who are styled Ministers. The Ministers with the Officers of State form the Board of Ministers.

All Ceylonese, both male and female, of a minimum age of 21, are included in the franchise. British subjects not domiciled in Ceylon are allowed to qualify for the franchise in accordance with the hitherto existing Constitution, or on their furnishing satisfactory evidence of five years' residence and a declaration of permanent settlement in the Island.

#### Population, Area, and Statistics.

According to the decennial census taken in 1921 the population was 5,312,548 an increase of 17.94 per cent. on the population enumerated in 1921. The details of the population were as follows (including the military, shipping, estates, and miscellaneous):—

Western Province .. ..	1,448,648
Central ditto .. ..	953,395
Southern ditto .. ..	771,283
Northern ditto .. ..	399,094
Eastern ditto .. ..	213,980
North-Western Province ..	546,988
North-Central ditto .. ..	97,365
Province of Uva .. ..	303,419
Provinces of Sabaragamuwa ..	578,368
Miscellaneous .. ..	8
<b>Total .. ..</b>	<b>5,312,548</b>

The population of the principal towns, exclusive of the Military and the Shipping, was as follows:—Colombo, 284,155; Dehiwala-Mount Lavinia, 34,288; Negombo, 25,291; Moratuwa, 32,409; Kalutara, 14,280; Kandy, 37,147; Jaffna, 45,708; Galle,

\* By "Miscellaneous" are meant persons enumerated in the Great and Little Passes.

\* Out of the 50 electoral districts no candidates for election came forward in 1931 for the four in the Revenue District of Jaffna.

38,424; Matara, 18,893; Batticaloa, 11,585; Trincomalee, 10,160; Kurunegala, 10,467; Badulla, 9,849.

The number of Indian coolies on the tea estates, etc., was about 700,000. They are under no indentures, and are free to quit on giving a month's notice.

The entire area of the Island is 25,332 square miles. About one quarter of this area, after deducting backwaters, etc., is under cultivation. Some 4,000 square miles in the centre form the mountain zone with an altitude of from 1,500 to 8,262 feet above sea level. The approximate acreages under the most important products are:—

	Acres.
Coconuts .. ..	1,100,000
Rice .. ..	800,000
Tea .. ..	457,000
Grain (other than Rice) ..	105,000
Rubber .. ..	534,000
Cinnamon .. ..	26,000
Cacao .. ..	34,000
Tobacco .. ..	14,000

At the end of 1930, the number of plumbago mines reported to be working was 52. The amount of plumbago exported during the year was 174,478 cwts., valued at rs. 1,775,317.

The minimum upset price of Crown land is rs. 16 to 20 per acre. 12,818 acres were granted and sold by the Revenue officers in 1930.

The revenue is principally derived from Customs Duties, Land Sales, Licences (under which head is entered the amount realised by the sale of Arrack and Toddy Rents), Salt (which is a Government monopoly), Stamps, and Railway Receipts. The revenue from the sale of salt for the financial year 1929-30 was rs. 1,961,875. This is local salt worked by the Government, but the importation of foreign salt is allowed on an import duty of rs. 4 per cwt.

The local revenues raised by the Municipalities of Colombo, Kandy and Galle, by the Provincial and District Road Committees, by the Local Boards of Health and Improvement and Urban District Councils which have been established in the towns of Kalutara, Panadura, Negombo, Minuwangoda, Dehiwala-Mount Lavinia, Gampola, Nawara Eliya, Matale, Nawalapitiya, Hatton-Dikoya, Matara, Batticaloa, Trincomalee, Kurunegala, Puttalam, Chilaw, Anuradapura, Badulla, Bandarawela, Ratnapura, Kegalla, Moratuwa, and Jaffna, and by Village Committees amounted in 1930 to rs. 14,557,207.37. The revenue collected by the Sanitary Boards amounted to rs. 1,014,493.34.

The municipal debt outstanding on 31st Dec. 1930, was rs. 13,524,672.10. Of this amount rs. 9,833,562.10 is the balance of the loan borrowed from the Government for the Colombo Drainage Works, and rs. 2,664,204.83 for Water Works. Rs. 426,621.85 is the balance of loans obtained by the municipality of Galle for the construction of waterworks, sanitary improvements and electric lighting, and rs. 600,383.32 is the balance of the loan due from the municipality of Kandy for water-works, drainage, housing and electric lighting.

The development of the tea industry is shown by the following statistics:—Export, 1884, 2,322,953 lbs.; 1900, 149,264,602 lbs.; 1930, 243,107,474 lbs.

There has been a remarkable development in rubber cultivation in recent years. Rubber was first brought to Ceylon in 1876, and its growth proved successful. In 1898, 750 acres were estimated to be planted with rubber, in 1906, 100,000 acres, and in 1930 about 534,000 acres.

The value of the products of the coconut palm exported in 1930 was rs. 46,779,594. During the past few years greater attention has been given to the cultivation of coconuts, and large areas of land formerly occupied with cinnamon are now planted in this crop. The value of cacao exported in 1930 was rs. 2,936,789 and of cinnamon rs. 1,779,983.

The chief imports are rice from British India (including Burma), valued at rs. 70,819,724, and from other countries valued at rs. 4,744,978, and coal and textiles chiefly from the United Kingdom.

#### *Law and Justice.*

The basis of the law is the Roman-Dutch law, much modified by the introduction of English law and by Colonial ordinances. Kandyan law and Muslim law also prevail among Kandyans and Muslims respectively. The criminal law has been codified on the model of the Indian Penal Code, and the codification of the law of Criminal and Civil procedure respectively has been completed.

Justice is administered by the Supreme Court, which has an original criminal jurisdiction and decides appeals from the inferior Courts both in civil and criminal cases; by the Police Courts and Courts of Requests, which dispose, respectively, of minor criminal and civil suits; and by the District Courts, which have a criminal jurisdiction intermediate between that of the Supreme Court and the Police Courts, and a civil jurisdiction in all cases. In addition to these there are the Gansabiyas, Village Councils, and Village Tribunals, instituted under the Ordinance No. 9 of 1924, with powers to deal with petty offences and trifling claims. They have worked well and are thoroughly adapted to the genius of the people. Besides settling a considerable amount of litigation, they have provided a valuable machinery for carrying out local improvements. They are empowered to make rules, subject to the approval of the Governor in Council, relating to their village economy, and it is noticeable that in many instances they have not only voluntarily provided school buildings and undertaken the cost of the current expenses and repairs, but have made elementary education compulsory.

#### *Education.*

Satisfactory progress is being made in education. The number of scholars in Government schools at the end of 1930 was 220,431, in assisted schools 321,176, and in unaided schools 30,638.

The total expenditure on account of the Education Department in 1929-30 was rs. 12,060,689-40. In 1868, the number of scholars was only 6,897, and the expenditure rs. 161,660. The improvement is due to the institution of a Department of Education and the adoption of a system under which the educational wants of the Island are met partly by Government, partly by schools receiving grants in aid from Government. The Government schools are all unsectarian, and no fee is charged for vernacular education; fees are charged for English teaching.

The only Secondary School entirely supported by Government is the Royal College, but there are numerous and excellent Grant-in-aid Secondary Schools. Seven Government scholarships, each of 300*l.* per annum, five for two years and two for three years, with outfit allowances of rs. 750 each and free passages, are awarded annually, on the results of the B.A. and B.Sc. Examinations of the University of London, to enable the best seven students of the year to complete their education at English universities.

Industrial education is provided in 75 Government and Grant-in-aid Schools and in a number of Orphanages. A central Technical College was founded in Colombo in 1893; its title has since been changed to "Government Technical Schools."

A University College opened in Colombo in 1921, offers instruction in the following subjects:—English Language and Literature, Classics and Philosophy, Modern History and Economics, Physics, Chemistry, Mathematics, Sanskrit and Pali, Tamil, Sinhalese, Modern Languages, Botany, Zoology, Geography. Students are presented for the External Examinations, Pass and Honours, of the University of London.

A Government Training College for Masters and Mistresses in English Schools and Government Vernacular Schools was opened in 1903.

#### *Medical Institutions.*

*Medical College.*—The Ceylon Medical College was founded in 1870 to provide a course of Medical training for the Ceylonese. The curriculum is a full five years' course, and since 1887 the Licence of the College has been recognised by the General Medical Council as a registrable Colonial qualification. The courses of instruction and examinations are also recognised by many of the British Examining Boards. The licence has been conferred upon 498 candidates since the College was opened; of recent years about 18 qualify annually.

There is a Junior or Apothecary Department in which students go through a two years' course, and after passing the prescribed examinations are qualified to serve as Apothecaries and Estate Dispensaries.

The College has a staff of over 30 lecturers and is managed by a Council incorporated by law.

There are at present about 200 students.

Owing to changes introduced by the Medical Council of Great Britain, the preliminary subjects, Physics, Chemistry and Biology, are now pre-medical subjects, and arrangements have been made for these to be studied at the University College. Students must pass an examination in these subjects before they can be admitted to the Medical College for their purely medical studies.

The Medical College fees amounted to rs. 60,343-60 in 1930-31.

There are 93 Government general hospitals providing 7,603 beds, with varying accommodation from 8 beds in smaller outstations to 912 beds in the General Hospital, Colombo.

There are in addition a number of special hospitals, viz., a lying-in-home with 83 beds, an eye hospital (with 56 beds) with an ear, nose and throat clinic attached, a women's hospital with 45 beds, a children's hospital with 82 beds, a women's venereal hospital with 29 beds, a police hospital with 32 beds, a tuberculosis hospital for chronic cases with 349 beds, a tuberculosis sanatorium with 72 beds, an infectious diseases hospital with 168 beds, a lunatic asylum and House of Observation with 1,830 beds, a prison hospital, Colombo, with 192 beds, and 8 other prison hospitals providing 149 beds, two leper asylums, one with 506 beds at Hendala (near Colombo), and the other with 176 beds at Mantivu, Eastern Province.

Eighty-eight estate hospitals and 715 estate dispensaries are maintained by proprietors of estates.

There were 595 Government dispensaries in different parts of the Island in 1930, and 3,810,010 patients who paid 5,815,125 visits were treated at these dispensaries.

There are a bacteriological, a pasteur, a dental, and an anti-tuberculosis Institute, and a vaccine establishment. A division of sanitary engineering

in interesting relics of antiquity, and in rock inscriptions, which, with the written annals left by the Sinhalese kings, are of peculiar value in revising Indian chronology.

In the sixteenth century the Portuguese formed settlements on the west and south of the island; in the next century they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements in the island, which were then annexed to the Presidency of Madras, but five years later, in 1802, Ceylon was constituted a separate Colony. In 1815 war was declared against the Sinhalese Government of the interior; the last Kandyan King was taken prisoner, and the whole island came under the rule of the British.

#### Constitution.

The Government is administered by a Governor, aided by a State Council consisting of 146<sup>+</sup> members elected for territorial constituencies, 3 ex-officio members (the Chief Secretary, Legal Secretary, and Financial Secretary) called Officers of State, and 8 members nominated by the Governor. The State Council concerns itself with administration as well as with legislation.

The Departments of Government are divided into ten groups. Three of these groups are in charge of the Chief Secretary, the Legal Secretary, and the Financial Secretary. The remaining seven groups are in charge of Members of the State Council who are elected as Chairmen of the various Executive Committees, and who are styled Ministers. The Ministers with the Officers of State form the Board of Ministers.

All Ceylonee, both male and female, of a minimum age of 21, are included in the franchise. British subjects not domiciled in Ceylon are allowed to qualify for the franchise in accordance with the hitherto existing Constitution, or on their furnishing satisfactory evidence of five years' residence and a declaration of permanent settlement in the Island.

#### Population, Area, and Statistics.

According to the decennial census taken in 1921 the population was 5,312,548 an increase of 17.94 per cent. on the population enumerated in 1921. The details of the population were as follows (including the military, shipping, estates, and miscellaneous):—

Western Province .. ..	1,448,648
Central ditto .. ..	853,395
Southern ditto .. ..	771,283
Northern ditto .. ..	399,094
Eastern ditto .. ..	213,980
North-Western Province ..	546,988

The population of the principal towns, exclusive of the Military and the Shipping, was as follows:—Colombo, 284,165; Dehiwala-Mount Lavinia, 34,288; Negombo, 26,291; Moratuwa, 32,409; Kalutara, 14,280; Kandy, 37,147; Jaffna, 45,708; Galle,

38,424; Matara, 18,893; Batticaloa, 11,585; Trincomalee, 10,160; Kurunegala, 10,467; Badulla, 9,849.

The number of Indian coolies on the tea estates, etc., was about 700,000. They are under no indentures, and are free to quit on giving a month's notice.

The entire area of the Island is 25,332 square miles. About one quarter of this area, after deducting backwaters, etc., is under cultivation. Some 4,000 square miles in the centre form the mountain zone with an altitude of from 1,500 to 8,262 feet above sea level. The approximate acreages under the most important products are:—

	Acres.
Coconuts .. ..	1,100,000
Rice .. ..	800,000
Tea .. ..	457,000
Grain (other than Rice) ..	105,000
Rubber .. ..	534,000
Cinnamon .. ..	26,000
Cacao .. ..	34,000
Tobacco .. ..	14,000

At the end of 1930, the number of plumbago mines reported to be working was 52. The amount of plumbago exported during the year was 174,474 cwts., valued at rs. 1,775,317.

The minimum upset price of Crown land is rs. 16 to 20 per acre. 12,818 acres were granted and sold by the Revenue officers in 1930.

The revenue is principally derived from Customs Duties, Land Sales, Licences (under which head is entered the amount realised by the sale of Arrack and Toddy Rents), Salt (which is a Government monopoly), Stamps, and Railway Receipts. The revenue from the sale of salt for the financial year 1929-30 was rs. 1,961,875. This is local salt worked by the Government, but the importation of foreign salt is allowed on an import duty of rs. 4 per cwt.

The local revenues raised by the Municipalities of Colombo, Kandy and Galle, by the Provincial and District Road Committees, by the Local Boards of Health and Improvement and Urban District Councils which have been established in the towns of Kalutara, Panadura, Negombo, Minuwangoda, Dehiwala-Mount Lavinia, Gampola, Nawara Eliya, Matale, Nawalapitiya, Hatton-Dickoya, Matara, Batticaloa, Trincomalee, Kurunegala, Puttalam, Chilaw, Anuradapura, Badulla, Bandarawela, Ratnapura, Kegalla, Moratuwa, and Jaffna, and by Village Committees amounted in 1930 to rs. 14,567,207.37. The revenue collected by the Sanitary Boards amounted to rs. 1,014,493.34.

The municipal debt outstanding on 31st Dec. 1930, was rs. 13,524,672.10. Of this amount rs. 9,833,562.10 is the balance of the loan borrowed from the Government for the Colombo Drainage Works, and rs. 2,664,204.83 for Water Works. Rs. 426,521.85 is the balance of loans obtained by the municipality of Galle for the construction of waterworks, sanitary improvements and electric lighting, and rs. 600,383.32 is the balance of the loan due from the municipality of Kandy for water-works, drainage, housing and electric lighting.

The development of the tea industry is shown by the following statistics:—Export, 1884, 2,392,963 lbs.; 1900, 149,264,602 lbs.; 1930, 243,107,474 lbs.

There has been a remarkable development in rubber cultivation in recent years. Rubber was first brought to Ceylon in 1876, and its growth proved successful. In 1898, 750 acres were estimated to be planted with rubber, in 1906, 100,000 acres, and in 1930 about 534,000 acres.

† By "Miscellaneous" are meant persons enumerated in the Great and Little Passes.

\* Out of the 60 electoral districts no candidates for election came forward in 1931 for the four in the Revenue District of Jaffna.

The value of the products of the coconut palm exported in 1930 was rs. 46,779,594. During the past few years greater attention has been given to the cultivation of coconuts, and large areas of land formerly occupied with cinnamon are now planted in this crop. The value of cacao exported in 1930 was rs. 2,936,789 and of cinnamon rs. 1,779,983.

The chief imports are rice from British India (including Burma), valued at rs. 70,819,724, and from other countries valued at rs. 4,744,978, and coal and textiles chiefly from the United Kingdom.

#### *Law and Justice.*

The basis of the law is the Roman-Dutch law, much modified by the introduction of English law and by Colonial ordinances. Kandyan law and Muslim law also prevail among Kandyans and Muslims respectively. The criminal law has been codified on the model of the Indian Penal Code, and the codification of the law of Criminal and Civil procedure respectively has been completed.

Justice is administered by the Supreme Court, which has an original criminal jurisdiction and decides appeals from the inferior Courts both in civil and criminal cases; by the Police Courts and Courts of Requests, which dispose, respectively, of minor criminal and civil suits; and by the District Courts, which have a criminal jurisdiction intermediate between that of the Supreme Court and the Police Courts, and a civil jurisdiction in all cases. In addition to these there are the Gansabwas, Village Councils, and Village Tribunals, instituted under the Ordinance No. 9 of 1924, with powers to deal with petty offences and trifling claims. They have worked well and are thoroughly adapted to the genius of the people. Besides settling a considerable amount of litigation, they have provided a valuable machinery for carrying out local improvements. They are empowered to make rules, subject to the approval of the Governor in Council, relating to their village economy, and it is noticeable that in many instances they have not only voluntarily provided school buildings and undertaken the cost of the current expenses and repairs, but have made elementary education compulsory.

#### *Education.*

Satisfactory progress is being made in education. The number of scholars in Government schools at the end of 1930 was 220,431, in assisted schools 321,176, and in unaided schools 30,638.

The total expenditure on account of the Education Department in 1929-30 was rs. 12,050,689.40. In 1868, the number of scholars was only 6,897, and the expenditure rs. 161,660. The improvement is due to the institution of a Department of Education and the adoption of a system under which the educational wants of the Island are met partly by Government, partly by schools receiving grants in aid from Government. The Government schools are all unsectarian, and no fee is charged for vernacular education; fees are charged for English teaching.

The only Secondary School entirely supported by Government is the Royal College, but there are numerous and excellent Grant-in-aid Secondary Schools. Seven Government scholarships, each of 300l. per annum, five for two years and two for three years, with outfit allowances of rs. 750 each and free passages, are awarded annually, on the results of the B.A. and B.Sc. Examinations of the University of London, to enable the best seven students of the year to complete their education at English universities.

Industrial education is provided in 75 Government and Grant-in-aid Schools and in a number of Orphanages. A central Technical College was founded in Colombo in 1893; its title has since been changed to "Government Technical School."

A University College opened in Colombo in 1921, offers instruction in the following subjects:—English Language and Literature, Classics and Philosophy, Modern History and Economics, Physics, Chemistry, Mathematics, Sanskrit and Pali, Tamil, Sinhalese, Modern Languages, Botany, Zoology, Geography. Students are presented for the External Examinations, Pass and Honours, of the University of London.

A Government Training College for Masters and Mistresses in English Schools and Government Vernacular Schools was opened in 1903.

#### *Medical Institutions.*

*Medical College.*—The Ceylon Medical College was founded in 1870 to provide a course of Medical training for the Ceylonese. The curriculum is a full five years' course, and since 1887 the Licence of the College has been recognised by the General Medical Council as a registrable Colonial qualification. The courses of instruction and examinations are also recognised by many of the British Examining Boards. The licence has been conferred upon 498 candidates since the College was opened; of recent years about 18 qualify annually.

There is a Junior or Apothecary Department in which students go through a two years' course, and after passing the prescribed examinations are qualified to serve as Apothecaries and Estate Dispensers.

The College has a staff of over 30 lecturers and is managed by a Council incorporated by law.

There are at present about 200 students.

Owing to changes introduced by the Medical Council of Great Britain, the preliminary subjects, Physics, Chemistry and Biology, are now pre-medical subjects, and arrangements have been made for these to be studied at the University College. Students must pass an examination in these subjects before they can be admitted to the Medical College for their purely medical studies.

The Medical College fees amounted to rs. 60,343.60 in 1930-31.

There are 93 Government general hospitals providing 7,603 beds, with varying accommodation from 8 beds in smaller outstations to 912 beds in the General Hospital, Colombo.

There are in addition a number of special hospitals, viz., a lying-in-home with 83 beds, an eye hospital (with 56 beds) with an ear, nose and throat clinic attached, a women's hospital with 45 beds, a children's hospital with 82 beds, a women's venereal hospital with 29 beds, a police hospital with 32 beds, a tuberculosis hospital for chronic cases with 349 beds, a tuberculosis sanatorium with 72 beds, an infectious diseases hospital with 168 beds, a lunatic asylum and House of Observation with 1,830 beds, a prison hospital, Colombo, with 192 beds, and 8 other prison hospitals providing 149 beds, two leper asylums, one with 508 beds at Hendala (near Colombo), and the other with 176 beds at Mantivu, Eastern Province.

Eighty-eight estate hospitals and 715 estate dispensaries are maintained by proprietors of estates.

There were 595 Government dispensaries in different parts of the Island in 1930, and 3,810,010 patients who paid 5,815,125 visits were treated at these dispensaries.

There are a bacteriological, a pasteur, a dental, and an anti-tuberculosis Institute, and a vaccine establishment. A division of sanitary engineering

in interesting relics of antiquity, and in rock inscriptions, which, with the written annals left by the Sinhalese kings, are of peculiar value in revising Indian chronology.

In the sixteenth century the Portuguese formed settlements on the west and south of the island; in the next century they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements in the island, which were then annexed to the Presidency of Madras, but five years later, in 1802, Ceylon was constituted a separate Colony. In 1815 war was declared against the Sinhalese Government of the interior; the last Kandyan King was taken prisoner, and the whole island came under the rule of the British.

#### Constitution.

The Government is administered by a Governor, aided by a State Council consisting of 146\* members elected for territorial constituencies, 3 ex-officio members (the Chief Secretary, Legal Secretary, and Financial Secretary) called Officers of State, and 8 members nominated by the Governor. The State Council concerns itself with administration as well as with legislation.

The Departments of Government are divided into ten groups. Three of these groups are in charge of the Chief Secretary, the Legal Secretary, and the Financial Secretary. The remaining seven groups are in charge of Members of the State Council who are elected as Chairmen of the various Executive Committees, and who are styled Ministers. The Ministers with the Officers of State form the Board of Ministers.

All Ceylonese, both male and female, of a minimum age of 21, are included in the franchise. British subjects not domiciled in Ceylon are allowed to qualify for the franchise in accordance with the hitherto existing Constitution, or on their furnishing satisfactory evidence of five years' residence and a declaration of permanent settlement in the Island.

#### Population, Area, and Statistics.

According to the decennial census taken in 1921 the population was 5,312,548 an increase of 17.94 per cent. on the population enumerated in 1921. The details of the population were as follows (including the military, shipping, estates, and miscellaneous):—

Western Province ..	1,448,648
Central ditto ..	953,395
Southern ditto ..	771,283
Northern ditto ..	399,094
Eastern ditto ..	213,980
North-Western Province ..	546,988
North-Central ditto ..	97,365
Province of Uva ..	303,419
Provinces of Sabaragamuwa ..	578,368
Miscellaneous ..	8
<b>Total ..</b>	<b>5,312,548</b>

The population of the principal towns, exclusive of the Military and the Shipping, was as follows:—Colombo, 284,155; Dehiwala-Mount Lavinia, 34,288; Negombo, 25,291; Moratuwa, 32,409; Kalutara, 14,280; Kandy, 37,147; Jaffna, 45,708; Galle,

38,424; Matara, 18,893; Batticaloa, 11,585; Trincomalee, 10,160; Kurunegala, 10,467; Badulla, 9,849.

The number of Indian coolies on the tea estates, etc., was about 700,000. They are under no indentures, and are free to quit on giving a month's notice.

The entire area of the Island is 25,332 square miles. About one quarter of this area, after deducting backwaters, etc., is under cultivation. Some 4,000 square miles in the centre form the mountain zone with an altitude of from 1,500 to 8,262 feet above sea level. The approximate acreages under the most important products are:—

	Acres.
Coconuts .. ..	1,100,000
Rice .. ..	800,000
Tea .. ..	457,000
Grain (other than Rice) ..	105,000
Rubber .. ..	534,000
Cinnamon .. ..	26,000
Cacao .. ..	34,000
Tobacco .. ..	14,000

At the end of 1930, the number of plumbago mines reported to be working was 52. The amount of plumbago exported during the year was 174,478 cwts., valued at rs. 1,775,317.

The minimum upset price of Crown land is rs. 16 to 20 per acre. 12,818 acres were granted and sold by the Revenue officers in 1930.

The revenue is principally derived from Customs Duties, Land Sales, Licences (under which head is entered the amount realised by the sale of Arrack and Toddy Rents), Salt (which is a Government monopoly), Stamps, and Railway Receipts. The revenue from the sale of salt for the financial year 1929-30 was rs. 1,961,875. This is local salt worked by the Government, but the importation of foreign salt is allowed on an import duty of rs. 4 per cwt.

The local revenues raised by the Municipalities of Colombo, Kandy and Galle, by the Provincial and District Road Committees, by the Local Boards of Health and Improvement and Urban District Councils which have been established in the towns of Kalutara, Panadura, Negombo, Minuwangoda, Dehiwala-Mount Lavinia, Campola, Nuwara Eliya, Matale, Nawalapitiya, Hatton-Dickoya, Matara, Batticaloa, Trincomalee, Kurunegala, Puttalam, Chilaw, Anuradapura, Badulla, Bandarawela, Ratnapura, Kegalla, Moratuwa, and Jaffna, and by Village Committees amounted in 1930 to rs. 14,567,207.37. The revenue collected by the Sanitary Boards amounted to rs. 1,014,493.34.

The municipal debt outstanding on 31st Dec. 1930, was rs. 13,524,672.10. Of this amount rs. 9,833,562.10 is the balance of the loan borrowed from the Government for the Colombo Drainage Works, and rs. 2,664,204.83 for Water Works. Rs. 426,521.85 is the balance of loans obtained by the municipality of Galle for the construction of waterworks, sanitary improvements and electric lighting, and rs. 600,383.32 is the balance of the loan due from the municipality of Kandy for water-works, drainage, housing and electric lighting.

The development of the tea industry is shown by the following statistics:—Export, 1884, 2,302,905 lbs.; 1900, 149,264,002 lbs.; 1930, 243,107,474 lbs.

There has been a remarkable development in rubber cultivation in recent years. Rubber was first brought to Ceylon in 1876, and its growth proved successful. In 1898, 750 acres were estimated to be planted with rubber, in 1906, 100,000 acres, and in 1930 about 534,000 acres.

\* By "Miscellaneous" are meant persons enumerated in the Great and Little Basins.

\* Out of the 60 electoral districts no candidates for election came forward in 1931 for the four in the Revenue District of Jaffna.

The value of the products of the coconut palm exported in 1930 was rs. 46,779,594. During the past few years greater attention has been given to the cultivation of coconuts, and large areas of land formerly occupied with cinnamon are now planted in this crop. The value of cacao exported in 1930 was rs. 2,936,789 and of cinnamon rs. 1,779,983.

The chief imports are rice from British India (including Burma), valued at rs. 70,819,724, and from other countries valued at rs. 4,744,978, and coal and textiles chiefly from the United Kingdom.

#### *Law and Justice.*

The basis of the law is the Roman-Dutch law, much modified by the introduction of English law and by Colonial ordinances. Kandyan law and Muslim law also prevail among Kandyans and Muslims respectively. The criminal law has been codified on the model of the Indian Penal Code, and the codification of the law of Criminal and Civil procedure respectively has been completed.

Justice is administered by the Supreme Court, which has an original criminal jurisdiction and decides appeals from the inferior Courts both in civil and criminal cases; by the Police Courts and Courts of Requests, which dispose, respectively, of minor criminal and civil suits; and by the District Courts, which have a criminal jurisdiction intermediate between that of the Supreme Court and the Police Courts, and a civil jurisdiction in all cases. In addition to these there are the Gansabawas, Village Councils, and Village Tribunals, instituted under the Ordinance No. 9 of 1924, with powers to deal with petty offences and trifling claims. They have worked well and are thoroughly adapted to the genius of the people. ## CEYLON.

#### *Situation and Area.*

Ceylon, the ancient Taprobane, is an island in the Indian Ocean, off the southern extremity of Hindustan, lying between 5° 55' and 9° 50' N. lat. and 79° 42' and 81° 53' E. long.; its extreme length from north to south, i.e., from Point Palmyra to Dondra Head, is 270 miles; its greatest width 140 miles, from Colombo on the west coast to Sangamankanda on the east. Its area is 25,332 square miles, or about equal to Holland and Belgium.

The Maldive Archipelago, 400 miles south-west of Ceylon, made up of 18 groups—known as atolls—or islets, but for centuries past arranged for administrative purposes in 13 groups, which are sparsely inhabited by a mixed race of probably Aryan original stock, speaking a dialect akin to Elu, or old Sinhalese, is tributary to Ceylon, to which the Sultan sends an embassy annually. The inhabitants of the Archipelago have for nearly eight centuries professed the Mohammedan religion. The islands are covered

with coconut palms and yield millet, fruit, and coconut produce. Communication is mainly by native craft with India and Ceylon. The population enumerated at the census 1921 was 70,413, including 137 Indian Borahs, 22 Malabars, and 58 Ceylon Moors who were at Malé Island for purposes of trade; the principal occupations are fishing (14,760 males), coir and lace making (10,799 females and 13 males), toddy drawing (1,273 males), carpentry (1,133 males), and cultivation (853 males and 572 females). Male, the residence of the Sultan and the capital of the Islands, is a little over 3 miles in circumference.

The Laccadive Islands are under the administration of the Government of India.

#### *Climate.*

The climate of Ceylon for a tropical country is comparatively healthy; the heat in the plains, which is nearly the same throughout the year, being much less oppressive than in India.

Along the coast the annual mean temperature is about 80° F., and a noteworthy feature is the smallness of the variation both between day and night in the same twenty-four hours, and between the different parts of the year. At Kandy, 1,654 feet above sea level, the mean temperature is 76° F., and the rule of 1° F. drop in temperature for each 300 feet rise in altitude holds fairly well throughout the island.

At Colombo and Galle the mean monthly temperature in the coldest months (December and January) is less than four degrees below those in the warmest months (April and May), while the mean daily ranges for the year are 12·3° and 7·4° respectively.

At Trincomalee, on the other side of the island, conditions are only slightly more varied. The mean monthly temperature in May (86° F.) is seven degrees above that in December (79° F.), while the mean daily range for the year is 13·7° F.

It must be remembered, however, that the change in the capacity of the air for moisture for each degree of change of temperature in the Ceylon low country is far greater than the corresponding change per degree at the mean temperature of London.

The highest temperatures are experienced in the district to the north of the hills, and to the north-east, but it is only in a very few days in the year that a temperature of 100° Fahr. or over is experienced. Trincomalee holds the record with 103·7° Fahr. In the hills there is of course a great variety of climate, and at Nuwara Eliya, over 6,000 feet above mean sea level, frost is occasionally recorded in the early part of the year.

The annual average rainfall varies from below 40 inches in the dry zones to the north-west and south-east of the Island to above 150 inches at certain places on the south-west slopes of the hills. The chief rainy seasons extend from April to June and from October to January, but as there is a sharp antithesis between the windward and lee side during both monsoons (particularly the S.W.), it is hard to summarise the island as a whole in one sentence. It may fairly be said that there is not a month without some rain, and the result is the luxuriant vegetation for which the island is famous.

#### *History.*

The authentic history of the island begins at the sixth century B.C., when an Aryan invasion from the north of India established the Sinhalese dynasty. Buddhism was introduced in the third century B.C., and from that time this faith has been preserved in comparative purity. The island abounds

## CEYLON.

#### *Situation and Area.*

Ceylon, the ancient Taprobane, is an island in the Indian Ocean, off the southern extremity of Hindustan, lying between 5° 55' and 9° 50' N. lat. and 79° 42' and 81° 53' E. long.; its extreme length from north to south, i.e., from Point Palmyra to Dondra Head, is 270 miles; its greatest width 140 miles, from Colombo on the west coast to Sangamankanda on the east. Its area is 25,332 square miles, or about equal to Holland and Belgium.

The Maldive Archipelago, 400 miles south-west of Ceylon, made up of 18 groups—known as atolls—or islets, but for centuries past arranged for administrative purposes in 13 groups, which are sparsely inhabited by a mixed race of probably Aryan original stock, speaking a dialect akin to Elu, or old Sinhalese, is tributary to Ceylon, to which the Sultan sends an embassy annually. The inhabitants of the Archipelago have for nearly eight centuries professed the Mohammedan religion. The islands are covered

with coconut palms and yield millet, fruit, and coconut produce. Communication is mainly by native craft with India and Ceylon. The population enumerated at the census 1921 was 70,413, including 137 Indian Borahs, 22 Malabars, and 58 Ceylon Moors who were at Malé Island for purposes of trade; the principal occupations are fishing (14,760 males), coir and lace making (10,799 females and 13 males), toddy drawing (1,273 males), carpentry (1,133 males), and cultivation (853 males and 672 females). Male, the residence of the Sultan and the capital of the Islands, is a little over 3 miles in circumference.

The Laccadive Islands are under the administration of the Government of India.

#### *Climate.*

The climate of Ceylon for a tropical country is comparatively healthy; the heat in the plains, which is nearly the same throughout the year, being much less oppressive than in India.

Along the coast the annual mean temperature is about 80° F., and a noteworthy feature is the smallness of the variation both between day and night in the same twenty-four hours, and between the different parts of the year. At Kandy, 1,654 feet above sea level, the mean temperature is 76° F., and the rule of 1° F. drop in temperature for each 300 feet rise in altitude holds fairly well throughout the island.

At Colombo and Galle the mean monthly temperature in the coldest months (December and January) is less than four degrees below those in the warmest months (April and May), while the mean daily ranges for the year are 12.3° and 7.4° respectively.

At Trincomalee, on the other side of the island, conditions are only slightly more varied. The mean monthly temperature in May (86° F.) is seven degrees above that in December (79° F.), while the mean daily range for the year is 13.7° F.

It must be remembered, however, that the change in the capacity of the air for moisture for each degree of change of temperature in the Ceylon low country is far greater than the corresponding change per degree at the mean temperature of London.

The highest temperatures are experienced in the district to the north of the hills, and to the north-east, but it is only in a very few days in the year that a temperature of 100° Fahr. or over is experienced. Trincomalee holds the record with 103.7° Fahr. In the hills there is of course a great variety of climate, and at Nuwara Eliya, over 6,000 feet above mean sea level, frost is occasionally recorded in the early part of the year.

The annual average rainfall varies from below 40 inches in the dry zones to the north-west and south-east of the Island to above 150 inches at certain places on the south-west slopes of the hills. The chief rainy seasons extend from April to June and from October to January, but as there is a sharp antithesis between the windward and lee side during both monsoons (particularly the S.W.), it is hard to summarise the island as a whole in one sentence. It may fairly be said that there is not a month without some rain, and the result is the luxuriant vegetation for which the island is famous.

#### *History.*

The authentic history of the island begins at the sixth century B.C., when an Aryan invasion from the north of India established the Sinhalese dynasty. Buddhism was introduced in the third century B.C., and from that time this faith has been preserved in comparative purity. The island abounds

Malé, the residence of the Sultan and the capital of the Islands, is a little over 3 miles in circumference.

The Laccadive Islands are under the administration of the Government of India.

#### *Climate.*

The climate of Ceylon for a tropical country is comparatively healthy; the heat in the plains, which is nearly the same throughout the year, being much less oppressive than in India.

Along the coast the annual mean temperature is about 80° F., and a noteworthy feature is the smallness of the variation both between day and night in the same twenty-four hours, and between the different parts of the year. At Kandy, 1,654 feet above sea level, the mean temperature is 76° F., and the rule of 1° F. drop in temperature for each 300 feet rise in altitude holds fairly well throughout the island.

At Colombo and Galle the mean monthly temperature in the coldest months (December and January) is less than four degrees below those in the warmest months (April and May), while the mean daily ranges for the year are 12.3° and 7.4° respectively.

At Trincomalee, on the other side of the island, conditions are only slightly more varied. The mean monthly temperature in May (86° F.) is seven degrees above that in December (79° F.), while the mean daily range for the year is 13.7° F.

It must be remembered, however, that the change in the capacity of the air for moisture for each degree of change of temperature in the Ceylon low country is far greater than the corresponding change per degree at the mean temperature of London.

The highest temperatures are experienced in the district to the north of the hills, and to the north-east, but it is only in a very few days in the year that a temperature of 100° Fahr. or over is experienced. Trincomalee holds the record with 103.7° Fahr. In the hills there is of course a great variety of climate, and at Nuwara Eliya, over 6,000 feet above mean sea level, frost is occasionally recorded in the early part of the year.

The annual average rainfall varies from below 40 inches in the dry zones to the north-west and south-east of the Island to above 150 inches at certain places on the south-west slopes of the hills. The chief rainy seasons extend from April to June and from October to January, but as there is a sharp antithesis between the windward and lee side during both monsoons (particularly the S.W.), it is hard to summarise the island as a whole in one sentence. It may fairly be said that there is not a month without some rain, and the result is the luxuriant vegetation for which the island is famous.

#### *History.*

The authentic history of the island begins at the sixth century B.C., when an Aryan invasion from the north of India established the Sinhalese dynasty. Buddhism was introduced in the third century B.C., and from that time this faith has been preserved in comparative purity. The island abounds

in interesting relics of antiquity, and in rock inscriptions, which, with the written annals left by the Sinhalese kings, are of peculiar value in revising Indian chronology.

In the sixteenth century the Portuguese formed settlements on the west and south of the island; in the next century they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements in the island, which were then annexed to the Presidency of Madras, but five years later, in 1802, Ceylon was constituted a separate Colony. In 1815 war was declared against the Sinhalese Government of the interior; the last Kandyan King was taken prisoner, and the whole island came under the rule of the British.

#### Constitution.

The Government is administered by a Governor, aided by a State Council consisting of 146\* members elected for territorial constituencies, 3 ex-officio members (the Chief Secretary, Legal Secretary, and Financial Secretary) called Officers of State, and 8 members nominated by the Governor. The State Council concerns itself with administration as well as with legislation.

The Departments of Government are divided into ten groups. Three of these groups are in charge of the Chief Secretary, the Legal Secretary, and the Financial Secretary. The remaining seven groups are in charge of Members of the State Council who are elected as Chairmen of the various Executive Committees, and who are styled Ministers. The Ministers with the Officers of State form the Board of Ministers.

All Ceylonese, both male and female, of a minimum age of 21, are included in the franchise. British subjects not domiciled in Ceylon are allowed to qualify for the franchise in accordance with the hitherto existing Constitution, or on their furnishing satisfactory evidence of five years' residence and a declaration of permanent settlement in the Island.

#### Population, Area, and Statistics.

According to the decennial census taken in 1921 the population was 5,312,548 an increase of 17.94 per cent. on the population enumerated in 1921. The details of the population were as follows (including the military, shipping, estates, and miscellaneous):—

Western Province .. ..	1,448,648
Central ditto .. ..	953,395
Southern ditto .. ..	771,283
Northern ditto .. ..	399,094
Eastern ditto .. ..	213,980
North-Western Province ..	546,988
North-Central ditto .. ..	97,365
Province of Uva .. ..	303,419
Provinces of Sabaragamuwa ..	578,368
Miscellaneous .. ..	8
<b>Total .. ..</b>	<b>5,312,548</b>

The population of the principal towns, exclusive of the Military and the Shipping, was as follows:—Colombo, 284,155; Dehiwala-Mount Lavinia, 34,288; Negombo, 25,291; Moratuwa, 32,409; Kalutara, 14,280; Kandy, 37,147; Jaffna, 45,708; Galle,

38,424; Matara, 18,893; Batticaloa, 11,585; Trincomalee, 10,160; Kurunegala, 10,467; Badulla, 9,849.

The number of Indian coolies on the tea estates, etc., was about 700,000. They are under no indentures, and are free to quit on giving a month's notice.

The entire area of the Island is 25,332 square miles. About one quarter of this area, after deducting backwaters, etc., is under cultivation. Some 4,000 square miles in the centre form the mountain zone with an altitude of from 1,500 to 8,262 feet above sea level. The approximate acreages under the most important products are:—

	Acre.
Coconuts .. ..	1,100,000
Rice .. ..	800,000
Tea .. ..	457,000
Grain (other than Rice) ..	105,000
Rubber .. ..	534,000
Cinnamon .. ..	26,000
Cacao .. ..	34,000
Tobacco .. ..	14,000

At the end of 1930, the number of plumbago mines reported to be working was 52. The amount of plumbago exported during the year was 174,478 cwt., valued at rs. 1,775,317.

The minimum upset price of Crown land is rs. 16 to 20 per acre. 12,818 acres were granted and sold by the Revenue officers in 1930.

The revenue is principally derived from Customs Duties, Land Sales, Licences (under which head is entered the amount realized by the sale of Arrack and Toddy Rents), Salt (which is a Government monopoly), Stamps, and Railway Receipts. The revenue from the sale of salt for the financial year 1929-30 was rs. 1,961,875. This is local salt worked by the Government, but the importation of foreign salt is allowed on an import duty of rs. 4 per cwt.

The local revenues raised by the Municipalities of Colombo, Kandy and Galle, by the Provincial and District Road Committees, by the Local Boards of Health and Improvement and Urban District Councils which have been established in the towns of Kalutara, Panadura, Negombo, Minuwangoda, Dehiwala-Mount Lavinia, Gampola, Nuwara Eliya, Matale, Nawalapitiya, Hatton-Dickoya, Matara, Batticaloa, Trincomalee, Kurunegala, Puttalam, Chilaw, Anuradapura, Badulla, Bandarawela, Ratnapura, Kegalla, Moratuwa, and Jaffna, and by Village Committees amounted in 1930 to rs. 14,557,207.37. The revenue collected by the Sanitary Boards amounted to rs. 1,014,493.34.

The municipal debt outstanding on 31st Dec. 1930, was rs. 13,524,672.10. Of this amount rs. 9,833,562.10 is the balance of the loan borrowed from the Government for the Colombo Drainage Works, and rs. 2,664,204.83 for Water Works. Rs. 426,521.85 is the balance of loans obtained by the municipality of Galle for the construction of waterworks, sanitary improvements and electric lighting, and rs. 600,383.32 is the balance of the loan due from the municipality of Kandy for water-works, drainage, housing and electric lighting.

The development of the tea industry is shown by the following statistics:—Export, 1884, 2,392,963 lbs.; 1900, 149,264,602 lbs.; 1930, 243,107,474 lbs.

There has been a remarkable development in rubber cultivation in recent years. Rubber was first brought to Ceylon in 1876, and its growth proved successful. In 1893, 750 acres were estimated to be planted with rubber, in 1906, 100,000 acres, and in 1930 about 534,000 acres.

\* By "Miscellaneous" are meant persons enumerated in the Great and Little Passes.

\* Out of the 50 electoral districts no candidates for election came forward in 1931 for the four in the Revenue District of Jaffna.

The value of the products of the coconut palm exported in 1930 was rs. 46,779,594. During the past few years greater attention has been given to the cultivation of coconuts, and large areas of land formerly occupied with cinnamon are now planted in this crop. The value of cacao exported in 1930 was rs. 2,936,789 and of cinnamon rs. 1,779,983.

The chief imports are rice from British India (including Burma), valued at rs. 70,819,724, and from other countries valued at rs. 4,744,978, and coal and textiles chiefly from the United Kingdom.

#### *Law and Justice.*

The basis of the law is the Roman-Dutch law, much modified by the introduction of English law and by Colonial ordinances. Kandyan law and Muslim law also prevail among Kandyan and Muslims respectively. The criminal law has been codified on the model of the Indian Penal Code, and the codification of the law of Criminal and Civil procedure respectively has been completed.

Justice is administered by the Supreme Court, which has an original criminal jurisdiction and decides appeals from the inferior Courts both in civil and criminal cases; by the Police Courts and Courts of Requests, which dispose, respectively, of minor criminal and civil suits; and by the District Courts, which have a criminal jurisdiction intermediate between that of the Supreme Court and the Police Courts, and a civil jurisdiction in all cases. In addition to these there are the Gansabawas, Village Councils, and Village Tribunals, instituted under the Ordinance No. 9 of 1924, with powers to deal with petty offences and trifling claims. They have worked well and are thoroughly adapted to the genius of the people. Besides settling a considerable amount of litigation, they have provided a valuable machinery for carrying out local improvements. They are empowered to make rules, subject to the approval of the Governor in Council, relating to their village economy, and it is noticeable that in many instances they have not only voluntarily provided school buildings and undertaken the cost of the current expenses and repairs, but have made elementary education compulsory.

#### *Education.*

Satisfactory progress is being made in education. The number of scholars in Government schools at the end of 1930 was 220,431, in assisted schools 321,176, and in unaided schools 30,638.

The total expenditure on account of the Education Department in 1929-30 was rs. 12,050,689.40. In 1868, the number of scholars was only 6,897, and the expenditure rs. 161,660. The improvement is due to the institution of a Department of Education and the adoption of a system under which the educational wants of the Island are met partly by Government, partly by schools receiving grants in aid from Government. The Government schools are all unsectarian, and no fee is charged for vernacular education; fees are charged for English teaching.

The only Secondary School entirely supported by Government is the Royal College, but there are numerous and excellent Grant-in-aid Secondary Schools. Seven Government scholarships, each of 300l. per annum, five for two years and two for three years, with outfit allowances of rs. 750 each and free passages, are awarded annually, on the results of the B.A. and B.Sc. Examinations of the University of London, to enable the best seven students of the year to complete their education at English universities.

Industrial education is provided in 75 Government and Grant-in-aid Schools and in a number of Orphanages. A central Technical College was founded in Colombo in 1893; its title has since been changed to "Government Technical School."

A University College opened in Colombo in 1921, offers instruction in the following subjects:—English Language and Literature, Classics and Philosophy, Modern History and Economics, Physics, Chemistry, Mathematics, Sanskrit and Pali, Tamil, Sinhalese, Modern Languages, Botany, Zoology, Geography. Students are presented for the External Examinations, Pass and Honours, of the University of London.

A Government Training College for Masters and Mistresses in English Schools and Government Vernacular Schools was opened in 1903.

#### *Medical Institutions.*

*Medical College.*—The Ceylon Medical College was founded in 1870 to provide a course of Medical training for the Ceylonese. The curriculum is a full five years' course, and since 1887 the Licence of the College has been recognised by the General Medical Council as a registrable Colonial qualification. The courses of instruction and examinations are also recognised by many of the British Examining Boards. The licence has been conferred upon 498 candidates since the College was opened; of recent years about 18 qualify annually.

There is a Junior or Apothecary Department in which students go through a two years' course, and after passing the prescribed examinations are qualified to serve as Apothecaries and Estate Dispensers.

The College has a staff of over 30 lecturers and is managed by a Council incorporated by law.

There are at present about 200 students.

Owing to changes introduced by the Medical Council of Great Britain, the preliminary subjects, Physics, Chemistry and Biology, are now pre-medical subjects, and arrangements have been made for these to be studied at the University College. Students must pass an examination in these subjects before they can be admitted to the Medical College for their purely medical studies.

The Medical College fees amounted to rs. 60,343.60 in 1930-31.

There are 93 Government general hospitals providing 7,603 beds, with varying accommodation from 8 beds in smaller outstations to 912 beds in the General Hospital, Colombo.

There are in addition a number of special hospitals, viz., a lying-in-home with 83 beds, an eye hospital (with 56 beds) with an ear, nose and throat clinic attached, a women's hospital with 45 beds, a children's hospital with 82 beds, a women's venereal hospital with 29 beds, a police hospital with 32 beds, a tuberculosis hospital for chronic cases with 349 beds, a tuberculosis sanatorium with 72 beds, an infectious diseases hospital with 168 beds, a lunatic asylum and House of Observation with 1,830 beds, a prison hospital, Colombo, with 192 beds, and 8 other prison hospitals providing 149 beds, two leper asylums, one with 508 beds at Hendala (near Colombo), and the other with 176 beds at Mantivu, Eastern Province.

Eighty-eight estate hospitals and 715 estate dispensaries are maintained by proprietors of estates.

There were 595 Government dispensaries in different parts of the Island in 1930, and 3,810,010 patients who paid 5,815,125 visits were treated at these dispensaries.

There are a bacteriological, a pasteur, a dental, and an anti-tuberculosis Institute, and a vaccine establishment. A division of sanitary engineering

and a division of health education are recent developments. Campaigns are carried on against malaria, ankylostomiasis and parangi. Estate sanitation is looked after by six inspecting medical officers. Seven health units have been established since 1926 and health work on intensive lines is carried on at those centres. School hygiene work is carried out throughout the Island by five school medical officers.

In the Department of Medical and Sanitary Services are 321 medical officers, of whom 200 possess British qualifications, 29 medical officers of health, 394 apothecaries, and 254 sanitary inspectors. There are three institutions where nurses are trained. The nursing staff of the Department consists of 39 European qualified matrons and sisters, 116 European Roman Catholic mothers and sisters, 398 matrons and nurses trained locally, and pupils in training.

The cost of working the department amounted in 1929-30 to rs. 10,669,279-01. The receipts, which included the cost of maintenance of paying patients, sale of medicines, etc., amounted to rs. 848,412-36 for 1929-30. The expenditure on account of estate medical aid was rs. 1,236,111-27 for 1929-30. The export duty levied for the purpose of meeting the expense of providing Medical aid to estates under the Medical Warrants Ordinance No. 9 of 1912 amounted to rs. 1,715,756-19 for 1929-30.

#### *Currency and Banking.*

The weights and measures in common use are British.

Accounts are kept in rupees, and the money in circulation is Indian and Ceylon rupee currency, sovereigns having ceased to be legal tender in the Colony in 1920. Ceylon cents take the place of the Indian annas and pice. The notes of the Chartered Mercantile Bank remained in circulation to some extent until 1888, when its charter expired, but since the failure of the Oriental Banking Corporation in 1884, the Government has instituted a note-issue of which the amount in circulation on the 31st December, 1930, was rs. 57,209,324. These notes are legal tender except at the Colombo Issue Office.

The following banks have establishments in the Colony: Mercantile Bank of India, Limited; Chartered Bank of India, Australia, and China; Hong Kong and Shanghai Banking Corporation; Imperial Bank of India; National Bank of India, Limited; Eastern Bank, Limited; P. & O. Banking Corporation, Ltd. None of these issues notes in Ceylon.

The Ceylon Savings Bank was established in 1832, and Post Office savings banks were opened in 1885. On 31st December, 1930, the deposits were: Ceylon Savings Bank, rs. 7,872,555; Post Office Savings Bank, rs. 12,262,136.

#### *The Colombo Harbour.*

The Colombo Port Commission was established in 1913 to administer the affairs of the Port of Colombo. The Commission is responsible for the efficient working of the Port, and has powers of executive action and initiative. It is composed of seven official members, seven unofficial members, and a secretary. The official members are the Principal Collector of Customs (Chairman), the Director of Medical and Sanitary Services, the General Manager of the Railway, the Chairman, Municipal Council, and Mayor of Colombo, the Deputy Collector of Customs, Colombo, the Master Attendant, Colombo and Galle, and the Harbour Engineer. Six of the unofficial members are nominated by the Ceylon Chamber of Commerce, and the seventh (representative of the Ceylonee and Indian interests of the Port) by the Governor.

The Harbour Works consist of three breakwaters. *The South-West*, completed in 1885 at a cost of 658,409l. is 4,212 feet long, and runs from the shore in a direction North by East. It is built of concrete blocks weighing from 18 to 30 tons, set in what is known as the sloping block system.

*The North-East and North-West breakwaters* were completed in 1906, at a total cost of 531,657l. The North-East breakwater is a rubble embankment 1,100 feet long, tipped from a staging.

The North-West breakwater is an island work, 2,670 feet in length, running between the two shore breakwaters, leaving a western entrance of 750 feet, and a northern entrance of 700 feet. This breakwater is of similar construction to the South-West arm.

These three breakwaters enclose an area of 643 acres, or one square mile.

An extension of the S.W. breakwater, starting from a point 3,150 feet from the shore end, was commenced in December, 1907, and completed in April, 1912. The arm is 1,800 feet long, and runs in a direction almost due north, protecting the present main entrance from the S.W. Monsoon seas. The cost of this additional arm was 338,931l.

*The Graving Dock.* A Graving Dock was completed in 1906. It is 723 feet long, 85 feet wide at the entrance, and has a depth over the sill of 30 feet at low water. Its cost was 465,756l. There is also a guide pier, 800 feet long, to assist vessels entering the dock. The dock has its own electric light installation. The docking of ships can be carried out by day or night.

*The Patent Slip* was opened in 1903, the cost being 42,300l. It is 800 feet long, the cradle being 220 feet, and is capable of dealing with vessels up to 1,200 tons dead weight.

*Oil Facilities.* The Oil Installations Depot, which is about 92 acres in extent, lies 3½ miles inland from the harbour front. The Oil Companies' storage tanks are situated within this area, with pipe line connection from the harbour for fuel oil, kerosene, and benzine imported in bulk. There is also a Measuring Tanks Depot (about 19 acres in extent) at Bloemendaal, about three-quarters of a mile from the Harbour. Three reinforced concrete jetties, two for bunkering purposes and one for the discharge of oil tankers, have been provided. The Outer Bunkering Jetty can accommodate vessels of 500 feet in length with a draught of 27 feet; the Inner Bunkering Jetty is available for barges. The Discharge Jetty can accommodate vessels 500 feet in length with a draught of 27 feet. The expenditure on the oil scheme up to 30th September, 1930, was rs. 5,026,906.

*The Coalging Depot* consists of 25 acres of land, reclaimed from the sea, with a frontage of 2,200 feet, from which 17 jetties project into the harbour for the landing, stacking, and shipping of coal. The total cost of this depot was 158,433l.

The total cost of the Reclamation and Jetties amounts to 214,227l.

*The Fishery Harbour* is to the northward of Colombo harbour for the use of the fishermen as a beaching ground. The fishery harbour consists of a rubble breakwater running out from the shore in a curve for 800 feet, the sheltered part forming a natural beaching ground for fishing canoes. The cost was 11,507l.

The total expenditure on the Colombo harbour from 1873, when work in connection with the first breakwater was commenced, to 1913, when the Colombo Port Commission assumed control of the harbour, was rs. 44,790,367, or 2,966,018l., taking the value of the rupee at ls. 4d.

In the period 1913 to 1930 a sum of rs. 39,474,251 or 2,631,617l., has been spent on various development and maintenance works by the Colombo Port Commission and a sum of rs. 2,603,045 or 173,536l. by

the Public Works Department, making a total of rs. 42,077,296 or 2,805,153. In addition to the above expenditure a sum of rs. 660,062 or 44,004. was charged to Loan Funds during the period 1922-1926, in connection with the dredging of the Colombo Harbour (including rock excavation). Prior to 1st October, 1922, this expenditure was met from Revenue, and is included in the sum of rs. 42,077,296 or 2,805,153. mentioned above.

Since the Colombo Port Commission assumed control of the Port, many improvements have been carried out, and shore facilities much increased. The warehouse accommodation in 1913 was 291,600 sq. ft., and this has been increased to 592,476 sq. ft.; similarly the quays for lighters has been increased from 4,645 lineal ft. to 14,043 lineal feet, including 1,278 lineal feet at the Lake to Harbour Canal Quay.

Dredging for deepening the harbour has been steadily carried out, and, of the 643 acres low water area of the harbour, 186 acres are now dredged to 36 feet and over, 102 acres to between 36 and 33 feet, 147 acres to between 33 and 30 feet, and 206 acres have a depth of less than 30 feet; berthing accommodation exclusive of the Graving Dock Guide Pier and Oil Jetties being available for 36 vessels in the north-east monsoon and for 23, or, if packed berths are used, 40, vessels in the south-west monsoon, six of which berths in either monsoon are available for vessels of draughts up to 33 feet.

A scheme for the development of the Colombo Lake and its connection to the Harbour was completed in 1925 at a total cost of rs. 9,206,490. The total capital expenditure on the Lake Scheme up to September, 1930, was rs. 10,048,032. The connection to the Harbour was taken over by the Colombo Port Commission in 1922, and the areas on both sides developed for the landing of import cargoes.

The maintenance of the waterways and quay walls of the Colombo Lake up to and including the operation of the San Sebastian Canal Locks and pumping plant has now been taken over, and it is hoped that this will lead to further development of its resources.

#### Colombo Water Supply.

The Colombo Water supply is obtained from Labugama Reservoir which is situated in the Western Province, at a distance of 28½ miles from the City.

The Reservoir was formed by impounding the water of the Wak-Oya, a tributary of the Kelani Ganga.

The Catchment area, which is 2,500 acres in extent, is free from any habitation or cultivation, all the land to the summit of the water shed having been reserved together with a strip two chains in depth along the adjacent water sheds.

The area of the reservoir at present top water level is 205 acres. This lake, the scenery of which is very charming, is 373 feet above sea level and has a maximum depth of 70 feet.

The storage capacity of the reservoir is 1,900 million gallons.

Filtration works of the "Jewell Gravity" type are situated immediately below the Reservoir Dam.

The water has a very low alkalinity and is remarkably pure. It is conveyed to the two service Reservoirs in Colombo through three separate pipe lines; two of these are of cast iron each 20 inches in diameter, and the other of steel 30 inches in diameter.

The 20-inch supply main was duplicated between Wellampitiya and Elie House Reservoir (a distance of 4 miles) during the latter part of 1930.

There are some 250 miles of supply and distribution mains, varying in size from 30 to 3 inches in diameter. Water service is available to all premises within the City and also to shipping in Colombo Harbour.

(c)

68 Deacon metres for the detection of waste have been fixed throughout the City.

The average daily consumption is 11 million gallons, or 36 gallons per head of population.

#### Railways.

The lines of railway, all of which are owned and worked by the Government, are distributed thus:—*Broad Gauge* (5ft. 6 in.), Colombo to Badulla (181½ miles), Polgahawela to Kankesanurai (21½ miles), Peradeniya Junction to Kandy and Matale (21½ miles), Ragama Junction to Mahara Quarry (1½ miles), Colombo to Matara (98½ miles), Ragama to Puttalam (74½ miles), Maho to Batticaloa (132 miles), Galle to Trincomalee (43½ miles), Madawachi to Talaimannar Pier (66 miles), Kolonnawa Oil Line and Harbour Branch (3½ miles). *Narrow Gauge* (2ft. 6 in.), Colombo Fort to Yatiyantota (49½ miles), Avissawella to Opanaika (48½ miles), Nanu Oya to Ragalla (19½ miles). *Total Mileage* 951 miles. The total cost of construction up to 30th September, 1930, charged in account was rs. 220,622,956. The receipts for the 12 months ended 30th September, 1930, were rs. 29,650,683, and expenditure rs. 25,065,120.

By the completion of the Talaimannar extension the railway systems of India and Ceylon were brought within 20 miles of one another, the intervening distance being covered by steamers of the South Indian Railway Co., which ply between Dhannakodi (the Indian Port) and Talaimannar (the Ceylon Port). The other extensions are for the better transport of planting produce (tea, rubber, coconuts, etc.).

#### Roads.

Of metalled roads there are 4,130 miles; gravelled and natural roads, 503 and 132 miles respectively. The maintenance of 4,765 miles of road cost, in 1930, rs. 7,287,350 or an average rate of rs. 1,529 per mile. This is exclusive of roads within municipal limits, and of minor roads which are not in the charge of the Department of Public Works.

#### Telephones.

The Government Telephone System comprises two exchanges at Colombo, viz., Central Exchange (2,848 subscribers) and Havelock Town Exchange (384 subscribers) in trunk communication with exchanges at Kandy (195 subscribers), Nuwara Eliya (146 subscribers), Galle (106 subscribers) and 179 smaller exchanges and call offices. There are, in addition, 73 licensed private systems of various sizes, several of which are connected by means of junction lines and subsidiary trunks with one another and the main trunk lines. The mileage of telephone wire in the Government system at the end of 1930 was estimated at 12,220\* (aerial) and 31,632 (underground).

#### Telegraphs.

Nearly all parts of the island are served by the Government telegraph system, which has 296 offices working, inclusive of Railway offices open for postal telegrams. The system comprises 3,472 miles of line and 9,186½ miles of wire. Ceylon is in direct telegraphic communication with India by a cable which starts from Talaimannar and crosses the Pamban Channel. It is also connected with Europe by direct cables from Colombo to Aden and with the Far East and Australia by direct cables to Penang.

There is a Government Radio Station in Colombo equipped for Continuous Wave and Interrupted Continuous Wave telegraphic services, and also for telephony.

\* Mileage of Trunk and Junction lines is included in this figure.

† Mileage of Trunk and Junction lines is included under telephone wire (aerial).

The Continuous Wave service is conducted on a wave length of 2,300 metres with a normal daylight range of 1,000 miles.

The Interrupted Continuous Wave Service is conducted on the 600 metre wave length, and has a normal daylight range of 500 miles.

The telephonic equipment is for providing a broadcasting service on a wavelength of 428.5 metres. The rating of the set for telephony is 2 kilowatts. The number of licence holders at the end of August, 1931, was 1,258.

#### *Postal and Shipping Communications.*

1. There is a regular fortnightly mail service between London and Colombo by the P. & O. steamers continuing to Australia. There is also a regular fortnightly mail service by the Orient line steamers continuing to Australia, except from April to September, when it is monthly. The Aberdeen and Dominion line provides a monthly service from Colombo to Australia.

2. There are also fortnightly services by the P. & O. line between London and Japan, and London and Australia, via Colombo. There is also a fortnightly service by the Orient line between London and Australia, via Colombo, except from April to September, when it is monthly.

A direct weekly mail service from London to Australia, and vice versa, from April to September has been made possible by the P. & O. branch line of steamers being utilized during this period.

The regular weekly mails despatched by the P. & O. and Orient Line mail steamers connect with the Australian Air Mail Services.

3. The M.M. Co. runs a fortnightly mail service between Marseilles and the Straits and Japan, via Colombo.
